The ACTING PRESIDENT pro tempore. Under the previous order, the

Senate will now resume consideration of the unfinished business, S. 897, which the clerk will state by title.

The assistant legislative clerk read as follows:

A bill (S. 897) to strengthen United States policies on non-proliferation and to recognize certain export functions of the Federal Government and to promote more efficient administration of such functions.

The Senate resumed the consideration of the bill.

The ACTING PRESIDENT pro tempore. Time for debate on the bill is limited to 4 hours, to be equally divided and controlled by the Senator from Ohio (Mr. GLENN) and the Senator from Illinois (Mr. PERCY), with 1 hour on any amendment in the first degree, 30 minutes on any amendment in the second degree, and with 20 minutes on any debatable motion, appeal, or point of order.

Who yields time?

Mr. GLENN. Mr. President, the Senator from Idaho was on the floor a few moments ago. I presume he is ready to address amendments to the bill.

Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

AMENDMENT NO. 1589

Mr. McCLURE. Mr. President, I call up amendment No. 1589.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an amendment numbered 1589.

Mr. McCLURE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 115, line 12, after the period insert "Such procedures shall include at a minimum the procedural details including time limitations comparable to those of Executive Order 11902, February 2, 1976. The processing of any subsequent arrangement proposed and filed as of October 3, 1977, shall not be delayed pending the development and establishment of procedures to implement the requirements of this section.".

Mr. McCLURE. Mr. President, this amendment is relatively simple. It has the effect of amending section 302 of the bill to require the administration to prepare specific procedures for the regulation under section 302. The amendment would require these procedures to include details comparable to Executive Order 11902, dated February 2, 1976.

The amendment also would grandfather subsequent arrangements which were proposed and filed as of October 3, 1977.

The purpose of the amendment is to provide some kind of procedural certainty and predictability for any licensing applicant. The Executive Order to which it makes reference did carry specific, step-by-step processes with deadlines and clear indication of who the responsible officials in the various involved agencies were for each step and each procedure. My amendment incorporates that requirement for similar procedural details. It does not require identical but requires similar procedural details, to be spelled out by referring to the Executive Order.

The administration, in its January 26 letter to Senator CHURCH, raised some question concerning the technical difficulty of a statute referring to an Executive Order. They recommended that the amendment should be modified to reflect that concern on their part. I understand that they have communicated that not only to Senator CHURCH but also to the floor managers of the bill.

I hope we can agree on a formulation to include the modifications which the administration asks to carry forward the purpose of this amendment without the objection to which they refer.

I yield to the Senator from Ohio to see if that is correct.

Mr. GLENN. Mr. President, in response to the administration's request that we not refer to an executive order directly, this substitute does flesh out the procedures which are comparable to those set forth in Executive Order 11902 and which have been agreed upon by the floor managers and by the distinguished Senator from Idaho (Mr. McCLURE).

This amendment also insures that while the substantive approval provisions of the section will become effective immediately upon enactment, there will be no delay while the specific interagency procedures are being developed.

So I am glad to accept the amendment proposed by the Senator from Idaho.

Mr. McCLURE. Mr. President, I understand there is an unprinted modification which I believe the majority staff has. I ask unanimous consent that the printed amendment be modified to include the agreed-upon formulation and the procedural detail as included in the unprinted amendment, which will be sent to the desk.

The ACTING PRESIDENT pro tempore. The Senator has a right to modify his amendment, and it will be so modified.

Mr. GLENN. Mr. President, I say to the Senator from Idaho that we do have a copy of the changes he refers to, and those also are acceptable to the floor manager on this side.

Mr. PERCY. Mr. President, I know of no objection on this side.

The ACTING PRESIDENT pro tempore. Will the Senator send the modification to the desk?

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GLENN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. GLENN. Mr. President, I send to the desk an amendment to the amendment of the Senator from Idaho.

The ACTING PRESIDENT pro tempore. Is this the modification?

Mr. GLENN. This is the modification.

The modified amendment is as follows:

On page 115, line 10, insert a period after "Defense", delete all that appears thereafter through "provision." on line 12, and insert in lieu thereof the following: "The Secretary of Energy shall, within ninety days after the enactment of this section, establish orderly and expeditious procedures, including provision for necessary administrative actions and interagency memoranda of understanding, which are mutually agreeable to the Secretaries of State, Defense, and Commerce, the Director of the Arms Control and Disarmament Agency, and the Nuclear Regulatory Commission for the consideration of requests for authorization under this section. Such procedures shall include, at a minimum, explicit direction on the handling of such requests, express deadlines for the solicitation and collection of the views of the consulted agencies (with identified officials responsible for meeting such deadlines), an interagency coordinating authority to monitor the processing of such requests, predetermined procedures for the expeditious handling of intra-agency and interagency disagreements and appeals to higher authorities, frequent meetings of interagency administrative cordinators to review the status of all pending requests, and similar administrative mechanisms. To the extent practicable, an applicant should be advised of all the information required of the applicant for the entire process for every agency's needs at the beginning of the process. Potentially controversial requests should be identified as quickly as possible so that any required policy decisions or diplomatic consultations can be initiated in a timely manner. An immediate effort should be undertaken to establish quickly any necessary standards and criteria, including the nature of any required assurances or evidentiary showings, for the decision required under this section. The processing of any request proposed and filed as of the date of enactment of this Act shall not be delayed pending the development and establishment of procedures to implement the requirements of this section."

The ACTING PRESIDENT pro tempore. Do Senators yield back their time?

Mr. GLENN. I yield back the remainder of my time.

Mr. McCLURE. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified.

The amendment, as modified, was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1597

Mr. McCLURE. Mr. President, I call up amendment No. 1597 and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. PAUL G. HATFIELD). The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes amendment No. 1597.

Mr. McCLURE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 121, line 2, after the period insert "The Secretary of State within ninety days after the enactment of this section shall establish orderly and expeditious procedures for the preparation of the executive branch judgment which are mutually agreeable to the Secretary of Energy, the Secretary of Defense, and the Director of the Arms Control and Disarmament Agency. Such procedures shall include at a minimum procedural details, including time limitations comparable to those of Executive Order 11902, February 2, 1976.".

Mr. McCLURE. Mr. President, this amendment would require the executive branch to formulate mutually agreeable procedures for the coordination mandated in section 304 in the preparation of executive branch judgments for export licenses.

The bill requires a number of separate departments, agencies, and groups within the executive branch to take certain actions with regard to export licenses, but there is nothing in the bill as such which mandates the procedures which would coordinate their activities and, therefore, there is the great opportunity, perhaps the great likelihood for a very, very long time process within the executive agencies as they separately take the actions required by the statute.

This amendment would mandate that the procedures for coordination be spelled out so that there be a minimum of time delay and a maximum of predictability in the interagency processing of export licenses under the procedures of section 304.

The administration in the State Department's letter of January 26 commented that the reference to the Executive Order might lead to difficulties, as was mentioned on the last amendment, and the concern expressed there and the solution is identical in this amendment.

As I understand, the floor managers of the bill do have some suggested modifications in line with the administration's request.

Mr. GLENN. Mr. President, the Senator from Idaho is correct.

UP AMENDMENT NO. 1177

I send to the desk an unprinted substitute for amendment No. 1597 and ask for its immediate consideration.

The PRESIDING OFFICER. The Senator will need unanimous consent so that the amendment may be in order at this time.

Mr. GLENN. Mr. President, I ask unanimous consent for consideration of this substitute for the amendment of the Senator from Idaho.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN) proposes a substitute amendment to amendment No. 1597, an unprinted amendment numbered 1177.

Mr. GLENN. Mr. President, I ask unanimous consent that the reading of the substitute amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment is as follows:

On page 121, line 2, after the period insert the following: "The Secretary of State shall, within ninety days after the enactment of this section, establish orderly and expeditious procedures, including provision for necessary administrative actions and interagency memoranda of understanding, which are mutually agreeable to the Secretaries of Energy, Defense, and Commerce, the Director of the Arms Control and Disarmament Agency, and the Nuclear Regulatory Commission for the preparation of the Executive Branch judgment on export application under this section. Such procedures shall include, at a minimum, explicit direction on the handling of such applications, express deadlines for the solicitation and collection of the views of the consulted agencies (with identified officials responsible for meeting such deadlines), an interagency coordinating authority to monitor the processing of such applications, predetermined procedures for the expeditious handling of intra-agency and inter-agency disagreements and appeals to higher authorities, frequent meetings of interagency administrative coordinators to review the status of all pending applications, and similar administrative mechanisms. To the extent practicable, an applicant should be advised of all the information required of the applicant for the entire process for every agency's needs at the beginning of the process. Potentially controversial applications should be identified as quickly as possible so that any required policy decisions or diplomatic consultations can be initiated in a timely manner. An immediate effort should be undertaken to establish quickly any necessary standards and criteria, including the nature of any required assurances or evidentiary showings, for the decisions required under this section. The processing of any export application proposed and filed as of the date of enactment of this Act shall not be delayed pending the development and establishment of procedures to implement the requirements of this section."

Mr. GLENN. Mr. President, in response to the administration's request that we not refer to an executive order directly, this substitute does flesh out the procedures which are comparable to those set forth in executive order 11902 and which have been agreed upon by the floor managers and by the Senator from Idaho, Senator McCLURE.

This amendment also insures that while the substantive approval provisions of the section will become effective immediately upon enactment their will be no delay while the specific interagency procedures are being developed.

I understand that this substitute is acceptable to the Senator from Idaho.

Mr. McCLURE. I say to the Senator from Ohio that the substitute is acceptable, and I join in his request that it be adopted.

Mr. GLENN. Mr. President, I yield back all of my remaining time on this substitute amendment.

Mr. McCLURE. I yield back all my remaining time.

The PRESIDING OFFICER. The question then is on agreeing to the substitute amendment.

The substitute amendment was agreed to.

Mr. McCLURE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. McCLURE. Does the procedure require the adoption of the substitute and than adoption of the amendment as amended?

The PRESIDING OFFICER. The Senator from Idaho is correct.

Mr. GLENN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. GLENN. Was the vote announced on that substitute to the amendment?

The PRESIDING OFFICER. The vote was announced on the substitute.

Mr. GLENN. All right.

Mr. President, I move to reconsider the vote by which the substitute amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, does the question now occur upon the amendment as amended?

The PRESIDING OFFICER. If Senators yield back their time, the question will occur on the amendment.

Mr. McCLURE. Mr. President, I yield back the remainder of my time.

Mr. GLENN. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment as amended.

The amendment, as amended, was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment, as amended, was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1594

Mr. McCLURE. Mr. President, I call up amendment No. 1594 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes amendment No. 1594.

Mr. McCLURE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 120, after line 6, insert the following new subsection (c).

(c) The Secretary of Energy within not more than ninety days after the enactment of this section shall establish orderly and expeditious procedures which are mutually agreeable to the Secretary of State, the Secretary of Defense, the Director of the Arms Control and Disarmament Agency, and the Nuclear Regulatory Commission for making the determinations and notifications required by this section. Such procedures shall include at a minimum procedural details, including time limitations comparable to those of Executive Order 11902, February 2, 1976. Further, such procedures shall specify that the Director must declare within five days of the receipt of a copy of a proposed subsequent arrangement whether he intends to

prepare a Nuclear Proliferation Assessment Statement, and if he intends to prepare such statement an additional thirty days to do so, unless pursuant to the Director's request, the President formally waives the thirty-day requirement and notifies the Committee on International Relations of the House of Representatives and the Committee on Foreign Relations of the Senate of such waiver and the justifications therefor.

Mr. McCLURE. Mr. President, this amendment would modify section 303 of the bill to specify the procedures for interagency coordination on approval of subsequent arrangements.

The amendment requires procedures which are comparable to those of Executive Order 11902, February 2, 1976.

Additionally, the amendment establishes a specific procedure for the Director of the Arms Control and Disarmament Agency in the timing of his decisions and preparation of a nuclear proliferation assessment statement.

These procedures will insure that the statutory authority granted to the Director cannot be used in a way to delay or stop a pending subsequent arrangement.

The amendment does provide a waiver of the 30-day time requirement in the event that the President grants such a waiver. The intended result of these various requirements will be to insure that subsequent arrangements are handled in an expeditious and procedurally predictable fashion.

Since section 303 in effect delineates the interagency coordination and approval requirements for U.S. Government actions with foreign governments and commercial entities, it is desirable that these coordination procedures provide for timely consideration of the approvals.

The executive branch had two comments on this amendment in its January 26, 1978, letter of the State Department to Senator SPARKMAN. One dealt with reference to the executive order as we have discussed on the last two amendments. The same agreed upon formulation for incorporation in the prior amendments will be used in this amendment.

In addition, the executive branch suggested that the Arms Control and Disarmament Agency may need more time to decide whether or not it will prepare a nuclear proliferation assessment statement, more time than is provided in the printed amendment.

I understand that Senator PERCY may have an amendment to make the recommended changes to the printed amendment.

If Senator PERCY has that amendment, perhaps it and the other conforming amendment could be offered at this time.

UP AMENDMENT NO. 1178

Mr. PERCY. Mr. President, I send to the desk an amendment in the form of a substitute to the pending amendment and ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an unprinted amendment numbered 1178 as a substitute to amendment No. 1594.

Mr. PERCY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 120, line 6, after the period insert the following new subsection (c): "(C) The Secretary of Energy shall, within ninety days after the enactment of this section, establish orderly and expeditious procedures, including provision for necessary administrative actions and interagency memoranda of understanding, which are mutually agreeable to the Secretaries of State, Defense, and Commerce, the Director or the Arms Control and Disarmament Agency, and the Nuclear Regulatory Commission for the consideration of requests for subsequent arrangements under this section. Such procedures shall include, at a minimum, explicit direction on the handling of such requests, express deadlines for the solicitation and collection of the views of the consulted agencies (with identified officals responsible for meeting such deadlines), an interagency coordinating authority to monitor the processing of such requests, predetermined procedures for the expeditious handling of intra-agency and inter-agency disagreements and appeals to higher authorities, frequent meetings of interagency administrative coordinators to review the status of all pending requests, and similar administrative mechanisms. To the extent practicable, an applicant should be advised of all the information required of the applicant for the entire process for every agency's needs at the beginning of the process. Potentially controversial requests should be identified as quickly as possible so that any required policy decisions or diplomatic consultations can be initiated in a timely manner. An immediate effort should be undertaken to establish quickly any necessary standards and criteria, including the nature of any required assurances or evidentiary showings, for the decisions required under this section. Further, such procedures shall specify that if he intends to prepare a Nuclear Proliferation Assessment Statement, the Director shall so declare in his response to the Department of Energy. If the Director declares that he intends to prepare such a Statement, he shall do so within sixty days of his receipt of a copy of the proposed subsequent arrangement (during which time the Secretary of Energy may not enter into the subsequent arrangement), unless pursuant to the Director's request, the President waives the sixty day requirement and notifies the Committee of International Relations of the House of Representatives and the Committee on Foreign Relations of the Senate of such waiver and the justification therefor. The processing of any subsequent arrangement proposed and filed as of the date of enactment of this Act shall not be delayed pending the development and establishment of procedures to implement the requirements of this section.

The processing of any request proposed and filed as of the date of enactment of this Act shall not be delayed pending the development and establishment of procedures to implement the requirements of this section."

Mr. PERCY. Mr. President, the reasons for this amendment are very similar to the reasons given by my distinguished colleague, Senator GLENN, on the previous amendment.

In addition, this amendment to the second portion of amendment No. 1594 reflects the administration's concern that the time limits on ACDA preparation of Nuclear Proliferation Assessment statements set forth in amendment No. 1594 as introduced would be inadequate.

Thus it requires ACDA to declare its intentions with respect to the need for a Nuclear Proliferation Assessment Statement when it transmits its views on a subsequent arrangement to DOE, and provides 60 days for preparation of such a Statement unless the President determines that additional time is necessary.

In addition, it provides that the required notice of a proposed subsequent arrangement in the Federal Register will not be made until ACDA has either completed the statement, or failed to complete the statement after all time authorized by the statute and any Presidential waiver has expired.

This might be a good time to ask our distinguished colleague to reaffirm the fact that in working together with him on this bill what we are trying to do is to ensure that adequate procedures will be followed and that the whole spirit and intent of the bill as we have agreed upon heretofore in previous colloquy will be followed.

But if the matters can be expedited in an effort to eliminate undue delay and to set a schedule that can be counted upon, we will remove a great deal of the ambiguity and doubt that previous suppliers have heretofore faced in dealing with the Federal Government.

Mr. McCLURE. I might say to my colleague from Illinois, if he will yield, that I agree with that statement. As I have tried to state in all the proceedings on his matter, we are in agreement on the goals.

My concern, and the concern of many others, have been twofold: One is that——

The PRESIDING OFFICER. The Chair is forced to interrupt. The second part of the amendment is not proper. It amends the section not amended by the prior amendment.

Mr. McCLURE. Mr. President, I thank the Chair for that comment. While we are checking that I might just continue my statement and then, perhaps, we can get some clarification on that matter.

The PRESIDING OFFICER. Very well. The Senator from Idaho.

Mr. McCLURE. I thank the Chair.

There are two concerns I have had. First and fundamentally is that if this procedure is not a workable procedure, instead of the United States being a participant in and a leader of the nonproliferation efforts in the world, that we will, as a matter of fact, have excluded ourselves from that process, and in doing so we will not have enhanced the likelihood of getting a control on the dangers of nuclear proliferation and the dangers of nuclear fuels in improper hands, but we will have increased the danger, if we do not make this bill workable, and if we can make this bill workable then we will have accomplished the goals of the managers of the bill and of the Senator from Idaho in making certain that we have the best possible nonproliferation statute and the best nonproliferation posture to present to the world.

In this latter context the amendment is absolutely necessary, and the Senator from Illinois is totally correct that we must have predictability, that we must have workable timeframes; we must have schedules that can and will be met.

I think this must be a procedure which is spelled out in the statute so that we know not only what those procedures are but that anyone looking at them can know what the procedures are so that they will have confidence in those procedures. But they must also be spelled out in sufficient detail so that they cannot be used by those who have other motives in mind, such as the complete destruction of the nuclear industry and the complete shutdown of United States nuclear supplies.

I know the Senator from Illinois shares that goal. I certainly agree with the statement he has made and, for that reason, I thought it was well that he appropriately did raise that issue with this amendment.

Mr. PERCY. Before responding to my distinguished colleague, I ask unanimous consent that I be permitted to modify the amendment sent forward in the form of a substitute by deleting the amendment on page 116.

The PRESIDING OFFICER. The Senator has the right to modify his amendment and, as so modified, it is so modified.

Mr. PERCY. I thank my colleague for his response. I think it appropriate as we go along in our colloquy today and tomorrow to reaffirm how united we are in intention and how the floor managers of this bill are very anxious to clarify any ambiguity, to set reasonable timeframes for every step that must be made, so that we can reensure and reinforce our position as a reliable supplier, and for this objective to which our distinguished colleague from Idaho is so devoted, we are very grateful indeed.

Mr. GLENN. Mr. President, I think it is well to point out at this time that the procedure we are going through with these amendments does set time limits in which actions have to occur in the licensing process. I rise to point that out because I think it is very, very important.

We are trying to streamline these procedures, not stop our nuclear industry from going ahead. I have had a number of inquiries in my office and by people approaching me that showed a lack of knowledge of what we are trying to do with this bill.

We are not trying to stop our nuclear industry from participating in markets around the world. In fact, we are trying to clarify procedures and to set time limits, which the Senator from Idaho very properly has pointed out that we need. We are happy to accept both of these amendments.

But these do set good limits; 60 days for ACDA, and with the other time provisions we have for the other licensing steps as we go ahead with approval of the licensing request which, I think, substantially helps the bill in that suppliers and buyers will know exactly what they are up against with regard to time. They can set specific time limits then for their negotiations and be assured that the United States will not only be a guaranteed nuclear supplier, but do it on a timely basis. That is the main point.

Mr. McCLURE. Mr. President, will the Senator yield for one other comment?

Mr. GLENN. Certainly.

Mr. McCLURE. There is a third group that is as interested and has to have notice, too, under the procedures under the statute, not only the prospective purchasers and the prospective suppliers, but the people who are opponents to that arrangement, and the amendments then set those timeframes so that anyone interested on either side of those issues knows what the procedures are, knows what the timeframe will be, and that the judgments will be made according to that timeframe.

Mr. GLENN. Mr. President, if the Senator will yield further to me, the procedures in this bill are designed to allow licenses to proceed in timely fashion and the intent is not to use these procedures to hold up licenses for 6 months, or 8 months, or as long as a year, which sometimes has happened, and which probably, has done more to stifle U.S. initiative abroad in the nuclear industry, and discourage prospective buyers of American products, than anything else we have had in our industry.

We are trying to clarify that in this bill, straighten out those procedures, put time limits on them. If anything, it should definitely help American industry abroad.

Mr. McCLURE. I thank the Senator for that comment because, of course, that is exactly the motivation of the Senator from Idaho, and nothing else. It has been characterized by some as an attempt to kill this legislation. My motivation has not been to do that but to do exactly as the Senator from Ohio has stated, to make this bill predictable to people in this country and outside this country so as to know exactly what the policies are, exactly what the procedures will be, exactly what it is, in order to know what they have to meet, and exactly the time frames in which they must meet them.

I think we can then be a reliable partner and we can then, in doing that, exert the maximum possible influence upon the world's nonproliferation concerns.

Mr. GLENN. At the same time put a roadblock in, very definite roadblocks, where it looks like we are having nuclear weapons fabrication as a possible result of our exports. That is the bottom line where we stop right there.

Mr. McCLURE. I agree with the Senator from Ohio.

Mr. PERCY. Mr. President, I feel that the Senator from Ohio has indicated there have been some concerns in the past by nuclear suppliers and the nuclear industry, and they have been very articulately voiced. There have been very genuine concerns which have been expressed individually to us and which have been noted. We have indicated throughout that we are working closely with the Senator from Idaho (Mr. McCLURE) on these matters, who is also concerned. I have noticed an increasing degree of understanding now. Very few questions are now being raised.

At the time I introduced the original bill, I said that it was imperfect, that it could have improvement, but I was submitting to get started, so we could begin the debate.

I have yet to find a member of the nuclear industry, to their credit, that disagrees with our overall objectives and goals. They would be the last ones who would want to be responsible for increasing the level of terror in the world, or placing our security and that of many other countries in jeopardy.

I think, as we move into these amendments, each of them fits into a mosaic that has been very carefully put together to balance out our desire to be a reliable source of supply, but also to fulfill the responsibility we feel we have to ourselves and all the rest of the peoples on the earth.

If no one wishes to speak further, I yield back the remainder of our time on the substitute amendment.

Mr. GLENN. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the substitute amendment of the Senator from Illinois to the amendment of the Senator from Idaho.

The substitute amendment was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. I yield back the time on the amendment, as amended.

Mr. GLENN. I yield back our time on the amendment, as amended.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Idaho, as amended.

The amendment, as amended, was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1179

Mr. McCLURE. Mr. President, I understand that the managers of the bill wish to offer an amendment to the substitute amendment, which will be properly drafted and again put in as an appropriate amendment.

Mr. PERCY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) offers an unprinted amendment numbered 1179:

On page 116, line 7, delete "notice of any such" and insert in lieu thereof the following: "Commission and, whenever the Director declares that he intends to prepare a Nuclear Proliferation Assessment Statement pursuant to paragraph (2) of this subsection, after the receipt by the Secretary of Energy

of such Statement or the expiration of the time authorized for the preparation of such Statement, whichever occurs first, notice of any".

Mr. PERCY. Mr. President, this is a technical amendment to alter the flaw that we found in the preceding amendment.

Mr. McCLURE. Mr. President, I support the amendment.

Mr. GLENN. I yield back our time on the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois.

The amendment was agreed to.

Mr. McCLURE. I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1555

Mr. McCLURE. Mr. President, I call up amendment No. 1555, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated. The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE), for himself and Mr. STONE, proposes an amendment numbered 1555.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 117, line 20, after "to" insert "all".

On page 118, line 2, after "material" insert ", and additionally, to the maximum extent feasible, will attempt to expedite such consideration".

Mr. McCLURE. Mr. President, this amendment redrafts subsection 303(a)(3) of the bill in order to clarify the exact intent with regard to the United States giving timely consideration to foreign requests for prior approvals, where they are required by this act. The reformulation accomplished by the amendment simply makes clear that it is the intent of Congress that the executive branch, in fact, give such timely consideration for the foreign requests for prior approval. It is our understanding that those requests are received by the State Department on a reasonably frequent basis. The requests often are of particular importance to a foreign nation where it is necessary to transfer spent fuel because of the lack of immediately available storage at the reactor site. The amendment, therefore, only clarifies what was intended to be the original intent when this subsection was added in the Foreign Relations Committee markup by Senator STONE.

Mr. President, I yield the floor to the managers of the bill at this point.

Mr. GLENN. Mr. President, I am prepared to accept the amendment by the Senator from Idaho. It basically cleans up some language in the bill and makes it more specific as to what is to be done. I think it is a good amendment, and I am happy to accept it.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. McCLURE. On my time, Mr. President.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I am now informed that one of the amendments adopted on last Thursday by agreement among all parties had the effect of doing exactly the same thing as this amendment, and by inadvertence this one was not subtracted from the list. I ask unanimous consent to withdraw the amendment.

The PRESIDING OFFICER. The Senator has that right. The amendment is withdrawn.

Mr. McCLURE. I thank the Chair.

AMENDMENT NO. 1603

Mr. McCLURE. Mr. President, I call up amendment No. 1603.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an amendment numbered 1603.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 126, after line 21, insert a new subsection to read as follows:

"(d) Within sixty days of the date of enactment of this Act, the Secretary of State shall, in consultation with the Secretary of Energy, the Director and the Commission, promulgate guidelines for adequate physical security measures to be applied to facilities and material referred to in paragraph (a)(3) of section 127 of the 1954 Act. Such guidelines shall be no less stringent than any guidelines contained in or promulgated to any international agreement, including an agreement for cooperation, to which the United States is a party.".

On page 127, after line 26, add a new sentence to read as follows: "Following the effective date of guidelines promulgated pursuant to section 304(d) of the Nuclear Nonproliferation Act of 1977, physical security measures shall be deemed adequate if such measures are in compliance with such guidelines.".

Mr. McCLURE. Mr. President, amendment No. 1603 would modify the criteria dealing with "adequate physical security" for any export license. The adequate physical security criteria was the subject of some concern because it was not clear exactly how the Commission would determine adequacy in the absence of any available guidelines or standards. There was also the concern that the Commission might attempt to adopt a test for adequacy which was solely based on our current domestic guidelines which generally are much more stringent than those that have been internationally agreed to. Consequently, the amendment provided for the establishment of guidelines that would be prepared on an interagency basis to be used in determining whether or not the physical security for an exported facility or fuel would be adequate.

This amendment would make the modification which I regard as necessary to avoid a great deal of potential uncertainty and possible litigaton resulting from the "adequate physical security" test now included in the bill.

I think that the floor managers and I are in agreement that there should not be that lack of certainty and predictability in terms of the statutorily-mandated criteria that must be satisfied before the Commission can approve an export license application. Amendment 1603 would provide for an interagency coordination in the establishment of the guidelines and would insure that the importing country had a clear understanding of its responsibilities under this Act.

The administration, in its January 26, 1978, State Department letter to Senator CHURCH, indicated that the specific formulation of the concept could cause some difficulty because it did not reflect the terminology that has evolved internationally in the consideration of this issue. Consequently, while supporting the general concept of providing for guidelines and predictability in the criteria, the administration suggested a change in language for it. I understand that the floor managers will offer a substitute for amendment 1603 which will incorporate the language recommended by the administration in the State Department letter. The substitute, however, does make one significant change to the administration proposed language. The administration substitute would give the responsibility for guidelines to the Secretary of State with consultation with the Secretary of Energy, the Secretary of Defense, the Director of the Arms Control and Disarmament Agency, and the NRC. I understand that the substitute to be offered will place the NRC in the lead role, with consultation with the Secretary of State and the other agencies. While I personally disagree with this change in the administration's recommendations, since it appears that the establishment of physical security guidelines does have important foreign policy implications in terms of the standards of the importing nations, I will defer to others at this point to offer whatever amendments might be appropriate to return the substitute to the administration recommendation.

While I might have preferred the other, I am certainly not going to resist the substitute which will be offered by the floor managers of the bill.

UP AMENDMENT NO. 1180

Mr. GLENN. Mr. President, I send to the desk a substitute for amendment 1603 and ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER (Mr. Hathaway). Without objection, it is so ordered. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN) proposes a substitute for amendment 1603, numbered UP Amendment 1180.

Mr. GLENN. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 126, in lieu of the language proposed to be inserted, in the following:

"(d) Within sixty days of the date of enactment of this Act, the Commission shall, in consultation with the Secretary of State, the Secretary of Energy, the Secretary of Defense, and the Director, promulgate (and may from time to time amend) regulations establishing the levels of physical security which in its judgment are no less strict than those established by any international guidelines to which the United States subscribes and which in its judgment will provide adequate protection for facilities and material referred to in paragraph (3) of Section 127 of the 1954 Act taking into consideration variations in risks to security as appropriate."

On page 127, in lieu of the matter proposed to be inserted, insert the following:

"Following the effective date of any regulations promulgated by the Commission pursuant to Section 304(d) of the Nuclear Nonproliferation Act of 1978, physical security measures shall be deemed adequate if such measures provide a level of protection equivalent to that required by the applicable regulations.

Mr. GLENN. Mr. President, I understand fully Senator McCLURE's concern for wanting to set up a standard for adequate physical security so that the Nuclear Regulatory Commission and potential licensees will know precisely what standards are to be applied when the NRC makes a judgment that there will be adequate physical security on exported nuclear materials. The question of what constitutes adequate physical security is not, in my view, basically a foreign policy question. Local mores and customs are of little or no concern to terrorists, for example.

The technical expertise needed to set up appropriate guidelines for physical security reside in the Nuclear Regulatory Commission and the Department of Energy. Since the NRC now has the ultimate responsibility for determining whether physical security will be adequate in foreign countries in connection with our nuclear exports, it is then appropriate, in my view, for the Nuclear Regulatory Commission to be given the responsibility of setting up the physical security guidelines. That is what this amendment does.

Of course, the sensitivity of other countries in setting up these guidelines cannot be completely ignored. Accordingly, it is appropriate for the NRC to consult with the State Department in setting up such guidelines; indeed, the NRC should consult other agencies as well, including the Department of Energy, the Department of Defense, and the Arms Control and Disarmament Agency. My amendment, therefore, delineates the appropriate roles to be played by all these agencies.

The substitute also directs that the regulations establishing the levels of physical security for nuclear exports provide for variations in the risks to security which may obtain in particular cases, as appropriate.

Mr. President, I think this is a very important amendment. I am glad that the Senator from Idaho brought this up. One of the most dangerous things that we must beware of was spelled out very, very graphically in the Washington Post of a week ago yesterday, in their excellent writeup on what can happen if a terrorist bomb is set off in the middle of a populated area. They picked four target points in Washington, D.C.—the CIA, the Defense Department, or the Pentagon, the White House, and Andrews Air Force Base—and indicated what would happen if a 15 kt bomb were set off at one of those points by terrorists in possession of plutonium stored for weapons development obtained through a lack of physical security, or by an attack or by getting into one of these plants abroad in which there might be plutonium or highly enriched uranium stored.

What this does is to clearly spell out how and by whom, in the licensing process in this country, the adequacy of physical security of exported nuclear materials and facilities will be judged. So I support the efforts of the Senator from Idaho completely on this. I think the substitute I have proposed to his amendment does spell it out in a manner that is, perhaps, more satisfactory. I offer it for approval.

Mr. PERCY. Will the Senator yield for a comment?

Mr. GLENN. Yes.

Mr. PERCY. I also commend the distinguished Senator for raising this issue. It really goes to the heart of the months of deliberation we put in on the creation of the NRC. We heard expert testimony. What we wanted was no ambiguity and no opportunity for somebody to pass the buck. We wanted the buck to stop someplace when it came to physical security.

We recognized that the Department of State has an interest. They should know; this deals with foreign relations and they should have an input. But they have many other concerns as well. They have to establish relationships to achieve many objectives. We did not want the Department of State, which might have to subordinate one particular aspect of their responsibility to the dominance of another, to take an overriding concern for something other than our principal concern here.

Obviously, the Department of Commerce and the Department of Energy have an interest in this field. The Department of Commerce has an interest, essentially, in building exports. They are in the selling end. They want to keep up the balance of payments. The Department of Energy has another perspective. But, certainly, there should be no misunderstanding that we have to place the responsibility somewhere.

We held hearings, as Senator GLENN knows, just a few days ago on what was happening in airport security around the world. I suppose the Department of Transportation's Secretary Brock Adams could have come in and said, "Well, we are responsible for airport security in this country, but we are not responsible abroad." That is just nonsense. Do Americans travel abroad? Should we not know whether or not, when we arrive at an airport, there are adequate safeguards? What good does it do to have all the safeguards in the world right here in the United States when we travel abroad, as many businessmen, tourists, and people on Government business have to do? They should be able to know that we are doing business with a government that knows something about airport protection.

So, the knowledge that the Department of Transportation had and what they were doing to carry out that responsibility was crucial.

This amendment would preserve the present role of the Nuclear Regulatory Commission as the agency with final authority to set the physical security requirements which would apply to nuclear exports. These requirements will be set in consultation with the other agencies noted in the substitute. NRC has considerable expertise in this area and I believe that the present arrangement, whereby these requirements are set by the independent commission, should be retained.

I commend both the distinguished Senator from Idaho (Mr. McCLURE) for the original amendment and for the substitute that he has indicated he will be willing to accept.

Mr. GLENN. Mr. President, we have other hearings going on in the Senate now in the Governmental Affairs Committee regarding terrorism. In some of our testimony we have, in discussing this with the witnesses, talked about what will happen one of these days when we may have some plutonium or weapons grade material truly missing and then we have a terrorist threat.

If we take that Washington Post article of a week ago and apply that same ground zero to different cities around the country, I think that it perhaps graphically illustrates the problem we are up against.

We did that with some of the smaller cities in Ohio on what the impact would be if we truly had a terrorist attack with a nuclear weapon, if we really have missing plutonium, and if there really is a bomb set to go off, and what could happen if we take that mile-and-a-half circle and the 5-mile area that would receive such devastation if one of these even small nuclear weapons went off over one of our cities.

I am sure if we apply that around the Loop in Chicago the Senator from Illinois could think in his mind's eye of the tragedy, the area, the crater, the numbers of people that would be involved.

We can apply it in Idaho, or, as many of us just conjecture on this, in Columbus, Cleveland, Dayton, and Cincinnati, and what would happen if we take a mile and a half circle out of a central target point that could be a terrorist attack point, and we begin to see when we bring it down to one lone area what a tragedy this would be.

In the Cleveland area, this would go from the city square to Shaker Heights, take out the Republic Steel plant, the center of the city, or the west side. One

single bomb, if plutonium is used, in that area.

In Columbus, a mile and a half is pretty well out towards Bexley, half way to the university, to the freeway, on the west side, down to South Columbus.

It puts more importance on why we are trying to protect against the possibility that terrorists will get nuclear material into their hands.

I dread to think of the day sometime in the future when this may, in fact, occur.

The amendment the Senator from Idaho has offered and for which we have sent up a substitute deals directly with trying to put physical security on shipments and dealings with foreign countries, and to clearly define that so we will, hopefully, never see that day when we have a mushroom shaped cloud over one of our major cities, or anyplace in this country, from a terrorist attack.

Mr. PERCY. If the Senator will yield for a comment, I think, obviously, this bill is not as well known as the Humphrey-Hawkins bill, or something like that. We always tend to defer those things we do not want to think about. But just to say a nuclear terror is unthinkable is really not to think very clearly about the problem.

How many years has our former Vice President, Nelson Rockefeller, tried to alert this country to this particular danger?

We have, certainly, in the subway system in Washington, increased our ability to withstand some attack. But I think every citizen, and the whole nature of this bill and this debate, can help once again focus attention on a problem which is a measure of national security. If another country felt there was no way or alternative other than to strike us and they determined what they could obliterate us and we could not come back, they would be far more likely to do so.

If a terrorist thinks in terms of terrorizing a city, but that city is able to protect itself, then it is not nearly as vulnerable as if it has done nothing, if people have no idea where they would go.

We sit here and talk about a satellite coming down, and the reason the President did not alert the Nation was that he did not want to alarm us because no one in this country would know what to do. They would run around like a bunch of chickens with their heads off. They would not know where a shelter was or what to do to protect themselves. They would not know any procedures.

We go through fire alarms, but we have not, as a country, been through this kind of thing. Other countries have however, and we had better be alert to this particular problem.

One of the early things we did when we moved to Washington was to build a bomb shelter. I think of it as an insurance policy, living in the center of the Nation and in the most important Capital in the world, when we have had a bomb go off a few hundred feet from the place we are sitting in this Capitol Building.

Someday, as the distinguished Senator from Ohio said, it is not unthinkable at all that someone in some city will be held hostage by a terrorist group, that some mad person heading a country is going to use this kind of power.

It is for this reason that we are trying so hard now to close every conceivable gap and loophole, even though the number of Senators on the floor today is an indication that this is hardly a burning issue in everyone's mind. But I think we will thank God we have taken this necessary step someday.

Certainly, I have paid tribute to my distinguished colleague for the months and months of work put in to perfect this bill. This is something that will be an insurance policy for the future.

Mr. McCLURE. Mr. President, the remarks of my colleagues from Ohio and Illinois have covered a number of issues that are of fundamental importance to us. I commend them for doing that because the public needs to understand what problem we are dealing with and also to know some of the limitations we are dealing with.

There are two kinds of threats of nuclear proliferation in the world. One is to all nations that may acquire nuclear weapons capability. The other is the terrorists who might do so, independent of nations.

The terrorist threat is one which is more easily dealt with by safeguards than is the threat of a foreign country developing a nuclear capability. Both need to be dealt with.

The amendment I have offered and for which the substitute is pending deals with the question of how we develop the guidelines that deal with the safeguards question. There is a substantial argument within the administration as to who the lead agency should be and how those matters are dealt with, just as there is a debate raging in the Congress, although quietly, and, as my friend from Illinois has mentioned, among very few.

But the concern I have is not that the Nuclear Regulatory Commission have the lead role in the formulation of guidelines, but the manner in which those guidelines reflect the internal security requirements of foreign governments.

It is a question of whether or not we are going to dictate to them and be perceived by them as dictating to them, or whether or not we provide the means by which we, perhaps less directly but perhaps more effectively, bring them along with us in applying themselves, within their own countries, the safeguards which we think are necessary.

I have no objection to the NRC formulating the guidelines. I have some concerns but no objections. But I will be offering amendments that deal with the second question, of how NRC meets whatever responsibilities are placed upon it.

We are requiring in this instance that we look at very, very sensitive matters within foreign countries, upon which foreign countries must, as a matter of their own security and their own pride, be able to run their own affairs, without direct interference by foreign countries, and they are going to resist to some degree dictation from a foreign country, even the United States.

While I am not as concerned about this amendment as I am about some of the later ones, the issue is raised indirectly by this amendment and by the discussion on it, as to how far the NRC can go or must go in independent review of information given to it by the State Department or the CIA concerning foreign safeguard systems. It is that independent review that is more critically important than the development of the guidelines. NRC does have the expertise in regard to safeguard systems. The State Department does have the expertise in regard to dealing with foreign countries with respect to those issues.

I do not think the State Department should be characterized by anyone as some kind of group of mad executives rushing around the world, trying to proliferate the quantity of nuclear materials without appropriate safeguards or without a sensitive concern for those safeguards.

I think the report of the IAEA, which last year was confessing its difficulties in safeguard arrangements in foreign countries, is a sign of the difficulty. I believe we must continue to work with IAEA to get not unilateral action by ourselves but multilateral action involving all nuclear countries, so that they are involved in the safeguards question, so that they are involved in developing the safeguards guidelines, so that their international security arrangements can be protected, and so that they perceive that their international security arrangements can be protected by what is essentially a domestic process in the United States that is intended to deal with international problems on an international scope.

That is why I say that I can accept the idea that NRC will have the responsibility for developing guidelines much more easily than I can the concept that NRC must have an independent role in ferretting out information internally in foreign countries. We will get to that issue on later amendments.

It seems to me that the London suppliers' guidelines, while they do not go far enough, and the IAEA safeguards, while they are imperfect, need to be strengthened by the role which this bill will play and NRC will play, rather than supplanted totally by the procedures set forth in the proposed legislation.

If the latter occurs, if this, as a matter of fact or in perception, is a total disregard for the London suppliers' guidelines and the efforts under the IAEA, then I think we may well have set the process back rather than setting it forward.

I hope people will look at this legislation, not only in this country but also in other countries, for what it really is—an attempt to get the nuclear industry within the confines of the best possible and appropriate safeguard systems, both in this country and overseas. If they once perceive that this legislation is not intended to do that or, as a matter of fact, will not do that, then they will have a tendency to disregard the United States, its policies, and its suppliers, and will seek other suppliers, under safeguards and

under restrictions far less stringent than we could persuade them to take if, as a matter of fact, we were still dealing with them and negotiating with them.

So it seems to me that our efforts initially, of course, is to do the best possible job we can internally and then to do the best possible job we can to strengthen the IAEA and to strengthen the London suppliers' guidelines, so that the international community accepts, across the board spectrum of suppliers, the guidelines which are most appropriate to accomplish the goal we are after, rather than simply ignoring our policy and our leadership and going an independent route away from the United States.

So I do not oppose the substitute. I express the concern that the NRC, in developing the guidelines, does so with a sensitive concern for the internal security requirements of foreign countries, in which the State Department has perhaps greater expertise, and the need for the security of information upon which the State Department and the CIA can provide advice and guidance in the development of the guidelines. I think that with that concern, NRC can well develop the guidelines, and, if those are done appropriately, can set us on the right course.

Mr. GLENN. Mr. President, the concerns regarding the NRC which the distinguished Senator from Idaho alludes to, I am sure, will be the subject of other discussion later in the day. I would be surprised, in fact, if they were not.

This amendment, though does deal with something very elementary. It is just plain physical security: whether a territorist or other individual can get through the security perimeter surrounding these plants and get into where he can, in fact, obtain material which would be dangerous in weapons formulation or for whatever purpose it is going to be used.

I do not think this provision does as much to address what might govern governments themselves in this situation as it does to deal with the straight physical security around these plants, making them secure from outside breaching of that perimeter.

The Senator indicated some of the other organizations that are working on these complementary problems.

The IAEA report is indeed of concern to everyone. What we have seen so far, of course, are just press reports of what perhaps is in the IAEA report. I must say that I am somewhat encouraged by the fact that IAEA had the good sense to go ahead and analyze their situation and very forthrightly, apparently according to the press reports put down on paper where they see their own weaknesses, so that we can help them do something about it. IAEA may not be perfect, but it is all we have. I want to see it become stronger and better able to do its job than it is now doing.

Mr. McCLURE. Mr. President, will the Senator yield on that point?

Mr. GLENN. I yield.

Mr. McCLURE. I think the fact that IAEA did take that action was the result of prodding from this Government. I would not characterize the other nations that are involved in IAEA as being unconcerned, but I know that this Government did urge this look. I am sure that the press for this legislation and the statements by the President on nonproliferation also have caused IAEA to take a look at its own procedures. I am encouraged by the fact that they felt, either by necessity or by desire, that they had the wisdom to make this statement publicly, so that the world's public can see what the concerns are and what the limitations are.

We, of course, also on the part of our Government have launched the international nuclear fuel cycle evaluation, which will be ongoing for the next several months and probably we will not see a report on that until in 1979.

But that report is an important part of the ongoing international inquiry as to what can be done to reduce the dangers to which we all address ourselves and about which we are all concerned.

Without belaboring the point on this amendment, though, let me say to my friend from Ohio, that basic simple security arrangements can also become highly technical closely held internal security matters.

Imagine a foreign government being required to come before our Nuclear Regulatory Commission to give details of the security arrangements around their nuclear weapons factory or installation for the security of nuclear weapons that may be stored. Even our own Government will not do that.

We cannot require other governments to do what we in our wisdom in our own country will not do, and that is the reason why basic simple security becomes a basic complex security question.

NRC is not necessarily suited under the statutory framework thus far developed to carry out that role in ways which will have the confidence of our country let alone other countries.

The PRESIDING OFFICER. All the time on the substitute amendment has expired.

Mr. GLENN. Very well. I am prepared to vote on the substitute to the amendment.

The PRESIDING OFFICER. The question is on agreeing to the substitute amendment.

The substitute amendment was agreed to.

Mr. GLENN. Mr. President, I move to reconsider the vote by which the substitute amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GLENN. I yield back time on the amendment.

Mr. McCLURE. I yield back time on the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment as amended.

The amendment, as amended, was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1601

Mr. McCLURE. Mr. President, I call up printed amendment No. 1601 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an amendment numbered 1601.

Mr. McCLURE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 125, line 10, strike the period, and insert in lieu thereof.": *And provided further*, That the procedures established pursuant to this section shall provide that the Commission shall immediately initiate review of any application for a license under this section and to the maximum extent feasible shall expeditiously process the application concurrently with the executive branch review, while awaiting the final executive branch judgment. In initiating its review, the Commission may identify a set of concerns and requests for information associated with the projected issuance of such license and shall transmit such concerns and requests to the executive branch which shall address such concerns in its written communications with the Commission. Such procedures also shall provide that if the Commission has not completed action on the application within sixty days after receipt of an executive branch judgment that the proposed export or exemption is not inimical to the common defense and security or that any export in the category to which the proposed export belongs would not be inimical to the common defense and security because it lacks significance for nuclear explosive purposes and, if action has not been completed by the end of the sixty days, the Commission must formally provide the applicant with an explanation of the need for further time, including a description of any remaining issues to be considered. If the Commission has not completed action by the end of an additional sixty days (a total of one hundred and twenty days from receipt of the executive branch judgment), the President may, upon a finding that further delay would be excessive and upon making the findings which would otherwise have been required of the Commission or, if he is unable to make those findings, upon a finding that withholding the proposed export would be seriously prejudicial to the achievement of the United States non-proliferation objectives or would otherwise jeopardize the common defense and security, he may declare by Executive order that such application is approved, subject to the Congressional review procedures set forth in the immediately preceding proviso.".

Mr. McCLURE. Mr. President, this amendment has several important elements that are intended to streamline the procedures under the new export licensing procedures in section 304.

First, the amendment would direct the Nuclear Regulatory Commission to initiate its review of an application at the same time as the executive branch rather than waiting for the receipt of the executive branch's review.

This parallel consideration of the application should serve to speed the ultimate approval of such applications.

The amendment also incorporates an expressed direction to the executive branch to respond to any issues raised by the Commission during its parallel consideration when the executive branch presents its judgment on the application.

Finally, the amendment provides a procedure by which there is a time limitation placed upon the consideration by the Commission on the pending application.

If the Commission is not finished in its consideration by 60 days, it must inform the applicant of the reasons for the additional time and is given another 60 days after which the President may approve the application by Executive order upon making a finding that delay would be excessive and also prejudicial to our nonproliferation objectives or otherwise jeopardize the common defense and security.

This amendment, Mr. President, was formulated jointly with the floor managers in attempt to place some amount of pressures on NRC to discharge its responsibilities under the new export statute as expeditiously as possible while insuring that required statutory determinations were made.

Section 304 already provides that the President may approve an application if the Commission is unable to make the required findings.

This amendment would also give the President authority to approve a licensing application when the Commission was simply delaying its decision.

Both of these Presidential options would be subject to congressional review using the expedited procedures included in the bill.

The administration in the January 26, 1978, State Department letter to Senator CHURCH expressed concern of the possibility public participation by way of hearings and comments might cause the Commission to delay beyond the time limitation allowed in the formulation of amendment 1601.

Consequently, the executive branch has suggested an alternative which retains the section 1601 basic requirements but provides that additional time for the Commission for public participation has been allowed in the consideration of a given application. The administration also suggested additional delay in the event of a Commission request for additional information.

I understand, Mr. President, that the Senator from Illinois or the Senator from Ohio will offer the administration language with some modification as a substitute for amendment No. 1601.

UP AMENDMENT NO. 1181

Mr. GLENN. Mr. President, I send to the desk a substitute for the amendment under consideration and ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN) proposes unprinted amendment No. 1181 in lieu of the language proposed in amendment No. 1601.

Mr. GLENN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 125, line 10, strike the period and insert in lieu thereof: *"And Provided further,* That the procedures established pursuant to subsection (b) of Section 304 of the Nuclear Nonproliferation Act of 1978 shall provide that the Commission shall immediately initiate review of any application for a license under this Section and to the maximum extent feasible shall expeditiously process the application concurrently with the Executive Branch review, while awaiting the final Executive Branch judgment. In initiating its review, the Commission may identify a set of concerns and requests for information associated with the projected issuance of such license and shall transmit such concerns and requests to the Executive Branch which shall address such concerns and requests in its written communications with the Commission. Such procedures shall also provide that if the Commission has not completed action on the application within sixty days after the receipt of an Executive Branch judgment that the proposed export or exemption is not inimical to the common defense and security or that any export in the category to which the proposed export belongs would not be inimical to the common defense and security because it lacks significance for nuclear explosive purposes, the Commission shall inform the applicant in writing of the reason for delay and provide follow-up reports as appropriate. If the Commission has not completed action by the end of an additional sixty days (a total of 120 days from receipt of the Executive Branch judgment), the President may authorize the proposed export by Executive Order, upon a finding that further delay would be excessive and upn making the findings required for such Presidential authorizations under this subsection, and subject to the Congressional review procedures set forth herein. However, if the Commission has commenced procedures for public participation regarding the proposed export under regulations promulgated pursuant to subsection (b) of Section 304 of the Nuclear Non-Proliferation Act of 1978, or—within sixty days after receipt of the Executive Branch judgment on the proposed export—the Commission has identified and transmitted to the Executive Branch a set of additional concerns or requests for information, the President may not authorize the proposed export until sixty days atfer public proceedings are completed or sixty days after a full Executive Branch response to the Commission's additional concerns or requests has been made consistent with subsection a. (1) of this Section. Provided, that nothing in this section shall affect the right of the Commission to obtain data and recommendations from the Secretary of State at any time provided in subsection a.(1) of this Section.

Mr. GLENN. Mr. President, this substitute to amendment No. 1601 is based upon language proposed by the administration. It differs from the amendment No. 1601 as offered in a number of important respects yet preserves that amendment's overall objective of placing certain limitations on the time normally available to the Nuclear Regulatory Commission for ruling on an export license application.

The most important change in the substitute is that it permits the NRC to hold public hearings on an export license and/or to forward an additional round of inquiries to the Department of State regarding the license without having the time needed for any such hearing or for the additional replies to be prepared by the Department of State counted against the time available to the Commission for considering the license.

In other words, Mr. President, we are providing limits on NRC, the limits that we spoke of earlier in the discussion this morning in the colloquy, but we do not want additional requests for information from the Department of State or the requirement for hearings in a particular instance to count against that time deadline. That would not be fair.

Providing for the tolling of the proposed amendment's time limits in this way is important to insure a proper balance between the interests of reasonable public participation and informed Commission action, on the one hand, and expeditious export licensing on the other, which we do want to maintain.

The substitute differs from the administration proposal, but is similar to the amendment as offered, in that the congressional review procedures of subsection b(2) of section 126 of the 1954 act would apply to any Presidential authorization made in the event of excessive delay by the Commission under the terms of the substitute.

The substitute also contains a proviso not found in either the amendment as offered or in the administration's proposed language which reaffirms the right of the Nuclear Regulatory Commission to obtain at any time all data it may require from the Secretary of State for the discharge of its responsibilities. Although, after a second full round of NRC inquiries to the Department of State, the time limits on the NRC provided in the substitute would continue to run, the Commission would thus remain free to address further questions to the Department. In such circumstances it would be highly unlikely, in my view, that the President would choose to exercise his right to authorize the license assuming important issues had not been resolved to the satisfaction of the Commission.

So, Mr. President, I believe this substitute to the amendment is acceptable to the distinguished Senator from Idaho, and I would be prepared to proceed to vote.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. McCLURE. I thank the Senator from Ohio. I am prepared to accept the amendment.

I do wish to express one concern and one limitation on the addition which has been placed in the amendment above the suggestion or beyond the suggestion of the administration, and that again deals with the question I addressed in the colloquy earlier about NRC's authority to obtain information from the State Department where that matter may, as a matter of fact, be sensitive security information either on the part of this country or on the part of for-

eign governments, and that will be a concern which I hope will be addressed in the guidelines. I hope they will establish internally the limitations on both the obtaining of that information, of what kind of information they will get, by their own action because I think it would be an error if, as a matter of fact, there were no limitations placed upon NRC by their own restraint or by their own guidelines. It may be one or the other, and the guidelines themselves could restrain; because once that material is obtained it is unclear to this Senator what the Freedom of Information Act, the Administrative Procedure Act, may do with respect to sensitive information obtained from foreign governments by way of the State Department, which could then be under this provision requested by NRC.

There is no objection to NRC's being able to get it, but I am concerned with what happens after they get it if they have not exercised some prior restraint on the security requirements of both this country and of foreign governments.

It is my understanding they are prepared either by guidelines or by statute to accept that that information would be protected.

Mr. GLENN. Mr. President, will the Senator from Idaho yield?

Mr. McCLURE. I am happy to yield.

Mr. GLENN. I would not anticipate we would be breaching any other security guidelines at all so far as confidentiality of information, whether it was developed from a foreign source or here or whatever. If that information was classified information in the State Department it would remain that way.

The fact that NRC requested information from the State Department, as I see it, would not change the classification of that information or the confidentiality one bit.

Mr. McCLURE. I thank the Senator from Ohio for that statement, because I would not want the passage of this amendment, of this statute, to be taken by anyone as a change in the law with respect to those security requirements, both for internal security of this country and the internal security information obtained from a foreign government.

Mr. GLENN. I might add it was not intended to do that, and if it weer interpreted that way, it would be a wrong interpretation.

Mr. McCLURE. I thank the Senator from Ohio, and I do support the amendment.

Mr. PERCY. The procedures of this section are quite similar to those of the Presidential override in section 126b(2). Both of these provisions are designed for unusual cases. The NRC is intended to be the primary licensing body, and in the vast majority of cases their actions should be upheld. These provisions allowing for Presidential override and subsequent review should only be used where extraordinary nonproliferation or other national security questions would be jeopardized without a Presidential authorization of the export in question. We would expect that in these rare cases where the NRC does encounter a serious conflict between nonproliferation concerns and vital foreign policy factors set forth by the State Department, that the NRC will take advantage of this mechanism and raise the issue to the Presidential level rather than approving the license in deference to the State Department's views.

Mr. McCLURE. I yield back all time on the substitute.

Mr. GLENN. I yield back all time on the substitute to the amendment.

The PRESIDING OFFICER. The question is on agreeing to Mr. GLENN's substitute amendment to amendment No. 1601.

The substitute amendment was agreed to.

Mr. GLENN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on agreeing to amendment No. 1601, as amended.

Mr. GLENN. I yield back all my time.

Mr. McCLURE. I yield back all my time.

The amendment, as amended, was agreed to.

Mr. McCLURE. I move to reconsider the vote by which the amendment, as amended, was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. McCLURE. On the time on the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HODGES). Without objection, it is so ordered.

COMMEMORATION OF 150TH ANNIVERSARY OF FOUNDING OF THE BOROUGH OF MOUNT PLEASANT, PA.

Mr. HEINZ. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Who yields time? We are under controlled time.

Mr. GLENN. Mr. President, I yield 2 minutes to the Senator from Pennsylvania.

Mr. HEINZ. Mr. President, I thank my distinguised colleague.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 390) commemorating the 150th Anniversary of the founding of the Borough of Mount Pleasant, Pa.

The PRESIDING OFFICER. Is there objection to the present consideration of the amendment?

There being no objection, the Senate proceeded to consider the resolution.

Mr. HEINZ. Mr. President, I think the resolution is self-explanatory.

It commemorates the 150th anniversary of the founding of the Borough of Mount Pleasant, Pa.

Located at the foot of the western slopes of the Chestnut Ridge of the Allegheny Mountain, Mount Pleasant Borough is in an area rich in natural resources such as timber, farmland, wildlife, and underground bituminous coal. It is also in the watershed of the Ohio Valley. The oldest borough in Westmoreland County, Pa., Mount Pleasant has figured prominently in the economic growth and development of western Pennsylvania. In addition, its location has contributed to its importance in the movement of the Iroquois Nation, the early American settlers, and Colonial American troops, including those commanded by General Braddock. More recently, this community has been an important link in the transportation of both people and products crossing the country by highway and rail.

The Borough of Mount Pleasant has its own rich history of economic and cultural growth. It has consistently enjoyed economic expansion and community development, beginning with its enterprising early settlers, who were later joined by western and southern European immigrants who contributed greatly to the community.

It is with great pleasure that I introduce this resolution, and congratulate the people of Mount Pleasant Borough on its sesquicentennial anniversary.

The PRESIDING OFFICER. The question is on agreeing to the resolution. The resolution (S. Res. 390) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 390

Whereas the borough of Mount Pleasant, Pennsylvania, will celebrate the one hundred and fiftieth anniversary of its founding on February 7, 1978;

Whereas the borough of Mount Pleasant is the oldest borough in Westmoreland County, Pennsylvania;

Whereas the borough of Mount Pleasant has played an important part in the economic growth of Westmoreland County; and

Whereas the cultural, historic, and economic growth of Mount Pleasant Borough exemplify the highest tradition in the development of American communities: Now, therefore, be it

Resolved, That the Senate recognizes and honors the borough of Mount Pleasant, Pennsylvania on the one hundred and fiftieth anniversary of its founding, February 7, 1978.

SEC. 2. The Secretary of the Senate is authorized to transmit a copy of this resolution to the Mayor of the borough of Mount Pleasant, Pennsylvania.

Mr. HEINZ. I move to reconsider the vote by which the resolution was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HEINZ. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Is the time equally divided?

Mr. HEINZ. Mr. President, that was with the understanding that the time will be equally divided on the bill, 1 minute each.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

NUCLEAR NONPROLIFERATION ACT OF 1977

UP AMENDMENT NO. 1182

Mr. DOLE. Mr. President, I send an unprinted amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an unprinted amendment numbered 1182.

Mr. DOLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 120, line 6 after the period, insert the following new subsection (c):

"(c) Nothing in this section is intended to prohibit, permanently or unconditionally the reprocessing of spent fuel owned by a foreign nation which fuel has been supplied by the United States, to preclude the U.S. from full participation in the International Fuel Cycle Evaluation provided for in Section 105; to in any way limit the presentation or consideration in that evaluation of any nuclear fuel cycle by the U.S. or any other participation; nor to prejudice open and objective consideration of the results of the evaluation".

Mr. DOLE. Mr. President, This amendment if adopted, would eliminate one particular reservation I have about the bill.

I feel that the bill suffers from an internal contradiction. On the one hand, it states that negotiations will take place to arrive at international solutions to the proliferation problem.

On the other hand, there are measures in this bill that dictate what U.S. policies will be with respect to other countries, irrespective of what these international negotiations may decide.

Let me give you an example. The bill states that the United States will work toward binding international undertakings providing for "the establishment of an International Nuclear Fuel Authority (INFA) with responsibility for providing agreed upon fuel services and allocating agreed upon quantities of fuel to resources to insure fuel supply on reasonable terms in accordance with agreements betwen INFA and supplier and recipient nations."

Yet, the bill prejudges the outcome of those agreements. The bill says that the President shall in particular seek to "insure that the benefits of such undertakings are available to nonnuclear-weapons states only if such States—do not establish any new enrichment of reprocessing facilities on a national basis * * *."

Such unilateral statements indicate that the United States is not ready to negotiate as an equal with other countries that may feel it is in their interest to have enrichment and reprocessing facilities. But more important, there is some concern that this attitude can be seen by other countries to be an abrogation of our agreements under the nonproliferation treaty.

Consider these quotations from the treaty:

Article III.3. The safeguards required by the article shall be implemented in a manner designed . . . to avoid hampering the economic or technological development of the parties . . . including the international exchange of nuclear equipment for the processing or production of nuclear material for peaceful purposes.

And again:

Article IV. All parties to the treatyy undertake to facilitate, and have the right to participate in, the fullest possible exchange of equipment, materials and scientific and technological information for the peaceful uses of nuclear energy.

My concern is that we must show the world that the United States means to negotiate in good faith with other countries and that we are not prejudging the outcome of discussions that require equal participation with other countries.

Mr. President, the amendment I am offering corresponds to wording that is already contained in the House bill. When the wording was offered in the House, it was accepted as merely clarifying the intent of the bill. It is my hope that the managers of the bill will see fit to accept the amendment into the Senate bill on the same basis.

Mr. President, I understand this amendment has been discussed at the staff level. There may be some feeling that it is not necessary. It is much like the amendment offered by a distinguished Member of the other body, Representative MCCORMACK.

Mr. PERCY. Mr. President, I first wish to state that S. 897 does not prejudge the results of the international fuel cycle evaluation.

What I wish to do is just ask my distinguished colleague, the author of the amendment, whether his understanding is the same as mine of this amendment. I understand that the amendment, which has been adopted by the House of Representatives, simply underscores the fact that S. 897 does not prohibit reprocessing permanently or unconditionally and that the international fuel cycle evaluation should include a full and fair examination of all relevant technology.

Mr. DOLE. Yes.

Mr. PERCY. That is the proper understanding of the floor manager of the bill. I checked this out with Senator GLENN, and I have no objection to it.

I thank the distinguished Senator for offering his amendment.

Mr. DOLE. Mr. President, I agree with that understanding and indicate that it corresponds to the wording already contained in the House bill. The amendment was offered on that side. And I appreciate the distinguished floor manager of the bill indicating his support for the amendment.

Mr. McCLURE. Mr. President, will my colleague from Kansas yield?

Mr. DOLE. I yield.

Mr. McCLURE. I thank my colleague not only for yielding but also for offering this amendment. If he had not done so I would have offered this amendment.

I think it is an important addition, in the negative sense, to state what this bill does not do and, as has already been stated, both by the Senator from Kansas and the Senator from Illinois, we have not been prejudging the international nuclear fuel cycle evaluation nor does this bill prejudice the future consideration of the reprocessing option.

I support the amendment fully and lest I say too much I shall be very brief, but I do want this much to be stated on the record clearly.

As Senators will recall, the April 7, 1977, Presidential policy statement on nuclear power specifically deferred commercial reprocessing for the near future, but it did not have the effect of a Presidential policy totally in opposition to reprocessing at some point in the future. Therefore, it is valuable to ensure that this statute does not imply and cannot be judicially or administratively construed to have the effect of a congressional statement prohibiting reprocessing.

I think there are domestic political and foreign diplomatic advantages to having the statute include such a disclaimer on any prohibition of reprocessing at this time.

I think the timely warning test in section 303 has been established by this amendment and in identical form as that contained in the House bill. I hope that the amendment will be adopted, and I commend my friend from Kansas for having proposed it.

Mr. DOLE. I thank the Senator.

I yield back the remainder of my time.

Mr. PERCY. Mr. President, while the bill does not prejudice future choices, it does require, as I am sure we all do, that we must be certain that we do not sanction reprocessing under conditions which would result in a significant increase in the risk of proliferation. With that statement I simply concur with all of the utterances that have been made and assurances given by the distinguished Senator from Idaho, and I am certain that they coincide with the opinions of the distinguished Senator from Kansas.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Without objection the amendment is agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PERCY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1607

Mr. McCLURE. Mr. President, I call up my printed amendment No. 1607 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (MR. MCCLURE) proposes an amendment numbered 1607.

Mr. McCLURE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 150, line 13, insert the following new subsection:

"f. If after the date of enactment of the Nuclear Nonproliferation Act of 1977, the Congress fails to disapprove a proposed agreement for cooperation which exempts the recipient nation from the requirement set forth in subsection 123(a)(2), such failure to act shall constitute a failure to adopt a resolution of disapproval pursuant to subsection 128b.(3) for purposes of the Commission's consideration of applications and requests under section 126(a)(2) and there shall be no congressional review of any subsequent license or authorization with respect to that state until the first such license or authorization which is issued after twelve months from the elapse of the sixty-day period in which the agreement for cooperation in question is reviewed by the Congress.".

Mr. McCLURE. Mr. President, this amendment has the effect of insuring that, if the President is able to get congressional approval for an exemption of the full scope safeguards with the appropriate conditions in the agreement for cooperation, for a period of 1 year thereafter the licensing procedure could work without having to require the President to once again exempt the licensing application which otherwise would be required by section 304.

This would allow for initial exports under an agreement for cooperation to proceed during that 1-year period but then would reimpose the requirement for periodic congressional approval of a further Presidential exemption of the full scope safeguards criteria.

In the absence of this amendment, the Presidential exemption in the agreement for cooperation which had been approved by Congress would not have the effect of allowing the licensing to go forward except with a further congressional approval of a Presidential exemption for the first export license.

The amendment would allow the President to negotiate such an exemption and an agreement for cooperation and to provide assurances that, if Congress were to agree to it, at least for a period of 1 year thereafter there would be predictability in terms of approvals of export licenses, assuming other criteria would be met.

In the absence of this modification to the procedure there would not be any such predictability, and it would render meaningless the exemption that the statute provides in the agreement for cooperation.

The original administration comment in the January 26, 1978 Department of State letter was to request a further extension of this principle to cover any exemption the President may offer, not just the full scope safeguards exemption.

The floor managers, as I understand, have objected to the extension of the concept to cover other exemptions, and I have indicated a willingness as part of the compromise to not force the administration view on the floor.

I understand that the floor managers will offer a technical amendment to my amendment numbered 1607 to bring it into conformance directly with reference to the full scope safeguard exemption.

Mr. PERCY. Mr. President, the amendment being offered by the Senator from Idaho is one that the managers of the bill do support. I have one modification, however, that I understand is acceptable to my distinguished colleague.

UP AMENDMENT NO. 1183

I send an amendment to the amendment to the desk at this time and ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. Without objection, the amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes unprinted amendment number 1183 to amendment No. 1607.

On page 2, line 2, insert the following: "pursuant to Section 128" after "Review".

Mr. PERCY. Mr. President, this minor modification would specify that effectively failing to override a waiver of the full-scope safeguards requirement by approving a new agreement which conflicts with section 128 would not preclude all congressional review of licenses to the recipient State for 12 months, as the amendment without this modification would possibly suggest, but rather would preclude only congressional review related to the full scope safeguards requirement.

I believe this modification is in full accord with the intent of the distinguished Senator from Idaho, and I trust that he will accept the amendment.

Mr. McCLURE. Mr. President, will my colleague yield?

Mr. PERCY. I yield.

Mr. McCLURE. Yes, I am in accord with the thrust of this amendment, and I am glad that we were able to work out a compromise on the language, and narrowing the scope of this amendment has my approval. I do support the amendment suggested by the Senator from Illinois.

Mr. PERCY. The managers of the bill yield back the remainder of their time.

Mr. McCLURE. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment to the amendment.

Without objection, the amendment to the amendment is agreed to.

Mr. McCLURE. Mr. President, I yield back all of my time on the amendment.

Mr. PERCY. I yield back all of our time on the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment as amended.

Without objection, the amendment, as amended, is agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PERCY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1587

Mr. McCLURE. Mr. President, I call up my Amendment 1587 and ask the clerk to report.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. MCCLURE) proposes an amendment numbered 1587.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 114, line 13, insert "a" immediately after "SEC. 111.".

On page 114, line 19, delete "person.", and insert in lieu thereof the following: "person: *Provided*, That nothing in this section shall require that licensing of the distribution of byproduct material by the Department of Energy under section 82 of this Act.".

On page 114, between lines 19 and 20, add a new subparagraph (b) as follows:

"(b) The Department of Energy shall not distribute any special nuclear material, source material, or byproduct material under section 54, 64, or 82 of the 1954 Act other than under an export license issued by the Nuclear Regulatory Commission until (1) the Department has obtained the concurrence of the Department of State and has consulted with the Arms Control and Disarmament Agency, the Nuclear Regulatory Commisison, and the Department of Defense under mutually agreed procedures which shall be established within not more than ninety days after the date of enactment of this provision and (2) the Department finds based on a reasonable judgment of the assurance provided and the information available to the United States Government, that the criteria in subsection 127 a. or their equivalent and any applicable criteria in subsection 128 are met, and that the proposed distribution would not be inimical to the common defense and security.".

Mr. McCLURE. Mr. President, this printed amendment would modify section 301 of the bill which deals with direct government-to-government transfers of nuclear materials as opposed to the licensing of commercial transfers of nuclear materials. The original 1587 was intended to remove from the full blown NRC licensing process these government-to-government transfers, and to place those transfers in a far less complicated and more standard interagency coordination type of control. The amendment also was intended to make clear that this act does not mandate the licensing of DOE activities by the Nuclear Regulatory Commission, but rather depends on the interagency process as

established under the printed amendment.

The modifications made by this amendment would avoid the complicated timely and unnecessary full blown licensing of DOE's direct government-to-government transfer activities. The substantive concerns of the drafters that there be a statutory determination and interagency review of such transfers is preserved without the unnecessary aspects of the full blown licensing. The sponsors have been concerned that the direct government-to-government transfer might become a major loophole in the overall licensing scheme established by Title III in the future. (It is ironic that one of the Commissioners of the NRC, reported Commissioner Gilinsky, advised the Department of Energy that the next shipment of fuel for Tarapur, India should be made by government-to-government transfer specifically to avoid another major battle within the NRC—the executive branch has just forwarded its recommendation for approval of the next Tarapur application, consistent with the President's pledge to President Desai and the Indian Parliament on his trip.) The amendment, therefore, should be acceptable from both a policy and a procedural point of view.

The Administration in the January 26, 1978, State Department letter suggested that there be a technical amendment to clarify the handling of so-called "by-product" materials.

I understand the managers will offer that technical amendment but otherwise will support No. 1587.

Mr. PERCY. Mr. President, the Senator is correct. The managers of the bill do accept, with appreciation, the amendment by our distinguished colleague from Idaho, subject to his acceptance of a technical change requested by the administration.

UP AMENDMENT NO. 1184

I send an amendment to the amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the clerk will report.

The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an unprinted amendment numbered 1184 to amendment 1587:

On page 2, lines 4 and 5, delete ", source material, or by product material under section 54, 64, or 82" and insert in lieu thereof "or source material under Section 54 or 64".

Mr. PERCY. Mr. President, as I pointed out, this amendment is acceptable subject to this minor technical change. The revision is a technical change requested by the administration to delete the inappropriate reference to byproduct material in this provision regarding controls on government-to-government transfers of source and special nuclear material.

I would like to point out that amendment No. 1587 is essentially a technical and clarifying amendment and does not alter the limitations on government-to-government transfers which were established by S. 897 as reported from the committee.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. McCLURE. Mr. President, I do support the technical amendment, and I urge its adoption. I yield back the remainder of my time.

Mr. PERCY. I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois to amendment No. 1587.

The amendment to the amendment was agreed to.

Mr. McCLURE. Mr. President, I yield back all the time on the amendment.

Mr. PERCY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PERCY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, I yield back the time of the managers of the bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as amended.

The amendment, as amended, was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment, as amended, was agreed to.

Mr. PERCY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

Mr. PERCY. Would the Senator withhold that request? The Senator from West Virginia has requested me to yield to him for a unanimous-consent request.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1604

Mr. McCLURE. Mr. President, I call up my amendment No. 1604 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposed an amendment numbered 1604.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection it is so ordered.

The amendment is as follows:

On page 139, line 23, strike "The" and substitute in lieu thereof "Subject to the provisions of subsection c. of this section, the".

On page 140, after line 20, insert a new subsection c. to read as follows:

"c. No determination by the Commission that a component part is especially relevant from the standpoint of export control shall be effective until thirty days after the Commission notifies the Secretary of Energy of such determination. If, prior to the expiration of such thirty days, the Secretary of Energy finds that the Commission's determination should be amended in whole or in part, he shall so notify the Commission and the President, and the determination of the Commission shall not take effect for a period of fifteen days thereafter (plus any period for congressional review provided by this subsection). During such fifteen-day period, the President shall review the Commission's determination and the Secretary's finding, and may amend the Commission's determination in whole or in part: *Provided*, That any such Presidential amendment shall be submitted to the Congress for a period of sixty days of continuous session (as defined in subsection 130(g) of this Act), and shall be referred to the Committee on International Relations of the House of Representatives and the Committee on Foreign Relations of the Senate. If during such sixty-day period the Congress adopts a concurrent resolution stating in substance that the Congress does not favor the amendment of the President, the Commission's determination shall take effect immediately. If no such concurrent resolution is adopted during such sixty-day period, by the Congress, the amendment of the President shall take effect at the expiration of such period. Any such amendment of the President shall be considered pursuant to the procedures set forth in section 130 of this Act for the consideration of Presidential submissions.".

On page 140, line 21, redesignate subsection c. as subsection d.

Mr. McCLURE. Mr. President, this amendment would provide a procedure for interagency concurrence in the decision of the NRC under section 309 as to what nuclear components and other items are potentially significant for nonproliferation and therefore should be subjected to the stringent regulation of section 309. I object to the NRC by itself having the authority to declare anything significant for proliferation potentially and thereby expand unnecessarily its regulatory jurisdiction over exports. For instance, the House Committee report suggested that computers should be subjected to this regulation. I hope that interagency concurrence will help deal with this problem and my amendment would provide that coordination.

This amendment also demonstrates how such a simple notion as coordination can be taken to an illogical conclusion in the sense that the amendment which was a compromise with the floor managers. Its complexity reflects the stress in attempting to balance the various agency roles, and a Presidential decision in the event of disagreement. It indeed is unfortunate, perhaps, that we have become so concerned and polarized over our preconceived notions regarding these agencies.

The PRESIDING OFFICER. The Senate will be in order.

Mr. McCLURE. I thank the Chair.

The administration has recommended a much simpler formulation of the new procedure for consultation dealing with

the decision by the Commission to insure that other agencies are in fact involved. This will be offered as a substitute by the floor managers. We would prefer to require "concurrence" by the Department of Energy and the Department of State on the NRC's decision, but as a compromise have agreed to take the consultation language which will be offered.

UP AMENDMENT NO. 1185

Mr. PERCY. Mr. President, I send a perfecting amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection to the amendment being offered at this time? Without objection, the clerk will state the amendment.

Mr. PERCY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Delete all that appears after "thereof" on line 2 and insert in lieu thereof "After consulting with the Secretaries of State, Energy and Commerce and the Director, the".

Mr. PERCY. Mr. President, this amendment, which I understand is acceptable to the Senator from Idaho, and is supported by the administration, would greatly simplify the procedure for designating components subject to the export licensing criteria of section 109b and would give the NRC the final say in the designation. Under my amendment the Commission simply would be required to consult with the Secretaries of State, Energy and Commerce and the Director of ACDA before designating the components.

I believe the amendment is acceptable, and I yield back the remainder of my time.

Mr. McCLURE. Mr. President, as I have stated, I would have preferred requiring concurrence by the Department of Energy and the Department of State, but I do accept the language on consultation, and yield back the remainder of my time on the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment in the second degree.

The amendment was agreed to.

Mr. McCLURE. Mr. President, I yield back the remainder of my time on the amendment, as amended.

Mr. PERCY. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as amended, of the Senator from Idaho.

The amendment (No. 1604), as amended, was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PERCY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum, and ask unanimous consent that the time not be charged against either side.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The VICE PRESIDENT. Without objection, it is so ordered.

SENATOR FROM MINNESOTA

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate?

The VICE PRESIDENT. The Senate will be in order.

The Chair lays before the Senate the certificate of appointment of MURIEL BUCK HUMPHREY as a Senator from the State of Minnesota.

Without objection, it will be placed in the file. The certificate of appointment will be read.

The legislative clerk read as follows:

State of Minnesota

CERTIFICATE OF APPOINTMENT

To the President of the Senate of the United States:

This is to certify that, pursuant to the power vested in me by the Constitution of the United States and the laws of the State of Minnesota, I, Rudy Perpich, the Governor of said State, do hereby appoint Muriel Buck Humphrey a Senator from said State to represent said State in the Senate of the United States until the vacancy therein, caused by the death of Hubert H. Humphrey, is filled by election as provided by law.

Witness: His excellency, our governor, Rudy Perpich, and our seal hereto affixed at St. Paul this twenty-fifth day of January in the year of our Lord 1978.

By the Governor:

RUDY PERPICH,
Governor.

JOAN ANDERSON GROWE,
Secretary of State.

The VICE PRESIDENT. If the Senator-designate will present herself at the desk, the Chair will administer the oath of office required by the Constitution and prescribed by law.

Mrs. HUMPHREY of Minnesota, escorted by Mr. ANDERSON, advanced to the desk of the Vice President; the oath prescribed by law was administered to her by the Vice President; and she subscribed to the oath in the official oath book.

[Applause, Senators rising.]

RECESS SUBJECT TO THE CALL OF THE CHAIR

The VICE PRESIDENT. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a 20-minute recess without the time being charged to either side.

There being no objection, the Senate, at 2:03 p.m., recessed until 2:21 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. FORD).

APPOINTMENT OF SENATOR TO STANDING COMMITTEES—SENATE RESOLUTION 391.

Mr. ROBERT C. BYRD. Mr. President, I send to the desk a resolution, and I ask for its immediate consideration.

The PRESIDING OFFICER (Mr. FORD). The resolution will be stated.

The legislative clerk read as follows:

Resolved, That Senator Humphrey of Minnesota be, and she is hereby, assigned to service on the Committee on Foreign Relations, and the Committee on Governmental Affairs to fill vacancies on those Committees.

The PRESIDING OFFICER. Without objection, the resolution is agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF BUSINESS

The PRESIDING OFFICER. The Chair asks the galleries to give the Senate its respect so that we can hear what is going on in the Chamber. The Chair asks the pages to return to the steps.

Mr. ROBERT C. BYRD. I thank the Chair for securing order in the Chamber and in the galleries.

TIME-LIMITATION AGREEMENT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Mr. RANDOLPH. as chairman of the conferees on H.R. 4544, the Black Lung Benefits Reform Act, and Mr. JAVITS, as the ranking member, each may have 10 minutes, and that Mr. LONG may have 5 minutes, on the Black Lung Benefits Reform Act conference report.

I also ask unanimous consent that the time not be charged against the time on the unfinished business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I ask unanimous consent that at the conclusion of that time and upon the disposition of the conference report, the Senate resume the consideration of the unfinished business.

The PRESIDING OFFICER. Without objection, it is so ordered.

BLACK LUNG BENEFITS REFORM ACT OF 1977—CONFERENCE REPORT

Mr. RANDOLPH. Mr. President, I submit a report of the committee of conference on H.R. 4544 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4544) to amend the Federal Coal Mine Health Safety Act to improve the black lung benefits program established under such act, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of February 2, 1978.)

Mr. RANDOLPH. Mr. President, I appreciate the cooperation of the Senator from West Virginia (Mr. ROBERT C. BYRD) in permitting us at this time to bring to the floor this conference report, which is a privileged matter. Our able majority leader has been an effective advocate of this black lung legislation.

It is a privilege to bring to the Senate the conference report on H.R. 4544 the Black Lung Benefits Reform Act of 1977. This report represents the extensive and comprehensive work of conferees from four committees—the Committee on Education and Labor and the Committee on Ways and Means of the House of Representatives and the Committee on Human Resources and the Committee on Finance of the Senate.

I note for the record that the chairman of the Committee on Human Resources, Senator WILLIAMS, and the chairman of the Committee on Finance, Senator LONG, are in the Chamber at this time.

The measure provides significant improvements to the black lung program. It will enable afflicted miners and the survivors of deceased miners to have a deserved and needed opportunity to qualify for black lung benefits.

Very quickly, let us go back to 1969. At that time, we brought into Congress, and it became law, the original Black Lung Benefits Act. It was further modified in 1972, when we brought in the elements of pulmonary and respiratory diseases as a part of the possible proof.

Now, in 1978, we are finalizing a bill, which will qualify many persons who need the opportunity to have their claims reviewed in connection with this dread disease.

As my colleagues know, the Senate debate on this body's version of the black lung bill, S. 1538, took place on July 21, 1977, and gave it unanimous approval on September 20, 1977. Subsequently, the conferees from the four committees agreed to separate the legislation into two parts—a bill to establish a tax on coal to fund approved black lung claims and a bill to reform the standards for approval of such claims. The financing proposal, H.R. 5322, was approved by the Senate on December 15, 1977, and by the House on January 24, 1978. We are confident that legislation will be signed by the President. The reform proposal in its final version is the measure before us today.

Briefly, the major provisions of the conference report are as follows:

First, there will be an automatic review of all previously denied or pending claims to determine if claimants are now eligible under the 1977 amendments. The "interim" medical standards which I will refer to later will be used in evaluating these claims.

Previously denied and pending part C claims will be reviewed by the Secretary of Labor. Claimants will be given the opportunity to augment their files. When such claims are approved they will be paid by the black lung disability benefits trust fund unless a responsible operator can be identified and the coal miner's employment extended beyond January 1, 1970.

All denied part B claimants will be given the option of having their claims reviewed based on existing files by the Secretary of HEW or transferred to the Secretary of Labor for review. In the latter case, the Secretary of Labor will treat the claim like a reviewed part C claim. If the HEW Secretary reviews the claim and it is found not approvable, the claimant will have the opportunity to have his or her claim transferred to the Department of Labor for further review based on any additional evidence that the claimant may submit. If the HEW Secretary approves the claim, it is transferred to the Department of Labor for payment as an initial determination of eligibility. The Labor Secretary will immediately direct that the payments be made from the trust fund or by a responsible operator if a responsible operator is identified. Any responsible operator will have the right to litigate his responsibility and the eligibility of the claimant. If the operator prevails in such litigation, payments to the claimant will cease.

The number of such claims in HEW and Labor totals over 200,000. This estimate includes claims of miners and survivors.

All claims approved as a result of this review will be eligible for retroactive benefits from the date of onset of disability or January 1, 1974, whichever is later. It should be stressed that no benefits resulting from the review of part B or part C claims will be paid by the Federal Government.

Under the conference report, the Secretary of Labor is authorized to promulgate medical standards for the evaluation of part C claims at a time in the future. However, the review of all part B and part C claims and of all claims filed prior to the promulgation of the Labor Department's medical standards will be accomplished with the use of the "interim" medical standards which were in use after the Black Lung Amendments of 1972.

In the past, except for complicated pneumoconiosis cases, a miner who was working at the time of death or at the time of his or her claim was made, could not be found eligible for benefits. H.R. 4544 states that employment at the time of death cannot be conclusively used as evidence that the miner was not totally disabled in determining the survivor's claim. Also, the bill provides that a living miner's changed circumstances of employment can be indicative of reduced ability to perform coal mine work. As in current law, however, no miner can receive black lung benefits while still employed (except for those with complicated pneumoconiosis). A working miner must leave work within a year to collect benefits.

H.R. 4544 modifies the evidence required to show disability from black lung. This includes:

For deceased miners, where there is no medical or other relevant evidence, affidavits shall be sufficient to show that the deceased miner was totally disabled due to pneumoconiosis or died as a result of pneumoconiosis;

The Secretary is prohibited from rereading X-rays, provided that the X-ray was initially taken and read by qualified individuals, is of sufficient quality, and there is no evidence of fraud;

There is other evidence that a miner has a pulmonary or respiratory impairment;

The Secretary must accept an autopsy report, unless he has good cause to believe that it is not accurate or that the miner's condition is being fraudulently misrepresented; and

Claims cannot be denied unless the miner has been afforded the opportunity to have a complete pulmonary examination.

H.R. 4544 provides that for State workers' compensation laws to be in compliance with the Federal black lung standards such laws need only cover claims filed subsequent to the approval of the State law. This provision will aid States in qualifying their compensation programs for black lung.

The conference report amends part C so that coal mine operators can only be held responsible for black lung benefits if the miner's employment extended beyond January 1, 1970.

The Secretary of Labor is authorized to establish an insurance fund for operators who are unable to secure insurance for black lung liability or are unable to do so at reasonable cost.

The conference report provides that a survivor of a miner who had at least 25 years of coal mine employment prior to June 30, 1971, will be entitled to benefits unless it is established that at the time of death the miner was not partially or totally disabled due to pneumoconiosis.

On this point, the conferees agreed to incorporate both the Senate and House provisions which provide for the filing of a part C claim by a miner within 3 years after the date of enactment of these amendments or within 3 years after a medical determination of total disability due to pneumoconiosis. The statute of limitations on survivor claim is eliminated.

The conference report adopted a House provision which allows miners receiving benefits under part B to file for medical benefits under part C. Such filing must be done during a 6-month period after the enactment of these amendments.

The conference report generally retains the Longshoremen's and Harbor Workers' Act procedures for the adjudication of all claims subject to review by the Secretary of Labor.

With further reference to the claims adjudication features, many of the provisions that were in the Senate and House bills are now covered by the Black Lung Benefits Revenue Act which is before the President. These include participation by the operators in adjudication, enforcement of operator liability to the claimant and the fund, administration of the fund, payments from the fund, and the trust fund itself. Those features retained in H.R. 4544 are covered in the conference report on the bill.

Finally, Mr. President, there are several provisions of the conference report which should also be noted.

H.R. 4544 provides for—

The establishment of field offices, where warranted, to assist claimants;

An 18-month study of all occupationally related pulmonary and respiratory diseases by the Secretary of Labor in cooperation with NIOSH;

A process in which any denied claimants will be supplied with a written statement of the reasons for such denial; and

A mechanism for interim part C payments in the event payments cannot lawfully be made from the trust fund.

Mr. President, these amendments to the black lung program have been developed over a period of 3 years. They are necessary and urgently needed revisions to compensate those persons who have mined coal to energize our Nation and who, in this process, have been afflicted by pneumoconiosis—a disabling and progressively delibilitating disease. Miners and their families have sacrificed much over the years. They are still paying a heavy price for these sacrifices and it is incumbent on the Congress and the Federal Government to be alert and responsive to the health and welfare of those persons who constitute our mining population.

The black lung program has been a blessing for hundreds of thousands of deserving beneficiaries who have received and continue to receive compensation income. But it has been a bitter disappointment for thousands of claimants who have been denied benefits, and thousands of others who have waited for years for their claims to be decided. They have not yet had an opportunity for fair consideration under the original act and the later amendments.

The program has really been harsh to many who have submitted claims and pursued them in good faith. Through administrative or legal quirks they have been determined to be ineligible for benefits.

These and other reasons are compelling ones for the enactment of this program of reform legislation. Widows who know with certainty that their husbands were totally disabled by black lung have often been barred from receiving benefits because they have no medical evidence to substantiate their claim.

Miners who are told they are disabled and whose chest X-rays are interpreted as positive for pneumoconiosis have been denied benefits because the rereaders of the X-rays disagree with the original X-ray interpretation.

There are widows whose claims are clearly valid and who would receive benefits except for the passage of time since the miner husband's death.

There are miners who are ill but are faced with the dilemma of whether to continue working or whether to stop their labor and file a black lung claim, perhaps taking a chance on the probability of approval of such claims sometime distant in the future.

Finally, there are all the black lung claimants who must wait an average of 630 days for their claims to be processed, only to have such claims, in 97 percent of the cases approved by the Labor Department, controverted by the responsibile coal company.

Mr. President, these are some of the reasons that have brought us to the point of bringing a new black lung measure to enactment. We have been in the process of reasoned improvement of this legislation from its enactment in 1969 to the 1972 amendments. Those amendments were made necessary because the full extent of pulmonary and respiratory diseases was being ignored through the sole use of the X-ray finding.

This was a step forward. The Social Security Administration was required to take into account pulmonary and respiratory ailments, which are very marked in connection with those who labor in the coal mines of this country.

A black lung benefit program has certainly—and I underscore this—worked well and favorably for many; but for many other persons it has been something which causes sleepless nights and anguished days.

H.R. 4544 will not solve all the problems nor fulfill all the wishes of every claimant for black lung benefits. It will, however, necessarily result in dramatic improvements in the program. It is urgently needed, and it can give a certain degree of economic security to thousands of disabled miners, widows, and children, who are now unjustly denied the benefits of this program.

Mr. President, I strongly urge adoption of this conference report.

Mr. President, this is no mere pleasantry for me. It is something I want very much to do, and I am eager to do it. That is to express genuine appreciation to the chairman of the Committee on Human Resources, Senator HARRISON WILLIAMS.

From the very beginning, even earlier than the passage of the 1969 bill, he was deeply involved in the hearing process and the process of developing black lung legislation. Without his effective work, the 1969 measure and the 1972 amendments would not have become law.

I am grateful, and I express my personal as well as my official thanks, as do thousands and thousands of miners and their families who know of his endeavors both on black lung and on coal mine health and safety. The Senator from New Jersey (Mr. WILLIAMS) has been a leader in all areas of the effort to insure safe and healthy working conditions for the people of our Nation and his work has improved the lives of millions.

Mr. President, I wish also to say that we have constantly had the reasoned judgment of the articulate and able Senator from New York, the ranking minority member of the Human Resources Committee.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator's time has expired.

Mr. RANDOLPH. Mr. President, will the distinguished Senator from New York yield 1 minute from his time?

Mr. JAVITS. I yield 1 minute.

The PRESIDING OFFICER. The Senator has an additional minute.

Mr. RANDOLPH. Mr. President, it is not important here to be able to say that on all counts Senator JAVITS agreed with me or with Senator WILLIAMS or with others. But he constantly was at counsel table working with us to develop a measure that could receive hopefully unanimous approval of both the House of Representatives and Senate, and we believe that is happening. Miners and their families have benefited from the diligent efforts of the Senator from New York (Mr. JAVITS).

I also wish to strongly state the appreciation—of all of us who worked with him—of the leadership which has been given by the chairman of our Finance Committee, Senator LONG of Louisiana.

Someone might have said a little word or two along the way that he might have been a stumbling block. He was not that. He was trying to help us to work out a valid program for the payment of black lung benefits not only now but in the years ahead. And I think that it is important to have had that sort of counsel and assistance.

Representative CARL PERKINS, chairman of the House Education and Labor Committee, of course, was a vigorous and dedicated advocate of this legislation. He worked with us. We worked with him. We had times of stress and strain, but we came through that conference with goodwill, understanding, and purpose. I am deeply grateful to Representative PERKINS.

I stress also that Representative JOHN DENT had a significant role in developing this measure. His dedication to the miners of this country is known and this legislation is a further indication of it.

Finally, I thank the members of the staff, many of them who are here today. They worked constantly. They dug in early in the morning and late at night to help us bring about the finalization of this legislation. I personally commend and express appreciation to Mike Goldberg and Jerry Lindrew of the majority staff, Subcommittee on Labor; Don Zimmerman, minority staff; Wiley Jones, Senator LONG's staff; and Herb Chabot and Richard Ruge, Joint Committee on Taxation.

The PRESIDING OFFICER. The Senator from New York is recognized.

Mr. JAVITS. Mr. President, I ask my own chairman if he wishes some additional time.

Mr. WILLIAMS. Only an additional moment.

Mr. JAVITS. I yield to him.

Mr. WILLIAMS. Mr. President, coal workers' pneumoconiosis, or black lung disease, is a dreadful and insidious disease which interferes with the respiratory function of its victims, and which slowly and progressively makes the very act of breathing more and more difficult.

Over the years, our coal miners have made significant contributions to our Nation's energy production. They have done so at a great personal sacrifice to their own health. The Congress has, in turn, taken steps to prevent black lung and to compensate miners who are afflicted with this occupational disease.

In 1969, Congress launched a two-pronged attack on this national health problem. With last year's passage of the Federal Mine Safety and Health Act, we committed ourselves to controlling the levels of coal dust in our Nation's mines, and to eliminating the cause of black lung. By controlling dust levels, we

hoped that future generations of coal miners would not have to face the suffering and hardship of their forebears.

Today's legislation will simplify the task of compensating the victims of black lung disease, and will thus provide justice for past inequities. It will also encourage the investment necessary to clean up the mine and eliminate the cause of this dreaded disease.

In the past, the administration of the black lung benefits program has failed to reach its objectives of fairly compensating victims and of reaching an equitable distribution of the costs of black lung compensation. Miners have been put through one obstacle after another in order to justify their claims and all but a handful of these claims are still, 7 years after implementation of the program, being paid by the Federal Government.

The conference report eliminates bottlenecks in the processing of claims. It eliminates unfair statutes of limitations. It adjusts the criteria which are used to evaluate claims so that these criteria will apply fairly to all. Currently, the criteria work to the distinct disadvantage of older miners and their widows who often cannot accumulate the medical or other data necessary to establish eligibility.

By approving this conference report, the Congress will also shift the burden of paying black lung benefits to the coal industry. The Senate bill contained a trust fund to be paid for by the coal industry with the Federal Government assuming no new liability for black lung claims.

The House conferees accepted this important principle. The conferees agreed, however, that the black lung benefits trust fund, and the accompanying excise tax should be provided for by separate legislation—amending the internal revenue code. The conferees asked the Senate Committee on Finance and the Ways and Means Committee of the House of Representatives to provide such legislation, and as a result, the Black Lung Benefits Revenue Act (H.R. 5322) has already been passed by both the Senate and the House and is now awaiting the President's signature.

By effectively shifting the cost of paying black lung benefits to the coal mining industry, that industry will be encouraged to eliminate harmful dust from our coal mines and eventually, to eliminate this disease.

With the enactment of this conference report our efforts to control black lung will be complete.

Mr. President, the conferees have worked for nearly 4 months to develop this report. Although both the Senate and the House conferees worked toward the same objective, there were serious differences in approach. This conference report represents an accommodation of those differences and I would like to commend the chairman of the Senate conferees, the Senator from West Virginia (Mr. RANDOLPH) for his leadership and perseverance in the conference, and to congratulate him on the conference report. I would also like to express my appreciation for the positive assistance which we received from the other Senate conferees.

Mr. President, this conference report, the Black Lung Benefits Reform Act of 1977, will restore justice and fairness to the black lung program and will fulfill the promise which we made to our Nation's coal miners in 1969.

I commend this conference report to the Senate.

Mr. President, the Senator from West Virginia brought to our legislative effort to meet the needs of coal miners the knowledge that comes from one who lives close to the people he represents, and so many of them are employed in the coal mines. It is for nearly a decade that we have worked together to develop the two things that coal miners needed, a program to advance safety and health conditions in the mines, and then a program of compensation for those who have been diseased as a result of this employment.

It has been put all together in our legislation. Since 1969 problems have developed with this measure and with the bill that we passed that deals with a reorganization of the Mine Safety and Health Administration.

I think the coal miners of our land at last have the full measure that they are entitled to for compensation and also for insuring a work environment that over the years ahead will reduce, we hope to zero, the incidence of the disease that we compensate here.

Certainly, and I know my colleague from New York will share this with me, though we come from States that are not known as and are not coal mining States, we had to work and relv day in, day out, on every measure in this area on the most constructive and most humane Senator from West Virginia.

It is good that we had the complications of financing the black lung program so expertly resolved with the cooperation and all of the creative thought of the Senator from Louisiana.

I thank the Senator from New York.

Mr. JAVITS. I thank my colleague.

Mr. President, I yield myself 5 minutes.

Mr. President, as one of the Senate members of the conference committee, I support the conference report on the Black Lung Benefits Reform Act of 1977, and I urge its adoption here today. This legislation will correct several provisions of the present law which have unfairly caused benefits to be denied to miners suffering from pneumoconiosis and to their survivors, and will reform the financing of black lung compensation by shifting the burden of financing benefits from the general revenues of the Treasury to the users of coal by a sales tax collected through coal mine operators. Coal mine operators, through the tax revenues to the new trust fund and through liability for individual claims, will be responsible for financing the cost of all benefits, including claims certified by the Secretary of HEW under the new section 435 of the act.

These amendments finally achieve the objective I have sought since the inception of the black lung benefits program in 1969 of requiring the coal industry itself to pay the cost of compensating miners and their survivors for black lung disease. I urged this approach again during consideration of the 1972 amendments. Although the 1972 amendments incorporated the concept of operator liability for individual claims, the provisions adopted then under part C were largely ineffective and resulted in virtually all payments being made from general revenues.

I am also pleased that the bill as reported by the conferees retains a great many of the amendments which I proposed during its consideration by the Human Resources Committee, and also includes amendments which I offered during the conference itself.

My great interest in the black lung benefits program, since its inception in 1969, has been to insure equity for victims of black lung disease while being mindful of the burden on the U.S. taxpayer of as much as $1 billion per year in benefit payments. I wish to assure my colleagues that although the bill incorporates a number of liberalized standards governing the adjudication of black lung benefit claims, it clearly preserves its basic integrity as a workers' compensation program by requiring a finding not only of the presence of black lung disease, but also that the claimant's disability due to the disease prevents him from performing coal mine work.

In this connection, I was concerned throughout the consideration of this legislation by the conference committee that the dual responsibilities of HEW and the Department of Labor for reviewing previously denied claims be exercised in a manner that is fair to all concerned. These claims are to be reviewed by both agencies under medical criteria no more restrictive than the so-called interim medical standards which were originally promulgated by HEW for the determination of claims under part B of the act, for which HEW was responsible through June 30, 1973. The bill also provides authority for the Secretary of Labor to promulgate regulations establishing revised medical criteria, based on the best medical information available, to be applicable to all newly filed claims.

The "interim" standards as they were applied to determine benefit claims under part B, have been highly controversial and widely criticized. For example, the Secretary of Labor, on September 30, 1977, stated:

> The part B standards are not medically sound for providing benefits to all deserving individuals.

I therefore requested that the statement of managers include language to the effect that "all relevant medical evidence" be considered in applying the "interim" standards to the reviewed claims in order to more clearly explain the intent of the new section 402(f)(2) of the act created by section 2(c) of the bill. I also suggested the language that "the conferees expect the Secretary of HEW to administer the 'interim' standards with a view to the just accomplishment of the purpose of allowing for reviewed Part B claims to establish disability within the meaning of the

1977 amendments as they apply to all reviewed Part B claims." It is found in the statement of managers under the heading of "Review."

These amendments I believed were not intended to require payment of a claim where the evidence in the file is fragmentary or otherwise incomplete, but to require payment of a claim where there is evidence of the presence of pneumoconiosis and that it has caused disability for performing coal mine work. If in reviewing its files of previously denied cases HEW finds incomplete evidence, such as X-ray evidence of simple pneumoconiosis only (which X-ray evidence standing alone is insufficient to establish eligibility), it is expected to transfer the case to the Department of Labor for a determination under part C with an opportunity for the claimant to supplement the evidence already on record.

I believe it would be inequitable, and contrary to sound program administration, if the Departments of Labor and HEW were to give disparate treatment to claimants in carrying out their dual responsibilities for reviewing previously denied claims. I felt the departments must be mindful not only of the potential impact on the new trust fund, which may be significantly underfunded on the basis of the established sales tax rate, but also that any claims approved on the basis of inadequate evidence may be controverted by operators who may be found liable for benefits. This could lead to an avalanche of costly litigation, and add months and possibly years to the final adjudication process.

Also important to this legislation are the provisions concerning the evidentiary value of lay affidavits and of X-rays submitted by claimants' physicians. With respect to X-ray evidence, I am pleased that the bill essentially retains the intent of my amendment adopted by the Human Resources Committee to the effect that a positive interpretation by a claimant's physician would be accepted as evidence of pneumoconiosis without rereading by expert radiologist consultants to the Government if the submitted X-ray meets the Department of Labor's criteria for X-ray quality, was initially interpreted by a board-certified or board-eligible radiologist, and there is no reason to believe it is fraudulently misrepresented.

Of course, acceptance by the Secretary of such X-rays, refers to the Department's initial determination, and does not preclude any operator who may be liable for benefits from contesting the claimant's X-ray evidence or from seeking another X-ray. The amendment to section 413(b) concerning affidavits simply means that such evidence may be used to establish disability only where it is the only evidence available, and that affidavits alone are not sufficient to overcome more tangible evidence if in the record. And, even if there is not other evidence available, the affidavits should contain sufficient evidence that the miner was disabled, or died, due to pneumoconiosis in light of the applicable presumptions.

With the adoption of this conference report, I very much hope that the Senate will now broaden its concern to consideration of the wholly inadequate and inequitable compensation of the victims of other occupational diseases. The improvements in State workers compensation systems necessary to provide compensation in the case of dozens of other categories of employees disabled by occupational diseases—including textile workers, asbestos workers, and many others—will clearly not come about until Federal legislation establishing minimum standards for these State systems has been enacted.

I intend to join with the distinguished chairman of the Senate Human Resources Committee, to renew my efforts, to enact such legislation. Senator WILLIAMS and I have applied ourselves for some years to this problem. I know he feels as I do. We will continue to do so. I hope to enlist again in his leadership in the same activities which have brought so many reforms into the field of health and safety for working people. I know we will be thoroughly joined by Senator RANDOLPH, and I have felt that there is no reason why we should deny the coal miners their opportunity to get elementary justice in this respect because others were left out. We will wage our fight for others, be they asbestos workers or textile workers, because we are learning that these diseases have very long-term incubation periods and are very disabling. We take a lot of our industrial production out on the backs of our workers in terms of their health.

Finally, I would like to congratulate JENNINGS RANDOLPH and CARL PERKINS. Never did people who are injured have two more devoted and impassioned advocates than these two legislators. I think they have scored a signal success, but also one which gives proper accommodation to the fact that the industry should pay its way and that the taxpayers of the United States should not carry that load.

I thank the Chair, and I reserve the remainder of my time.

Mr. LONG. Mr. President, I want to thank the Senator from West Virginia, the Senator from New York, as well as the Senator from New Jersey for their comments here today.

The conferees from the Finance Committee have worked in harmony and concert with the conferees from the Human Resources Committee in order to develop both the black lung tax legislation, which the Senate passed in December, and the black lung benefits bill which we are considering today. Each of the two committees has acted responsibly in recognizing the jurisdiction of the other, with respect to the current legislation and with respect to future oversight and legislation in connection with the black lung program. Thus, the Finance Committee jurisdiction extends to those matters covered in H.R. 5322, the Black Lung Benefits Revenue Act of 1977, including the new excise tax on coal, the establishment of the black lung disability trust fund, the structure and administration of the trust fund, the purposes authorized for expenditures out of the trust fund, and provisions as to self-insurance trusts established by coal mine operators. The Human Resources Committee jurisdiction extends to those matters covered in H.R. 4544, which we are considering today, including eligibility for black lung benefits, rules for evidence of disability, claims adjudication, and related benefit provisions. I assure Senators that the Finance Committee, working jointly with the Human Resources Committee, will be alert to the needed levels of funding for approved claims under H.R. 4544. Based on the cost estimates set forth in the committee reports in both the House and Senate, by the end of fiscal year 1984 the new excise tax on coal will have produced more revenue than the estimated payments out of the trust fund to that time.

Mr. President, I congratulate the Senator from West Virginia (Mr. RANDOLPH) for his great work on this bill. This has been a long, continuous struggle for him, dating back to 1969. His indefatigable never-say-die efforts have prevailed again.

Mr. ALLEN. Mr. President, will the Senator yield?

Mr. HUDDLESTON. Mr. President, will the Senator yield me 1 minute?

The PRESIDING OFFICER. The Senator from New York has 1 minute left; the Senator from Louisiana has 2 minutes remaining.

Mr. LONG. I yield 1 minute.

Mr. HUDDLESTON. I thank the Senator. I just want to add my commendations to the Senator from Louisiana (Mr. LONG), the Senator from West Virginia (Mr. RANDOLPH), the Senator from New Jersey (Mr. WILLIAMS) and the Senator from New York (Mr. JAVITS) for joining with our colleague over on the other side of the building, in the House, Congressman PERKINS.

I am sure my colleague from Kentucky (Mr. FORD), who is in the chair at the present time, joins me in expressing our appreciation from a State that has many citizens who are afflicted with this disease, and who will benefit greatly from the farsightedness that has been demonstrated with this particular bill.

I think it will expedite the process. It shifts the burden from the taxpayer to the coal producers, and it will be of great benefit to our State and to all citizens who have been afflicted by the so-called black lung disease. I thank the Senator very much.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that both Mr. JAVITS and Mr. RANDOLPH have 4 additional minutes equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered. Senators have 4 minutes divided as they wish.

Mr. RANDOLPH. Mr. President, with the Senator from Kentucky (Mr. HUDDLESTON) saying what he said, expressing appreciation to those of us who were perhaps more closely identified with the actual hearing process and the writing of the bill, I want to say that the two Senators from Kentucky, both of them in the Chamber now, have certainly been very ardent advocates of this legislation. Senator FORD and Senator HUDDLESTON understand the problems of coal mining in the State of Kentucky—the largest producer of bituminous coal—and in our

Nation. Our action today is to me an indication of their continuing desire to see that which is right be done in the Congress of the United States for those afflicted with black lung. I thank the Senators.

Mr. JAVITS. Mr. President, I yield 2 minutes to the Senator from Alabama, and I reserve 1 minute to myself.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. ALLEN. I thank the distinguished Senator from New York.

Mr. President, I wish to commend and pay tribute to the distinguished Senator from West Virginia (Mr. RANDOLPH), to the distinguished Senator from New Jersey (Mr. WILLIAMS), the distinguished Senator from New York (Mr. JAVITS), and the distinguished Senator from Louisiana (Mr. LONG) for this excellent and meritorius conference report that has been brought back to the Senate.

Certainly it illustrates that Congress does have a heart, it does have a conscience, because to stabilize the matter of black lung claims and to provide that those who are victims of black lung can obtain the benefits to which they are entitled, make this legislation landmark legislation.

I was very much interested—and the Senator from West Virginia (Mr. RANDOLPH) and the distinguished Senator from New York (Mr. JAVITS) and also the distinguished Senator from New Jersey (Mr. WILLIAMS) will recall—that last year Senator SPARKMAN and I introduced a bill that would have provided for red lung benefits for miners in the iron ore mines, and also were interested in brown lung that textile workers have, and white lung that asbestos workers and lime plant workers have.

I was very much interested in the statement of the distinguished Senator from West Virginia that hearings would be held this year on these and other respiratory illnesses of workers, and I would like for him to state again, if he would, when it is anticipated that those hearings will be held.

Mr. RANDOLPH. Mr. President, I appreciate the question. The chairman of our committee is present. He has an intense interest in this subject as well as others of us. Perhaps the chairman (Mr. WILLIAMS) should make that response and if necessary, I will join with him.

Mr. ALLEN. I thank the Senator.

Mr. WILLIAMS. Mr. President, I assure the Senator from Alabama that he has kept the matter before us——

The PRESIDING OFFICER. The Senator's time is expired.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that I may have 4 more minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I yield 3 minutes to the Senator from New Jersey.

Mr. WILLIAMS. I thank the Senator.

The Senator from Alabama has kept before us the fact that there are other respiratory diseases associated with the workplace. Brown lung is one of those diseases; red lung, which affects those who work in iron, is another.

Mr. ALLEN. Yes.

Mr. WILLIAMS. I know of the particular concern of the Senator from Alabama about that. The Senator from New York and I are, and have been over quite a period of time, developing comprehensive legislation that will deal expressly with these other diseases that should be compensable.

The timing, we can say, is this: Because the committee must proceed before May 15 on the reauthorization of existing programs. Our wise decision to look at all reauthorizations basically, or nearly from the ground up, will occupy us until that Budget Committee deadline of May 15.

Then the comprehensive workers' compensation bill will be before us, and hearings will be held, and we of course, will welcome at that time——

Mr. ALLEN. That would be this year?

Mr. WILLIAMS. This year. We will welcome whatever input the Senator from Alabama may have.

Mr. ALLEN. I hope that when that time arrives, the distinguished Senators, the Senator from New Jersey, Mr. WILLIAMS) and the Senator from New York (Mr. JAVITS) will allow the Senators from Alabama to join as cosponsors of this legislation.

Mr. WILLIAMS. We certainly will present our legislation to the Senator from Alabama, and would welcome, indeed, his cosponsorship.

Mr. ALLEN. I thank the distinguished Senator.

I would like to commend also the Finance Committee on devising the trust fund approach, whereby claims will be able to be paid through the trust fund. I think that is a very sound and fiscally responsible approach.

I again commend the managers of the conference report.

Mr. JAVITS. Mr. President, let me take just 1 minute to associate myself with Senator WILLIAMS again, and assure him of my cooperation in every way.

Mr. President, as to the especially difficult trust fund issue, Senator LONG, I think, has made every effort to define the substantive responsibilities which we have and the tax responsibilities which the Finance Committee has. He used one phrase regarding Finance Committee juridiction: "Purposes for expenditures of the trust fund." I just wanted to make it clear that his original definition of Finance Committee jurisdiction is satisfactory, and that I would expect that this assertion fits within the context of the basic definition. If understood that way, it is reasonable and proper; but not if understood as an enlargement of Finance Committee jurisdiction. I just wanted to put my own caveat on the Record in that regard.

Finally, Mr. President, I think this has been a most creditable endeavor by all concerned—Senator RANDOLPH, Senator LONG, and Senator WILLIAMS—and I hope very much the Senate will agree to the conference report.

Mr. ROBERT C. BYRD. Mr. President, I wish to add my commendation to those so properly expressed by our colleagues with respect to the work performed by my senior colleague (Mr. RANDOLPH) and by the ranking members, Mr. WILLIAMS and Mr. JAVITS, and also by Mr. LONG and others, on this major legislation. It is a very important piece of legislation, and Senator RANDOLPH and the others have worked long and very hard in the process of the hearings and in the management of the bill on the floor and then in conference. They met with difficult problems in conference, but their dedication, their purpose, and their tenacity have prevailed. These plaudits are well deserved, and I am happy to add my own to those that others have so well expressed.

Mr. RANDOLPH. Mr. President, I thank my colleague. I do not forget what my colleague from West Virginia did in 1969 when we started this long trail, when he joined very, very actively in securing the funds with which the first payments could be made to the sufferers from black lung disease. I want the record to indicate that when I say this, I have a full knowledge of the contribution he has made and is making in helping those afflicted with black lung.

Mr. ROBERT C. BYRD. Mr. President, I thank my colleague for his generous remarks.

Mr. RANDOLPH. Mr. President, I urge the adoption of the conference report on H.R. 4544, the Black Lung Benefits Reform Act of 1977.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

Mr. JAVITS. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, in adopting the black lung conference report today, we have recommitted ourselves to assuring that our Nation's miners who have been or will become afflicted with this dread disease will receive just compensation.

During our original consideration of the Senate bill last summer, I indicated that we must assure adequate protection of our most precious resource—the miner. This legislation goes far to assure such protection.

The definition of total disability as contained in this measure assures that employment at the time of death does not arbitrarily bar a survivor's claim for total disability benefits. In the past it would have. Also in the past, if a miner was working when the disease was discovered he or she could not have been found totally disabled. Employment is no longer a conclusive bar to a determination of total disability. However, no miner can receive benefits if he is still employed.

In the past, one of the most controversial aspects of the old law was the determination of whether or not the miner had the disease. Under this legislation a more realistic approach is taken and other medical evidence, as well as affidavits in certain cases, may be used to establish the presence of the illness.

The legislation also assures that miners previously denied black lung benefit payments will be permitted to have their claims reconsidered to determine if they are eligible.

Additionally, the bill provides an insurance mechanism through the Secretary of Labor to provide coverage for coal operators who cannot secure workers compensation coverage or who are unable to do so at a reasonable cost.

Mr. President, we must recognize that one of the costs which we must bear in order to enjoy our energy-oriented lifestyle is the social cost we owe those who make such a lifestyle possible. We must realize that there is no way in which we can completely compensate our miners who suffer from black lung. This bill, however, at least recognizes the debt which we as a society owe them.

NUCLEAR NONPROLIFERATION ACT OF 1977

The PRESIDING OFFICER. The Senate will resume the consideration of the unfinished business, which the clerk will state.

The legislative clerk read as follows:

A bill (S. 897) to strengthen United States policies on nonproliferation and to reorganize certain export functions of the Federal Government to promote more efficient administration of such functions.

The PRESIDING OFFICER. Who yields time?

UP AMENDMENT NO. 1186

Mr. McCLURE. Mr. President, I have an unprinted amendment which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an unprinted amendment numbered 1186: On page 115, line 15—

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I ask unanimous consent that the amendments which I have sent to the desk be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments are as follows:

On page 115, line 15, strike "." and insert in lieu thereof;

"; *Provided Further*, That notwithstanding subsection 402(d) of the Department of Energy Organization Act (P.L. 95-91), the Secretary of Energy and not the Federal Energy Regulatory Commission, shall have sole jurisdiction within the Department of Energy over any matter arising from any function the Secretary of Energy in this section."

On page 120, line 6, insert new subsection (c) as follows:

"(c) Notwithstanding subsection 402(d) of the Department of Energy Organization Act (P.L. 95-91), the Secretary of Energy, and not the Federal Energy Regulatory Commission, shall have sole jurisdiction within the Department of Energy over any matter arising from any function of the Secretary of Energy in this section."

Mr. McCLURE. Mr. President, the two amendments which I have submitted I will describe as follows:

Section 402(d) of the Department of Energy Organization Act specifies that any matter involving a decision based on a hearing on the record, whether required by law or based on a discretionary decision by the Secretary, would be placed in the Federal Energy Regulatory Commission.

This amendment would insure that any matter to be decided on the basis of a hearing on the record would not, as a matter of law, be placed in the FERC, but rather could be retained within the jurisdiction of the Secretary of Energy.

A similar amendment was made in S. 1811 to deal with many of the functions transferred from ERDA to the Department which involved such hearings, such as patent appeals, contracting actions, et cetera.

Printed amendment No. 1595 would have, by statute, limited any application of the Administrative Procedure Act, and provided for limited judicial review for section 303, dealing with subsequent arrangements. Because of the opposition of the floor managers to that amendment, now the only possible protection against full administrative procedures dealing with subsequent arrangements would be on the basis of either the foreign policy exemptions in the Administrative Procedure Act or failure of a potential intervenor to obtain standing, and thereby trigger formal proceedings in a material matter.

We certainly hope they are correct in their assessment. We do not intend that this amendment in any way be construed to suggest that the Administrative Procedure Act should apply. However, there is some remote possibility that one or more classes of subsequent arrangements could be subjected to the Administrative Procedure Act, which may involve a formal hearing on the record.

If that were to occur, under the Department of Energy Organization Act, the on-the-record hearing would automatically trigger the jurisdiction of FERC. There certainly is no public policy to be served by placing subsequent arrangement considerations with the nonproliferation type findings contained in section 303 of the FERC.

Also, for certain of the subsequent arrangements, the Secretary of Energy might have reason, in his discretion, to schedule a formal hearing for consideration of public views and comments. Under section 402(d) of the DOE Organization Act, that discretionary decision might also trigger FERC jurisdiction. Again, there is no reason further to complicate these proceedings by placing them in the wrong reviewing and decisionmaking agency.

I understand that the floor managers will accept this amendment and I hope that that is true.

Mr. GLENN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WILLIAMS assumed the chair.

Mr. GLENN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, we have worked out the language of this, I believe, satisfactorily, and I would be glad to agree to the amendments of the Senator from Idaho as proposed, and as proposed en bloc.

Mr. McCLURE. With that understanding, I yield back the remainder of my time on the amendments.

Mr. GLENN. I yield back the remainder of my time on the amendments.

The PRESIDING OFFICER. The question is on agreeing to the amendments.

The amendments were agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendments were agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENTS NUMBERED 1609 AND 1612

Mr. McCLURE. Mr. President, I call up my printed amendments numbered 1609 and 1612 and I ask unanimous consent they may be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes unprinted amendments numbered 1609 and 1612.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments are as follows:

On page 156, line 19, after the comma, insert "and to cooperate with other nations in protecting the international environment from radioactive, chemical, or thermal contamination arising from nuclear activities".

On page 102, line 23, through page 103, line 2, strike subsection 2(e).

Mr. GLENN. Will the Senator yield for a moment?

Mr. McCLURE. I am happy to.

Mr. GLENN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. GLENN. The Senator from Ohio has an amendment to one of these amendments being proposed en bloc, is it necessary to split them and consider them separately?

The PRESIDING OFFICER. It would not be necessary to split them and consider them separately. It would not.

Mr. GLENN. I thank the Chair.

Mr. McCLURE. Mr. President, these two amendments offered en bloc have the effect of deleting the environmental policy statement from the policy section and placing it in the assistance to developing countries title, which is title V of the bill.

These amendments have the effect of moving a statement of policy regarding international cooperation in protecting the international environment from radioactive, chemical or thermal contamination arising from nuclear activities to the title of the bill dealing with international cooperation, title V. The concern regarding the placement of the policy statement is that it could be argued that congressional intent, as interpreted on the basis of this statement, was that the various provisions of the National Environmental Policy Act should apply to nuclear exports. As was discussed at length on Thursday during the earlier debate on this bill, it is the intent of the sponsors that the bill remain neutral on the issue of the NEPA requirements for these exports. Consequently, moving the statement to title V will avoid any misinterpretation of congressional intent in that regard. At the same time, however, it is also clear that moving the policy statement is not intended to prejudice one way or the other the current debate on the NEPA application to international activities.

I understand the floor managers will accept these two amendments in exchange for an unprinted amendment adding a new section 407 to title IV on agreements for cooperation. The new section 407 would encourage the President to attempt to get provisions in new agreements for cooperation that would provide for cooperation in this environmental area. Specifically, the section would read as follows:

SEC. 407. The President shall endeavor to provide, in any agreement entered into pursuant to Section 123 of the 1954 Act, for cooperation between the parties in protecting the environment from radioactive, chemical or thermal contamination arising from peaceful nuclear activities.

I am prepared to support the adoption of section 407 at this time with the understanding similar to that of the floor managers and myself on amendments No. 1609 and No. 1612, to the effect that adoption of the new section 407 in no way prejudices positively or negatively the current debate on the application of NEPA to nuclear exports. Based on the assurance of an accompanying statement of neutrality, I am convinced that this section would not do any violence to the bill, but rather would indicate the view of Congress as to the proper vehicle for cooperation in protecting the environment from radioactive, chemical or thermal contamination arising from nuclear activities associated with our nuclear exports. This would clearly establish the congressional intent that such cooperation would be the subject of agreement of both parties, that is, the United States and the importing nations, as opposed to any implication that this would be a unilateral, statutorily mandated requirement for any specific environmental effort related to a nuclear export.

I also understand that the floor managers are prepared to indicate expressly their intention to support the maintenance of section 407 and the policy statement as moved to title V during the forthcoming Senate-House conference. I also understand that the floor managers will commit themselves to maintaining the strict neutrality of the nonproliferation legislation in its final conference form on this issue.

To place all this into an acceptable form on both sides, I proposed engaging the floor managers in a colloquy specifically discussing the relationship of amendment No. 1609, No. 1612, the unprinted new section 407, the neutrality of the bill as it will pass the Senate regarding NEPA, and the commitment of the floor managers to maintain that neutrality in the final conference bill.

Mr. President, it might be easier if the managers of the bill would propose their amendment to the amendments now pending and then we could engage in the colloquy as to the effect of these several actions.

UP AMENDMENT NO. 1187

Mr. GLENN. Mr. President, I send to the desk an unprinted substitute to amendment No. 1609 and ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN) proposes an unprinted amendment numbered 1197 as a substitute to amendment No. 1609.

Mr. GLENN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike the material in quotation marks and insert in lieu thereof the following new material: "to cooperate with both developing and industrialized nations in protecting the international environment from contamination arising from both nuclear and non-nuclear energy activities,"

Mr. GLENN. Mr. President, we are all aware of the environmental problems concerned with the development of energy resources, both nuclear and nonnuclear. The development of nonrenewable energy resources in particular cannot be done in an environmentally benign fashion. It is therefore, appropriate for the United States to cooperate with other nations by assisting them in the development of nuclear energy and nonnuclear energy activities in an environmentally acceptable way. Accordingly, since we are proposing in title V that we cooperate with other nations in developing energy resources in so called "developing countries," it behooves us independently of the nature of such a program to make a policy statement regarding our commitment to protect the international environment.

Mr. President, in introducing the amendments to title V of this bill, I do wish to say a few words concerning the reason why this title was included in the bill. Any strategy for nuclear nonproliferation must deal with the question of where proliferation begins. And on this score there can be no argument, proliferation risk begins however small it may be when a nation takes its first step toward nuclear power. We have attempted to deal with that internationally in a variety of ways including the Nuclear Non-Proliferation Treaty. Article 4 of that treaty says that parties to the treaty in a position to do so shall cooperate in contributing to the further development of the applications of nuclear energy for peaceful purposes, especially in the territories of nonnuclear weapon states, party to the treaty, and with due consideration for the needs of the developing areas of the world. In other words, the United States does have a commitment to aid other countries in developing nuclear energy resources if those countries sign the NPT. And indeed, we have provided massive assistance through the granting of low interest eximbank loans and through technical education and research. On the other hand, the United States, at the moment, has no commitment with respect to the other side of the energy coin, namely a commitment to cooperate with other countries in the development of indigenous nonnuclear energy resources, especially in developing countries.

This imbalance needs to be redressed, not only because of the question of proliferation, but because there are additional benefits to be gained by making such commitments beyond nonproliferation. For instance, there will political and economic stabilization in developing countries through reduction of foreign oil dependency, as well as dependency on capital intensive technology. In addition, developing countries can provide field laboratories for development of soft technologies such as solar and biomass.

Finally a commitment by the United States in this area can provide the same type of high-minded motivation to young people with technical training, as the peace corp has provided in the past. In fact title V calls for a study of the feasibility of expanding the authorized program into an international scientific peace corp for developing indigenous energy supplies in developing countries. Some have questioned why title V should be included in a bill on nuclear nonproliferation. And my opening statement answers this query. That is, countries that can meet their energy needs by indigenous nonnuclear means should be encouraged to do so.

In his testimony before the Senate Energy and Natural Resources Committee, on September 13, 1977, Robert Frye, who was then the Acting Administrator for ERDA, stated that—

I wish to emphasize our belief that there is a critical need for expanded cooperation with other countries particularly developing countries in examining the role that nonnuclear as well as nuclear technologies can play in national energy programs. We therefore support the objectives of Title V of S. 897.

Last fall when S. 897 was being marked up by the Senate Foreign Relations Committee, I was privileged to receive a letter from our late and dear colleague, Senator Hubert Humphrey. I would like to read an excerpt from this letter and then enter it into the record:

This is to advise you of my strong and unequivocal support for Title V to S. 897, which directs the United States to cooperate with other nations, international institutions, and private organizations to assist in the develop-

ment of non-nuclear and renewable sources of energy in developing countries.

This title is important for two reasons. First, one of the major obstacles to equitable economic growth in developing countries is access to inexpensive, renewable, and assured energy supplies. Unless, these energy needs can be met adequately, attempts to come to grips with the tremendous economic and social problems confronted by these countries will be continually frustrated.

Second, if we are, indeed, to have any chance of bringing nuclear proliferation under reasonable control, then it is imperative that alternative, renewable sources of energy be developed in developing countries. To ignore this fact, in my estimation, will only encourage growing attempts on the part of nations to acquire nuclear technology as an energy source. This, in turn, can only enhance prospects for the proliferation of weapons-grade nuclear material.

In essence, our concern of the dangers of nuclear proliferation will only be credible if we are willing to draw upon our own technological expertise and capability in assisting developing countries in meeting their rising energy needs. Therefore, if S. 897 is to have any meaning whatsoever, Title V must remain an integral part of this legislation.

Mr. President, that is the end of the quotation from Senator Humphrey's letter to me. I certainly appreciated his comments and his insight in forwarding that letter, and the views he expressed, because I believe he states very succinctly and to the point the objective of title V, and what we are trying to accomplish with it. I ask unanimous consent that the entire letter be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMMITTEE ON FOREIGN RELATIONS,
Washington, D.C., September 28, 1977.

Hon. JOHN GLENN,
U.S. Senate,
Washington, D.C.

DEAR JOHN: This is to advise you of my strong and unequivocal support for Title V to S. 897, which directs the United States to cooperate with other nations, international institutions, and private organizations to assist in the development of non-nuclear and renewable sources of energy in developing countries.

This title is important for two reasons. First, one of the major obstacles to equitable economic growth in developing countries is access to inexpensive, renewable, and assured energy supplies. Unless these energy needs can be met adequately, attempts to come to grips with the tremendous economic and social problems confronted by these countries will be continually frustrated.

Second, if we are, indeed, to have any chance of bringing nuclear proliferation under reasonable control, then it is imperative that alternative, renewable sources of energy be developed in developing countries. To ignore this fact, in my estimation, will only encourage growing attempts on the part of nations to acquire nuclear technology as an energy source. This, in turn, can only enhance prospects for the proliferation of weapons-grade nuclear material.

In essence, our concern of the dangers of nuclear proliferation will only be credible if we are willing to draw upon our own technological expertise and capability in assisting developing countries in meeting their rising energy needs. Therefore, if S. 897 is to have any meaning whatsoever, Title V must remain an integral part of this legislation.

In conclusion, I want to take this opportunity to commend you for the fine work you have done with this measure and in particular for the foresight you have exhibited in developing Title V.

With warm personal regards.

Sincerely,

HUBERT H. HUMPHREY.

Mr. GLENN. That, Mr. President, concludes the remarks I wish to make. I ask that they be printed in the RECORD in the area in which we were considering the substitute to my amendment No. 1609.

Mr. PERCY. Mr. President, will the Senator yield?

Mr. GLENN. Certainly.

Mr PERCY. I think the comments he has made are of considerable importance.

I would like to note that Senator GLENN and I have worked on so many things together that we are of one mind in this regard, that we have a duty and responsibility now not only to do everything we conceivably can to start working on alternate energy sources here, but to encourage others to do so.

I do not see how we can encourage others to do it unless we do it ourselves. How can we say, "It is all right for us to go the nuclear route and depend entirely or overwhelmingly on nuclear products but you should go some other route."?

It is for that reason that so many of us in the Senate—50 of us are going to sponsor Sunday, May 4, as Solar Energy Day and ask that the President so proclaim that day of this year; and it is for that reason that I am introducing legislation to require that the State Department buildings that we build abroad utilize solar technology, as an example of using an infinite source of energy rather than a finite source.

Our distinguished present Presiding Officer (Mr. MATSUNAGA) is evidencing his leadership in this field, and has been strong in his encouragement of this effort.

Recently, while on a personal trip to France, I visited with the President of the International Foundation for Cultural and Economic Development, where they had just completed a $250 million facility, built with local and provincial funds of France, to be an international conference center.

They have offered the facilities of their conference center for a conference that would embrace 400 or 500 representatives from countries all over the world, developing and developed countries, to discuss the subject of energy. France would be a good place to hold such a conference.

I have discussed this matter with the Russian delegation that was here just 2 weeks ago, to see whether they would have an interest. These are the kinds of things the developed countries of the world ought to be doing together. But we would have to go there able to say, "This is what we have done, and this is the technology and know-how we can share with you."

Certainly the Department of Energy has a tremendous responsibility to be innovative, creative, bold, and imaginative in what we do here in this country, so that we can then implement and carry out those sections of the foreign aid bill and those sections of the legislation authorizing a national energy policy to promulgate this idea.

I concur with and commend our distinguished colleague from Ohio on the comments he has made. And certainly it is appropriate that we should quote Senator Humphrey, who was a founding member and cochairman of the Alliance to Save Energy, because he recognized, above all, that the best way to create a new source of energy is to conserve the energy we have, and then go into other sources of energy. We will always be able to use the petroleum products we have, but once we use them all, they are gone, and it will take millions of years to create new resources.

It behooves us to use wind, waves, water power, and everything else we have in developing new sources of energy for the world.

Mr. McCLURE. Mr. President, will the Senator yield, on whatever time I have remaining on Amendment 1609?

Mr. PERCY. I yield.

Mr. McCLURE. I thank the Senator. Without unduly prolonging this discussion, I want to underscore the comments which both the Senator from Illinois and the Senator from Ohio have made with regard to the necessity and desirability of focusing on other forms of energy. As was mentioned last week, one of the nations which figures so importantly in the energy debate in the world today, Brazil, is also moving forward much more rapidly than we in the area of substitution of alcohol for petroleum products. Their mixture of 20-percent alcohol to 80-percent gasoline might well be a pattern for this Government. Often other nations may take actions that perhaps we should try to follow.

I might also mention that another government much in the news on energy is the Government of Saudi Arabia, which is very much interested in cooperative efforts with the United States in the field of solar energy. Just 2 weeks ago I was in Riyad, and discussed with them the proposal for a joint effort of $10 million in the development of solar energy technology. I was pleased to be able to urge them to join with us in that effort; even though it does not show likelihood of an immediate substitution for massive quantities of petroleum, certainly it does hold promise for significant additions to the world's arsenal of energy that could be a very constructive and useful addition, and it underscores the commitment, I think to the conservation of fossil fuels, their own concern about the conservation of their national assets, which is a matter of concern to that government.

So I join with my colleagues in suggesting that nuclear power is not the only source of energy for the petroleum or fossil fuel deficient countries.

Mr. PERCY. Mr. President, will the Senator yield for just one remark?

Mr. McCLURE. I am happy to yield.

Mr. PERCY. It is important to note also, and I think the public should understand, that not only is Saudi Arabia, the world's largest oil producer and the owner of the largest oil reserves in the world, looking for practical ways of

sponsoring the development of solar energy, but it has contributed $600,000 to a Virginia school to illustrate that we, too, can convert to solar energy.

Then the Shah of Iran recently contributed $25,000 to the Alliance to Save Energy, to demonstrate that country's interest in showing energy hungry Americans how to use less of the oil that we buy from Iran, because they think we are using it at an unconscionable rate. Also, $25,000 contributions have been made by Standard Oil of Indiana, Standard Oil of California, ARCO, and Union Oil. There is a matching grant of $100,000 from the Ford Foundation, just to tell Americans how to conserve energy and use it more efficiently and effectively and not to waste and squander it. The second part of that, of course, is then to go to alternate sources, which are so important.

I know that my distinguished colleague, who knows a tremendous amount about the energy field and is one of the more knowledgeable men in the U.S. Senate, puts emphasis on that. He is right in the leadership with the petroleum industry, because they also are saying that there has to be another way of doing it, rather than just continuing to draw down on the finite sources we have available to us.

I thank my distinguished colleague.

Mr. McCLURE. I thank my friend for those comments and also for his leadership in the field, which is well known, not only in this body but across the country. I think his actions speak very eloquently for his commitment.

Mr. GLENN. Mr. President, it is my understanding that the distinguished Senator from Idaho has agreed to the language proposed in this amendment.

Mr. McCLURE. If the Senator from Ohio will yield, my understanding of the substitute for No. 1609 is the rewording of the language so that it conforms to the format and the structure of the bill at this point, and it has my support.

Mr. GLENN. That is correct.

Mr. President, I am prepared to yield back the remainder of my time on this.

Mr. McCLURE. I yield back the remainder of my time on this.

The PRESIDING OFFICER. The question is on agreeing to the unprinted substitute amendment No. 1187 offered by the Senator from Ohio.

The amendment was agreed to.

Mr. GLENN. Mr. President, I move to reconsider the vote by which the substitute was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, I suggest that we go ahead and have amendments 1609 and 1612, as amended; that the managers of the bill then offer their amendment with regard to section 407; and that following that, we have the colloquy on the meaning of this action. Is that agreeable to the manager of the bill?

Mr. GLENN. That is agreeable to the Senator from Ohio.

Mr. McCLURE. If that is agreeable, then I yield back the remainder of my time on amendments 1609 and 1612.

Mr. GLENN. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendments as amended.

The amendments, as amended, were agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendments were agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GLENN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. GLENN. As I understand it, amendments 1609 and 1612 were agreed to en bloc.

Mr. McCLURE. The Senator is correct.

The PRESIDING OFFICER. That is correct.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum. I ask unanimous consent that the time be charged equally against both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GLENN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

(At this point the Senate considered the matter concerning authorization for artists to be in gallery during consideration of the Panama Canal treaties. By unanimous consent the colloquy is printed elsewhere in today's RECORD.)

Mr. GLENN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. GLENN. As to the status we were in before the quorum call, is there any reason why I could not bring up another amendment at this time?

The PRESIDING OFFICER. No amendment is pending.

Mr. McCLURE. Mr. President, will the Senator yield for a parliamentary inquiry?

Mr. GLENN. I yield.

Mr. McCLURE. Is it proper to request that the amendment brought up at this time will be placed in the RECORD following the sequence that had been established earlier and the amendment which the Senator from Ohio will offer in regard to section 407 and the colloquy on amendment 1609 and 1612, so that those amendments en bloc, plus the amendment of the Senator from Ohio on section 407 and the colloquy thereon would appear sequentially? The amendment offerred now would follow in the RECORD after that.

Mr. GLENN. That is agreeable to the Senator from Ohio.

Mr. McCLURE. I ask unaniomus consent.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GLENN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1188

(Purpose: To provide for the participation of the Armed Services Committee of the House of Representatives and the Senate in the case of certain agreements for ccoperation)

Mr. GLENN. Mr. President, I send to the desk an unprinted amendment and ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. Without objection, the amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN) proposes unprinted amendment No. 1188.

Mr. GLENN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 135, line 22, immediately after "Representatives" insert a comma and the following: "and in addition, in the case of a proposed agreement for cooperation arranged pursuant to subsection 91c., 144b., or 144c., the Committee on Armed Services of the House of Representatives and the Committee on Armed Services of the Senate,".

On page 149, line 9, immediately after "Senate," insert the following: "and in addition, in the case of a proposed agreement for cooperation arranged pursuant to subsection 91c., 144b., or 144c., the Committee on Armed Services of the House of Representatives and the Committee on Armed Services of the Senate,".

Mr. GLENN. Mr. President, this amendment would give the Committee on Foreign Relations and the Committee on Armed Services in the Senate and the Committee on International Relations and the Committee on Armed Services in the House shared responsibility for oversight and review of military agreements for nuclear cooperation. This approach is consistent with that of the comparable House bill, H.R. 8638. Agreements for peaceful cooperation would remain the sole responsibility of the Senate Committee on Foreign Relations and the House Committee on International Relations.

Under the reorganization of the Senate last year, the Committee on Foreign Relations was given jurisdiction over all "executive agreements except reciprocal trade agreements."

It is worth emphasizing that the only specified exception to the committee's exclusive jurisdiction over executive agreements is reciprocal trade agreements. Thus, it is clear that all agreements for nuclear cooperation will fall within the exclusive jurisdiction of the committee.

This point as it applies to agreements for nuclear cooperation is reinforced by clause 13 of the jurisdictional grant to the Foreign Relations Committee. That clause gives responsibility for "international aspects of nuclear energy, including nuclear transfer policy."

Although the committee will have full jurisdiction over all agreements for nuclear cooperation, as a matter of comity, the floor managers of this bill for the Committee on Foreign Relations, the Senator from Illinois (Mr. PERCY), and I, believe that responsibility for military agreements for nuclear cooperation should be shared by the Committee on Foreign Relations and the Committee on Armed Services. This would enable review from a foreign policy and military perspective and would allow the application of the expertise of both committees in a complex and critically important area. I expect that the two committees can work together to devise a mutually acceptable and effective way to handle military agreements for nuclear cooperation.

I believe the distinguished Senator from Idaho, Senator MCCLURE, has agreed to this amendment and we are prepared to proceed to a vote.

Mr. McCLURE. Mr. President, I say to the distinguished Senator from Ohio yes, indeed, I do support this amendment and support its adoption.

I yield back the remainder of my time.

Mr. GLENN. I yield back the remainder of my time.

The PRESIDING OFFICER (Mr. MATSUNAGA). Without objection, the amendment is agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Who yields time?

Mr. McCLURE. Mr. President, I ask unanimous consent that it be in order for me to offer another amendment which again will appear sequentially as was agreed to on the last amendment.

Mr. GLENN. I have no objection to that, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1189

Mr. McCLURE. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho, Mr. MCCLURE) proposes unprinted amendment No. 1189.

Mr. McCLURE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 125, line 13, after the comma, insert "or would modify any existing export criteria under this section,".

Mr. McCLURE. Mr. President, section 304 of the bill establishes a procedure for expedited congressional consideration of additional export criteria in the event that either the House or the Senate passes a joint resolution which would adopt additional criteria. This unprinted amendment would modify that section to also incorporate the concept of expedited procedures for a modification of an existing criteria. The rationale for the expedited procedures for new criteria was that there would be substantial uncertainty in the international community if one House of Congress were to pass a new export criteria to this bill.

The argument is that expedited procedures will insure that the Nuclear Regulatory Commission, the executive branch, and our nuclear trading partners would get a relatively quick decision on whether or not the other House of Congress was supportive of that criteria, rather than have it hanging as a potential problem for the export process. It has not always been clear that that was the only motivation for this expedited procedure for new criteria, since there is some sentiment that the sponsors have the hope of tightening the screws over time in the future.

On that basis, there was considerable opposition to the section of the bill that would accomplish that purpose. This would be a compromise approach. Addition of the language in the unprinted amendment would expand the application of expedited procedures, in order to also include possible modification to some of the criteria in the act. While this could be misused to make them more stringent, it also would provide flexibility in the future for a fix to problems which will undoubtedly arise. It also will insure that if either House does make a modification by amendment that there will not be the same uncertainty which has been mentioned as the rationale for the original language in the bill.

This amendment, I hope, will be acceptable to the floor managers of the bill.

Mr. GLENN. Mr. President, the suggested change is acceptable and we are glad to accept it and yield back my time if the Senator from Idaho yields back his time.

Mr. McCLURE. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Who yields time?

UP AMENDMENT NO. 1190

Mr. GLENN. Mr. President, I send to the desk an unprinted amendment and ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. Without objection, the amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN) proposes unprinted amendment numbered 1190.

On page 156, following line 12, insert the following new section:

"PROTECTION OF THE ENVIRONMENT"

407. The President shall endeavor to provide in any agreement entered into pursuant to section 123 of the 1954 Act for cooperation between the parties in protecting the international environment from radioactive, chemical or thermal contamination arising from peaceful nuclear activities."

Mr. GLENN. Mr. President, the purpose of this amendment is to provide, in the context of new or renegotiated agreements for cooperation, for enhanced cooperation with other nations in protecting the international environment from radioactivity, chemical or thermal contamination arising from peaceful nuclear activities.

This new section of the bill places no additional duties on the President with regard to the protection of the international environment other than in the context of agreements for cooperation and in no respect addresses any requirements which the National Environmental Policy Act of 1969, NEPA, as amended, may impose on the President or any Federal agency to consider such matters in this or any other context.

This is in keeping with the remaining provisions of S. 897 which likewise do not try to address the question of the possible international reach of the 1969 National Environmental Policy Act.

This question is one which will be resolved elsewhere, not in conjunction with this bill, and nothing in S. 897 should be taken as implying a view on the merits of this issue.

Mr. McCLURE. Mr. President, I support the adoption of the amendment offered by the distinguished Senator from Ohio.

Mr. GLENN. I yield back the remainder of my time.

Mr. McCLURE. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, I yield myself such time on the bill as may be consumed.

The PRESIDING OFFICER. The Senator from Idaho is recognized.

Mr. McCLURE. Mr. President, the question of the implications of this bill with respect to application of NEPA have been the subject of considerable discussion in the debate thus far. After a great deal of further discussion between the floor managers and myself I believe we have formulated what may be the best response to the concerns that were discussed on the floor on Thursday. It is my understanding that we will ensure that complete neutrality of the nonproliferation bill by these actions, insofar as application of NEPA to nuclear exports is concerned. Is that the understanding of the floor managers?

Mr. GLENN. Yes, Mr. President. The Senator from Idaho is correct and our

actions are intended to ensure that there is complete neutrality in S. 897 with regards to any NEPA requirements that may be associated with the activities contained in the bill.

Mr. McCLURE. Do I further understand that the new section 407 which is to be added to the bill by Senator GLENN's unprinted amendment and the effect of my printed amendments 1609 and 1612, will have the effect of placing in the bill the statutory provisions for cooperation in the area of environmental protection which is the sole intention of the floor managers, and therefor neither section 407 nor the printed McClure amendments have the effect of requiring or precluding any specific environmental protection action outside of this context? Is that the understanding of the floor managers?

Mr. GLENN. Mr. President, I will respond by saying yes, it is my understanding that our actions with both printed amendment 1609 and 1612 and my unprinted amendment adding new section 407 will simply deal with the issue of international cooperation and environmental protection, but will not in any way indicate a congressional intent to mandate or preclude specific environmental protection actions in connection with the National Environmental Policy Act.

Mr. McCLURE. Am I correct then that this bill would not take any position either in support or in opposition to the currently proposed Council on Environmental Quality Guidelines dealing with international actions in environmental protection?

Mr. GLENN. The Senator from Idaho is correct. These actions will not be a statement of support or opposition by Congress with regards to the CEQ proposed guidelines.

Mr. McCLURE. Am I also correct in understanding that it would be the intention of the floor managers in the conference on the nonproliferation bill to use all possible persuasion with the House conferees to maintain the neutrality of this bill with regard to the National Environmental Policy Act and the pending CEQ guidelines?

Mr. GLENN. Yes, again the Senator from Idaho is correct. The respective floor managers and the leaderships of the committees of jurisdiction of this bill will make every effort in the conference to insure that the final statute maintains the neutrality which we are placing in the bill today with respect to the NEPA issue and the proposed CEQ guidelines.

Mr. McCLURE. Mr. President, I want to thank the floor manager for his restatement of our understandings with regard to this particularly controversial and very critical matter, and I look forward to working with him in the conference on this and many other issues which we have considered both here on the floor and in our many hours of separate consultation on this bill. I thank the Senator.

Mr. PERCY. Mr. President, will the Senator yield? Who has the floor?

Mr. McCLURE. I would be happy to yield to the Senator from Illinois.

Mr. PERCY. I would just like to indicate that I feel the distinguished Senator from Idaho has rendered a very valuable service again on this particular point. It was not the intention of the managers of the bill to get into this entire area. The bill itself is neutral in this regard, and it is important that it so indicates. Certainly the indication we have had that there will be a thorough discussion of this matter at some time in the future is encouraging. But the statement of the amendment itself and the bill itself is very clear indeed that we will endeavor to provide in any agreement entered into pursuant to section 123 of the 1954 act cooperation between the parties in protecting the international environment from radioactive, chemical, or thermal contamination arising from peaceful nuclear activities. This is a statement which none of us could really disagree with.

It is again an objective and a purpose, but it is limited to that, and the colloquy, I think, has helped a great deal.

I fully support the spirit and letter of the colloquy as the intention of the authors of the bill.

Mr. McCLURE. I thank the Senator from Illinois for that comment. I appreciate very much the remarks he has made with regard to my efforts on this bill and also to further the understanding of the floor managers of the bill on this very particular matter.

UP AMENDMENT NO. 1191

(Purpose: Euratom/IAEA Renegotiation)

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an unprinted amendment numbered 1191.

On page 122, line 17, after "section 127", insert the following "for a period of thirty days after enactment of this Act, and thereafter".

Mr. McCLURE. Mr. President, this amendment would provide a 30-day time frame after enactment of the act to allow other nations to decide to renegotiate their agreements for cooperation when made necessary by criteria 4 and 5, dealing with U.S. rights to prior approval on retransfer and reprocessing of spent fuel. The bill, as now phrased in section 304, would require that any such nation must agree to renegotiation and the Secretary of State must notify the Commission of that fact before there can be the so-called 24-month Euratom exemption available for licensing. Consequently, this could be seen as an ultimatum by foreign nations, thereby presenting domestic, political, and international diplomacy problems in getting approval of such renegotiation.

I hope that the floor managers will accept this amendment. I am informed that they will.

Mr. PERCY. Mr. President, I have consulted with the floor manager of the bill on the majority side (Mr. GLENN). Both of us accept the amendment. We understand that it is simply intended to insure that the group of nations affected by the provisions in section 126a (2) of the 1954 act will have a reasonable opportunity to come to a final decision on the question of renegotiation.

I yield back the remainder of my time.

Mr. McCLURE. I yield back the remainder of my time.

Mr. GLENN. I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. McCLURE. I move to reconsider the vote by which the amendment was agreed to.

Mr. PERCY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1192

Mr. CHURCH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. CHURCH) proposes unprinted amendment numbered 1192.

On page 128, line 2–4, delete "no such materials or facilities previously exported and subject to the applicable agreement for cooperation".

On page 128, lines 14–16, delete "or previously exported and subject to the applicable agreement for cooperation".

Mr. CHURCH. Mr. President, I yield myself such time as I may need to explain the amendment.

First of all, I commend my colleague (Mr. McCLURE) for the work he has done in an effort to perfect this bill and make it more workable. The amendment that I am offering also has that objective. I think that the managers of the bill, themselves, are determined to obtain legislation that will give us the most workable program possible, enabling us to sell nuclear generators and other nuclear technology abroad within the framework of an effective nonproliferation policy.

This particular amendment, Mr. President, deletes the references in section 305 of S. 897 (phase I licensing criteria) to prior U.S. approval of the reprocessing or retransfer of previous exports. These provisions would bar exports to Canada, EURATOM, and the IAEA, since those agreements for cooperation do not contain such controls with respect to certain previous exports, and it will be difficult to obtain retroactive application of these controls in all three of these cases.

It would eliminate the retroactive application of some of the export licensing criteria contained in S. 987. As the bill now reads, section 305 makes certain criteria—particularly, no retransfer of materials or reprocessing without prior approval—retroactive. Under that section, if the United States does not obtain reprocessing and retransfer consent rights retroactively applied to all previous U.S. transfers under a applicable agreement for cooperation, the NRC could not license a new export even if the country buying from us agreed to all our new conditions.

Presently, U.S. agreements with Canada, EURATOM and the International Atomic Energy Agency (IAEA) do not contain these requirements and, according to the administration, it is "highly unlikely, if not impossible," to obtain their revision. This means that, the United States would not be able to export to a country accepting all S. 897 conditions pursuant to the United States-IAEA cooperation agreement, unless we first were able to obtain reprocessing and retransfer veto rights for all prior transfers made to that country and other countries under the IAEA agreement.

This retroactive provision is unworkable and would gravely damage the United States in the eyes of the world as reliable supplier. Most importantly, it would help to frustrate our own nonproliferation goals.

Mr. President, I understand that this amendment has been carefully reviewed by the managers of the bill. I am told they have no objection to it. I am also informed that the amendment has the support of the administration.

I express the hope that the managers of the bill might see fit to accept the amendment.

Mr. McCLURE. Will my colleague yield briefly?

Mr. CHURCH. Yes, I yield.

Mr. McCLURE. First, Mr. President, I ask unanimous consent that I may be added as a cosponsor.

Mr. CHURCH. I am happy to have my colleague as a cosponsor.

Mr. McCLURE. I thank my colleague for that courtesy.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. I thank my colleague for bringing that amendment to the floor. I think if it had not been brought, there would have been the result of an immediate, absolute embargo on the shipment of fuel to our allies under old agreements. I commend the Senator for this amendment and urge its adoption.

Mr. CHURCH. I thank my colleague very much. As I have already said, I commend the Senator highly for his own efforts in perfecting the bill. I certainly approve of the work that he has done in amending the legislation and commend him for it.

Mr. GLENN. Mr. President, the amendment offered by Senators CHURCH and McCLURE was agreed to by the floor managers as part of a package of amendments worked out between the floor managers and the administration on February 2. Last Thursday, I entered into the RECORD the exchange of letters between the administration and myself, detailing the agreement. We are happy to accept the amendment proposed by the distinguished Senator from Idaho, with the understanding that we have the rest of this package yet to be considered, which was part of this agreement. I think if we had a few moments here, perhaps after a quorum call, we could consider those amendments right now and then it could all be completed, if that is agreeable to the Senator from Idaho.

Mr. CHURCH. It is perfectly agreeable with me. The Senator from Illinois raised the question as to whether both elements were contained in the amendment that I offered. The answer to that question is, yes, both elements are contained. The clerk simply read the first element, but the second also is included in the amendment. Since it is acceptable, I hope that, perhaps, we can have action on it now.

Mr. GLENN. I am happy to do that, with the agreement that we shall follow right onto the other amendments that were part of this package, which, as I understand, encompasses some three other amendments. I believe that is correct.

Mr. CHURCH. We have no objection to that procedure.

Mr. GLENN. If that is the agreement, I am happy to yield back my time on this particular amendment and proceed to vote.

Mr. PERCY. I have no objection to this amendment. It fits right in with the total package.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1193

Mr. GLENN. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative Clerk read as follows:

The Senator from Ohio (Mr. GLENN) proposes an unprinted amendment numbered 1193.

Mr. GLENN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 154, line 20, insert the following immediately after the period: "To the extent that an agreement for cooperation in effect on the date of enactment of this Act with a cooperating party contains provisions equivalent to any or all of the criteria set forth in Section 127 of the 1954 Act with respect to materials and equipment transferred pursuant thereto or with respect to any special nuclear material used in or produced through the use of any such material or equipment, any renegotiated agreement with that cooperating party shall continue to contain an equivalent provision with respect to such transferred materials and equipment and such special nuclear material. To the extent that an agreement for cooperation in effect on the date of enactment of this Act with a cooperating party does not contain provisions with respect to any nuclear materials and equipment which have previously been transferred under an agreement for cooperation with the United States and which are under the jurisdiction or control of the cooperating party and with respect to any special nuclear material which is used in or produced through the use thereof and which is under the jurisdiction or control of the cooperating party, which are equivalent to any or all of those required for new and amended agreements for cooperation under Section 123a. of the 1954 Act, the President shall vigorously seek to obtain the application of such provisions with respect to such nuclear materials and equipment and such special nuclear material. Nothing in this Act or in the 1954 Act shall be deemed to relinquish any rights which the U.S. may have under any agreement for cooperation in force on the date of enactment of this Act.".

Mr. GLENN. Mr. President, the first sentence of this amendment will insure that no controls comparable to those of phase I licensing criteria, which we already have under an existing agreement for cooperation, will be relinquished as a result of the renegotiation of any agreement.

The second sentence expresses the strong desire of the Congress for the President to seek vigorously to obtain retrospective application of requirements for new and amended agreements to install the barriers against the nonpeaceful use of any nuclear material and equipment which has been exported by the United States.

The third sentence, Mr. President, insures that this bill will not be misconstrued as relinquishing any existing nonproliferation controls.

Mr. President, I understand that this has been agreed to.

Mr. McCLURE. Mr. President, I am happy to report I am in agreement with this amendment and urge its adoption.

Mr. GLENN. I yield back the remainder of my time on this amendment, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Ohio.

The amendment was agreed to.

Mr. GLENN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1194

Mr. PERCY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an unprinted amendment numbered 1194.

Mr. PERCY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 121, line 5, delete the period after "met" and insert in lieu thereof the following: "and the extent to which the cooperating party has adhered to the provisions of the applicable agreement for cooperation."

Mr. PERCY. Mr. President, this amendment, together with the general requirement for the State Department to provide information to the NRC on page 122 of the bill, will ensure that the NRC will receive all needed information from

the executive branch regarding the extent to which each export recipient has adhered to the terms of its agreement for cooperation with the United States. This information will be especially relevant in the NRC's consideration of whether the statutory licensing criteria will be met with respect to proposed exports.

I understand that the amendment is acceptable to the Senator from Idaho.

Mr. McCLURE. The Senator is correct.

Mr. PERCY. The floor managers yield back the balance of their time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois.

The amendment was agreed to.

Mr. PERCY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1195

Mr. PERCY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated. The legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an unprinted amendment numbered 1195:

On page 133, lines 23 and 24, delete "any guarantee it has given under".

Mr. PERCY. Mr. President, this is a technical amendment to clarify the original intent of new section 129a. (2)(A) of the Atomic Energy Act of 1954 that sanctions should be applied in the event of a material violation of any of the provisions of an agreement for cooperation with the United States, not just those provisions which are referred to as "guarantees."

Mr. President, we want to emphasize now very clearly that one of the major intents of this bill is to remove the ambiguity as to what the United States will do in the event that agreements that it has entered into as a supplied nation are broken. The agreements are very clear, they are entered into solemnly, and they involve in a way that simply cannot be adequately described for the safety and security of our own Nation as well as the people of the world.

When our materials were used by India to create a so-called peaceful nuclear explosion—it is certainly not very peaceful to any that might be underneath it just when it goes off—there was no provision for what we should do.

We did not even slap their wrist. I do not know if a diplomatic note was even sent. I do not know who commented on it. I know I did when in India, to the Prime Minister, but I was speaking not with the authority of the U.S. Government, just as one Senator who was aghast at the action India had taken.

But this has reverberated into many things. Therefore, I feel it essential to provide for the clarification of the original intent of the section and do everything we can to strengthen the sanctions part of the Nuclear Proliferation Act that is before us.

I understand this amendment has been cleared on all sides and is acceptable to the distinguished Senator from Idaho.

Mr. McCLURE. I support the amendment and urge its adoption.

Mr. PERCY. Mr. President, I yield back the remander of our time.

The PRESIDING OFFICER. Is all time yielded back?

Mr. McCLURE. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois.

The amendment was agreed to.

Mr. PERCY. I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1196

Mr. McCLURE. Mr. President, I have an unprinted amendment which I send to the desk and ask that it be considered.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an unprinted amendment numbered 1196.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 163, line 17, after the period insert new subsection (e), as follows,

"(e) Three years after enactment of this Act, the Comptroller General shall complete a study and report to the Congress on the implementation and impact of this Act on the nuclear nonproliferation policies, purposes, and objectives of this Act. The Secretaries of State, Energy, Defense and Commerce and the Commission and the Director shall cooperate with the Comptroller General in the conduct of the study. The report shall contain such recommendations as the Comptroller General deems necessary to support the nuclear nonproliferation policies, purposes and objectives of this Act."

Mr. McCLURE. Mr. President, this amendment is cosponsored by my distinguished colleagues from the State of Pennsylvania (Mr. SCHWEIKER and Mr. HEINZ). I am pleased to have their support on the amendment.

This unprinted amendment, which is a compromise amendment, requires GAO to complete a study with a report to Congress within 3 years after enactment of this act. The study will review the implementation and impact of this act on the "nuclear nonproliferation policies, purposes and objectives of this act." Further, the amendment would direct the various agencies to cooperate with GAO and to require that the Comptroller General include any recommendations which may result from the study.

RATIONALE

This study and report by GAO is intended to keep alive the various issues associated with the impact of the bill on nuclear exports and the foreign policy and export ramifications flowing from the independent role of the NRC under this statute. The original draft from last fall incorporated much more specific information on the impact of nuclear exports, the potential difficulties with other countries, consideration of an alternative formulation with the Secretary of State having these responsibilities, et cetera. This amendment, however, preserves the idea of some independent review with a report at time certain by an independent authority. Three years from the bill will be fully implemented and will have had considerable time for experience to develop. Also, the International Nuclear Fuel Cycle Evaluation (INFCE) will have been completed and associated negotiations may very well have led to an international consensus either opposing or supporting various policies incorporated in this act.

I would anticipate that the GAO study would consider the full spectrum of potential concerns and interests resulting from the implementation of this act. For example, at a minimum, the study necessarily should consider a number of aspects of the implemented act.

Mr. HEINZ. Mr. President, will the Senator yield?

Mr. McCLURE. I am happy to yield to the Senator from Pennsylvania.

Mr. HEINZ. As I understand the Senator, this is his amendment which Senator SCHWEIKER and I have cosponsored to section 602, adding a new subsection thereto. Is that correct?

Mr. McCLURE. The Senator is correct.

Mr. HEINZ. Mr. President, as a supporter of the objectives of S. 897 I rise to speak in favor of Senator McCLURE's amendment to title VI, section 602, of S. 897. Title VI requires reports to the Congress on the implementation of this legislation. It must be stated immediately, clearly and without equivocation that this amendment has no impact whatever on the nuclear weapon nonproliferation objectives of this bill. This amendment goes to reporting only; to telling us in the Congress what is the practical down-on-the-ground effect of this legislation on the peaceful nuclear exports of the United States as related to global nuclear proliferation.

Because it is so basic, I would like to think that this amendment is not a matter of controversy—I would like to think that the managers of the bill would examine the amendment and despite a natural tendency not to adopt late additions to a bill, their examination would tell them is that what this amendment requires with regard to orderly nuclear exports policy is precisely what they already have written into the bill with regard to nuclear weapons nonproliferation policy. This is, after all, a bill treating what Senator GLENN has referred to as the Siamese twins of atoms for peace and atoms for war; and on which he is performing delicate surgery. (1 CONGRESSIONAL RECORD.) We should not neglect the atoms for peace. If, as the bill now states, there is required a report on its implementation as to atoms for war, then why should there not be required report on its implementation as to atoms for peace?

What should be included in this re-

port? The following would be an excellent outline:

First, whether any new or renegotiated agreements for cooperation, any other agreements proposed under or related to this act, or agreements with other supplier nations have not been or are not likely to be obtained from other nations, and the reasons therefor, specifically including where applicable any provision of this act, and whether, in light of such inability, American participation in international nuclear trade would be adversely affected. The report should identify which specific actions are required by this act, if any, cannot be agreed to, the reasons therefor, and the impact that therefore might be expected on American nuclear trade and nonproliferation objectives, if the United States continues to require that such specific action be taken, particularly with regard to any requirements which other nuclear supplier nations do not require. The President shall also propose whether it is in the interests of the United States therefore to suspend the application of any provision of this act or the 1954 act as amended, until such time as agreement with other nations is achieved.

Second, the report should also include an assessment of the impact of this act on the competitiveness of American nuclear exports in comparison to those of other supplier nations and whether, as a result of this act, any nation appears to have or has in fact chosen to place an order for civilian nuclear material or equipment with a nation other than the United States, and the economic and employment impact of such action on the U.S. economy.

Third, the report should evaluate the effectiveness of the interagency organizational structure for export licensing established pursuant to this act. Particular emphasis should be given to identifying overlapping and duplicative responsibilities or efforts and the timeliness of decisionmaking by agencies in carrying out their responsibilities under the act. In particular, the President should evaluate the merit of establishing an interagency nuclear export control board with operational responsibilities and streamlined procedures to process export licenses pursuant to and consistent with the nonproliferation policies and purposes of this act.

Fourth, the report also should focus in detail on the procedures of title III and the role of the Nuclear Regulatory Commission therein:

First. The adequacy for the objectives of this act of a licensing procedure whereby the Secretary of State directly makes the findings required of the Commission by sections 304 and 309 of this act.

Second. Any impact of the Commission's independent review on the timely processing of applications and requests and any related impact on the reliability of the United States as a nuclear supplier.

Third. Any foreign policy impact and implications of the Commission's independent review role.

Fourth. Any reaction of existing and potential nuclear trading nations of the United States to the Commission's independent review role.

Fifth. Any impact and implications of the Commission's responsibilities for regulation of the domestic nuclear industry.

Sixth. A detailed comparison of the procedures under this act with the export approval and licensing procedures of each foreign nuclear supplier nation and with any guidelines or agreements, formal or informal, among such nations.

Seventh. Recommendations for any change to the procedures of title III, including the role of the Commission.

There can be on the part of the managers no fear of facts—and this amendment requires only a reporting of facts, only a setting forth in greater detail and specificity the happenings related to S. 897 over the coming months and years. Thus, I hope the managers will pay special attention to this amendment and will consider it in a positive framework.

Debate opened last Thursday with much agreement by all that we share a common objective in nuclear weapon nonproliferation. That is a deeply felt commitment by all of us, and I have received no representations from any persons, including persons heavily involved in the nuclear export industry, which differ with the goal of nuclear weapon nonproliferation. The debate on this legislation cannot focus on whether the future of humanity is outweighed by commerce—that is not the point and no one is arguing on behalf of that proposition.

However, it is proper to focus on exactly what this legislation aims for and what we want to accomplish with it.

In the statement of purpose, section 3 the bill says:

SEC. 3. It is the purpose of this Act to promote the policies set forth above by—

(a) establishing a more effective framework for international cooperation to meet the energy needs of all nations and to ensure that the worldwide development of peaceful nuclear activities and the export by any nation of nuclear materials and equipment and nuclear technology intended for use in peaceful nuclear activities do not contribute to proliferation;

(b) authorizing the United States to take such actions as are required to ensure that it will act reliably in meeting its commitment to supply nuclear reactors and fuel to nations which adhere to effective non-proliferation policies;

(c) providing incentives to the other nations of the world to join in such international cooperative efforts and to ratify the Treaty; and

(d) ensuring effective controls by the United States over its exports of nuclear materials and equipment, and of nuclear technology.

No one disagrees with that.

Now, where do we disagree and what can we do about it with this amendment? Much of our time over the past several days has been spent in disagreement over the practical effect of the unilateral imposition of strict controls by the United States. The administration admits that this legislation imposes stricter controls on our nuclear exports than presently exist in the newly signed London supplier agreement but says this is not a reason to change the bill. One group says S. 897 will cause greater proliferation, because foreign buyers will get nuclear material from suppliers not bound by the strict controls of this legislation. One group says it will not result in greater proliferation and postulates a different set of results from the same language. Now we can debate that kind of proposition for any length of time we wish without coming one step closer to reality than we were when we started. In the end, regardless of which side prevails, only passage of time and what happens during that time will answer the question. And make no mistake about it. S. 897 is not the end of this issue—the matter of nuclear nonproliferation is here to stay and we will debate again in 1 year, or 2, or 3.

But today as we look at the problem of the hypothetical effects of S. 897 let us for the sake of commonsense, at least, include in S. 897 the device we need to gather the facts we need to make future decisions on the basis of these facts and not on conjecture, however well founded or informed it may be.

Now, the managers have their focus in this legislation and that focus is nuclear nonproliferation. I do not ask them to change that focus or to weaken their attack—I ask them to read again the purpose of this bill and to join me insuring that the future reports to the Congress on this bill include all the purposes of the bill. I ask them to join me in insuring that future discussion and information on nuclear nonproliferation is based on all the facts and not on hypothetical cases. The reporting section of this bill needs strengthening and that is what this amendment would accomplish. What we can do about our disagreement on the bill today is to agree on this amendment to give us the tools to refine the case and to sharpen our focus regardless of where we stand on other parts of the bill.

Now, let us go one step further. Aside from the intellectual neatness of an amendment designed to require facts for information, judgment, and decision; aside from the nicety of completing the pattern of required reporting to properly balance the piece; why should anybody care? What is behind it? Where are the facts?

Here are the facts:

An exported nuclear power plant can create 30,000 to 40,000 man-years of domestic employment. (man-year equals one job for one person for 1 year).

Reasonable industry projections show a potential for 350,000 jobs annually in the nuclear export industry over the next 5 years.

These jobs would be created in 31 States, 202 congressional districts, 174 cities.

And that job potential is important, because according to U.S. Labor Department figures we need 35 million new jobs between 1977 and 1985 in order to achieve 5 percent unemployment with

the increased labor force and to replace jobs eliminated by automation and efficiency improvements.

Is this not incentive enough to pay attention to the atoms for peace side of S. 897?

Quite frankly, it is very simple. This legislation will be enacted on one form or another and it will be effective to some degree as is the case with all laws. And one way or another both sides of in this body will be breaking out the standard variations of "I told you so" before we see another new year. All sides will be making charges at or responding to charges from the antinuclear group. The nuclear group, industry, labor, and just plain interested folks. It did work; it did not work; it can work; it can not work; and on for ever and ever. Today, now, let us put in this bill an amendment to give us more answers: Why? Because serious questions are coming.

What about the $2 billion in nuclear materials that we may not be able to sell to Japan, but will instead be sold by Germany or France, because of S. 897 and thereby aggravate our stunningly bad trade deficit?

What about the nuclear plants that we may not be able to sell to Spain, which will buy from Germany or France instead, because of S. 897?

Are these serious questions? They certainly are. In my State of Pennsylvania alone every billion dollars we give away to Germany or France in nuclear plant sales means 16,000 people who do not work. Now when they ask me why they are not working and blame S. 897, I want something better than the hypotheses we have today as an answer.

In opening debate Senator GLENN paid at least as much attention to peaceful use of atomic power as to bombs. His intention is to make possible "benefits without bombs."[2] We agree on that. Now, is it his intention that the benefits accrue only to foreign countries and not to the United States? Of course not. Senator GLENN says the bill is designed to:

> Reduce the uncertainty surrounding U.S. nuclear export policy;
>
> Reestablish our reputation as a reliable supplier of nuclear fuel to those countries sharing our nonproliferation objectives; . . .
>
> But while doing the above, I believe this legislation substantially enhances the international prospects for U.S. industry, particularly by reducing uncertainty, by long-needed clarification of previously uncertain licensing procedures and criteria, by shortening the present too-long licensing process, and by instituting a new program for nuclear fuel assurance.[3]

Beyond these objectives, however, we should also be aiming for consistency. Atoms for peace is featured in the statements of policy and purpose; atoms for peace is costarred in the explanation on the floor of what the bill does; but when we get to title VI on Executive reporting and, alas, we find that our delicate surgery has been too severe. Atoms for war is with us for several paragraphs of required reporting. Atoms for peace is referred to at section 601(a)5 and all that is required in the report is "a description of the progress made toward establishing procedures * * *."

Mr. President, I can write that section 601(a)5 report today:

> Progress is about what can be expected under the circumstances."

Now, lest my colleagues Senator GLENN and Senator PERCY think me too harsh in my assessment let me assure them that I question neither their motives nor their sincerity in treating ably and with dedication a matter of fundamental importance to our very lives. They have the highest respect, admiration, and commendation of this body and of our Nation. Indeed, it is only because I believe what they say that I point out this small omission, this lack of symmetry, this fault which I feel certain they want to address. It is my acceptance of their accurate portrayal of atoms for peace and atoms for war which leads me to the inescapable conclusion that if atoms for peace means as much as atoms for war then we had better see to it there is no mistake about the intent of Congress.

From the commitments of nuclear material he made to India and to Iran I can only conclude that the President recognizes full well that denial of the means of nuclear destruction is only part of the matter. The other part is the supply of nuclear material for the benefit of mankind.

This is the objective of this amendment, which I understand has the support of the managers of the bill.

Mr. SCHWEIKER. Mr. President. I rise to speak in favor of the McClure amendment that requires a report to Congress on the impact of S. 897. The bill now before the Senate, S. 897, is one I have been hearing about from my constituents for a long time. I am not a member of the committees that considered this bill, so I have not been able to express my concerns until now. But if I may, I would like to make a few brief points on the bill and the amendment, and to discuss a few matters that are very much on the minds of Pennsylvanians.

First of all, let me say that I very strongly support the efforts of the Energy Committee and the Governmental Affairs Committee to find a workable solution to the problem of nuclear proliferation. Nobody in this body is more committed to the cause of wise nuclear safeguards and nonproliferation than I am. Even at a time of serious energy problems like today, it is our responsibility, as one of the world's major nuclear suppliers, to help insure that nuclear power is a safe tool for meeting energy needs and not a dangerous Pandora's box. I think we all feel this way, and my concerns here must be prefaced by my strong support for the ends S. 897 seeks to achieve: Control of atoms for war and a safe future for atoms for peace.

But although we agree on the ends, it is obvious many of us in this body have honest disagreements about how effective this bill will be in reaching those ends. Over the past weeks—in fact, over the past year or more—the primary concern I have heard about this type of legislation has revolved around the issue of international agreements—namely, can we best guard against proliferation by unilateral action along the lines of S. 897, or is it more practical to do it through multilateral agreements among the nations who share nuclear markets with us? I think this is a key question. It should be thoroughly discussed in this Chamber as we act on S. 897.

But it is not the international versus unilateral question I want to speak to today. Instead, I want to bring up another question, one that very much affects my State, but one that has wide national implications as well. I am talking about the impact this legislation may have on American jobs, especially in industries such as steel. I am talking about atoms for peace.

In bringing up this question, I do not mean to suggest that economics is somehow more important than the serious environmental and public safety questions addressed by S. 897. Weapons nonproliferation should not be subordinated to jobs. But I do want to suggest that, before we pass a bill such as this, we owe it to the American worker to assure him that we have fully considered the impact our actions will have on employment and industrial health close to home. In legislation which is supposed to deal with both, we need to pay at least as much attention to atoms for peace as to atoms for war. And atoms for peace means jobs.

My colleagues well know that, as a Senator from a major steel State, I have been very active in the fight to rescue American steel from the plight it is in, through my work on the steel caucus and my efforts to make the administration understand the need for import relief. We have made some real progress in that regard, and it can even be said in some ways that we are actually turning the tide for steel.

But when I examine the relation of steel to the nuclear industry, I see some very disturbing facts. First of all I see that the fate of steel is significantly tied to that of the nuclear export industry.

In a typical 1,000 megawatt nuclear electric powerplant produced for export, steel is used for components like piping, reactor vessels, generator casings, forgings, and so on. In this typical unit for export, 100,000 tons of American steel are used.

Mr. President, that is a very substantial figure, and let me remind the Senate what it means in terms of jobs: every single reactor we export translates into 1,000 jobs in the steel and steel-related industries for 5 years. That is a significant figure too, and I stress that I am only referring to the steel in the package—I do not include the many other jobs tied to reactor work that are not directly steel-related.

I understand that, based on the specific jobs available to U.S. suppliers with a high probability of success, we are talking about a minimum business worth of about $3 billion over the next 2 years.

[2] Congressional Record, S1063, February 2, 1978.

[3] Congressional Record, S1064, February 2, 1978.

I further understand that over the next 5 years, orders will be placed for nuclear power plants totaling about $32 billion.

What I am saying here is that, in talking about this bill, we must not lose sight of the fact that a lot of jobs are at stake, particularly in an industry that many of us in the Senate are trying desperately to save. Again, I repeat that I am not suggesting we subordinate safety and nonproliferation to economics. But I am saying we do the American people a disservice if we fail to plug the jobs issue into this equation.

It is disturbing to me that American nuclear related workers have been losing ground to their foreign counterparts over the past few years. Over the past 4 years alone, U.S. production in the nuclear field valued at over $10 billion has been lost to foreign competition in markets such as Finland, Belgium, Brazil, and others. Mr. President, this is serious. As in the case of steel, we cannot let American job providers face the competition time and again with the likelihood of getting clobbered. Too many American workers have a stake in this.

One job provider estimates that, if over the next 2 years American industry were to receive orders for eight reactors for which American industry has a good chance, then the State-by-State breakdown of export jobs and revenues would affect some 31 States. I offer the following table to illustrate this:

STATE-BY-STATE DISTRIBUTION OF EXPORT JOBS AND REVENUES

The total $ value, man years of effort and jobs are typically distributed among thirty-one states, based on an analysis of previous export orders. The breakdown for the fourteen major states is given below:

State	Value (millions)	Man-years	Total jobs (for 5-yr period)
Alabama	$50.3	1,673	337
Connecticut	53.8	1,792	362
Florida	157.1	5,229	1,061
Illinois	93.7	3,117	632
Indiana	51.5	1,667	337
Kentucky	35.8	1,190	241
Massachusetts	32.5	1,081	216
New Jersey	73.9	2,460	499
New York	355.6	11,969	2,304
North Carolina	190.3	6,433	1,281
Ohio	40.8	1,360	275
Pennsylvania	1,103.1	36,885	7,336
South Carolina	70.5	2,346	474
Tennessee	55.1	1,822	370
Total	2,364.0	79,024	15,723
17 other States	219.0	7,276	1,477
Total	2,583.0	86,300	17,200

Mr. SCHWEIKER. Our people in Pennsylvania do not build nuclear bombs; they do build nuclear powerplants which make an important contribution to the elimination of the want and need that cause world strife. And we ought to pay some attention to that want and need at home.

Mr. President, my distinguished friend, the Senator from Idaho (Mr. McCLURE), has put forth very sincere and commendable efforts to make this bill as realistic as possible, in terms of its impact on the competitive position of American industry and jobs. I think he deserves a great deal of credit for his concern, and his willingness to work with the managers of the bill, all of whom share a sincere desire for adequate nuclear safeguards.

In specific terms, it seems to me we face a very significant policy decision here. We have heard the legitimate concerns over proliferation expressed here by the managers of the bill and others. We have heard the equally legitimate concerns of those who, like Senator McCLURE and myself, do not want to see us take a path that could lead to serious economic disruption on its way to the admirable goal of nonproliferation that we all share. It seems to me, we have to say here and now whether, by this bill, we really are closing our eyes to economic realities, or whether, on the other hand, we really are willing to be realistic, as the backers of S. 897 say we are.

If this Senate wants to assure the American people that our actions on S. 897 are not taken in disregard of their jobs and their economy, we must offer clear words of policy that will give them that assurance.

Frankly, I think it would be well to include even stronger reporting requirements in this bill. It would be good to require that the President inform Congress promptly of any adverse impact this legislation might have on the competitive position of American industry with respect to nuclear exports, or of any instances in which a foreign nation chooses not to negotiate seriously with us toward multilateral nuclear safeguards because of the advantage this bill gives to foreign competitors against our own U.S. nuclear materials exporters.

But, in the absence of such strong requirements, this amendment is the very least we can do to try to achieve some feedback about whether the aims of S. 897 are really being achieved as we intended them.

These are questions Congress must have answered if we are to intelligently gage the effects of this legislation. Too often, Mr. President, I become aware of cases when Congress fails to track the results of our actions, when we fail to look back down the road to see exactly how legislation we pass is working in terms of its objectives. I have spoken many times of my own personal concern in this area. The McClure amendment before us, Mr. President, is a responsible method of addressing this problem of gaging the impact of S. 897 on the cause of nonproliferation.

Again, Mr. President, I restate my own commitment to the cause of wise nuclear safeguards against proliferation, with the stress on the word wise. I think Senator McCLURE has done us a real service over the past few days in trying to guide the terms of this bill into a realistic and balanced perspective. I believe that, by offering this amendment before us, he has again addressed the problem of economic impact. I urge my colleagues to join me in supporting this effort, and voting for the McClure amendment.

It all comes down to one simple point: Will S. 897 really accomplish what it is supposed to, and will it do so without destroying portions of the American economy in the process? This amendment can help give us those answers.

Mr. McCLURE. Mr. President, I thank the Senator from Pennsylvania for his remarks.

I concur with the items he has enumerated which should be included and covered by the report of the GAO which is called for by this amendment.

There is a reporting requirement in the bill under title VI, under section 601(a), subsections 4 and 5, for an annual report by the President of the United States. It would seem to me to be appropriate that these items might well be covered and should be covered by the President in the annual report, as well as the more extensive report at the end of 3 years which the GAO is directed to give under this amendment.

The concerns that the Senator from Pennsylvania has mentioned are concerns which I have sought to minimize by the amendments I have offered to this bill. The fact that the concerns do remain indicates that the work we have done so far has not satisfied everyone, and indeed does not satisfy this Senator; that we are not completely certain that we can answer all those questions in advance of some experience under the bill.

Therefore, I support the comments that were made, and I urge that the President include those items among others in the annual report, in addition to those that are required by sections 4 and 5 of 601(a).

I might just read those, because I think they are important requirements on the President of the United States.

I note, parenthetically, that there is a typographical error on page 161 of the bill. The first word in line 18, subsection 4, reads "as" and it should be "an." It should read:

(4) an assessment of whether any of the policies set forth in this Act have, on balance, been counter-productive from the standpoint of preventing proliferation; and

(5) a description of the progress made toward establishing procedures to facilitate the timely processing of requests for subsequent arrangements and export licenses in order to enhance the reliability of the United States in meeting its commitments to supply nuclear reactors and fuel to nations which adhere to effective non-proliferation policies.

Mr. President, even though it will be 3 years from now before that report is due, nevertheless, I think the report by GAO gives us greater confidence that an independent look has been taken at the way in which this bill is functioning and the way it is being administered by the executive branch and in the Nuclear Regulatory Commission.

Mr. GLENN. Mr. President, I do not object to the amendment proposed by the Senator. Was that proposed by the Senator from Idaho or the Senator from Pennsylvania?

Mr. McCLURE. I might say it was cosponsored by both Senators from Pennsylvania, Mr. SCHWEIKER and Mr. HEINZ.

Mr. GLENN. The information of what would be encompassed in the GAO report as delineated by the Senator from Pennsylvania would require a very extensive report, and I am for that. I think it is good that we have a watchdog on what is happening. I had felt that prob-

ably the provisions that we had in the original legislation, to which the Senator from Idaho referred and which require extensive presidential reporting as we go along on this, were probably adequate, but I certainly do not object to any additional looking at this whole process which might be done by the General Accounting Office.

The Senator from Pennsylvania said that he hoped it would focus on the title III criteria which are spelled out in the bill, in addition to quite a lengthy list of other things that he wished the GAO to look into. I agree with all of those. I hope, however, that there are some other foci for this bill and that one of those would be in the area of whether the bill is doing its job as far as preventing nuclear proliferation around the world. Also if I read the Senator from Pennsylvania's comments correctly or the notes that I made while he was speaking, most of his remarks would indicate an effort to place a great burden of proof on NRC, the Nuclear Regulatory Commission, in their effectiveness evaluation, and I would say I have a little bit of concern about that focus because it would seem to me that a number of different departments must also function equally well if this whole process is to work. And I might say that in my view of what a GAO report might contain, I also wish to have specific comment from them as to whether the NRC at the end of this 3-year period has worked sufficiently well that perhaps their role should be expanded instead of contracted.

I hope this view they take of this whole process is done in light of what may be happening by that period of time with regard to the nuclear suppliers conference and what arrangements may have been worked out there, what new effective means IAEA may have come up with in that length of time to help prevent the spreading of this proliferation problem around the world as well as the effect of the international nuclear fuel cycle evaluation which is due to be completed within 2 years. So the GAO report at the end of 3 years could comment on that because all of these, Mr. President, do fit together as a package. No one of them stands alone in doing its own job including this legislation we are considering here as far as preventing the spread of nuclear weaponry around the world. One of the things we have kept in mind throughout this whole consideration of S. 897 has been to try and make it complementary to these other things that we knew that were going on, the INFCE report, international nuclear fuel cycle evaluation, as well as IAEA operations, and I hope that any GAO report getting into the detail as outlined by the Senator from Pennsylvania would also comment in these other areas that I think should be also addressed, and specifically with regard to whether NRC not only should have their role curtailed, as was indicated by the Senator from Pennsylvania or inferred as one of his points, where an independent review of their role in all phases should be assessed very completely. But I think that review should also say that if this bill has worked, as we hope it may, perhaps the NRC role could be expanded so I hope they would take an across-the-board neutral approach in their approach to this whole problem and not go into this with any prejudged idea that NRC, State, or anyone else should have their role necessarily altered. We would want an even-handed approach to this whole problem.

And with those understandings, I am very happy to support this request for a GAO study.

Mr. McCLURE. Mr. President, if my colleague will yield very briefly, certainly I do not want to prejudge the report by indicating that GAO is going to be critical of NRC involvement. They may well find that it has worked well. Certainly I share the hope that these other actions, both unilateral on the part of the United States, but more importantly the multilateral initiatives in which we are jointly involved with other nations will have yielded a great deal of progress between now and the time of the GAO report. And they may indeed then define a more appropriate role for NRC, whether that be restricted or expanded. But I think that will await the advance not only of progress under this legislation but of progress under those other initiatives as well and Congress should take a look at that time as to how well this is functioning, how well the other agreements have progressed and whether or not further legislation is needed.

Mr. PERCY. Mr. President, I have only one problem with this amendment. I think it is such a good amendment I wish I had thought of it myself. I, therefore, ask unanimous consent that the Senator from Illinois be added as a cosponsor of the amendment.

Mr. McCLURE. I am pleased to have the Senator as a cosponsor, and I join in that unanimous-consent request.

The PRESIDING OFFICER (Mr. DeCONCINI). Without objection, it is so ordered.

Mr. PERCY. Mr. President, I just look right at the wording of the report itself. I said recently back in Illinois that I considered this piece of legislation the most important legislation that I have authored since I came to the Senate. I think its impact will be far greater than anything many of us can do and will do in the future in the Senate. I wish that this procedure had been used on other legislation that we have authored, introduced, seen through, and seen enacted into law. If we ever just thought to have GAO monitor the national homeownership for low-income people at the end of 3 years we could have saved grand jury investigations, we could have prevented fraud, and we could have seen not just 3 million people put into their own homes for the first time in the history of the world at very low-income levels, but we would have seen to it that we did the counseling and the advising and the careful selection that was necessary. We had no real checkpoint on this. I was always concerned about having FHA do this. I said it would be like building Volkswagens in a Cadillac factory. That is just how it turned out to be. They did not know how to handle low-income people. They were used to dealing with middle-income families that did not need that kind of assistance and help. So we are going into a new area here with a known record of failure throughout the world now.

It is a remarkable record in that it has not been worse than it has, but the mistakes that can be made in the future are just tremendous.

So the very knowledge that everyone will have, the State Department, Department of Energy, Department of Defense, certainly the Nuclear Regulatory Commission, and all the others, that there is going to be an ongoing study—and I would hope the Comptroller General would set up a team to start monitoring right away—is so important.

That is all we have to do, that is what we want to see happen. The objectives we have all agreed upon; we want to make sure that the goals and principles of this act are implemented, and I think that will be the best insurance that we are going to be a reliable source of supply. It is the best insurance we will have that the State Department will be exercising due diligence to renegotiate many of these agreements and bring them in line with what we now know to be the imperative safeguard steps that must be taken.

So I commend my distinguished colleague very much indeed for his foresight in offering this amendment; and I commend our distinguished colleague from Pennsylvania (Mr. HEINZ). I am very pleased and proud not only to be a cosponsor but to indicate that I not only see no objection from our side of the aisle but I feel there would be a good deal of "amens" by many of our colleagues who feel this is a worthwhile addition.

Mr. GLENN. Mr. President, I would like to add only a couple of short comments here regarding this proposal for a study, too.

I note that approximately five or six of the points made by the Senator from Pennsylvania indicated the effect this will have on our trade, whether we are going to cut out U.S. participation; assessing the impact on trade as compared with other nations; evaluating the effectiveness of the interagency actions on licensing; further streamlining the procedures necessary for implementing business.

I am glad to see those things addressed. I think it will be very much in order to have those assessed because I think that with the conflicting situation we have had with regard to nuclear licensing up to this time, it has held back U.S. industry, perhaps, when other nations were considering whether they wished to go through the complexity of trying to comply with U.S. licensing procedures up to this time.

I think one of the things we do with this bill is take a lot of conflicting law and make it into a more comprehensible, more administrable, more attractive package for doing business with American industry.

If it does not do that, if some of the dire predictions of some of the critics of

the bill do come to pass, then certainly we should be making changes as we go along with this.

Nothing is cast in concrete forever. So I am glad to see that emphasis because it is my personal belief that at the end of 3 years, given a business climate in the world where there is money for expansion, and if there are additional buys of nuclear plants in the world, I think with this bill clarifying the situation with regard to American licensing processes, we will find, and I would predict we would find, that American business has moved up and will like the functioning of this bill by that time.

So I am glad this will be assessed in the proposed GAO study, and I would join in supporting the study as proposed by the distinguished Senator from Idaho.

Mr. McCLURE. I thank the Senator for his comments, and I share both the concern and the optimism that this can be a constructive addition to the workings of this act.

I would also hope that if, as a matter of fact, the Presidential annual report indicates the problems that some are predicting, and that may arise under this legislation, that we do not await the 3 years to make corrections; that we hold ourselves in readiness, if the legislation proves to be unduly restrictive or burdensome before the end of the 3-year report; and certainly there will be a great deal of concern here, just as there has been concern among some of our allies and partners in the world, in this regard.

Mr. President, I am prepared to yield back the remainder of my time on this amendment.

Mr. GLENN. Mr. President, I am prepared to yield back my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1197

Mr. McCLURE. Mr. President, I have an amendment that I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

Senator from Idaho (Mr. McCLURE) proposes an unprinted amendment numbered 1197.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 121, line 2, after the period insert, "The Executive Branch judgment shall be completed in not more than sixty days from receipt of the application or request, unless the Secretary of State, in his discretion, specifically authorizes an additional time for consideration of the application or request because it is in the national interest to allow additional time. The Secretary shall notify the Committee on Foreign Relations of the Senate and the Committee on International Relations of the House of Representatives of any such authorization. In no event, shall consideration of an application or request continue longer than 120 days unless the Secretary determines that additional time is necessary to avoid a serious prejudice to the achievement of the United States non-proliferation objectives or otherwise jeopardize the common defense and security of the United States, and so informs the aforementioned Committees.

Mr. McCLURE. Mr. President, this amendment now pending would establish a 60-day time period for executive branch consideration of license applications in preparation of the executive branch judgment which is required to be transmitted to the NRC under the section 304 procedures.

The Secretary of State could provide further extension of time for consideration of the application if he found it in the national interest to do so.

Ultimately, however, the President would have to approve any longer range extension of time on the basis that completion of consideration would be prejudicial to our nonproliferation or inimical to the common defense and security.

Currently the executive branch procedures for export applications require that the various reviewing agencies complete their consideration of the application in the same 60-day time-frame period. There is not an absolute deadline, however, and many license applications have taken months and years for final executive branch action.

Since this act will clarify much of the uncertainty surrounding the criteria and requirements for export licensing, it is reasonable to expect that applications can now be processed in a timely and predictable fashion.

This amendment would provide congressional guidance with regard to that processing, and at least establish some reasonable pressure on the executive branch to move expeditiously in the process, and might provide some variance in the use of the procedures under this bill for those who would desire to have a de facto moratorium or a de facto embargo rather than constructive progress under this legislation.

Mr. President, I think it would be fair to state that Senator HOLLINGS has indicated interest in this amendment and supports it, and I urge its adoption.

I might also add, Mr. President, we have received correspondence from a number of foreign countries with respect to the difficulties under current processes. I am not referring, when I say, "we have received," to myself because one of the letters I refer to at this time is addressed to the Honorable JOHN SPARKMAN, chairman of the Committee on Foreign Relations. But let me read an excerpt from this letter which was written under date of February 1, 1978:

I wish to make it known that some plants under construction have experienced the following delays in obtaining export licenses:

The Asco nuclear power plant: a 30 month delay for the reactor license.

The Valdecaballeros nuclear power plant: a 17 month delay for the reactor license.

The Lemoniz, Asco and Zorita nuclear power plants: from 7 to 17 month delays for the first core and reloads export licenses.

Mr. President, that is the kind of delay which does not lead to the reputation of the United States as a reliable partner in the nuclear field, but leads such countries to begin to look to other countries for their nuclear support and assistance and trade.

Again I want to underscore what I have tried to underscore throughout all of this debate, and that is it is not simply the loss of business, it is not simply the impact upon balance of payments; it is not simply the question of jobs in this country, all of which are important, but it also says something about whether or not we will be able to influence the policies of those nations.

Certainly it is no secret that the Government of Japan will be approaching this country in the next several weeks or several months in regard to what is potentially a $2 billion item of trade, but again it is not the trade that is important. It is the question of whether or not we will have influence on their policy or whether they will have to go somewhere else for their nuclear trade, for their nuclear supplies and, therefore, listen to someone else for their advice and the framework of their policy statements.

Let me conclude with one further statement from the letter which I read some excerpts from just a moment ago:

It is for this reason that the Spanish electric utilities will have to seriously consider, at the time of evaluating future contracts, all these aspects and the future repercussions that the application of the contemplated restrictions could have on the Spanish plants.

Mr. President, I think, in order to provide predictability, we have to establish procedural frameworks, and I urge the adoption of the amendment.

I ask unanimous consent that the full text of the letter from which I have quoted be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CONTRAIES NUCLEARES DEL NORTE, S.A.,
Santander—España
February 1, 1978.

Hon. JOHN SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: During meetings sponsored by the Atomic Industrial Forum last March 14, 1977, I explained on behalf of the Spanish electric utilities the effects U.S. Government imposed restrictions were causing and would cause on the Spanish nuclear program.

In this meeting I indicated that the implantation of restrictions to equipment exports and spent nuclear fuel transfers were causing such problems and economic prejudices, that the electric utilities could find themselves forced to reconsider their entire nuclear power plants construction program or, at least, to seriously reconsider the advantages of resorting to non-American markets.

This was fundamentally due to the delays in obtaining export licenses, in the case of the plants under construction, seriously affecting the starting date of the installations, with the tremendous economic repercussions that this would entail; and the delay of spent fuel transfer authorizations, in the case of the plants already in operation, conditioning the operation of the plants and causing additional high expenses.

I wish to make it known that some plants under construction have experienced the following delays in obtaining export licenses:

The ASCO nuclear power plant: a 30 month delay for the reactor license.

The VALDECABALLEROS nuclear power plant: a 17 month delay for the reactor license.

The LEMONIZ, ASCO AND ZORITA nuclear power plants: from 7 to 17 month delays for the first core and reloads export licenses.

The authorizations for the transfer of spent fuel from the plants in operation, Garona and Zorita, have also suffered serious delays, which have forced the operation of the Garona plant without the fuel emergency margin of the reactor for over a year, due to the lack of extra storage pool capacity. Presently, one of the transfer authorizations has been pending in the Department of Energy since August 22, 1977.

In the case of Spain, this situation acquires characteristics of special importance because if a reactor breakdown should occur, it would be required to close the plant for an indefinite period of time.

As you know, Spain is a country with scarce natural energy resources and must annually import more than 70 per cent of its primry sources of energy. The immense economic impact this has on the country, along with the dependence on foreign suppliers of these raw materials, has made the Spanish electric industry regard nuclear energy as a new source.

In order to confront this technological challenge, the Spanish electric utilities are trying to overcome serious difficulties and are making a great economic effort that could find itself bound by our own public opinion and by our Congress, since they argue—and not without reason—that the implantation of these measures would imply passing from a dependence on the oil producing countries to a dependence on the United States.

We consider that the procedures established by the nuclear legislation currently being studied by the Senate could make the situation even more serious, and could condition not only the operation of our plants, but the reliability of the U.S. as a future supplier of nuclear fuel and equipment.

It is for this reason that the Spanish electric utilities will have to seriously consider, at the time of evaluating future contracts, all these aspects and the future repercussions that the application of the contemplated restrictions could have on the Spanish plants.

Sincerely,

J. L. SÁNCHEZ,
Administration General Manager.

UP AMENDMENT NO. 1198

Mr. GLENN. Mr. President, I firmly support the objective of the Senator's amendment, but I am constrained to offer a substitute for it, which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The substitute amendment will be stated.

The legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN) offers an unprinted amendment numbered 1198, as a substitute for unprinted amendment No. 1197.

Mr. GLENN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment is as follows:

Page 121, line 2, after the period insert:

"The Executive Branch judgment shall be completed in not more than sixty days from receipt of the application or request, unless the Secretary of State in his discretion specifically authorizes additional time for consideration of the application or request because it is in the national interest to allow such additional time. The Secretary shall notify the Committee on Foreign Relations of the Senate and the Committee on International Relations of the House of Representatives of any such authorization."

Mr. GLENN. Mr. President, my amendment would differ from the proposal of the Senator from Idaho in two respects. First, it would eliminate the firm 120-day cap on executive branch action, which would have been waivable only under very stringent conditions. By removing this cap, some additional flexibility would be provided to accommodate foreign policy and other legitimate demands.

The second change would make clear, by use of the words "in his discretion" that the Secretary of State's waiver of the 60-day time limitation would not be subject to judicial review.

This has been discussed with the Senator from Idaho, and I hope the Senator will accept this substitute for his amendment.

Mr. PERCY. Mr. President, I support the substitute offered by Senator GLENN, and feel that it places as much of a time limit on the executive branch as is wise. We must be extremely careful not to force the President to take a public position which could seriously upset sensitive foreign policy discussions. While expeditious consideration of amendments is desirable, we must be careful to avoid counterproductive results.

Since executive branch review is an extremely sensitive political matter, we must give the State Department a degree of flexibility. They may be in the midst, for example, of nonproliferation negotiations, in which a deal on an export license would be very helpful, at the right time. Certainly the present experience in India is reason enough alone to show the value of flexibility in negotiating for time—time for something we really want and the world wants from India, which I think we have every right to expect. We have the problem that they are requesting of us another shipment of enriched uranium for their plants.

The other country may be developing explosives and we want to hold the license until they stop—but for reasons of protecting intelligence information or making it easier for them to stop and save face, we may not want to publicly announce the problem.

Or there may be other foreign policy concerns—as with an export to the Middle East—where it is better to put off a decision or to avoid confrontation until it will not have a severe adverse impact on more important concerns.

In the midst of the delicate negotiations now going on with the Middle East, certainly as evidenced by the sobering comments made at the National Press Club by President Sadat today, and perhaps a sobering weekend at Camp David, we have to take all of those matters into account, and I am certain that our distinguished colleague, who is conversant with all these matters, will understand that, and perhaps be willing to accept the substitute.

Mr. McCLURE. Mr. President, let me make it clear to my distinguished colleagues, if I may, that, first, my amendment has in it language stating that this is within the discretion of the Secretary of State, to deal without judicial review of that discretion. I share the Senator's concern in that respect, and I think my amendment took care of that problem.

The additional portion of the amendment is the latter part, which adds a little longer time in certain circumstances.

It has not been the intention of the Senator from Idaho to place the administration in any kind of a procedural straitjacket, but I do want to provide them not only the flexibility to deal with the problem, but also guidelines that indicate that these long delays that have been experienced are destructive of the very purposes which we seek to serve.

I understand that our colleagues from Ohio and Illinois share with me the desire that the export licenses not be unduly or unnecessarily restricted or delayed, but that they be expedited and processed in a reasonable manner.

In that context, I am willing to accept the amendments, and hope the Senators will join with me in seeing if, as might be, there are unreasonable delays, that we can expedite, that we can get some help in going to the administration and saying that those delays are destructive of the purposes of the legislation.

I am sure that if that does occur, we will be able to get that kind of help.

Mr. GLENN. Mr. President, if the Senator will yield, it is indeed the intent of the substitute, that in 60 days, in normal circumstances, the NRC would obtain the views of the executive branch on export licenses. If there are overriding foreign policy considerations at the moment, such as those mentioned by the distinguished Senator from Illinois, the State Department should not be obliged to issue its views. I think we should provide the discretion for the State Department to waive the sixty day time limit, but we should make it definite that our intention is for the export licensing process to be shortened up only under the most compelling circumstances that the State Department review would go beyond the 60-day period.

Mr. McCLURE. I appreciate the comment of the Senator from Ohio. I yield back the remainder of my time on the substitute amendment.

Mr. GLENN. I yield back the remainder of my time.

The PRESIDING OFFICER. All remaining time having been yielded back, the question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

Mr. GLENN. I move to reconsider the vote by which the substitute amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. I yield back the remainder of my time on the amendment.

Mr. GLENN. I yield back my remaining time on the amendment, Mr. President.

The PRESIDING OFFICER. All remaining time having been yielded back, the question is on agreeing to the amendment of the Senator from Idaho, as amended.

The amendment, as amended, was agreed to.

Mr. McCLURE. I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, I have, I believe, one more amendment which should be handled tonight. Then, if the leadership would be agreeable to a quorum call——

Mr. PERCY. Mr. President, if the Senator will withhold, today in the Chicago Sun-Times there appeared an excellent editorial entitled "Cutting A-Export Risks," commenting on the pending bill. I ask unanimous consent that extracts from that editorial be printed in the RECORD at this point.

There being no objection, the excerpts from the editorial were ordered to be printed in the RECORD, as follows:

CUTTING A-EXPORT RISKS

The spread of nuclear weapons is an issue all should worry about—especially those in the U.S. nuclear industry, who are vitally concerned with convincing the public that their nonweapon products are safe.

And although the industry has an obvious interest in selling as much of its wares as possible overseas as well as in the United States, it could in fact be threatening itself by opposing rational—and needed—controls on foreign sales of U.S. nuclear technology.

The Nuclear Nonproliferation Act wouldn't hobble exports. Far from it. Indeed, it would begin a program of nuclear-fuel assurances for nations that agree to effective policies against the spread of nuclear weapons.

That's a crucial concern, given the ever-expanding possibility of nuclear reactions to global instabilities. And it's a threat underlined by India's 1974 detonation of an A-bomb produced from nuclear materials intended for peaceful uses.

The Percy-Glenn bill would put strict controls on exports to prevent just such diversions from intended uses. In the long run, as Percy pointed out on the Senate floor last week, those safeguards work to the advantage of industry, insofar as they emphasize continuing U.S. commitment to the safe uses of nuclear power.

The proposal is flexible and reasonable—and vital. It could even make licensing of exports faster in virtually all cases, actually putting the U.S. nuclear industry at a business advantage. But international safety is its most compelling selling point.

President Carter has put welcome emphasis on the need for the limits that the Percy-Glenn bill sets. He and its legislative proponents deserve support.

The PRESIDING OFFICER. Who yields time? If no one yields time, the time will run equally against both sides.

ORDER OF PROCEDURE TOMORROW

Mr. ROBERT C. BYRD. Mr. President, have any special orders been entered into for the recognition of Senators on tomorrow?

The PRESIDING OFFICER. No orders have been entered.

Mr. ROBERT C. BYRD. The Senate, under the order, is to resume consideration of the unfinished business at 10 o'clock tomorrow morning. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

AUTHORIZATION FOR ARTISTS TO BE PRESENT IN THE GALLERY DURING CONSIDERATION OF THE PANAMA CANAL TREATIES

Mr. ROBERT C. BYRD. Mr. President, the Panama Canal treaties will be before the Senate beginning on Wednesday of this week. The first of the two treaties, the Neutrality Treaty, will be before the Senate.

Artists are now allowed to sit in the galleries and, like reporters, they are permitted to take written notes, but they are not permitted to do any drawing. In view of the fact that the Senate has given consent for audio transmission of the debates, the networks would like to have their artists present so that they might be permitted to sketch during the debate on the Panama Canal treaties. The networks are planning to carry audio feeds of up to a minute on their TV news programs during the Panama Canal debate, and a series of sketches will be needed to illustrate those audio feeds accurately.

I have cleared this unanimous-consent request with Mr. BAKER, Mr. HATFIELD, and Mr. PELL, and I, therefore, propound it as follows:

That the networks may have as many as four artists in the gallery, one for each network and a fourth for public TV or one of the chains. I will discuss this with the Sergeant at Arms so as to notify the networks as to which gallery their artists may be located in. I should think that it should be limited to a single media gallery, either where the print journalists sit or where the broadcast people sit, but that is a matter that can be determined, and the networks and public TV will be so informed.

I ask unanimous consent, therefore, that four artists, one for each of the three networks and one for public TV, may have access to the press gallery during the debates on the Panama Canal treaties—only during the debates on the treaties.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. This would mean that should the Senate go into legislative session for the consideration of other matters from time to time, the authorization would not carry forward into those legislative sessions.

ORDER FOR THE SENATE TO RESUME CONSIDERATION OF THE UNFINISHED BUSINESS TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, on tomorrow, after the prayer and the disposition of the approval of the Journal, the Senate resume its consideration of the unfinished business.

The PRESIDING OFFICER (Mr. SASSER). Without objection, it is so ordered.

ADJOURNMENT

Mr. ROBERT C. BYRD. Mr. President, while we are just sort of killing time, I move that the Senate stand in adjournment for 2 seconds.

The PRESIDING OFFICER. The question is on agreeing to the motion to adjourn.

The motion was agreed to, and, at 5:03 p.m. on Monday, February 6, 1978, the Senate adjourned until 5:03:02 p.m., the same day.

AFTER ADJOURNMENT

MONDAY, FEBRUARY 6, 1978

The Senate met at 5:03:02 p.m., pursuant to adjournment, and was called to order by Hon. JAMES R. SASSER, a Senator from the State of Tennessee.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO DISPENSE WITH ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that morning business be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

NUCLEAR NONPROLIFERATION ACT OF 1977

Mr. ROBERT C. BYRD. Mr. President, may we have resumption of the unfinished business?

The PRESIDING OFFICER. The clerk will state the unfinished business by title.

The assistant legislative clerk read as follows:

A bill (S. 897) to strengthen United States policies on nonproliferation and to recognize certain export functions of the Federal Government to promote more efficient administration of such functions.

UP AMENDMENT NO. 1199

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes unprinted amendment numbered 1199.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 123, line 23, strike the period and insert in lieu thereof, "; *and Provided Further*, that nothing contained in this section is intended to require the Commission independently to conduct or prohibit the Commission from independently conducting country or site specific visitations in the Commission's consideration of the application of IAEA safeguards.

Mr. McCLURE. Mr. President, this amendment would add a proviso to the part of the section 304 export licensing procedures dealing with the NRC independent regulatory functions. The thrust of the proviso is to negate any implication in section 304 that NRC is required, in reviewing a licensing application, independently to assess the adequacy of foreign safeguards.

In the absence of such a proviso, there would be a very strong implication, if not an express directive, to the effect that the NRC should conduct such independent assessment of foreign safeguards.

The proviso establishes the neutrality by expressly stating that nothing in this section requires such independent efforts and also to satisfy those on the other side of the issue, to indicate additionally that nothing in this section would necessarily prohibit the Commission from such independent assessments.

This is a direct response to the current debate raging within the NRC and within the executive branch over the exact responsibility of the NRC for assessment of the adequacy of foreign safeguards implemented for U.S. nuclear exports. Various commissioners, including Commissioner Kennedy, Commissioner Gilinsky, and NRC Chairman Hendry, have dealt with the issue.

Additionally, this has been the subject of a closed meeting with the NRC in which we have been represented. Placing this proviso in the bill has the effect of negating the very strong implication that NRC has such a role. It leaves open the question of the exact responsibility of the Federal Government, to review foreign safeguards and the exact procedures in which that will be done.

Clearly, it would be preferable to put an expressed prohibition on the NRC's assessment of foreign safeguards, but that, in my judgment, is highly unlikely to be done by Congress at this time. Consequently, maintaining strict neutrality on the face of this section 304, Procedures and Requirements, leaves that question open for determination by the administration between administrative agencies without prejudice to the conclusion of those debates.

Mr. President, while I recognize that this is a tremendously difficult question to state with neutrality, it is essential we do so.

I would hope that the managers of the bill can see fit at least to accept this amendment at this time and if, as a matter of fact, the language does not accomplish exactly what I suggest, that then we might in the conference be able to perfect the amendment to say exactly what it is that we are contemplating saying.

Maybe there is another way of saying it that would allow better results than the language I have submitted. But I think it is essential we have some such expression in the legislation.

Mr. GLENN. Mr. President, we discussed the proposed amendment here prior to the Senator from Idaho proposing it officially. It was my understanding that the amendment was designed only to make clear that the bill neither requires nor prohibits specific site visits to each country to consider the application of IAEA safeguards. I would be prepared to support the amendment if the thrust of it were limited to neither requiring nor prohibiting site visits, country by country, for the purpose of considering the applications of IAEA safeguards.

However, the way the Senator describes this gives me some pause because he specifically says NRC will as I understood it, not be required to independently assess the adequacy of the safeguards. It seems to me that would take away a tremendous thing they should be charged with doing.

Mr. McCLURE. If the Senator will yield, I will clarify what I intended.

That is the difficulty of what is an independent assessment. I agree with the Senator that that language is troublesome. Perhaps I stated it over broadly in my initial remarks. It was not my intention to raise that alarm because I think NRC does have the responsibility under this legislation to arrive at their own assessment of the safeguards.

But the amendment says specifically the country by country site specific visits will not be required as a component of that independent assessment.

Mr. GLENN. But did the Senator from Idaho intend that they would not independently assess the adequacy of safeguards?

Mr. McCLURE. It is not my intention to state it that broadly. The amendment only refers to site specific visits and not to the assessment of the safeguards question itself.

If my earlier language was broader than that, it was because of an inadvertence on my part, not because I want to broaden the import of the amendment beyond the language which appears on its face.

Mr. GLENN. Is it the Senator's understanding of the bill now that it specifically requires NRC to specifically assess the adequacy of the safeguards?

Mr. McCLURE. The bill does require NRC to make their own assessment. The question, I guess, boils down to what is an independent assessment.

Mr. GLENN. Further, is it the understanding of the Senator that that independence of NRC to assess IAEA safeguards would continue if we adopt his amendment?

Mr. McCLURE. It would be changed by this amendment with the exception that the amendment simply says that site specific visitations are not required by the act. That is all the amendment says.

Mr. GLENN. Neither required nor prohibited?

Mr. McCLURE. That is correct.

Mr. GLENN. All right, with that understanding, I think the amendment would be acceptable to the Senator from Ohio.

I was concerned about the previous remarks that I thought intended to take it out of the IAEA safeguards assessing business.

I think one of the intents of the bill is to keep the NRC indefinitely in that business because they report both to the legislative and executive branches and they are best equipped to assess the adequacy of safeguards, perhaps even more so than any other branch of Government in this country or any agency of Government in this country.

Mr. McCLURE. I might just refer to the bill, section 127. Their mandate is to make a reasonable judgment regarding IAEA safeguards as required by article III, subsection 2, of the treaty.

It is not my intention that this amendment in any way intereferes with their reasonable judgment requirements requiring IAEA safeguards.

Mr. GLENN. I would be prepared to support the amendment with the understanding that it applies only to not requiring nor prohibiting site visits country by country to consider the application of IAEA safeguards and does not in any way cut down on the requirement of NRC to independently assess the adequacy of IAEA safeguards.

Mr. McCLURE. All my amendment is intended to address is to make this provision neutral, neither prohibiting nor requiring site specific visitations and to make it clear on the face of the statute that that is our posture at this time on that issue.

Mr. PERCY. Mr. President, again thinking back on how the legislation was created that established NRC, I see nothing inconsistent with the wording of the amendment of the Senator from Idaho with the intent and purpose of the originating act.

I think the explanation that was just now heard from the majority floor manager of his interpretation of this amendment is accurate. It is not really a question of whether NRC independently will assess the adequacy of safeguards. The question is really how they will do it.

This amendment addresses whether or not they will use onsite visitations as the method.

I agree with the majority floor manager that this amendment underscores the fact that this legislation is not intended to prejudge the current debate as to the information which the United States should seek to obtain with respect to the adequacy of IAEA safeguards on U.S. exports or as to the roles which the various interested agencies should perform in the process. I think there is no question that the NRC should have full access to all information available to the executive branch on this and related issues, and that the NRC, in making the findings and judgments required under this act, should independently assess the information which is available to it. Just as past compliance with prior approval commitments is relevant to the question of whether such commitments will be meaningful with

respect to the export under consideration, by the same token information concerning the adequacy of safeguards should be carefully considered by the NRC in applying the first phase 1 criterion and in making general common defense and security findings.

I find no objection with the amendment or with the ultimate decision reached in the legislative history and colloquy just carried on.

Mr. GLENN. Mr. President, if the Senator from Idaho is finished with the discussion of this, I am prepared to yield back my time.

Mr. McCLURE. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Idaho.

The amendment was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GLENN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1200

Mr. GLENN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN) proposes an unprinted amendment numbered 1200.

Mr. GLENN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 145, line 23, before the word "and" insert the phrase "no uranium 233,".

On p. 145, line 24, strike "233".

On p. 145, line 25, strike "or".

On p. 153, line 10, after the word "plutonium" insert ", uranium 233,".

On p. 153, line 11, strike "233 or".

On p. 154, line 1, after the word "plutonium" insert ", uranium 233,".

On p. 154, line 2, strike "233 or".

Mr. GLENN. Mr. President, the fission characteristics of uranium 233 are much closer to those of plutonium than to uranium 235. It therefore should be treated in the legislation the way plutonium is, and that is what this technical amendment accomplishes.

I believe we have unanimous agreement on this side of the aisle on this matter; and if the Senator from Idaho is prepared to yield back his time, I will yield back mine.

Mr. McCLURE. Mr. President, I support this amendment, and I yield back the remainder of my time.

Mr. JAVITS. Mr. President, the minority supports this amendment as well.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. GLENN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GLENN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Mr. President, while I think all Senators would support the objectives of this bill, it is my view, as well as that of others, that its provisions raise numerous questions that should be examined in detail and at some length.

Without question I am in support of nuclear weapon nonproliferation. There is, in fact, no one in this body today opposed to nuclear weapon nonproliferation. From the more elder among us upon whom Hiroshima and Nagasaki burst as an awesome new terror to the younger among us who during the cold war learned in our school years that "atoms for peace" would elevate mankind; all of us share the knowledge that nuclear weapons capability must not be spread.

The real division among us is as to how we shall accomplish this goal.

The questions that particularly interest me in this regard, and interest most Pennsylvanians as well, relate primarily to whether this bill, as reported, will achieve its principle goal—halting the spread of nuclear weapons, without at the same time stopping nuclear development for peaceful purposes or eliminating the role of the American nuclear industry in that development. As I have said before with respect to the breeder reactor, nuclear technology poses serious safety and security problems, but these are problems we must work to solve so that development of the technology can go forward. I know some people may prefer a world without nuclear power, and I can respect that point of view, but the fact is that at the present time we have no viable alternative source options if we wish to reduce our dependence on fossil fuels. Reduction of that dependence, of course, is an essential national security objective in the short and mid term, as well as an inevitability in the long term as we exhaust fossil sources. While I have consistently supported accelerated development of other energy sources, we cannot bury our heads in the sand with respect to nuclear energy and simply ignore it.

Similarly, on the international level we have to face the fact that other nations are not ignoring nuclear development, that the growth of nuclear technology for power production is an inevitability, particularly in those nations that are more vulnerable to an oil embargo than we are, such as France and Germany, and finally that those nations are going to continue to seek to export their technology.

While I do not subscribe to the argument that we should seek to continue acting in the nuclear marketplace simply because others are doing so and we do not want to be left out; we must nonetheless ask ourselves what effect this bill, S. 897, will have on our participation in that marketplace, and, if it is correct that it will inhibit our involvement, then we must also ask ourselves whether that inhibiting effect will encourage other suppliers to adopt the same policy we have or whether it will discourage the proliferation of nuclear weapons.

With respect to the issue of the further expansion of nuclear technology, it is estimated that about 80 new nuclear plants producing about 84 thousand megawatts of electricity will be ordered worldwide between 1978 and the end of 1982. These plants will cost about 32 billion dollars. Ample evidence, indeed, of the need for weapon non-proliferation!

However, there is a serious question as to whether the pending legislation would do anything to halt weapon proliferation. These nuclear plants will be ordered and built regardless of this legislation. That is not in question. The real question is whether they will be ordered and built under a framework of safeguards organized by the United States or whether they come to life without the safeguards we seek. Will there be U.S. leadership and participation or will this $32 billion program be controlled by the United Kingdom, France, Germany, and Japan? Or even by others, not our friends? That is no idle question!

On Wednesday, February 1, 1978, in hearings before the Senate Finance Committee my distinguished colleague Senator HANSEN inquired of Special Trade Representative Strauss regarding trade with Japan in nuclear equipment. I ask to have printed in the RECORD at this point the text of that exchange with the caveat that it is from an as yet uncorrected transcript and there may be typographical errors.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FINANCE COMMITTEE HEARING—
FEBRUARY 1, 1978

Questions propounded by Senator Hansen to Ambassador Strauss:

H. Ambassador Strauss I think this has been a very worthwhile and productive morning and I would welcome an opportunity to reciprocate with my good friend the Chairman of the Subcommittee by saying that we have talked about beef and we've talked about citrus, I'm going to talk about something that I know will be of interest to the distinguished senior Senator from Connecticut—nuclear power. I would observe that I'm told that the number of man hours necessary to construct just one nuclear power plant entails the full-time efforts of thirty thousand man years of work. No one need remind my good friend Senator Ribicoff that

GE is a pretty important employer in the great State of Connecticut and I do have some questions that I'd like to ask you about that because on page 16 of your statement—allusion has already been made to that statement—that the ultimate value of these consultations depends largely upon what we do to follow through on our efforts—I agree with that and I note that on page 14 you say "also the Japanese government has announced its intention to form a number of joint industry groups to explore the possible purchase of citrus products, forest products" and then I underline "nuclear plant machinery and equipment and to increase imports of beef." The January 13th joint U.S. Japan communique included as a specific Japanese trade measure the following item:

"Dispatch to the United States of a mission to explore the possibility of purchasing electric power plant machinery and equipment, including nuclear plant components and equipments."

The Washington Post reported that the Japanese had specifically requested the addition of the nuclear plant reference. Could you comment on the circumstances surrounding the addition of this item? Is it, in fact, representative of a high level of interest in our nuclear exports?

S. That came out of some very private conversations that Mr. Ushiba [1] and I had in the early stages of our conversation when he was here and you will recall that I mentioned to a number of you who discussed it a little farther with him. We formalized it over there and I think its going to lead to substantial purchases of nuclear power plant components in this country and I said there are those who think this is a program this country shouldn't be fostering, but my views are a simple one. If those things are going to be bought they might as well be bought here instead of bought in Germany or built in Japan. It is something they can purchase from us, something they want to purchase from us something that will help them bring their account surplus in balance.

H. I couldn't agree with you more.

S. And we have already been furnished the fifty member team that will be over here in oh in March 13th or 10th or something.

H. I appreciate the President's philosophical desire to do everything he can to make improbable the development of nuclear weapons by countries aren't now making them but it seems to me as though in this respect he's expressing concern over a train that's already left the station. As you say, if Japan doesn't buy these plans from us and if we don't, in my opinion, continue to make available around the world, at least on a selective nation basis, those countries that will receive our uranium as well as nuclear power plants why they will be buying it some place else and if we're concerned as I know you are, and as I think as all members of the Senate are, it seems as though this is an ideal place to try to try to address and rectify that imbalance in the trade.

S. I don't want to be stuck with this figure, Senator Hansen, but I think we're talking about $2 billion potential purchases there. That's an awful lot.

H. Well. I was told that one plant is $1 billion but with the rapidly escalating rate of inflation you could be right today, my figures are a week or two old. As you may know the Senate will be considering shortly legislation which places a series of new regulatory controls and requirements on U.S. nuclear exports. Would it be your view, in light of the specific Japanese interest, as well as that of other trading partners, that the legislation should provide predictable and workable export licensing regime?

S. I'd like to see the type of legislation proposed and I'd like to give it a little more—have a little more time before I furnish an answer to that I'm not certain that I'm fully clear on it now.

H. Further what would be the impact on our trade relations and this agreement if the new export licensing regulations creates a de facto moratorium on nuclear exports, either generally or specifically to Japan?

S. Well, if we—its obvious Senator Hansen that if we were to create impediments to the sale of nuclear plant components it would have an adverse impact on our ability to sell those components and thereby reduce the trade account.

H. The Council on Environmental Quality has distributed a guide—draft guidelines to executive agencies which would require Environmental Impact Statements for U.S. international activities in other countries. I understand the guidelines would require Federal agencies to document and consider foreign impacts, both for direct U.S. government activities abroad and the licensing of commercial exports and activities abroad. This would place an immediate de facto moratorium on nuclear exports and related Ex-Im Bank financing—as well as many other activities. What is your view, as Special Trade Representative, regarding the advisability of such a new requirement?

S. Senator Hansen I have some very serious concerns in this whole area. Now these proposals are exceedingly preliminary in nature as I understand it now and I don't want to be negative or critical but I would say to you that is something I intend to monitor very carefully, something I expect to be heard on very forcefully and I am very concerned that nothing be done very strong reservations about anything being done that would in anyway impede our ability to do business outside the United States with products that are manufactured in this country and we will be as I said monitoring any proposals that come out of there closely and presenting our position on it. That's about all I have to say on it for now. We don't need any unnecessary barriers to trade we're having a tough enough time right now with what we've got overseas.

H. Well I thought that and it continues to be my opinion, that if we finally are drowned under a blizzard it won't be snow it will be paper and these Environmental Impact Statements I might note parenthetically some 212 of them, are going to be required of the Department of the Interior in before approval can be given to grazing permits and the amount of time and number of people who must have their full-time efforts committed to the preparation of those Impact Statements and the amount of money that will go into them is unbelievable, but that's just within this country. It seems to me that putting Environmental Impact Statements as a prerequisite to the export of materials and manufactured machinery in this country raises issues that I think are of serious foreign policy concern that question the sovereignty of foreign countries, long time delays, litigation, and all that sort of thing and in a word I don't think we have any business getting into that kind of operation.

S. I thank you for that statement Sir.

H. The Japanese are anxious to proceed with their own domestic nuclear power program, using imported U.S. fuels and equipment. That will require a new, renegotiated U.S. agreement in September, 1979 for U.S. approval of some of the intended uses. What would be the impact on our trade relations if the pending legislation, that is S. 897, by statute, would prohibit unilaterally the Japanese intentions and thus deny U.S. officials of any flexibility in the 1979 renegotiations?

S. I'm not familiar with that legislation as I should be and Senator in an attempt to answer that I think the question speaks for itself, it almost answers itself, I'm not familiar with the legislation.

H. It might be that—I know that you have many demands upon your time and when you do have an opportunity if you might have someone on your staff examine this legislation with particular reference it might be helpful.

S. I assure you it will be done.

H. Well, I appreciate your responses Mr. Ambassador, it seems to me as though we're headed in the wrong direction, the attack we've taken in this whole nuclear field, and I would hope very much that we can turn that around so as to permit GE and the State of Connecticut to share with the few crumbs that we're going to get from the Japanese purchase of more beef, Senator Ribicoff.

Mr. HEINZ. Mr. President, reasonable men may differ on the degree of response given by Ambassador Strauss but certain points are clear:

First. Japan has now and will continue to pursue a nuclear energy program with or without the United States.

Second. Purchase of nuclear equipment from the United States is an important part of reducing our stunning trade deficit with Japan.

Third. Enactment of impediments to nuclear exports would eliminate trade with the United States but would not eliminate the nuclear trade itself.

There is good reason to believe that with respect to Japan, nuclear weapons proliferation is not nearly the danger it is elsewhere. But the point remains the same—impediments to nuclear trade remove the United States not only from the marketplace but from the ability to affect the global nuclear trade picture. It would be a cruel hoax on the American people for the Senate to assure them of future safety when we would have, in fact, advanced weapons proliferation and exported American jobs to boot.

Given this recognition of the importance of nuclear exports to our balance of trade, we must then discuss the equally significant questions of whether the pending legislation impacts adversely on those exports.

I recently wrote President Carter in that regard, raising several questions concerning the recent commitments of our Government to India and Iran and our participation in the London Suppliers Group agreement, which differs in several respects from the pending bill. I ask unanimous consent that the text of my letter be included at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMMITTEE ON THE BUDGET,
Washington, D.C., January 26, 1978.

The PRESIDENT,
The White House, Washington, D.C.

DEAR MR. PRESIDENT: Your dedicated efforts over the past year to develop a coherent U.S. policy on nuclear proliferation are most commendable. I have been pleased to see legislation supporting your efforts making its way through the Congress. As a member of the Governmental Affairs Committee, I voted to report one such bill, the Nuclear Nonproliferation Act (S. 897), last August.

Since that time there have been a number of events, including your recent trip and the agreement reached by supplier nations, which require a serious review of S. 897.

[1] Mr. Ushiba is the Japanese counterpart to Mr. Strauss.

Before acting on S. 897, the Senate should be fully informed with respect to what commitments have been made in India, Iran and to the London Suppliers Group and whether these commitments can be kept if S. 897 passes as currently written.

In addition I am concerned that U.S. suppliers might be placed under more stringent export requirements than those we have agreed to with other nations, and I would be eager to know your views on this matter.

I believe the Senate can best make a informed decision on S. 897 after these questions have been satisfactorily and completely answered. Accordingly, I would appreciate your providing me with the information necessary to respond to these concerns.

Sincerely,

H. JOHN HEINZ III,
U.S. Senate.

Mr. HEINZ. In a response I recently received from the State Department, several of my suspicions are confirmed with respect to India and the London Suppliers Group. I ask unanimous consent that that letter be included in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF STATE,
Washington, D.C.

Hon. JOHN HEINZ, III,
U.S. Senate.

DEAR SENATOR HEINZ: The President has asked that I reply to your letter of January 26 concerning the effect of the Nuclear Non-Proliferation Act (S. 897) on commitments that the Administration has made to Iran, India, and the London Suppliers Group.

I can assure you that these commitments will be carried out in a manner that meets the requirements of the pending non-proliferation legislation. In Iran, the President and the Shah agreed, in principle, on an Agreement for Nuclear Cooperation. Some details remain to be worked out, but the draft Agreement meets all the conditions of this legislation. We hope that negotiations will be concluded in the near future.

With regard to India, where the US is supplying low-enriched uranium for US-built power reactors at Tarapur, the President stated that we are prepared to go ahead with the next shipment of this fuel. The President also stated that the US would be prepared to make available some heavy water to India. The President's offer of heavy water was a good will gesture in the context of an effort to work out with India an arrangement which gets the Indians to accept international safeguards on all their nuclear activities. India is aware of the impact of the pending legislation, which is strongly supported by the President, on nuclear supplies 18 months after enactment unless India puts all its nuclear activities under IAEA safeguards. We are hopeful that India will find a way to take this step so that US/Indian nuclear cooperation may continue.

Concerning the Nuclear Suppliers guidelines, I have enclosed, for your information, a copy of the guidelines and a paper discussing how they relate to S. 897. While the current US position, as reflected in S.897, is more stringent than the minimum criteria represented by the Guidelines, we are hopeful that the consensus among suppliers will continue to move toward our somewhat stricter position. We are very much aware that if we move too far out in front of others, we would undermine our nuclear export capabilities and thus reduce our leverage to shape stronger international export regime.

We believe that S. 897 achieves a good balance by establishing strong nuclear export criteria while allowing for sufficient flexibility to continue nuclear cooperation that is in the national interest. We strongly support passage of the legislation as soon as possible.

The Office of Management and Budget advises that from the standpoint of the Administration's program, there is no objection to the submission of this report.

Sincerely,

DOUGLAS J. BENNET, Jr.,
Assistant Secretary for Congressional Relations.

Mr. HEINZ. Further, in material submitted to the Senate Foreign Relations Committee on January 12, one major point is reconfirmed in detail—the difference between the London Suppliers Group agreement and S. 897. I also ask unanimous consent, Mr. President, to insert that material at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE NUCLEAR SUPPLIERS GUIDELINES AND S.897

In January 1978, the export guidelines adopted by the London Nuclear Suppliers Group were for the first time officially made public. These guidelines establish minimum standards for safeguards and export controls to be applied by nuclear suppliers in transfers to any non-nuclear weapon state for peaceful purposes. The text of these guidelines was provided the Senate Foreign Relations Committee under cover of letters from Dr. Joseph S. Nye, of January 12, 1978.

As the Committee is aware, the major elements of these guidelines were developed in a series of confidential meetings in 1975 among seven major supplier nations. The original participating states in January 1976 informed each other of their intention to observe the guidelines in their national export policies. Several additional steps were necessary prior to official publication of the guidelines. First, several related documents had to be worked out: the trigger list, the annex to the trigger list containing additional clarifications, and the agreed levels of physical protection. Second, the group was enlarged from its original seven members to fifteen members. Third, several of the provisions in the guidelines were revised for technical reasons (e.g., to take into account the completion of work on the various annexes). Fourth, provisions in the guidelines were strengthened; thus, the provisions relating to "sanctions" in paragraph 14(c) were elaborated. Finally, procedures for publication were worked out. During this whole period, from the commencement of work on the guidelines, through the initial stages of adoption of the guidelines in confidence, the Executive Branch has periodically provided the Congressional Committees with confidential briefings on the progress of this work.

Since the main elements of the guidelines were established by the end of 1975, the work of the Executive Branch on non-proliferation legislation since then has taken into account the existence of this document. The positions taken by the Executive Branch in commenting on previous versions of the non-proliferation legislation, in proposing its own bill during this Administration (S.1432), and in working out compromise provisions in S. 897 have been fully consistent with and supportive of the London Nuclear Supplier Group Guidelines.

It is the Executive Branch's judgment that the publication of the guidelines does not necessitate any revision in S. 897, as most recently reported to the Senate. In fact, consistent with our view that the guidelines provide a floor and not a ceiling on the non-proliferation controls and commitments appropriate to be sought by nuclear suppliers in their export dealings, S. 897 is considerably stronger in many ways than the guidelines.

U.S. law as it would be set forth in S. 897 is stronger in some respects than the guidelines. Countries purchasing from the U.S. will be asked to agree to somewhat stricter terms than those which may be sought by some other suppliers, but we do not believe that the U.S. should adopt a "lowest common denominator" approach. In developing our policy and our position on S. 897, we have had clearly in mind the need to avoid policies so restrictive as to damage our competitive commercial position, or our leverage in moving others toward adequate safeguards and controls. We believe that our present policy and S. 1432 strike the proper balance between these factors.

For the sake of comparison, the following discussion relates provisions in the guidelines to provisions in S. 897.

Paragraph 2 of the guidelines requires that suppliers, in their civil nuclear dealings explicitly exclude uses which would result in any nuclear explosive device. This is reflected in S. 897 in proposed section 127 (2) and 123 (a) (3) of the Atomic Energy Act.

Paragraph 3 of the guidelines requires adequate physical protection in the recipient country of nuclear materials and facilities. This is reflected in S. 897 in proposed sections 127 (3) and 123 (a) (6) of the Atomic Energy Act.

Paragraph 4 of the guidelines requires IAEA safeguards on exported items. This is reflected in S. 897 in proposed sections 127 (1) and 123 (a) (1) of the Atomic Energy Act. In addition, S. 897 contains a more stringent provision, on which we have not yet succeeded in achieving consensus in the Nuclear Suppliers Group, which provides for full-scope safeguards (see proposed sections 128 and 123 (a) (2) of the Atomic Energy Act). Paragraph 5 provides that suppliers will jointly reconsider their common safeguards requirements whenever appropriate. This provides the United States the opportunity to continue to press for full-scope safeguards, as well as to take initiatives in the Nuclear Suppliers Group in accordance with provisions contained in sections 104, 201, and 403.

Paragraph 6 of the suppliers guidelines require that safeguards be triggered by the transfer of certain sensitive technology. This is reflected in S. 897 in proposed sections 127 (6) and 123 (a) (9) of the Atomic Energy Act. In addition. section 402 (b) would require specific provision in any Agreement for Cooperation to permit any export of any major critical component of a sensitive nuclear facility.

Paragraph 7 of the guidelines calls for supplier restraint in the transfer of sensitive facilities, technology and weapons usable materials. While this requirement in the suppliers guidelines lacks specificity, the United States, France and the Federal Republic of Germany have each publicly announced their intention not to export certain sensitive technology. President Carter in his April 7, 1977, nuclear policy announcement, indicated that "We will continue to embargo the export of equipment or technology that would permit uranium enrichment and chemical reprocessing." Further, with respect to weapons usable material, the White House announced a policy of restraint in Point 1 of its fact sheet of April 27, 1977 (see page 123 of *Nuclear Proliferation Fact Book*, Joint Committee Print, 95th Congress, First Session, September 23, 1977). This policy of restraint is reflected in many places in S. 897, such as section 402 (b).

Paragraph 8 of the guidelines requires that the recipient nation agree that any enrichment facility or any facility based on the technology to be exported will not be designed or operated for the production of greater than 20% enriched uranium without the consent of the supplier. This policy is reflected in section 402 (b) of S. 897.

Paragraph 9 of the suppliers guidelines is non-mandatory. It indicates that suppliers recognize the importance of including con-

trols on reprocessing, storage, alteration, use, transfer and retransfer in agreements for the supply of nuclear materials and facilities for production of weapons-usable material. Paragraph 10 of the guidelines require retransfer controls on all export items and material derived through their use, as well as on major critical components. S.897 is more stringent in some respects, and comparable in others. With respect to retransfers, S.897 reflects the provisions in the suppliers guidelines in proposed sections 127 (4) and 123 (a) (5). With respect to reprocessing and alteration, S.897 goes further than the guidelines in the provisions of proposed sections 127 (5) and 123 (a) (7). With respect to storage, S.897 reflects the provisions of the suppliers guidelines in section 123 (a) (8). As indicated above, all the controls listed, including those on reprocessing, storage, alteration, transfer and retransfer, apply to sensitive nuclear facilities, major critical components, and material produced through their use.

Paragraphs 11–16 of the guidelines concern "supporting activities".

Paragraph 11 calls on suppliers to promote international cooperation in the field of physical security. A U.S. initiative on this matter is proposed in section 403(b)(2) of S. 897. It is consistent with this that the U.S. proposed internationally a Convention on the Physical Protection of Nuclear Materials, Equipment and Transports. A first meeting to negotiate this Convention was held in November 1977, with the next meeting scheduled for April 10–21, 1978.

Paragraph 12 calls for suppliers to make special efforts in support of effective implementation of IAEA safeguards. Section 201 or S. 897 deals with this subject matter and reflects the provisions of the suppliers guidelines, in somewhat greater detail.

Paragraph 13 of the guidelines calls on suppliers to encourage designers and makers of sensitive equipment to construct it in such a way as to facilitate the application of safeguards. The U.S. Government is undertaking studies related to this initiative.

Paragraph 14 of the guidelines deals with consultations among suppliers. Paragraph 14 (c) deals particularly with the issue of sanctions. Even more stringent provisions are contained in S. 897 in proposed section 129 of the Atomic Energy Act. Proposed section 123(a)(4) would also require that provisions on sanctions be in all new or amended agreements for Cooperation.

Paragraph 15 of the guidelines calls on suppliers to exercise prudence taking into account the circumstances of each case, including the risk that transfers of nonsensitive technology may lead to unsafeguarded nuclear material. Through the variety of licensing and approval processes provided for in S. 897, all the agencies of the Executive Branch and the Nuclear Regulatory Commission will, as appropriate, have the opportunity to assess the risk of each particular nuclear export, so that exports which would, in the circumstances of a particular case create an undue risk, would be denied.

Mr. HEINZ. From these various materials, Mr. President, I think several conclusions are clear. First, that the President's agreement with India would be in serious difficulty if S. 897 were law today. The State Department letter assumes, optimistically in my view, that India can be persuaded to accept the necessary safeguards within 18 months of enactment of this legislation. I know of no evidence for this assumption.

Second, the letters admit that S. 897 is notably more stringent than the agreement negotiated by the London Suppliers Group.

Curiously, the executive branch seems to regard this as a good thing, despite saying simultaneously that there is a very real danger of getting too far out in front of other suppliers in terms of requirements. Aside from the inconsistency inherent in these two statements, the State Department also fails to draw the obvious conclusion that stricter standards for U.S. exporters will inevitably persuade buyers to turn to other sources of supply. The result of that will be no reduction in the spread of nuclear technology, but rather a reduction in the spread of American nuclear technology and American exports.

Particularly disturbing in the letter is the statement:

> We are very much aware that if we move too far out in front of others, we would undermine our nuclear export capabilities and thus reduce our leverage to shape stronger international export regime.

This is essentially an admission of both the present situation—we are too far out in front—and of the consequences for our world role in halting nuclear proliferation and for our domestic industry.

The latter consequences, in particular, need to be discussed in greater detail. Westinghouse, one of the major companies in this business, has provided lists of potential exports and job impacts, as well as current jobs in the export arm of the industry. Mr. President, I ask unanimous consent that this material be inserted in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NUCLEAR EXPORT ORDERS OBTAINABLE BY U.S. SUPPLIERS IN THE NEXT TWO YEARS INCLUDING THEIR ECONOMIC AND JOB IMPACTS ON THE U.S. ECONOMY

The following reactor orders are those which U.S. suppliers would have a reasonably high opportunity of obtaining between now and mid-1979:

1. South Korea—Between two and four 600 Mega-watt Electric Nuclear Power Plants.
2. Israel—Two 900 Mega-watt Electric Nuclear Power Plants.
3. Egypt—One 600 Mega-watt Electric Nuclear Power Plant.
4. Iran—Two 1200 Mega-watt Electric Nuclear Power Plants.
5. Spain—One 1000 Mega-watt Electric Nuclear Power Plant.

The attached table lists the overall basic economic and job information as well as the scope of supply for the above nuclear plants.

ATTACHMENT 6

Country	Number of units/size	Scope of supply	Export value (millions)[1]	Export jobs[2]
Spain	1/1,000 MWe	Reduced U.S. equipment supply	$150	6,000 man-years, 1,200 jobs.
Iran	2 /1,200 MWe	Turnkey	1020	42,000 man-years, 8,400 jobs.
Korea	2 or 4 900 MWe	U.S. equipment supply	480 or 960	11,900 man-years, 2,400 jobs; or 23,800 man-years, 4,800 jobs.
Israel	2 900 MWe	do	480	11,900 man-years, 2,400 jobs.
Egypt	1 600 MWe	Turnkey	353	14,500 man-years, 2,900 jobs.
Totals	8 to 10 units		2,583 or 3,063	86,300 man-years, 17,200 jobs; or 88,200 man-years, 19,600 jobs.

[1] The value listed is not the total value of a particular job but that of the goods and services provided from the United States. The value has been calculated assuming all sales were made in 1977 and includes an estimated escalation rate until the unit is delivered.

[2] The number of jobs has been estimated based on the simplifying assumption that the man years of effort are evenly distributed over the 5-yr manufacturing and construction cycle required to complete a large nuclear unit overseas.

ATTACHMENT 7

STATE-BY-STATE DISTRIBUTION OF EXPORT JOBS AND REVENUES

The total dollar value, man-years of effort, and jobs are typically distributed among 31 States, based on an analysis of previous export orders. The breakdown for the 14 major States is given below:

State	Value (millions)	Man-years	Total jobs (for 5-yr period)
Alabama	$50.3	1,673	337
Connecticut	53.8	1,792	362
Florida	157.1	5,229	1,061
Illinois	93.7	3,117	632
Indiana	51.5	1,667	337
Kentucky	35.8	1,190	241
Massachusetts	32.5	1,081	216
New Jersey	73.9	2,460	499
New York	355.6	11,969	2,304
North Carolina	190.3	6,433	1,281
Ohio	40.8	1,360	275
Pennsylvania	1,103.1	36,885	7,336
South Carolina	70.5	2,346	474
Tennessee	55.1	1,822	370
Total	2,364.0	79,024	15,723
17 other States	219.0	7,276	1,477
Total	2,583.0	86,300	17,200

Mr. HEINZ. Mr. President, these figures indicate a substantial amount at stake in this country, particularly in Pennsylvania, which has over 42 percent of the jobs involved.

As I have said before, Mr. President, while jobs are critically important, they should not be our sole consideration in debating any piece of legislation, and I would certainly not want to suggest that halting the proliferation of nuclear weapons is an unimportant goal to strive for. However, I will say again that in view of the potential economic cost of this bill to this country, we had better be very sure of achieving our goal before we pass S. 897.

At this point unfortunately I for one am not very sure of that goal and I hope the sponsors of the bill will be able to present a more compelling case. What we have had thus far are assertions that the rest of the world is moving in our direction and that more countries are indicating willingness to accept the stringent safeguards required by S. 897. That of course is good news, but important countries like India, Argentina, and South Africa continue to raise doubts, and countries like these pose the greatest threat of proliferation.

In the absence of progress with these countries, adoption of this bill unamended will only serve to remove us from the marketplace, thereby removing any degree of leverage and control we could exercise. The result will be failure to achieve our nonproliferation goals, but worse than that, the price for that failure will be thousands of American jobs, lost for no purpose. A better approach,

in my view, would be to recognize the multilateral nature of this problem and, in the State Department's words, not "get too far out in front" of the other suppliers, and instead work with them to develop a common, consistent policy on nonproliferation.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Senate will convene tomorrow at 10 a.m.

After the prayer and the disposition of the approval of the Journal, the Senate will resume consideration of the unfinished business. Further amendments to S. 897 are in order.

At 1:30 p.m. tomorrow, the Senate will begin consideration of the spent fuel amendment by Mr. McCLURE. The vote on that amendment will occur no later than 4:30 p.m.

Following the disposition of the spent fuel amendment, there will be 1 hour of debate on the bill, and a vote will occur immediately upon the expiration of that 1 hour or upon the time being yielded back. So there will be rollcall votes tomorrow.

RECESS UNTIL 10 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until 10 a.m. tomorrow.

The motion was agreed to; and at 5:24 p.m. the Senate recessed until tomorrow, Tuesday, February 7, 1978, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate February 6, 1978:

DEPARTMENT OF STATE

Robert J. McCloskey, of Maryland, a Foreign Service officer of the Class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Greece.

NATIONAL TRANSPORTATION SAFETY BOARD

James B. King, of Massachusetts, to be Chairman of the National Transportation Safety Board for a term of 2 years, vice Webster B. Todd, Jr., resigned.

NATIONAL LIBRARY OF MEDICINE

The following-named persons to be members of the Board of Regents of the National Library of Medicine, Public Health Service, for the terms indicated:

For a term expiring August 3, 1979:

Thomas C. Chalmers, of New York, vice Bernice M. Hetzner, term expired.

Kelly M. West, of Oklahoma, vice Angelo M. May, term expired.

For a term expiring August 3, 1980:

Samuel Richardson Hill, Jr., of Alabama, vice Ethel Weinberg, term expired.

Doris H. Merritt, of Indiana, vice Max Michael, Jr., term expired.

Cecil George Sheps, of North Carolina, vice William N. Hubbard, Jr., term expired.

For a term expiring August 3, 1981:

James Franklin Williams II, of Michigan, vice Joseph Francis Volker, term expired.

Nicholas Edward Davies, of Georgia, vice William O. Baker, term expired.

INTERNATIONAL COMMUNICATIONS AGENCY

The following-named persons to the positions indicated:

John E. Reinhardt, of Maryland, to be Director of the International Communication Agency (new position).

Charles W. Bray III, of Maryland, to be Deputy Director of the International Communication Agency (new position).

DEPARTMENT OF STATE

The following-named Foreign Service information officers for promotion in the Foreign Service to the classes indicated:

Foreign Service information officers of class 1:

Robert L. Chatten, of California.
Mourad William Haratunian, of New Jersey.
Fred D. Hawkins, of the District of Columbia.

Foreign Service information officers of class 2:

Dennis Askey, of Hawaii.
Stephen F. Dachi, of Maryland.
Thomas C. Dove, Jr., of Connecticut.
Robert Barry Fulton, of Pennsylvania.
Norris D. Garnett, of California.
Allen C. Hansen, of Virginia.
Edward M. Harper, of California.
Robert E. Kays, of Virginia.
John F. Kordek, of Illinois.
Frederic S. Mabbatt III, of Virginia.
Edgar E. Noel, of the District of Columbia.
Phelon D. Peters, of California.
Donald E. Reilly, of California.
Robert A. Riccio, of California.
Lois W. Roth, of New Jersey.
John C. Scafe, of Kansas.
Frank W. Scotton, of Virginia.
Christopher L. Sholes, of New Jersey.
William F. Thompson, of Minnesota.
John H. Trattner, of Virginia.
G. Claude Villarreal, of Texas.

Foreign Service information officers of class 3:

Jeffrey Robert Biggs, of the District of Columbia.
Frances D. Cook, of Florida.
Robert T. Coonrod, of New Jersey.
Lawrence Donald Daks, of Illinois.
John Henry Hicks, of Missouri.
Larry J. Ikels, of Texas.
Robert Douglas Jones, of Maryland.
John M. Keller, of Minnesota.
Clara Sigrid Maitrejean, of Arizona.
Cynthia J. Miller, of Texas.
Thomas E. O'Connor, of Ohio.
Clathan McClain Ross, of North Carolina.
Ernesto Uribe, of Texas.

Foreign Service information officers of class 4:

Cresencio S. Arcos, Jr., of Texas.
Stephen Mark Dubrow, of Florida.
Joan Mary Gibbons, of Illinois.
Joe B. Johnson, of Texas.
Charles C. Loveridge, of Utah.
Francis William Lowrey, of New Mexico.
Robert L. Michael, of Ohio.
Steven J. Monblatt, of New York.
John J. Shippe, of Connecticut.
Frank F. Starbuck, of Florida.
Carmen Suro-Bredie, of the District of Columbia.
Larry R. Taylor, of Washington.
Van S. Wunder III, of Florida.
Michael D. Zimmerman, of New Jersey.

Foreign Service information officers of class 5:

Mary Lou Edmondson, of Colorado.
Hugh H. Hara, of Illinois.
Joel J. Levy, of Connecticut.
Mildred C. McCoo, of the District of Columbia.
Robert J. Meade, of New Jersey.
Patricia J. Moser, of Maryland.
Arthur L. Skop, of the District of Columbia.
Rosalind L. Swenson, of New York.
Louise Taylor, of California.
E. Ashley Wills, of Virginia.
Douglas B. Wilson, of Arizona.

Foreign Service information officers of class 6:

William R. Barr, of New York.
Michael Allen Betcher, of Ohio.
Anne M. Chermak, of Pennsylvania.
Mark E. Dillen, of California.
Louis P. Falino, Jr., of Pennsylvania.
Pamela Sterne Gumport, of New York.
Lynne E. Hart, of California.
Barbara E. Haven, of New York.
Lois Marie Herrmann, of the District of Columbia.
Thomas Neil Hull III, of Florida.
Robert S. Lapiner, of California.
Barbara St. C. Calandra Moore, of Oregon.
Jennifer E. Newton, of Minnesota.
Theresa L. Rusch, of Wisconsin.
Charla Saylor, of Ohio.
J. Riley Sever, of Florida.
Lynn Gunn-Smith Sever, of Florida.
William J. Shine, of New Hampshire.
Jane Daniel Wilson, of Arizona.

Foreign Service information officers of class 7:

Domenick DiPasquale, of New York.
Linda Jewell, of Arkansas.
K. Kimberly King, of California.
Gary B. MacDonald, of Washington.
Mary Jane McKinven, of Illinois.
Charles David Noziglia, of Virginia.

IN THE COAST GUARD

The following officer of the U.S. Coast Guard for promotion to the grade of lieutenant:

Lewis J. Buckley

The following-named Reserve officers of the Coast Guard to be permanent commissioned officers in the grades indicated:

Lieutenants

Robert F. Carter, Jr.	Francis P. Hopkins
Phillip R. Corpuz	Charles J. Mathis
Michael L. Dorsey	William J. Morani, Jr.
Robert W. Ferguson	William B. Short, Jr.
John R. Frost	Gerald W. Vonantz

Lieutenants (junior grade)

Kenneth A. Baker	Gabriel O. Kinney III
John E. Bate	Donald J. Klingenberg
Eric C. Bries	Denis A. Kremer
Johnny F. Burell	Leonard J. Kuhnemann
Elizabeth A. Calhoun	
Douglas B. Cameron	Larry R. Manthei
Kurt A. Carlson	Terry A. McKay
Bruce M. Carskadon	David F. Miller
John J. O'Connor	Steven P. Mojonnier
Gary A. Denhel	Dennis L. Crosby
Jonathan V. Embler	John R. Odom III
Alberto J. Gaston	Eric H. Olsson, Jr.
William T. Gibbs	Jerry R. Penska
Stewart L. Gingrich	John A. Pepe, Jr.
Bobby D. Greenlee	Douglas B. Perkins
Robert L. Griffin	Thomas R. Pigage
Gary H. Griffiths	Thomson Pray
Christopher A. Grimm	Rex J. Prosser
	Stephen P. Purvine
Dale L. Harrington	Michael A. Roberts
Kay L. Hartzell	John S. Ryba
Bradford C. Herter	James H. J. Schaeffer
Derrick W. James	Charles T. Schmincke
Gerald D. Jenkins	John E. Schrinner
Donald M. Johnson, Jr.	John G. Shaw
	Michael L. Stafford
Daniel E. Kah	Thomas P. Talbot, Jr.
Glen E. Kapitzke	Stanley J. Walz
Alan J. Kiehle	

Chief Warrant Officer, W-2

Theodore F. Ramsey

IN THE COAST GUARD

The following-named lieutenant commanders of the Coast Guard Reserve to be permanent commissioned officers in the Coast Guard Reserve in the grade of commander:

Ernest E. James	Edward B. Peel
Richard C. Binzley	Fred S. Golove
George A. Newton	Manuel C. Rosenfield
Clifford G. Speiman, Jr.	Thomas P. Noe
	Paul O. Larson
James (n) Keating	Peter N. Davidson
William H. Disney	Alvin N. Kellogg
Alfred (n) Haro	Peter J. Gaizutis
James L. Mears	Burton G. Womble
James A. Marvin	Kenneth A. Klein

Fred C. Willes
Richard J. Flynn
James L. Krish
Lawrence F. Merlino
Robert R. Caron
David M. Halstead
Paul M. Hureau
Roger S. Tucker
Larry E. Helber
Robert C. Isham
John G. Donovan
Joseph P. J. Cooley
Clinton R. Miller
Thomas M. Crehan
Paul B. Pascoe
Joseph M. Harasta
Edward C. Rawley
Victor K. Goodman, Jr.
Dalton L. Garrison
Patrick O. Boyle
Joseph S. Cromwell, Jr.
Eino E. Niinimaki
David J. Dehlin
Raymond O. Wickstrom
Bobby G. Christian
Norman D. Stevens
David W. Proudfoot
William S. Haight
Larry D. Brooks

IN THE COAST GUARD

The following-named officers of the Coast Guard for promotion to the grade of lieutenant:

Bruce E. Tate
Walter J. Brudzinski
David W. Beach
Michael K. Parmelee
Robert B. Buford
Michael R. Bowen
Thomas J. Neill
Mark D. Keyl
Michael E. Swigert
Robert E. McDaniel
Bradley N. Balch
Philip M. Kolb, Jr.
Frederick R. Hill
Leonard F. Edinger II
Robert R. Trescott
Harold L. Hayes
Steven L. Hamilton
Jerry M. Lentz
Ronald W. Batson
Thomas S. Cunningham
Lawrence C. Craig
Billy H. Reid
Donald J. Alciati
Steven T. Fothergill
Kent E. Fisher
Leslie H. Smith
Ronald Bunk
Robert C. Perry
Lawrence B. King
Daniel J. Elliott
Jeffrey M. Garrett
Leonard J. Kelly, Jr.
Pecos B. Field
James M. Seagraves
David D. Caron
Brian V. Hunter
Guy E. Motzer
Ronald R. Weston
Robert C. Shearer, Jr.
William A. Henrickson
Roman T. Lewandowski, Jr.
Richard R. Beardsworth
Charles A. Amen
John C. Burson
Terence M. Hurley
Richard E. Lang
Philip M. Sanders
William J. Lee II
Michael L. Hardie
Kenneth U. Dykstra
Fred F. Rogers III
Allen B. Hughes, Jr.
Philip G. Matyas
James L. House
Peter K. Mitchell
Andrew J. Sincali
Kevin J. Eldridge
Thomas W. Sechler
Lawrence I. Kiern
Walter L. Johnson
John K. Nelson
John P. Aherne
Richard A. Koehler
Mark A. Fisher
Joseph F. Ahern
David M. Loerzel
James M. Dwyer
Richard L. Ryan
Daniel G. Henderson
Dale E. Hower
Gary Krizanovic
Stefen G. Venckus
Scott W. Allen
Timothy W. Hylton
David M. Giraitis
James M. Garrett
Victor J. Zoschak, Jr.
Jeffrey J. Hathaway
Joseph A. Conroy, Jr.
Derek A. Capizzi
Joseph P. Brusseau
James C. Vansice
Bruce A. Russell, Jr.
William L. Powers
Albert F. Suchy IV
Guy R. Colomna
Scott F. Kayser
Stephen K. Toney
Michael W. Collier
Ronald A. Nilsen
Dana A. Goward
Larry C. Young
John T. O'Connor
Robert L. Gazley
Richard S. Hartman, Jr.
David W. Gault
Gregory B. Kirkbride
Kyle W. Blackman
Robert M. Wicklund
Drew F. Vanriper
Arthur S. Blaylock III
Gary W. Palmer
John T. Murray
Walter E. Hanson, Jr.

IN THE NAVY

The following-named captains of the line of the Navy for temporary promotion to the grade of rear admiral, subject to qualification therefor as provided by law:

John G. Wissler
William E. McGarrah, Jr.
Milton J. Schultz, Jr.
Robert B. Fuller
Charles E. Gurney III
Frank C. Collins, Jr.
Frederick W. Kelley
Dempster M. Jackson
John B. Mooney, Jr.
Lawrence Burkehardt III
Walter M. Locke
Joseph F. Frick
Richard A. Martini
Harry C. Schrader, Jr.
Joseph J. Barth, Jr.
Richard T. Gaskill
Glenwood Clark, Jr.
Richard A. Miller
Louis R. Sarosdy
Joseph B. Wilkinson, Jr.
Richard K. Fontaine
James E. Service
Peter C. Conrad
James A. Lyons, Jr.
James B. Busey
William C. Neel
Donald S. Jones
Louis A. Williams
Powell F. Carter, Jr.
Wayne D. Bodensteiner
Stanley G. Catola

IN THE AIR FORCE

The following-named officers for promotion in the U.S. Air Force, under the appropriate provisions of chapter 839, title 10, United States Code, as amended.

DENTAL CORPS

Major to lieutenant colonel

IN THE NAVY

The following-named Navy enlisted candidates to be appointed temporary Chief Warrant Officers, W–2, in the U.S. Navy, Subject to the qualifications therefore as provided by law:

Alfredo Zamora Acosta
Donald James Adams
Richard Lee Adams
Glenn Howard Allen
Brian Walter Ambrose
Gerold Boyd Anderson
Jon August Anderson
Richard Joseph Andrzejewski
Robert Bruce Archibald, Jr.
Terrence Donald Armbruster
Harold Thomas Austin
Kenneth Robert Baisey
Benildo Saria Baja
Jose Arturo Balderrama
Waite William Balog
Thomas Salvatore Barba
John Albert Barnhart
William Joseph Bauman
Dennis Dean Beesley
James Jesse Bell
Kenneth William Bendy
Francis Marion Bennett, Jr.
Frederick Joseph Bergeron
Thomas Jefferson Berry, Jr.
James Gordon Bickel
Robert Eugene Blansett
Jacinto Ubas Bolado
Gary George Boley
Frank John Boyd
Donald Franklin Bradley
Johnny Larry Brandon
William James Brazell
Gary Lamar Brown
Horace James Brown
John Leonard Brustol
Thomas Joseph Bryan
Kenneth Hugh Buttler, Jr.
Danilo Ilas Cajigas
Lind Antonio Canino
Tony Martin Cheesebrew
Virginia Bernice Ciborowski
Mariano Fulgueras Ciron, Jr.
Efren Dison Cisneros
Joseph Blue Clark
Harry Vernon Clifton
James Robert Clifton
Robert Woodrow Clouse, Jr.
John Herbert Coers
Robert John Coffin
Charles Arthur Commons
Howard Everet Conder
Chandler Cooks, Jr.
Robert Estol Cooper
Lewis Laverne Cornett
Byron Franklin Craig
Richard Joseph Crawford
Mitchell Hartley Danforth
Antonio Manaloto David
James Ray Davis
Orville Clinton Davis
James Lee Day
Dale Arrington Derricote
Ronald Paul Dill
Jimmie Leon Dodson
Daniel David Drahos
Robert Herman Dulin
Fredrick Charles Dunbar
Samuel Newton Dunlap
Wayne Lawrence Dupree
Billy Blake Earl
Ronald Dean Eberly
Thomas Patrick Eck, Jr.
Elton Edwin Ellis
Robert Allen Ellis
Ronald Michael Estrada
Charles Ronald Ethridge
William Stanley Ewashko
James Joseph Fenwick, Jr.
Dalton Lamar Fields
Elton Craig Fortner
Gerald Thomas Fountain
James Everett Francis
Lloyd Coleman Fraser
John Robert Frisko
Jesse James Gac
Gerald Monroe Gandy
William Jefferson Gardenhire, Jr.
John Edward Gates
Robert Francis Geihl
William Raymond Gideon
Robert Timothy Giffin
Dwain Eugene Glascock
Rodolfo Valentos Gloria
William David Goldfarb
William Matthew Gottschalk
Joseph George Graleski
William Alton Grizzard
Darrel Lee Gurley
Robert Andrew Hahn
John Dewey Haldeman
Gunnard Harvey Halvorson
Hubert Franklin Harrell
Wayne Darwin Hartman
Robert Olen Hastings
Thomas Cawley Hawkins
Robert Merle Henderson
Peter Francis Hennessy
Roy Dean Henson
Sidney William Hoder
Michael Edmond Holland
Carl Forrest Horne
Jackie Ray Horne
Larry Dean Hosterman
Charles Edward Hughes
John David Hundley
John William Hyde
Bobby Earl Hyman
Michael Rex Ingram
Danny Taylor Jenkins
"J" "L" Jenkins, Jr.
Elvin Jiles, Jr.
Del Gene Jondahl
Gilbert Harrison Jones, Jr.
Robert Jay Kemple
Robert Henry Kermon, Jr.
James Stephen King
Thomas Moses King, Jr.
Klifton Kay Kirk
John Henry Kolenda
Paul Donald Lacoe
Bruce Michael Laurendeau
Robert Howard Ledford
Clement Joseph Lestage
Donald Earl Lins
James Joseph Lloyd, Jr.
Jess Elmer Ludrick, Jr.
Charles Pat Lundy, Jr.
Robert Edward Lutz
Jackie Louree Lyon
John Dennis Lytle
Harold Bernard McAnney
Larry James McKee
Larry Steven McMahon
Jerry Lee Marquette
David Paul Martin
Rustic Allen Maultsby, Jr.
Jack Edward Maxey
William Earl Mick
Charles Earl Miller
Glenn Edward Miller
Jack Ritter Miller
Randy Scott Miller
Robert Bruce Miller, Jr.
William Lamar Miller
Ronald Joseph Moore
Suzanne Morgan
Peter Mularchuk
Michael Eugene Murphy
John Lewis Ness
James Alvin Nicholson
George Henry Niebler, Jr.
Stacy Lee Norris
John Harvey Olcott
George Bernard Overbeek

Allan George Young
Richard Matthew Zablocki
Marion Davis Ziegler III

The following-named Navy enlisted candidates to be appointed ensigns in the U.S. Navy, for limited duty, for temporary service, in the classification indicated, subject to the qualifications therefor as provided by law:

Edmond Carroll Caviness II (deck-surface).
James Clifton Crout (deck-surface).
John Louis Haddox (deck-surface).
Rhudean Carl Musgrove (deck-surface).
Gerald Paul Ruggles (deck-surface).
William Joseph Rutland, Jr. (deck-surface).
Michael John Crone (operations-surface).
Russell Wallace Green (operations-surface).
Lawrence Dean Griffith (operations-surface).
Richard Harold Kluber (operations-surface).
Daniel Richard Martin (operations-surface).
Ronald Bruce Moorman (operations-surface).
George Ray Admire (engineering/repair-surface).
George Chester Bell, Jr. (engineering/repair-surface).
Michael Ray Bennett (engineering/repair-surface).

Donald Wayne Blackmore (engineering/repair-surface).
Lowell Karl Block (engineering/repair-surface).
Van Allen Case (engineering/repair-surface).
James Wilson Chester (engineering/repair-surface).
Michael Robert Dutton (engineering/repair-surface).
Marion Laverle Holloway (engineering/repair-surface).
James Raymond Hosking (engineering/repair-surface).
Thomas Ryles Howell (engineering/repair-surface).
Noah William Jackson (engineering/repair-surface).
James Douglas Jolley (engineering/repair-surface).
Ararat Kirkorian (engineering/repair-surface).
Ben "G" Lindsey, Jr. (engineering/repair-surface).
Robert Merle McKinney (engineering/repair-surface).
Glenn Earl Miller (engineering/repair-surface).
Charles Lewis Murphy, Jr. (engineering/repair-surface).
Raymond Paul Weber (engineering/repair-surface).
Gary Louis Whitney (engineering/repair-surface).
Jack Phillip Goldenberg (nuclear power-surface).
David Paul Gruber, II (nuclear power-surface).
Gary Wilbert Simpson (nuclear power-surface).
Richard Raymond Dickens (ordnance-surface).
James Lawrence Kuriger (ordnance-surface).
Seawood Murray, Jr. (ordnance-surface).
Howard David Suchland (ordnance-surface).
Steven Murray Albert (electronics-surface).
Michael David Belanger (electronics-surface).
Larry Lee Brown (electronics-surface).
Denis Ray Carpenter (electronics-surface).
David Eugene Draper (electronics-surface).
Joseph Earl Estrada (electronics-surface).
Marshall Earl Godwin (electronics-surface).
Michael Andrew Knight (electronics-surface).
Gene Francis Le Blanc (electronics-surface).
Curray Andrew Long (electronics-surface).
Gary Lee Manuel (electronics-surface).
Jack Weston Moody (electronics-surface).
Thomas Joseph Moore (electronics-surface).
Charles Howard Munter (electronics-surface).
William James Shank (electronics-surface).
James Frank Tichacek (electronics-surface).
John Joseph Vogel, Jr. (electronics-surface).

IN THE MARINE CORPS

The following-named male officers of the Marine Corps for temporary appointment to the grade of lieutenant colonel under the provisions of title 10, U.S. Code, section 5769:

Herbert M. Sanchez
Joseph J. Dzielski
Robert L. Mitchell
Fred W. Anthes
Howard A. Franz
Morris R. Roberts
James E. Rickmon

The following-named women officers of the Marine Corps for permanent appointment to the grade of major under the provisions of title 10, U.S. Code, section 5771:

Ingrid M. Pranger
Kyoko Pentz
Alice B. Speizman
Helen D. Kruger

The following named male officers of the Marine Corps for temporary appointment to the grade of major under the provisions of title 10, U.S. Code, section 5769:

James R. Acreback
Jerald R. Agenbroad
Gary R. Albin
Lester E. Amick III
Robert D. Amos, Jr.
Gary D. Andersen
James E. Andrews III
Russell E. Appleton
Bruce R. Archer
Rodney A. Arena
Michael D. Ashworth
George B. Atkinson
Paul C. Bacon
Ronnie J. Bailey
Wheeler L. Baker
William J. Baker
Charles Balchunas
David W. Baldwin
James E. Barksdale
James J. Barta
Allen C. Bartel
Richard J. Bartolomea
John M. Basel
Edmund Bauernfeind
Arthur S. Bausch
Hugo T. Beck
Emil R. Bedard
Charles A. Bellis, Jr.
Guiseppe A. Betta
John L. Bilodeau
Willie R. Bishoff, Jr.
David L. Bjork
William B. Blackshear, Jr.
James R. Blanich
Billy R. Blocker
Michael P. Boak
Robert J. Boardman
George J. Bolduc
James N. Bonner
Michel A. Boyle
Sevath A. Boyum
Clifford A. Brahmstadt
Leo A. Brandenburg
Ian Brennan

Thomas D. Olson
Robert D. Madison
Robert J. Watson

HOUSE OF REPRESENTATIVES—*Monday, February 6, 1978*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

They that wait upon the Lord shall renew their strength; they shall mount up with wings as eagles; they shall run and not be weary; and they shall walk and not faint.—Isaiah 40: 41.

O God, our Father, as we wait upon Thee may our strength be renewed that we may run and not be weary and walk with Thee and with one another and not faint. So shall we do our best for our country and so shall we bring our best to the tasks before us this day. Consecrate with Thy presence the way our feet may go that our thoughts may be creative, our words clear, our hearts clean, and our deeds constructive. In everything, move through us to lift our Nation and the nations of our planet to a higher plane of cooperative living for Thy sake and for the good of our human family. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate disagrees to the amendments of the House of Representatives numbered 1, 2, and 3 to the amendment of the Senate to the bill (H.R. 7442) entitled "An act to amend the Communications Act of 1934 to provide for the regulation of utility pole attachments.".

The message also announced that the Senate agrees to the amendment of the House of Representatives numbered 4 to the amendment of the Senate to the above-entitled bill with an amendment.

The message also announced that the Vice President, pursuant to Public Law 95–45, appointed Mr. BELLMON and Mr. SCOTT to attend, on the part of the Senate, the Interparliamentary Union Spring Meeting, to be held in Lisbon, Portugal, March 27 to 31, 1978.

CONSENT CALENDAR

The SPEAKER. This is Consent Calendar Day. The Clerk will call the first bill on the Consent Calendar.

LAND CONSOLIDATION AND DEVELOPMENT ON THE UMATILLA INDIAN RESERVATION

The Clerk called the bill (H.R. 2539) pertaining to land consolidation and development on the Umatilla Indian Reservation.

The SPEAKER. Is there objection to the present consideration of the bill?

Ms. MIKULSKI. Mr. Speaker, I ask unanimous consent that the bill H.R. 2539 be stricken from the Consent Calendar.

The SPEAKER. Is there objection to the request of the gentlewoman from Maryland?

There was no objection.

INHERITANCE OF TRUST OR RESTRICTED LANDS ON UMATILLA INDIAN RESERVATION

The Clerk called the bill (H.R. 2540) pertaining to the inheritance of trust or restricted lands on the Umatilla Indian Reservation.

There being no objection, the Clerk read the bill as follows:

H.R. 2540

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the right to inherit trust or restricted lands on the Umatilla Indian Reservation, to the extent that the laws of descent of the State of Oregon are inconsistent herewith, shall be as follows:

SECTION 1. When any Indian dies leaving any interest in trust or restricted land within the Umatilla Reservation and not having lawfully devised the same, such interest shall descend in equal shares to his or her children, and to the issue of any deceased child by right of representation; and if there is no child of the decedent living at the time of his or her death, such interest shall descend to all his or her other lineal descendants; and if all such descendants are in the same degree of kindred to the intestate, they shall take such real property equally, or otherwise they shall take according to the right of representation. Any interest taken hereunder shall be subject to the right of a surviving spouse as provided in section 2.

SEC. 2. The surviving spouse of any Indian who dies leaving any interest in trust or restricted land within the Umatilla Reservation shall be entitled to the use during his or her life of one-half part of all such trust or restricted interests in land.

SEC. 3. If any Indian who leaves any interest in trust or restricted land within the Umatilla Reservation, make provisions for his or her surviving spouse by an approved will, such surviving spouse shall have an election whether to take the provisions as made in such will or to take the interest as set forth in section 2 of the Act, but such surviving spouse shall not be entitled to both unless it plainly appears by the will to have been so intended by the testator. When any surviving spouse is entitled to an election under this section, he or she shall be deemed to have elected to take the provisions as made in such will unless at or prior to the first hearing to probate the will that he or she has elected to take under section 2 of this Act and not under the will.

With the following committee amendment:

Page 1, beginning on line 3, strike out all after the enacting clause and insert in lieu thereof the following:

That the right to inherit trust or restricted land on the Umatilla Indian Reservation, to the extent that the laws of descent of the State of Oregon are inconsistent herewith, shall be as provided herein.

SEC. 2. When any Indian dies leaving any interest in trust or restricted land within the Umatilla Reservation and not having lawfully devised the same, such interest shall descend in equal shares to his or her children and to the issue of any deceased child by right of representation; and if there is no child of the decedent living at the time of his or her death, such interests shall descend to his or her other lineal descendants; and if such descendants are in the same degree of kindred to the intestate, they shall take such real property equally, or otherwise they shall take according to the right of representation. An interest taken hereunder shall be subject to the right of a surviving spouse as provided in section 3.

SEC. 3. The surviving spouse of any Indian who dies leaving any interest in trust or restricted land within the Umatilla Reservation shall be entitled to obtain a one-half interest in all such trust or restricted interests in land during his or her lifetime.

SEC. 4. If any Indian, who leaves any interest in trust or restricted land within the Umatilla Reservation, makes provisions for his or her surviving spouse by an approved will, such surviving spouse shall have an election whether to take the provisions as made in such will or to take the interest as set forth in section 3 of this Act, but such surviving spouse shall not be entitled to both unless it plainly appears by the will to have been so intended by the testator. When any surviving spouse is entitled to an election under this section, he or she shall be deemed to have elected to take the provisions as made in such will unless, at or prior to the first hearing to probate the will, he or she has elected to take under section 3 of this Act and not under the will.

SEC. 5. The provisions of this Act shall apply to all estates of decedents who die on or after the date of enactment of this Act.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PROVIDING FOR THE RETURN TO THE UNITED STATES OF TITLE TO CERTAIN LANDS CONVEYED TO CERTAIN INDIAN PUEBLOS OF NEW MEXICO AND FOR SUCH LAND TO BE HELD IN TRUST BY THE UNITED STATES FOR SUCH TRIBES

The Clerk called the Senate bill (S. 1509) to provide for the return to the United States of title to certain lands conveyed to certain Indian pueblos of New Mexico and for such land to be held in trust by the United States for such tribes.

There being no objection, the Clerk read the Senate bill as follows:

S. 1509

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the duly authorized officials of each of the Indian pueblos of New Mexico are hereby authorized to convey to the United States all the right, title, and interest of such pueblos in the land located in Albuquerque, County of Bernalillo, State of New Mexico, which was conveyed to such pueblos on behalf of the United States and the Secretary of the Interior by the quitclaim deed executed on June 17, 1969, by the Acting Commissioner of Indian Affairs, and by the correction quitclaim deed executed July 30, 1970, by the Commissioner of Indian Affairs, and which is described as follows:

Tract "C"

A tract of land lying and being situated in section 7, township 10 north, range 3 east of the New Mexico principal meridian, within the city of Albuquerque, County of Bernalillo, State of New Mexico, said tract being more particularly described as follows:

Beginning at a point on the west right-of-way line for 12th Street and the north right-of-way line for Indian School Road, said point also being corner No. 2 of tract herein described and from whence the New Mexico Highway Department Triangulation Station 1–40–15 having established coordinates of Y–1494103.76, X–378204.72 of the New Mexico coordinate system, central zone, bears S. 16 degrees 02 minutes 03 seconds E., 989.43 feet.

Thence north 59 degrees 58 minutes 22 seconds west, 281.29 feet along the north right-of-way of Indian School Road to the point of curvature and corner No. 3 of said tract.

Thence in a northwesterly direction 212.69 feet along the range/west curve concave to the northeast having a radius of 1,393.27 feet to corner No. 4.

Thence north 8 degrees 49 minutes 05 seconds east, 865.60 feet to corner No. 5, a point on the south right-of-way of Menaul Boulevard extension.

Thence in a northeasterly direction 493.42 feet along the range/west curve concave of the south having a radius of 716.20 feet to corner No. 1, a point on the west range/west line for 12th Street.

Thence south 8 degrees 16 minutes west, 1,255.45 feet along said range/west to corner No. 2, the point and place of beginning, said tract containing 11.2857 acres, more or less.

Corner Coordinates of Tract "C"

Corner	Y— Coordinate	X— Coordinate
1	1496295.97	378116.98
2	1495054.70	377931.43
3	1495196.41	377688.55
4	1495316.87	377513.58
5	1496171.41	377649.72

(b) Upon approval by the Secretary of the Interior, the Secretary shall accept such conveyances on behalf of the United States. Such land shall be held in trust jointly for such Indian pueblos and shall enjoy the tax-exempt status of other trust lands, including exemption from State taxation and regulation. However, such property shall not be "Indian country" as defined in section 1151 of title 18, United States Code. The Secretary shall cause a description of such trust land to be published in the Federal Register.

(c) Nothing in this Act shall terminate or diminish the rights or interests of the Indian Pueblo Cultural Center, Inc., as an assignee or subleasee of the lease of such land to the All Indian Pueblo Council, Inc., approved on August 27, 1974, by the Bureau of Indian Affairs.

(d) Nothing in this Act shall alter the rights or interests, if any, in the adjacent lands previously conveyed to the County of Bernalillo for Four-H Club use by deed dated March 22, 1960.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AUTHORIZING RETIREMENT OF CERTAIN RESERVE ENLISTED MEMBERS OF ARMY AND AIR FORCE AFTER 20 YEARS OF SERVICE

The Clerk called the bill (H.R. 10341) to amend title 10, United States Code, to authorize reserve enlisted members of the Army and the Air Force to retire with 20 years of service.

The SPEAKER. Is there objection to the present consideration of the bill?

Ms. MIKULSKI. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentlewoman from Maryland?

There was no objection.

RECALCULATING THE RETIRED PAY OF CERTAIN SERGEANT MAJORS OF MARINE CORPS

The Clerk called the bill (H.R. 10343) to provide for recalculation of the retired pay of individuals who served as sergeant major of the Marine Corps before December 16, 1967.

Ms. MIKULSKI. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentlewoman from Maryland?

There was no objection.

The SPEAKER. This ends the call of bills on the Consent Calendar.

APPOINTMENT AS MEMBERS OF NATIONAL COMMISSION ON SOCIAL SECURITY

The SPEAKER. Pursuant to the provisions of section 361(a)(2), Public Law 95-216, the Chair appoints as members of the National Commission on Social Security, the following from private life: Mr. Wilbur J. Cohen of Ann Arbor, Mich., and Mr. Robert Julius Myers of Silver Spring, Md.

APPOINTMENTS TO THE NATIONAL COMMISSION ON SOCIAL SECURITY

(Mr. O'NEILL asked and was given permission to address the House for 1 minute.)

Mr. O'NEILL. Mr. Speaker: You may recall that the Social Security Amendments of 1977, Public Law 95-216, provides for the establishment of a nine member National Commission on Social Security in which the Speaker of the House appoints two members.

I am very pleased to announce today the appointment of Wilbur Joseph Cohen as the Democratic appointment, and after consultation with the minority leader, JOHN RHODES, the appointment of Robert Julius Myers as the Republican appointment to the National Commission on Social Security.

We in the House of Representatives view this Commission with particular importance and feel very strongly that the members of this Commission should consist of men and women of bipartisan and recognized standing and distinction, and who have a special knowledge or expertise in those programs under the social security system.

The purpose of this Commission is to conduct a study, investigation, and review of the old age survivors and disability insurance program and the health insurance programs of the Social Security Act. The Commission will also examine the fiscal status of the trust funds, and more specifically, the adequacy of these trust funds to meet the immediate and long-term needs of the social security program; it will also examine the scope of coverage, the requirement for coverage, and the measurement of an adequate retirement income. This Commission will further examine the possible alternatives to the current Federal programs and the need for the development of a special consumer price index for the elderly as well as the financial impact of such alternatives. This National Commission will hold public hearings throughout the United States during its 2-year existence and will meet at least once each month.

Wilbur Cohen is eminently qualified to serve on this Commission. We Democrats call him "Mr. Social Security." He was the guiding light of President Roosevelt's Committee on Economic Security which was set up for the purpose of passing the Social Security Act. He has been an integral of the Social Security Administration from 1936 to 1956, former Secretary of the Department of Health, Education, and Welfare, former consultant on aging to the Senate Committee on Labor and Public Welfare, consultant on the impact of inflation on retired citizens to the White House Conference on Aging, and Chairman of the President's Task Force on Health and Social Security. In addition, Wilbur Cohen is an international adviser and consultant on social welfare, the recipient of numerous awards in this field, and the author of books and treatises on social security.

Robert Myers has held various actuarial positions in Government including the Committee on Economic Security, the Railroad Retirement Board, and the Social Security Administration. He has served as a consultant on social security to Republican Members of Congress, most recently during the deliberations on the Social Security Amendments of 1977. Like Wilbur Cohen, he has been associated with the American social security system from its infancy, is widely regarded as one of the world's foremost authorities on social insurance in general, and the U.S. social security system in particular, and is the author of several books on the subject.

APPOINTMENT AS MEMBERS OF U.S. DELEGATION OF CANADA-UNITED STATES INTERPARLIAMENTARY GROUP

The SPEAKER. Pursuant to the provisions of title 22 United States Code, section 276d, as amended, the Chair appoints as members of the United States delegation of the Canada-United States Interparliamentary Group to be held in New Orleans the following Members on the part of the House: Mr. FASCELL, Florida, chairman; Mr. JOHNSON, California, vice chairman; Mr. GIBBONS, Florida; Mr. HANLEY, New York; Mr. MEEDS, Washington; Mr. BAUCUS, Montana; Mr. OBERSTAR, Minnesota; Mr. FOWLER, Georgia; Mr. BROOMFIELD, Michigan; Mr. MCEWEN, New York; Mr. WINN, Kansas; and Mr. STANGELAND, Minnesota.

SOCIAL SECURITY HONOR ROLL

(Mr. BURKE of Massachusetts asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

SOCIAL SECURITY ONE-THIRD, ONE-THIRD, ONE-THIRD GENERAL REVENUE FUNDING—THE BURKE PROPOSAL

Mr. BURKE of Massachusetts. Mr. Speaker, today I am publishing the first list of those who's names will appear on the Social Security Honor Roll for 1978. Names will be published once a week. They are Members of Congress who have cosponsored the one-third, one-third, one-third general revenue funding legislation I have filed calling for restructuring of the social security system.

If your name is not on this list, I hope you will hasten to join because the American people are looking for a reduction in the regressive social security taxes that has caused high unemployment in this Nation in every field of endeavor—the steel industry, auto, electronic, textile, footwear, hats, handbags, bicycle, and others. The high payroll tax has been the cause of increased prices for American made goods, higher utility rates and even affects farmers in the United States.

If your name is not included on this list, it will be published next week when new Members are added to the Social Security Honor Roll.

If you have joined as a cosponsor, and your name does not appear on this list, it will be published next week when new Members are added to the Social Security Honor Roll.

The list follows:

SOCIAL SECURITY HONOR ROLL

Hon. Joseph Addabbo, New York.
Hon. Frank Annunzio, Illinois.
Hon. Edward P. Boland, Massachusetts.
Hon. Edward P. Beard, Rhode Island.
Hon. Mario Biaggi, New York.
Hon. Jonathan B. Bingham, New York.
Hon. James J. Blanchard, Michigan.
Hon. David Bonior, Michigan.
Hon. William M. Brodhead, Michigan.
Hon. Yvonne Brathwaite Burke, California.
Hon. Charles J. Carney, Ohio.
Hon. Shirley Chisholm, New York.
Hon. William (Bill) Clay, Missouri.
Hon. Silvio O. Conte, Massachusetts.
Hon. John Conyers, Jr., Michigan.
Hon James C. Corman, California.
Hon. Ronald V. Dellums, California.
Hon Ron de Lugo, Virgin Islands.
Hon. Robert F. Drinan, Massachusetts.
Hon. Joeseph D. Early, Massachusetts.
Hon. Joshua Eilberg, Pennsylvania.
Hon. Frank E. Evans, Colorado.
Hon. John G. Fary, Illinois.
Hon. Walter F. Fauntroy, District of Columbia.
Hon. Daniel J. Flood, Pennsylvania.
Hon. James J. Florio, New Jersey.
Hon. Harold E. Ford, Tennessee.
Hon. Joseph M. Gaydos, Pennsylvania.
Hon. Albert Gore, Jr., Tennessee.
Hon. Tennyson Guyer, Ohio.
Hon. Margaret M. Heckler, Massachusetts.

Hon. James M. Hanley, New York.
Hon. Michael Harrington, Massachusetts.
Hon. Agustus F. Hawkins, California.
Hon. Barbara Jordan, Texas.
Hon. Joseph A. Le Fante, New Jersey.
Hon. Edward J. Markey, Massachusetts.
Hon. Parren J. Mitchell, Maryland.
Hon. Joe Moakley, Massachusetts.
Hon. Anthony Toby Moffett, Connecticut.
Hon. Austin J. Murphy, Pennsylvania.
Hon. Morgan F. Murphy, Illinois.
Hon. Robert N. C. Nix, Pennsylvania.
Hon. Richard Nolan, Minnesota.
Hon. Edward W. Pattison, New York.
Hon. Jerry Patterson, California.
Hon. Carl D. Perkins, Kentucky.
Hon. Melvin Price, Illinois.
Hon. Charles B. Rangel, New York.
Hon. Frederick W. Richmond, New York.
Hon. Peter W. Rodino, Jr., New Jersey.
Hon. Charles Rose, North Carolina.
Hon. Benjamin S. Rosenthal, New York.
Hon. George E. Shipley, Illinois.
Hon. John F. Seiberling, Ohio.
Hon. Paul Simon, Illinois.
Hon. B. F. Sisk, California.
Hon. Fernand J. St Germain, Rhode Island.
Hon. Stephen J. Solarz, New York.
Hon. Fortney H. (Pete) Stark, California.
Hon. Louis Stokes, Ohio.
Hon. Gerry E. Studds, Massachusetts.
Hon. Frank Thompson, Jr., New Jersey.
Hon. Paul E. Tsongas, Massachusetts.
Hon. James Weaver, Oregon.
Hon. Lester L. Wolff, New York.
Hon. Antonio Borja Won Pat, Guam.
Senator William Hathaway, Maine.
Senator Don Riegle, Michigan.

SPECIAL ORDER ON PUBLIC WORKS AND PUBLIC SERVICE EMPLOYMENT

(Mr. CONABLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONABLE. Mr. Speaker, on Thursday of this week I am scheduling a special order to consider the effects of the public works and public service employment programs on the national economy and on the economic and governmental relations climate of our own districts. When these programs first went into effect we had serious problems with them. The President recommended and Congress accepted an expansion of these programs as a large part of his $10 billion economic stimulus proposals at the beginning of this Congress. It was alleged that we had reformed the problems out of these programs when the stimulus package was enacted, and at least a substantial part of the package is likely to be extended or reenacted in revised form this year. Before we assume success, as the President did in his state of the Union message, from the improvement of the economy, I hope my colleagues will find time to check the statistics and compare their own experiences. My special order is an invitation to start this process, and I hope many will participate.

TRIBUTE TO FRANK CULLEN BROPHY

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUDD. Mr. Speaker, Arizona lost one of the pioneer guiding forces in the development and growth of our State last Friday, with the passing of Frank Cullen Brophy at the age of 83.

In addition to his leadership in Arizona's banking industry, and in mining, produce sales, ranching, and farming, Mr. Brophy was a generous philanthropist who furthered education and health care for our people. He was an early and firm supporter of Arizona political leaders who have also been dominant on the national scene.

Mr. Speaker, it is a mark of this gentle, creative, and energetic man's great contribution to Arizona that tributes to him have been forthcoming throughout this past weekend from every quarter of our State's leadership and citizenry.

A front-page story in the Arizona Republic, the State's largest statewide newspaper, and a column eulogizing Mr. Brophy by that paper's highly respected editor, Frederick S. Marquardt, are indicative of the reverance for this truly great Arizonan.

I feel a great personal loss at the passing of Frank Cullen Brophy, who it was my privilege to know as a friend and counselor.

I know that I speak for his many friends and admirers in Arizona and throughout the Nation when I say that Frank Brophy will be sorely missed. We are thankful for what he gave us throughout his life, and for his great family that will carry on the proud Brophy tradition.

INDIVIDUAL TAX RELIEF ACT OF 1978

(Mr. SCHULZE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHULZE. Mr. Speaker, last week Treasury Secretary Blumenthal appeared before the Ways and Means Committee to present the administration's tax proposals. The Secretary's statement and his responses to questions posed by myself and other members of the committee brought to light the need for certain additional modification to the tax code and the way it is administered.

Therefore, I am today introducing the Individual Tax Relief Act of 1978 which will make certain that taxpayers are not overtaxed due to inflation and will restore an element of fairness to the administration of the Internal Revenue Code.

Specifically the bill will:

First. Provide for an annual inflation adjustment to the income tax tables and exemption;

Second. Provide for the payment of interest to taxpayers at 6 percent on the amount by which their withholding exceeds actual tax liability;

Third. Provide a $100 tuition tax credit per household for attendance at elementary, secondary or vocational schools or at an institution of higher learning;

Fourth. Forgive all of the capital gain on the sale of a principal residence for taxpayers who have reached the age 65; and

Fifth. Exclude from income the first $100 of interest.

As a recent Roper poll has indicated, approximately 64 percent of the American taxpaying public feels the tax system is unfair. The Individual Tax Relief Act of 1978 will help to restore fairness and the respect of taxpayers for the system.

COMMUNICATIONS ACT AMENDMENTS OF 1978

Mr. VAN DEERLIN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 7442) to amend the Communications Act of 1934 to provide for the regulation of utility pole attachments, with a Senate amendment to the House amendment to the Senate amendment thereto, recede from House amendments Nos. 1, 2, and 3, and concur in the Senate amendment to House amendment No. 4.

The Clerk read the title of the bill.

The Clerk read the House amendments to the Senate amendment, as follows:

Page 1, strike out all after line 4 over to and including line 8 on page 7.

Page 7, line 9, strike out "SEC. 5.", and insert *Sec. 2.*

Page 7, line 13, strike out SEC. 5 and insert *Sec. 3.*

Page 10, strike out all after line 6 over to and including line 12 on page 11.

The Clerk read the Senate amendment to House amendment No. 4, as follows:

Resolved, That the Senate disagree to the amendments of the House of Representatives numbered 1, 2, and 3 to the amendment of the Senate to the bill (H.R. 7442) entitled "An Act to amend the Communications Act of 1934 to provide for the regulation of utility pole attachments.".

Resolved, That the Senate agree to the amendment of the House of Representatives numbered 4 to the amendment of the Senate to the above-entitled bill with an amendment as follows:

In lieu of the matter proposed to be inserted by the amendment of the House of Representatives numbered 4 to the amendment of the Senate insert:

SEC. 7. The amendments made by this Act shall take effect on the thirtieth day after the date of enactment of this Act; except that the provisions of sections 503(b) and 510 of the Communications Act of 1934, as in effect on such date of enactment, shall continue to constitute the applicable law with respect to any act or omission which occurs prior to such thirtieth day.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. ASHBROOK. Mr. Speaker, reserving the right to object, I would ask my friend and colleague from California if this is the same bill that was sent over by unanimous consent last week?

Mr. VAN DEERLIN. It is.

Mr. ASHBROOK. Mr. Speaker, further reserving the right to object, could my colleague indicate what has happened over there? Did it come back in substantially the same form?

Mr. VAN DEERLIN. Mr. Speaker, if the gentleman will yield further, no. The troublesome amendment the Senate had added is one that dealt with international common carrier communications. The House has held no hearings on this matter. There has been no action by the House of any kind. The Senate sent the bill back with one amendment intact. It

authorizes the Federal Communications Commission to impose penalties and forfeitures on cable operators for violation of FCC regulations and raises the ceiling on fines for other licensees, such as broadcasters and land mobile operators.

Mr. ASHBROOK. Mr. Speaker, further reserving the right to object, is the latter amendment a new amendment that was attached in the Senate?

Mr. VAN DEERLIN. If the gentleman will yield, it is an amendment which was not in the House bill. It went over to the Senate late last year. It is precisely the same amendment that was part of the language of a House bill that failed to get to the floor in the last week of the 94th Congress.

Mr. ASHBROOK. Mr. Speaker, further reserving the right to object, there is nothing that is nongermane that has been attached to this amendment or in any other way has changed the House position?

Mr. VAN DEERLIN. In specific response to the gentleman, I would have to say that the amendment that the Senate has left on the bill, which is satisfactory to the committee on this side, is nongermane to the subject of the bill sent over by the House. The Senate has exercised its prerogative of nongermaneness, and we are willing to accept its language in order to move the legislation.

Mr. ASHBROOK. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

Mr. CARTER. Mr. Speaker, reserving the right to object, I would like to ask the nature of this nongermane amendment attached by the Senate, if you please.

Mr. VAN DEERLIN. Mr. Speaker, if the gentleman will yield, the major portion of the legislation goes to granting cable operators of the Nation a forum at the Federal level for the resolution of pole attachment disputes.

The amendment that the Senate has attached grants the Federal Communications Commission the right to impose, as it now has the right to impose on broadcasters, penalties and forfeitures against cable operators who violate FCC rules and regulations.

Mr. CARTER. Mr. Speaker, further reserving the right to object, I would say that I have closely followed cable television. There are a great many cable television, companies throughout our country. I see an increasing tendency of them to be gathered together under one group. In fact, I submit, Mr. Speaker, that within the next few years, just as we have only 3 major T.V. broadcasting companies, it is extremely likely that we will have only two or three major cable television companies.

Further, Mr. Speaker, I would say that in instances in which cable television companies have purchased recently, and in the district I represent, immediately after purchase up goes the price.

Mr. Speaker, I am alarmed at what is going on in this area, and I would like the Members of this body to take cognizance of what is really going on in my home town. The cost per month of cable television went up from $6 to $7.25. In Casey County, immediately after purchase by another company, again the cost went up $1 per month. In Knox County, further east in the district, the cost went up more.

Mr. Speaker, I want to see the people of our country served and served as reasonably as possible, but I do not want to see them ripped off. With the promise of the distinguished gentleman from California, the chairman of the Communications Committee, that he will see to it that they are not ripped off, I will not object.

Mr. VAN DEERLIN. Mr. Speaker, I grant the gentleman that assurance.

Mr. CARTER. The gentleman gives me that assurance.

Mr. Speaker, I have been noticing this. I would ask that the gentleman take this up with the FCC, to see that our people are not exploited by large companies. Furthermore, Mr. Speaker, I would ask the gentleman to see that all of the cable television companies are not gathered together into one huge combine.

Mr. Speaker, do I have that promise?

Mr. VAN DEERLIN. Mr. Speaker, let me assure the gentleman from Kentucky (Mr. CARTER) that I have been thinking along those lines mvself, and the gentleman's words will be helpful to us in bringing this matter to the attention of both the Commission and the cable television industry.

Mr. CARTER. With that assurance, Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 3(b) of rule XXVII, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

After all motions to suspend the rules have been entertained and debated and after those motions to be determined by "nonrecord" votes have been disposed of, the Chair will then put the question on each motion on which the further proceedings were postponed.

GRAND CANYON SCHOOL DISTRICT

Mr. UDALL. Mr. Speaker, I move to suspend the rules and pass the Senate bill (S. 2076) to authorize the Secretary of the Interior to transfer franchise fees received from certain concession operations at Grand Canyon National Park, Ariz., to the Grand Canyon Unified School District, Ariz., and for other purposes, as amended.

The Clerk read as follows:

S. 2076

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Secretary of the Interior (hereafter referred to as the "Secretary") is authorized for the two-year period commencing October 1, 1978, and ending September 30, 1980 to make payments to reimburse the appropriate school district or districts (hereafter referred to as the "districts") for educational facilities and services (including, where appropriate, transportation to and from school) incurred by said districts in providing educational benefits to pupils living at or near the Grand Canyon National Park upon real property owned by the United States which is not subject to taxation by State or local agencies: Provided, That the payments for any school year to said districts shall not exceed that part of the cost of operating and maintaining such facilities and providing such services which the number of pupils as defined above bears to the whole number of pupils in average daily attendance within said districts for that year.

(b) If in the opinion of the Secretary of the Interior, the aforesaid educational facilities and services cannot be provided adequately and payment made therefor on a pro rata basis, as prescribed in subsection (a), the Secretary of the Interior may enter into cooperative agreements with State or local agencies for (1) the operation of school facilities, (2) for the construction and expansion of educational facilities at Federal expense, and (3) for contribution by the Federal Government, on an equitable basis satisfactory to the Secretary, to cover the increased cost to local agencies for providing the educational services required for the purposes of this section: *Provided,* That authority to make payments under this subsection shall be effective only to such extent or in such amounts as are provided in advance in appropriation Acts.

(c) The Secretary shall submit an annual estimate of the anticipated payments which may be made in accordance with the provisions of this Act to the Committees on Appropriations of the United States Senate and House of Representatives. There are authorized to be appropriated an amount not to exceed $1,500,000 for fiscal year 1979 and an amount not to exceed $1,500,000 for fiscal year 1980 to carry out the provisions of this Act: *Provided,* That any appropriations made pursuant to this Act shall be reduced by the amount of any payments made to said districts pursuant to the Acts of September 23, 1950 (64 Stat. 906), as amended (20 U.S.C. 631 et seq.), and September 30, 1950 (64 Stat. 1100), as amended (20 U.S.C. 236 et seq.). Any amount appropriated pursuant to this Act for any fiscal year shall remain available until expended.

The SPEAKER. Is a second demanded?

Mr. ASHBROOK. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from Arizona (Mr. UDALL) will be recognized for 20 minutes, and the gentleman from Ohio (Mr. ASHBROOK) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Arizona (Mr. UDALL).

Mr. UDALL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, before I discuss the specific provisions of the bill, let me state to the House that I do not intend to ask for a record vote on this legislation. I do this because of the severe storm which has paralyzed much of the Midwest and the Northeast. A number of our colleagues are unable to get here today by plane or other transportation.

I would hope that, with our limited schedule today, we would not make it difficult for our colleagues who might

be forced to miss rollcall votes. Many of our most conscientious Members are, through no fault of their own, in a position which makes it impossible for them to be here today.

Mr. Speaker, the Grand Canyon Unified School District is located within the Grand Canyon National Park. Because of this, a large percentage of the children who attend the school come from families of National Park Service employees or concessionaire employees who live on nontaxable Federal land, and therefore do not contribute to the financial base of the school district.

The legislation that is before the House today, S. 2076 as amended, was ordered reported by the full Interior Committee by voice vote on Novembr 29, 1977. The Senate passed the measure by unanimous consent on September 9 of last year.

The purpose of the legislation is to allow the Grand Canyon School District, severely strapped for operating funds, to attain solvency by authorizing the Secretary of Interior to reimburse the school district for educational services rendered to dependents of Park and Park-related employees.

This, to me, seems to be the only fair solution to this very complex problem. Over 90 percent of the children who attend the school are dependents of people who pay no property taxes, so the remaining 10 percent are, in effect, subsidizing the education of these remaining Federal and concessionaire employees. Without this legislation, I fear that the viability of the school district is threatened. The physical plant of the school is in serious disrepair and the present curriculum operates at bare minimum. Recent estimates by the National Park Service indicate that the situation will be worsening, with the school district population projected to more than double in the next 5 years. These increases, for the most part, will be from the families of National Park Service employees.

The superintendent of the school district, Dr. Thomas Caldwell, has explored every other possible avenue of relief before coming to the Congress for help. Consolidation with the Williams School District 65 miles away was explored, but because of the great distance involved and because the Williams School District was unwilling to increase their tax burden substantially, this alternative was dropped. Another alternative that was explored without success was to dissolve the Grand Canyon School District altogether and bus the children 80 miles away to the Flagstaff Public Schools. Because of the severe winter climate of northern Arizona, a 160-mile round trip to school every day by children in grades K–12 is impractical and dangerous. One other option that was explored was the feasibility of having Park Service and concessionaire employees children sent off to boarding schools every fall. This seems to me to be the most unacceptable approach not only from a financial viewpoint but from an ethical one, also.

The people of the Grand Canyon School District have done more than their fair share with the limited funds available to them to try to keep the school alive. Without this legislation the very few taxpayers on whose shoulders the responsibility for the upkeep and maintenance of the school rest will be forced to pay unrealistically high taxes to the point where the facility will be forced to close. As the only unified school district (K–12) in America within a national park, the need and uniqueness of this problem requires special legislation.

As Senator CLAIBORNE PELL, chairman of the Education, Arts and Humanities Subcommittee said after personally touring the school this past summer:

> I also saw the condition of the school buildings which was not good, and I learned about the financial situation which faced the school administration, which was worse. There are many schools in the United States which face financial difficulties; however, this case is special in a number of ways, and if we do not act upon this bill then this district will simply not be able to serve the students in that area. This would happen in spite of the fact that the parents of those children already pay some of the highest school taxes in the Nation.

In conclusion, I urge the Members of the House to vote favorably on this desperately needed piece of legislation, so that the children living in this area will at least have the opportunity to pursue a decent level of education.

Mr. PERKINS. Mr. Speaker, if the chairman of the committee will yield to me for a minute, I would like to ask him several questions about S. 2076 as reported by his committee.

Mr. UDALL. I will be pleased to yield to the gentleman from Kentucky.

Mr. PERKINS. At the beginning, I would like to state for the record that the gentleman from Arizona (Mr. UDALL) and I discussed this bill last Monday when it was supposed to be voted on by the House under suspension of the rules; and, after I expressed to the chairman a number of the concerns that some of us on the Education Committee had with this bill as it was amended in the Interior Committee, the chairman very graciously withdrew that bill from consideration and offered to discuss it further with us last week.

I am pleased to report to the House that the chairman of the committee has modified his bill to meet the concerns we had with it as it was reported by the Interior Committee. The first major concern we had was that the bill as reported created a permanent authorization to provide general operating funds to one school district in the country. We feared that, as with many permanent authorizations, this authority would never be looked at again after it was signed into law. I am pleased to report that the chairman modified the bill to make this into a limited 2-year authorization so that the Congress will have to review the wisdom of this provision within the next 2 years.

The other major concern we had was that the original Senate bill which took the revenues from the concessions operated in the Grand Canyon National Park and earmarked them for the benefit of the Grand Canyon School District was modified by the House Interior Committee to create instead an open-ended authorization of appropriations from general government revenues for the benefit of that school district. We, on the Education Committee, could possibly understand earmarking revenues from contracted concessions in a national park for a particular purpose if there were very unusual circumstances, but we had difficulty understanding drawing funds from the general treasury for this purpose.

Therefore, regarding this concern, I would like to ask the chairman of the committee whether it is his understanding that this bill, if it is to become law, will be within the oversight responsibility of the Committee on Education and Labor so that the Committee can propose amendments to it if necessary in the future.

Mr. UDALL. I would like to assure the gentleman that it is the understanding of the Committee on Interior and Insular Affairs that the Committee on Education and Labor will have oversight responsibility for this bill when it becomes law and that the Education and Labor Committee will also have the right under the rules of the House to propose amendments to it.

In turn, I would like to ask the gentleman from Kentucky whether he will take it upon himself as chairman of the Education Committee to delve further into the situation in which the Grand Canyon School District finds itself so that if, in fact, that school district needs a long-term solution to its problems the gentleman will take it upon himself to propose such a solution in the Education Amendments of 1978 which I understand is going to be reported from his committee this year.

Mr. PERKINS. I can assure the gentleman from Arizona that as a member of the Education Committee I will learn more about the situation of this school district and will try to propose an amendment to deal with its problems if those problems are as severe as the chairman and the Interior Committee seem to believe.

Mr. UDALL. Mr. Speaker, I thank the gentleman.

Mr. Speaker, I yield such time as he may consume to the gentleman from Arizona (Mr. RHODES).

Mr. RHODES. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I rise to associate myself with the comments of my colleague from Arizona concerning the Grand Canyon National Park School Aid Act that is now before us. This legislation is designed to provide educational benefits, and indeed, basic education opportunities, to those students served by the Grand Canyon Unified School District in Arizona.

The reason for this bill is the school district's financial crisis which developed because approximately 50 percent of the students attending Grand Canyon schools have parents employed by the National Park Service. As such, they are excluded from the State and local tax base which supports the school district. Since the Grand Canyon School District is wholly contained within the borders of a national park, it is incumbent upon

Congress to act in such a way as not to deny adequate education for children in this area.

Because of the deteriorating finanical situation in the school district and the effect this is having on the students of the Grand Canyon School System, I urge prompt passage of this measure.

Mr. UDALL. Mr. Speaker, I yield such time as he may consume to the gentleman from Arizona (Mr. STUMP).

Mr. STUMP. Mr. Speaker, like many school districts, the Grand Canyon School District is in need of financial assistance. However, unlike many school districts, the financial assistance needs of the Grand Canyon School District are unique in that they require congressional action.

The school district is unique in that it is the only school district located wholly within the boundaries of a national park which provides a kindergarten through 12th grade education for 285 children. Approximately 90 percent of the student population makes no contribution to the financial base of the school district because their parents are Federal employees or concessionnaires residing on Federal property. Therefore, a large burden is placed on the few taxpayers who own property within the school district.

The condition of the school facilities are poor and inadequate, and seriously restrict the curriculum. The school has been cited for not complying with certain aspects of the North Central Accreditation requirements, and is in jeopardy of losing its accreditation.

Alternatives to Federal financial assistance have been studied by the Grand Canyon Board of Education. The alternatives would either place a much higher funding burden on the district, or require the students to be bused 150 miles to another school district. Both alternatives are unrealistic, and would lead to the closure of the school.

There has been a long history of Federal involvement in the school district. The school came into existence and now exists because of the Grand Canyon National Park. Federal funds have been used for the construction of the school buildings since 1921, and for the maintenance of those buildings until 1964, when the Grand Canyon Board of Education was given the responsibility of maintenance.

To insure the continued operation of the school district, and provide the necessary construction and maintenance of the educational facilities, S. 2076 authorizes the Secretary of Interior to make payments annually to the Grand Canyon School District from appropriations of the general fund. Because of the large number of students whose parents are Federal employees and are connected with the Grand Canyon National Park, the Federal Government should be responsible for the future financial viability of the Grand Canyon School District.

GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill S. 2076, now under consideration.

The SPEAKER pro tempore (Mr. GIAIMO). Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. UDALL. Mr. Speaker, I have no further requests for time.

Mr. ASHBROOK. Mr. Speaker, I yield myself such time as I may consume.

I would like to ask my colleague, the gentleman from Arizona (Mr. UDALL), several questions.

I listened to the colloquy of the chairman of my full Committee on Education and Labor. I was not quite sure how it came out.

As I understand it, Mr. Speaker, the gentleman from Kentucky (Mr. PERKINS) indicated that he would like to have a 2-year trial on this and then bring it back for review.

What is the situation in the bill? As I understand it, it is a permanent piece of legislation, is it not?

Mr. PERKINS. If the gentleman would yield, Mr. Speaker, we certainly support the legislation, which was agreed to both by the gentleman from Michigan (Mr. FORD), who can speak for himself and myself. However, we do not expect to wait 2 years for oversight. We will commence the oversight consideration this year, and there will be oversight next year.

Mr. Speaker, this is a special problem, and I think it has much merit. I want to compliment the gentleman from Arizona (Mr. UDALL) for moving in this direction.

Mr. UDALL. Mr. Speaker, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Speaker, the motion I made to suspend the rules was with respect to the bill as amended by the committee, plus an amendment that I had printed in the RECORD, which ended this open-end authorization.

Mr. ASHBROOK. For 2 years, as I understand; is that correct?

Mr. UDALL. For 2 years; it will expire in 2 years.

Mr. ASHBROOK. This is a piece of legislation which deals with only one school district; is that correct?

Mr. UDALL. Yes. It is a very unique and unusual district, totally within the boundaries of the Grand Canyon National Park; and most of the students are children of park employees. It is also 80 miles from the nearest school to which they might go. Therefore, we have some special problems.

Mr. FORD of Michigan. Mr. Speaker, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Michigan.

Mr. FORD of Michigan. Mr. Speaker, on behalf of the committee, I raised a question with the chairman, the gentleman from Arizona (Mr. UDALL), when the bill was up on suspension the last time, about the fact that this seemed to be a peculiar and very special kind of change in the concept of Federal impact. As a result, he graciously pulled the bill back until we had an opportunity to discuss it.

They have an immediate problem with this school district; and if they have to wait until we act on the impact aid legislation that will be acted on this year, they could miss the opportunity for an appropriation in the current fiscal year. Therefore, there was an understanding reached that the legislation would be changed from a permanent authorization to a 2-year authorization, which will still require a specific appropriation, I might say to the gentleman from Ohio.

In the meantime, we are under the gun, in effect, on the Committee on Education and Labor to reenact the impact aid program during this session of Congress; and it would be our intention to take into account the special kind of considerations that are urged for the Grand Canyon school system to see whether we can accommodate them.

I might say, for example, to the gentleman that if he will look at the report accompanying the bill, the gentleman will see that the Department of the Interior has already drawn attention to the fact that the county in which the school district lies received $500,000 last year from legislation that we passed to soften the impact of a big Federal presence, the ownership of most of the land in a particular area, and they have not chosen to share any of that money with the school district. Perhaps we might be able to work out an arrangement so that in the future that money will be divided in some way with the school district.

But, in any event, the gentleman from Arizona (Mr. UDALL) and the Department of the Interior have agreed to cooperate with the Committee on Education and Labor. We hope to work it out so that we do not set a precedent for everyone with special school districts with special problems desiring to pass special laws.

Mr. ASHBROOK. Mr. Speaker, I thank my colleague, the gentleman from Michigan (Mr. FORD), for saying that he hopes we will not set a precedent, however I think that some of us may feel that we may very well be setting a precedent. Further, Mr. Speaker, this seems to run contrary to the President's proposal to cut down on what might be called impact aid to schools.

By any fair evaluation would my friend and colleague the gentleman from Michigan (Mr. FORD) say that this is an impacted school district in the Grand Canyon?

Mr. FORD of Michigan. They are receiving impacted aid of some $300,000, as a matter of fact, a year, but they only receive impacted aid payments for the children of Federal Government employees. It is just simply a case of some very special circumstances where the Federal Government in effect does accept an activity that produces civilian employees in areas such as in this case.

I might add that it never came to our committee. It got in the other committee because it was a bill intended to provide some of the receipts from the concessionaires to the local school district in lieu of taxes and then it got changed in the other committee to where it resembles more of an educational bill and not

quite an earmarking of special funds bill in the Interior Department.

All we are trying to do is work out something without jeopardizing the current status of the school system, or give them at least 1 year, depending upon what they can justify in the Committee on Appropriations, the one and a half million dollars, and thereafter we should dispose of it in the treatment of the impact aid program.

Mr. ASHBROOK. I thank my colleague for his statement. I think this is probably an effort to accommodate either an amendment in a special situation, or a State, but I think by any fair evaluation that this is something that should be in the jurisdiction of the committee on education and labor. I am particularly concerned since the concessionaires, as I understand it, are not Federal employees, as to whether we are really in effect going one level beyond, that is, impacting these kind of employees in what might be a Federal enclave in a Federal park, or a military base.

Mr. FORD of Michigan. I might say to my friend and colleague the gentleman from Ohio (Mr. ASHBROOK) that this is not entirely new, if the gentleman will yield further to me. One of the sad things we did with impacted aid in years gone by arose where we had war production plants with lot of war workers who came there from many different parts of the country during the early days of impacted aid, because these war production and other related plants attracted people as I say from other parts of the country in large numbers without attracting a tax base with them, and impact aid was used to facilitate the expansion of the local school systems to accommodate the children of these civilian employees of a federally inspired activity.

We do recognize that there are peculiar problems when we get into a situation where the Federal Government owns all the land in sight, does all of the functions that a local government normally does, because most of the land is a national park, has all sorts of employees and employee relationships, as well as contractual relationships with people who in turn bring employees to perform that function that would not be there, as a matter of fact, except for the Federal ownership and use of the land. I do not view this as a potential large opening in the impact aid bill. Frankly, I would be pleased if I saw this as an excuse to get more impact aid, but I do not really see it that way at all. I think that what started out as a very logical sort of process in the Interior Committee got switched around along the way and that they are recognizing that the jurisdiction for any kind of permanent legislation to meet this situation ought to come from our committee. That is what we are trying to work out. I would suspect that the effect of this bill would be limited to this year and that before it would have any effect on ensuing school years we would have changed the impact aid law.

Mr. ASHBROOK. I thank my friend and colleague for that very fine explanation.

Mr. Speaker, I reserve the remainder of my time.

Mr. UDALL. Mr. Speaker, I yield such time as he may consume to the gentleman from Kansas (Mr. SKUBITZ), our ranking minority member.

Mr. SKUBITZ. Mr. Speaker, I understand that Mr. UDALL will propose an amendment which will place a 2-year cap upon this legislation and if this is done—I support this bill.

Mr. UDALL. If the gentleman will yield, let me say to the gentleman that that amendment is before the House, and the bill will not be passed unless the amendment is included.

Mr. SKUBITZ. I thank the chairman.

However, I must advise the committee that Mr. BAUMAN, who is chairman of the subcommittee that handled this bill, objects to the bill as I did in its original form. What his view might be today I do not know.

Mr. Chairman, heretofore, it has been recommended that special circumstances within the Grand Canyon National Park required special action by the Congress if the children within the park were to be assured adequate educational opportunities.

Because of its location within the park, most of the children attending the Grand Canyon Unified School District come from families of National Park Service employees, and the employees of the concessionaires who live on nontaxable Federal land. It has been estimated that 90 percent of the student population make no financial contribution to finance the school district.

Thus, the burden of operating the school falls heavily on the few people who own property within the park.

And of the few property owners, the primary taxpayer, is the Santa Fe Railroad which has not run a train to the Grand Canyon in several years, and recently has removed some spur tracks. I understand the railroad is contemplating removing the tracks entirely.

If this happens, the right-of-way becomes untaxable Federal land, thus dealing a crushing blow to the remaining taxpayers who would make up the loss.

In addition, the Havasuopee Tribe has expressed a desire that their children attend the Grand Canyon School as it is the school nearest their aboriginal home.

Without legislation, the future financial viability of the school district, is threatened.

This bill provides:

A. That the Secretary of the Interior make payments from appropriated money to assist the Grand Canyon School District in providing adequate facilities. However, the payments made to the school district are not to exceed that part of the cost of operating and maintaing the facilities.

Would authorize the Secretary to make pyaments in addition to those authorized in paragraph A:

For the operation of school facilities and the construction and expansion of additional facilities on an equitable basis satisfactory to the Secretary.

That authority to make payments under this subsection, shall be effective only, to the extent provided in advance, in appropriation acts.

As recommended by the committee S. 2076 would be amended to make it clear that all payments would be made from appropriations from the general funds of the Treasury rather than from franchise fees derived from the Treasury from concession operations in the park.

If the Udall amendment places a cap of 2 years on the bill, this give the Interior Committee and the Education Committee time to work out a more satisfactory solution to the problem.

Mr. UDALL. Mr. Speaker, I yield back the balance of my time and ask for a vote on the motion.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arizona (Mr. UDALL) that the House suspend the rules and pass the Senate bill S. 2076, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the Senate bill, as amended, was passed.

The title was amended so as to read: "An act to authorize the Secretary of the Interior to make payments to appropriate school districts to assist in providing educational facilities and services for persons living within or near the Grand Canyon National Park on nontaxable Federal lands, and for other purposes.".

A motion to reconsider was laid on the table.

MEDICAID INCREASES IN PUERTO RICO, THE VIRGIN ISLANDS, AND GUAM

Mr. ROGERS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 9934) to mend the Social Security Act to increase the dollar limitations and Federal medical assistance percentages applicable to the medicaid programs of Puerto Rico, the Virgin Islands, and Guam.

The Clerk read as follows:

H.R. 9434

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

ADJUSTMENT OF DOLLAR LIMITATION ON MEDICAID PAYMENTS TO PUERTO RICO, THE VIRGIN ISLANDS, AND GUAM

SECTION 1. (a) Subsection (c) of section 1108 of the Social Security Act (42 U.S.C. 1308(c)) is amended to read as follows:

"(c) The total amount certified by the Secretary under title XIX with respect to—

"(1) the fiscal year ending September 30, 1978, for payment—

"(A) to Puerto Rico shall not exceed $50,000,000,

"(B) to the Virgin Islands shall not exceed $1,600,000, and

"(C) to Guam shall not exceed $1,475,000;

"(2) the fiscal year ending September 30, 1979, for payment—

"(A) to Puerto Rico shall not exceed $60,000,000,

"(B) to the Virgin Islands shall not exceed $2,000,000, and

"(C) to Guam shall not exceed $1,800,000; and

"(3) each subsequent fiscal year, for payment to Puerto Rico, the Virgin Islands, and Guam shall not exceed the amounts specified in subparagraphs (A), (B), and (C), respectively, of paragraph (2) increased by a percentage equal to the percentage increase in the Consumer Price Index (published monthly by the Bureau of Labor Statistics of the Department of Labor) between Octo-

ber 1, 1979, and the first day of such fiscal year.".

(b) The amendment made by subsection (a) shall apply to fiscal years beginning after September 30, 1977.

ELIMINATION OF SPECIAL LIMITATION ON THE FEDERAL MEDICAL ASSISTANCE PERCENTAGE FOR PUERTO RICO, THE VIRGIN ISLANDS, AND GUAM

SEC. 2. (a) The first sentence of section 1905(b) of the Social Security Act (42 U.S.C. 1396d(b)) is amended—

(1) by striking out "(1)", and

(2) by striking out ", and (2)" and all that follows through "shall be 50 per centum".

(b)(1) Except as provided in paragraph (2), the amendments made by subsection (a) apply with respect to care and services provided, under a State plan approved under title XIX of the Social Security Act, in a calendar quarter beginning after September 30, 1978.

(2) Each of the agencies administering or supervising the administration of the State plan, approved under title XIX of the Social Security Act, for Puerto Rico, the Virgin Islands, or Guam may elect not to have the amendments made by subsection (a) apply to any care or services provided in its jurisdiction to an individual over a period of time beginning before October 1, 1978, and ending after October 1, 1978.

The SPEAKER pro tempore. Is a second demanded?

Mr. CARTER. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Florida (Mr. ROGERS) will be recognized for 20 minutes and the gentleman from Kentucky (Mr. CARTER) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Florida (Mr. ROGERS).

Mr. ROGERS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this bill would increase the maximum amount of Federal dollars which can be spent to support the medicaid programs of Puerto Rico, Guam, and the Virgin Islands. These jurisdictions have traditionally received treatment under the Social Security Act which is different from that of the States. Although the general structure of the medicaid program is one where Federal matching funds are available for whatever level of expenditures a State finds necessary to run an adequate medicaid program, ceilings have been placed on the amount of Federal support which is available to assist these jurisdictions in their medical assistance programs for the poor. These ceilings were established in 1967, soon after enactment of medicaid. They were increased to their present level in 1972, when they were set at a maximum of $30 million for Puerto Rico, $1 million for the Virgin Islands, and $900,000 for Guam. Since that time, inflation in the cost of medical care has been high. Hospital expenditures have increased so rapidly that they double approximately every 5 years. Over the past several years, the medical care price index has increased at rates close to 10 percent annually. Erosion in the amount of Federal support in real dollars for the jurisdictions has clearly occurred. In fact, the amount of Federal dollars available today in constant terms is less than 60 percent of what it was when the ceilings were established.

This bill would provide the adjustments necessary to restore the level of actual Federal support that the Congress last approved. It would double the ceiling on Federal expenditures for fiscal year 1979, so that $60 million in matching funds would be available to Puerto Rico, $2 million to the Virgin Islands, and $1.8 million to Guam. In order to provide more immediate relief, fiscal year 1978 ceilings are also increased for the portion of this fiscal year which is remaining. Finally, to protect against the ceilings becoming insufficient again in several years, an automatic adjustment in the ceiling is provided for in fiscal year 1980 and fiscal years thereafter. The ceiling will be increased automatically by the same percentage as the consumer price index increases.

This legislation also provides that the Federal matching rate for the jurisdictions will be determined in the same manner as the Federal matching rate is established for the medicaid programs of the States and the District of Columbia. The medicaid program has generally been designed to provide relatively greater Federal assistance to areas which have limited resources. The Federal matching rate for medical assistance is variable, with a minimum rate of 50 percent and a maximum rate of 83 percent, with the higher matching rate being provided to States with low per capita incomes. However, although the per capita income in the jurisdictions has clearly been low relative to most States, nonetheless the Federal matching rate for Guam, Puerto Rico, and the Virgin Islands has been limited by law to 50 percent. The Committee on Interstate and Foreign Commerce is convinced that the same rationale for higher Federal matching rates for States with low per capita incomes is also persuasive in the case of the jurisdictions. Eliminating discriminatory treatment of the jurisdictions in the determination of their Federal medical assistance percentages will result in matching rates of 81.87 percent for Guam, 83 percent for Puerto Rico, and 74.6 percent for the Virgin Islands. The absolute dollar ceilings on Federal expenditures would continue to be effective. However, to claim its full $2 million ceiling, for example, the Virgin Islands would be required to spend only $667,000 in its own funds rather than $2 million, an amount more nearly within its economic capability.

The increasing cost of medical care, the limited economic base of the jurisdictions, the desirability of an adequate medicaid program, and the essential fairness of more equitable treatment for the jurisdictions all argue for the changes reported in this bill. I urge the Members to support it.

Mr. DE LUGO. Mr. Speaker, will the gentleman yield?

Mr. ROGERS. I yield to the Delegate from the Virgin Islands.

Mr. DE LUGO. Mr. Speaker, I thank the gentleman from Florida for yielding.

Mr. Speaker, I rise in support of H.R. 9434, legislation I have cosponsored to double the total amount of Federal medicaid funds for the Virgin Islands from $1 to $2 million annually and to lift the current restrictions on the matching formula for territorial participation in the medicaid program.

The purpose of this legislation, which was reported by an overwhelming margin by the House Committee on Interstate and Foreign Commerce, is to guarantee equal protection under the law by extending to the U.S. citizens of the Virgin Islands the same rights and benefits under the Federal medicaid program already enjoyed by citizens of the several States and the District of Columbia. This bill is in line with action taken by the House last year with respect to other public assistance programs in H.R. 7200, currently pending floor action in the Senate. Moreover, it is in accord with the principles of equitable treatment of the territories adopted by President Carter in the administration's welfare reform proposal.

Under the discriminatory provisions of the present law, the Virgin Islands is forced to suffer reduced levels of health care services for our low-income citizens, as well as an ever-increasing financial burden that is disproportionately higher than that of individual States. While doubling the amount of Federal medicaid funds and allowing the matching rate to rise to the State level will enable the Virgin Islands to finance much needed and long delayed improvements in its health system, HEW has estimated that additional Federal expenditures for the Virgin Islands under this bill will cost a bare $600,000 in fiscal year 1978 and a bare $800,000 in fiscal year 1979.

Mr. Speaker, I would like to commend chairman of the House Commerce Subcommittee on Public Health, PAUL ROGERS, for his outstanding leadership on this legislation and for the generous amount of time he has spent in helping to insure equal treatment for our U.S. citizens in our offshore areas. I would also like to thank Congressman TIM LEE CARTER, the ranking Republican member on the subcommittee, for making this a truly bipartisan effort.

I urge the Members of this House to follow the lead of Chairman ROGERS and Congressman CARTER in promoting better health care for all of our citizens by voting for this important legislation.

Mr. Speaker, I would like to commend the gentleman from Florida (Mr. ROGERS), chairman of the Health and Environment Subcommittee of the Committee on Interstate and Foreign Commerce for his outstanding leadership on this legislation and for the generous amount of time he has spent to insure equal treatment for our U.S. citizens in our offshore areas.

I also would like to thank the gentleman from Kentucky, Congressman TIM LEE CARTER, the ranking Republican member of the subcommiteee, for making this a truly bipartisan effort.

PERMISSION FOR SUBCOMMITTEE ON GOVERNMENT ACTIVITIES AND TRANSPORTATION OF GOVERNMENT OPERATIONS COMMITTEE TO SIT DURING 5-MINUTE RULE TODAY

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that the Subcommittee on Government Activities and Trans-

portation of the Committee on Government Operations be permitted to sit while the House is in session today.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

GENERAL LEAVE

Mr. ROGERS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill under consideration.

The SPEAKER pro tempore (Mr. GIAIMO). Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. ROGERS. Mr. Speaker, I reserve the balance of my time.

Mr. CARTER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I support this legislation, H.R. 9434. It provides increased Federal assistance under medicaid for Puerto Rico, Guam, and the Virgin Islands, whose residents are citizens of the United States.

As it happens, Mr. Speaker, these people are very poor. Sixty-two thousand families in Puerto Rico have no visible means of support. Up until this time, under title 19, $30 million has been given to Puerto Rico to assist in caring for the sick. As we know, total Federal spending on health care has tripled in the past decade. It has increased at the rate of no less than 10 percent per year, over the last decade.

It is absolutely necessary, if we are to help these people, that our Federal medicaid contribution be increased; and that is what this legislation does. H.R. 9434 provides that by fiscal year 1979 our contribution to Puerto Rico will increase from $30 to $60 million; for Guam, from $900,000 to $1.8 million; and for the Virgin Islands from $1 to $2 million.

Mr. Speaker, in addition to raising the current ceilings this bill would permit the Federal matching rate to be determined by the same formula as that which applies to our States.

So rather than the present mandatory 50 percent matching rate, Puerto Rico, Guam, and the Virgin Islands would be able to receive a Federal match based on per capita income. The resulting rates would be as follows in fiscal year 1979:

Puerto Rico: Federal match of 83 percent.

Guam: Federal match of 81.87 percent.

Virgin Islands: Federal match of 74.6 percent.

Mr. Sepaker, this legislation is vital and necessary. Many of the States in our country which are poor have a like contribution, or almost as much, as that which will be given to Puerto Rico or to Guam or to the Virgin Islands. For us to deny health care to the poor of these islands, whose residents are citizens of the United States, would indeed not be compassionate.

I strongly support this legislation, Mr. Speaker.

Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Texas (Mr. COLLINS).

Mr. COLLINS of Texas. Mr. Speaker, I agree with all that was said about the medicaid need. We have talked much here about the increasing needs that do exist, but we have not talked about the tax contribution that we get from these particular areas. What concerns me is the fact that Puerto Rico, Guam, and the Virgin Islands contribute nothing in the way of taxation to the Federal Government.

As I understand it, in Puerto Rico they pay no income tax, no Federal income tax. In Guam and the Virgin Islands, they pay the Federal income tax but it is rebated back to the territorial government. In addition to that, we send back the money that they have paid from excise taxes. In fact, I was interested to see in Puerto Rico that we returned $180 million net—that is, after deduction of expenses—for the importation and excise taxes last year. Puerto Rico got a $180 million tax refund.

So, we have a situation here where these people pay no Federal taxation. We are talking about compassion, but everybody else pays Federal taxes and they do not.

I dissent from the action of the full Committee on Interstate and Foreign Commerce in reporting H.R. 9434, which increases the dollar limitations and Federal medical assistance percentages applicable to the medicaid programs of Puerto Rico, the Virgin Islands, and Guam.

My opposition is not meant to evince a lack of concern for certain problems respecting medical assistance in those jurisdictions. However, I am somewhat skeptical of conferring upon these jurisdictions certain additional benefits normally flowing from statehood without corresponding obligations. Indeed, it should be pointed out that individual income taxes of their citizens do not support the Federal share of the medicaid match.

Nevertheless, the primary reason for my opposition is the fiscal impact of this measure. Ceilings on Federal matching funds available for the jurisdiction will be doubled in fiscal year 1979 over the current level and the fiscal year 1978 ceiling would be increased on a proportionate basis to provide for the last three-quarters of that period. For fiscal years after fiscal year 1979, the ceiling would be increased automatically by the percentage increase in the Consumer Price Index. Further, the Federal matching rate would be determined by the same formula as for the States.

The increased fiscal year 1978 Federal costs would be approximately $21 million, which, though within the anticipated figure included in the committee's report to the Budget Committee, represents a substantial added Federal expenditure. Increased fiscal year 1979 Federal costs would be about $32 million. Because of the linkage of the ceiling to increases in the Consumer Price Index the Federal costs will be higher every year thereafter.

This represents another example of the unfortunate upward spiral of Government health expenditures. In 1965 (piror to medicare and medicaid), government at all levels spent about $9.5 billion on health care, constituting some 24 percent of total health spending. Ten years later, government spending had increased to some $50 billion, representing about 42 percent of the total. In the same period, the percent of the gross national product that went for medical expenses went from 5.9 to 8.2, with 87 percent of the increase attributed to Government spending. H.R. 9434 will only exacerbate this unfortunate fiscal trend.

Then to sum it all up, what we are facing here is a most important issue. We have Puerto Rico, Guam and the Virgin Islands paying no Federal income tax; also receiving back their excise and customs tax paid back to them net. This is a case where there is no income and all outgo. From Washington.

President Carter in his speech this year on the state of the Union said that he wants to have a lean Federal budget. This would certainly be the first place that Congress could start. Let us balance these territories that do not contribute anything. It seems only equitable that we start balancing out the fiscal responsibilities and what they are asking the Federal Government to provide. I think that the responsible position is to vote against this special interest bill.

Mr. CARTER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as I stated previously about this legislation, we are helping provide medical care to unfortunate people in Puerto Rico, Guam, and the Virgin Islands. While Puerto Rico is not subject to Federal income tax, Puerto Rico does pay excise tax on imports. However, only the excise tax on rum is rebated; the rest is returned to the United States.

As we all know, Puerto Rico is a very poor little island, as are the Virgin Islands. Guam itself does not have a lot of natural resources and since the citizens of these areas are citizens of this great country of ours, it behooves us to see that they have proper health care. Of course, if we come from rich States, great oil-producing States, perhaps we might feel constrained to overlook our less fortunate brothers; but there is a dire health need in these areas and we are only increasing the assistance to these States to the level at which some of our States here in this country are now receiving assistance in medicaid.

Mr. Speaker, are we as a compassionate country going to turn our backs on these parts of the United States whose residents are citizens of this country?

I say "no."

I say, Mr. Speaker, that we should strongly support this legislation.

Mr. ROGERS. Mr. Speaker, I yield 3 minutes to the gentleman from Iowa (Mr. BEDELL).

Mr. BEDELL. Mr. Speaker, I certainly would be the first to agree that we should be concerned about those less fortunate than ourselves. However, I think, as we look at this bill, we should ask ourselves, as we look at our policy, what it is that we do in order to help those people the most.

Mr. Speaker, I have been down to Puerto Rico. I think what we find in

Puerto Rico is a society which, by its nature, has tended to have lower income than the people of the United States. When we establish formulas that base the benefits upon income concerns completely, as we do in this situation, what we do is turn those countries into welfare states or welfare individuals. We find that in food stamps. I sit on the Committee on Agriculture. Something like half the people of Puerto Rico now get food stamps. I have been down there and talked to people. They tell me that the people who have been farming out in the hinterlands no longer farm because we have increased the income levels to keep them from farming and building their economy.

Mr. Speaker, I guess my plea to this House is that we look at this in some depth, to find out what it is that helps those people help themselves, because if we decide what we do is to have food stamp policies, if we decide what we do is to have medicaid policies, if we should have all of the policies which base the payments upon income limitations as we have in the United States, I think that, instead of furnishing a service and helping those countries, what we really are doing is doing a disservice to those people and turning those people into welfare dependents—and they are turning more and more—to the United States and saying, "Big Brother America, send us the money." We send them the money, and that is what we find. That is why I would have grave question about this particular legislation. I do not think a cap is the answer. I think the answer is a different formula, where the formula should not go by the square of the income of the people.

Mr. ROGERS. Mr. Speaker, I yield myself such time as I may consume.

I thank the gentleman for his remarks and I understand his concerns. But I think probably those basic policies as to how we treat Puerto Rico will have to be determined in other forums. Other committees are dealing with issues of statehood for Puerto Rico, the overall tax status of Puerto Rican residents, and food stamp coverage. We cannot solve those problems here. What this bill simply recognizes is that this is the condition now, and we are providing funds to pay for necessary health costs. That is what this adjustment is for, simply to keep paying the increase in program costs occurring because of the inflation of health costs. Until the other policies are changed, as the gentleman has suggested, until statehood is granted, or independence, which might have some effect, to say we are just going to let people suffer and die there in the meantime because they are poor is not a very realistic policy.

Mr. BEDELL. Mr. Speaker, will the gentleman yield?

Mr. ROGERS. I yield to the gentleman from Iowa.

Mr. BEDELL. I thank the gentleman for yielding.

Mr. Speaker, will the gentleman give me some indication of what committee might be looking at our total policy, so that we will not come along in another year and have similar legislation, and the same on food stamps? Is there any committee in our Congress which is trying to determine what type of a legislative policy would be of the most help to the people of Puerto Rico?

Mr. ROGERS. I assume the Committee on the Interior is looking at that constantly. I presume the Committee on Ways and Means also is giving attention to tax questions relating to the jurisdictions. These committees, which have jurisdiction, would probably be the best forum for these issues.

Mr. CARTER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would only add to what has been said that if we could but rebuild the land of Puerto Rico or increase the fertility of the soil of the Virgin Islands or increase the fertility of the soil and the mineral content of the soil out in Guam and make those countries as rich as the great State where the tall corn grows, then I would assure some of my distinguished friends that the funds to improve the health and to keep the people of that area healthy would be forthcoming. But these are some of God's unfortunate people. If one has been to the Virgin Islands, one will find that the hills are slanting, that there is no place much to raise crops.

If we go to Guam, we find it a rather large island, one which is covered with military installations and one on which there is not much room for agriculture.

In Puerto Rico we find the same sort of situation, Mr. Speaker. It is the same type of area. There is no intrinsic wealth there.

As I stated previously, 62,000 families, without any visible means of support, are involved, and all are citizens of the United States of America.

Yes, I will say to my friends and colleagues, if Puerto Rico had that rich land, the land where the tall corn grows and where the soybeans grow in profusion and where the farmers reap riches from the fields and go to Florida in the winter, then there would be no need for this legislation. But the fact is that these people are poor, and that they are not healthy. They need medical assistance, and I hope that our compassionate people will support this legislation for them.

Mr. Speaker, I yield 3 minutes to the distinguished gentlewomen from New Jersey (Mrs. FENWICK).

Mrs. FENWICK. Mr. Speaker, I thank my colleague for yielding this time to me. I am most grateful.

With all due deference to our fine subcommittee chairman and the ranking minority member, we must introduce the voice of common sense here, as we have heard it from the State of Iowa, because I, too, have worked in this area, as an honorary Puerto Rican, and I know something of the situation.

I have worked long and hard in my district and outside my district in my State with the Puerto Rican community. We cannot continue to do what we are doing.

We are told that in Puerto Rico they could not get anybody on the island to pick the coffee crop. They had to bring people in from the Dominican Republic to pick the coffee crop. Why? Because we have so exaggerated our food stamp arrangements in Puerto Rico that they cannot get off food stamps and on again. If they do take a job, they are lost. The flood of food stamps is so high that it represents something that inflates the whole economic expectation of the island.

It does not cost as much to live in Puerto Rico as it does on the mainland. Puerto Rico is a rich island; fortunes used to be made there. We must care about those people enough to understand what we are doing to them. We do not care enough about them. We just use a formula, and we think, "Well, that's great." We give them $180 million, and we think that ought to be enough.

I do not know how this is calculated. I notice that repeatedly we speak about bringing up the costs to equal the effect of inflation.

Is this right? Do we plan on a per capita basis? Do we arrange that medical aid according to the cost to the people of that island?

Mr. BEDELL. Mr. Speaker, will the gentlewoman yield?

Mrs. FENWICK. I yield to the gentleman from Iowa.

Mr. BEDELL. Mr. Speaker, let me state to the gentlewoman that it is computed by the square of the income of the people of the area, so it is not just the income that is considered. It is the square of the income that determines it.

Further than that, I am sure the gentlewoman will agree that there indeed is productive, fertile soil in Puerto Rico.

Mrs. FENWICK. Mr. Speaker, it is one of the richest islands on Earth. What I wish to point out is that we must use our commonsense if we care about those people. If we do not care about them, we can just hand out the money without regard to its effect. That is demoralizing. It is not serving the people well, and many of the people I know who are concerned about their compatriots are desperate. I think we have to stop our present practices.

Mr. ROGERS. Mr. Speaker, will the gentlewoman yield?

Mrs. FENWICK. I yield to the gentleman from Florida.

Mr. ROGERS. Mr. Speaker, the gentlewoman realizes that this legislation is only to increase support for medicaid?

Mrs. FENWICK. I do.

Mr. ROGERS. It does not go to food stamps. We are not considering food stamps.

If the gentlewoman will permit me to continue, what we are trying to do here for Puerto Rico is what we do for every State in the Union. We are not asking for different treatment than any State receives. In fact, because of the ceiling, we are really giving Puerto Rico less, relatively, than most States receive.

Mrs. FENWICK. Mr. Speaker, if the gentleman will allow me to reclaim my time, I will continue.

Mr. ROGERS. Surely.

Mrs. FENWICK. The point is that we should not treat Puerto Rico like another State in the Union. It is not like other States; it has different conditions.

In every single thing we do for other people, we ought to be considering the effects with the deepest sense of respon-

sibility. Maybe this has been done. I am not arguing about that. Nevertheless, it troubles me that we have this automatic increase in cost every single year.

The SPEAKER pro tempore (Mr. GIAIMO). The time of the gentlewoman from New Jersey (Mrs. FENWICK) has expired.

Mr. ROGERS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I take this time because I would like to say in answer to the gentlewoman from New Jersey (Mrs. FENWICK) that I do not think we are going to change all the policies on Puerto Rico that she is concerned about by saying we are not going to treat them in their health care programs as we treat States. Food stamps are not considered here; the welfare program is not considered here.

That is handled by other committees in other bills.

All this is doing is saying that we are going to help these people because of the inflation in health care costs, just as we help New Jersey and just as we do Texas. Texas gets nearly $500 million for their medicaid program. This bill provides for $60 million for Puerto Rico.

May I also say that if the income tax applied to Puerto Rico, many poor persons in Puerto Rico would not pay taxes at all or would have their tax rebated back through the earned income tax credit, because their income is so low.

But we are not addressing the tax issue here. We are addressing needs for medical care. There is no doubt that these people are poor. We only want to make sure that these people who are sick and who may die can have some little help just as other citizens of the United States do.

Mr. DE LUGO. Mr. Speaker, will the gentleman yield?

Mr. ROGERS. I yield to the gentleman from the Virgin Islands.

Mr. DE LUGO. Mr. Speaker, I thank the gentleman for yielding.

I wish to thank the gentleman from Kentucky, who has certainly been most eloquent on this matter, and also to thank the chairman of the subcommittee.

I would just like to point out to the House that what all of this is about, as far as the Virgin Islands is concerned, is an item which is already in the President's budget. We are talking here about the grand additional sum for the Virgin Islands of $600,000 for fiscal year 1978 for sick U.S. citizens; and, for fiscal year 1979 an additional sum of $800,000.

Mr. Speaker, I think the gentleman from Iowa (Mr. BEDELL) made a very good statement when he said, "What is the policy for the offshore areas?"

The fact is that there is none.

Mr. Speaker, if others had to live in an offshore area where constantly Federal laws are passed which impact them and they do not have control over them, such as tax cuts, the impact of this bill, or immigration legislation, which impacts one's entire area, they would continue to have the compassion that they have at the present time for these people.

Mr. Speaker, I would like to respond to some of the other arguments made in opposition to this bill, particularly those with respect to the special tax status of the Virgin Islands.

I would like to point out that in October of 1976, the HEW Under Secretary's advisory group on Puerto Rico, Guam, and the Virgin Islands issued a report addressed to this very issue and which concluded that—

> The current fiscal teatment of Puerto Rico and the territories under the Social Security Act is unduly discriminatory and undesirably restricts the ability of these jurisdictions to meet their public assistance needs.

The report went on to recommend full statelike treatment for the offshore areas, arguing that—

> While the legitimate obligations of Puerto Rico and the territories to contribute to general Federal tax revenues should be considered within the context of their overall political relationship with the Federal Government, there is little justification for addressing this issue within the context of the Social Security Act.

This conclusion is in accordance with statements of general policy the present administration has made with respect to the offshore territories. As President Carter recently stated:

> The Constitution of the United States does not distinguish between first and second class citizens.

Rather, the Constitution specifically guarantees equal protection under the law to all U.S. citizens, regardless of where they may live. The logic of the constitutional argument, moreover, is strengthened by the fact that while the people of the Virgin Islands do not contribute to the Federal Treasury, neither do millions of Americans who are unable to pay taxes because of economic circumstances. In the final analysis, neither of these circumstances relieves the Federal Government of its responsibilities to these citizens.

Mr. COLLINS of Texas. Mr. Speaker, will the gentleman yield?

Mr. ROGERS. I yield to the gentleman from Texas.

Mr. COLLINS of Texas. Mr. Speaker, the gentleman was right in stating that primarily this bill concerns Puerto Rico. They are the great recipient of health aid. However, I cannot think of a more healthy place to live than in Puerto Rico. It has a delightful climate. While we are up here literally freezing to death in Washington, they live in an ideal climate the year round.

Those of us who have visited Puerto Rico have never seen a more fertile soil. The country can grow anything.

When we talk about a poor, starving island, I think their problem is with economics, not with the medical program.

In that connection, Mr. Speaker, I think we ought to provide them with an incentive to work and we ought to help them to work.

Mr. ROGERS. Mr. Speaker, I might say to the gentleman from Texas (Mr. COLLINS) that Puerto Rico, as a percentage, puts far more of its funds into the medicaid program, about double the percentage that Texas puts into it. Puerto Rico is trying to pay its fair share; this provides for the Federal Government to do the same.

Mr. BEDELL. Mr. Speaker, will the gentleman yield?

Mr. ROGERS. I yield to the gentleman from Iowa.

Mr. BEDELL. Mr. Speaker, from the gentleman's last statement, as I understand this legislation, the Federal Government would be paying 83 percent of the medicaid amount to Puerto Rico.

Certainly the gentleman does not feel that Texas is in the same position and that we are subsidizing the Texas medicaid program to the tune of 83 percent; does he?

Mr. ROGERS. We may not be subsidizing Texas at 83 percent, but we are also not subsidizing Puerto Rico at that rate. Nor would we under this bill. Although the matching rate is 83 percent, that simply means that they would be required to spend only about $1 for every $4 they would be entitled to receive. But the ceiling on Federal payments to Puerto Rico would override this. Since Puerto Rico's medicaid program already costs nearly $120 million, and the maximum Federal contribution is limited by this bill to $60 million, we will effectively only be paying 50 percent of the cost. We pay 64 percent of Texas medicaid. Changing the way the matching rate is determined for the jurisdiction really only has an effect on Guam and the Virgin Islands. With their current 50-percent matching rate, they cannot raise a large enough local contribution to take advantage of all the Federal dollars available to them under the ceiling.

Mr. BEDELL. If the gentleman will yield further, Mr. Speaker, can he tell us what the amount is in Mississippi or can the gentleman's staff provide that figure?

Mr. ROGERS. Yes, Mississippi currently receives 78 percent.

Mr. BEDELL. Mr. Speaker, I thank the gentleman.

Mr. ROGERS. Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from West Virginia (Mr. STAGGERS), the chairman of the Committee on Interstate and Foreign Commerce.

Mr. STAGGERS. Mr. Speaker, I thank the chairman for yielding to me. I want to congratulate him and his subcommittee for the attention they have given to this very important legislation.

Mr. Speaker, I seldom disagree with the gentlewoman from New Jersey (Mrs. FENWICK), very seldom, because we are usually on the same side; and as to the gentleman from Texas (Mr. COLLINS), I respect his opinion, as he knows. He is a great legislator and a great friend.

I would like to say that this was in the budget that was sent up by the President. We held hearings on it. It passed in our subcommittee unanimously. In the full committee there was a voice vote. The gentleman from Texas might have said no in voting on it. I do not know. But the gentleman did have dissenting views.

But I would like to say that there will not be any 83 percent paid because there is a ceiling we have in here on the amount of money. It would be less than 50 percent. So talking about Puerto Rico having 83 percent is simply out the window because, as I say, we set a ceiling on what they can pay.

Let me say as far as Puerto Rico is concerned that I flew in and out of Puerto Rico many times during the war and after the war and all I can say that there was only the really rich and the

really poor. There was no in-between The poor were so poor that it made me feel very sad to see humanity having to live the way some of them lived there and still live in that same way.

There has been mention made about the climate. I would say that next to Hawaii it has one of the finest climates anyone could find anywhere in the world. But that does not alleviate the fact that people do get sick.

I agree fully with the gentlewoman from New Jersey (Mrs. FENWICK). I know that her intentions are the best in the world. I want to repeat to the gentlewoman that there is a ceiling that has been put on this, the percentage would be less thon 50 percent. I believe that the gentlewoman from New Jersey (Mrs. FENWICK) would be for this 100 percent if she knew all of the facts that are involved in this.

Mrs. FENWICK. Mr. Speaker, if the gentleman would yield, I do not think anyone in this Chamber wants to see any poor person go unattended. The question I ask is that if this is done on this basis of real concern for the people of Puerto Rico that the costs there should tie in with what they need. I just wonder whether perhaps we are doing in this program that which we have done in so many others? It is not necessarily a question about how they live and what they do, or how different they are from others; but with these automatic increases we seem to be putting in every bill we vote upon I think we should start to question what is going to happen to this country and its ability to pay for every one of these demands, when our budget is so great and our deficit is rising every year.

However, that is not the question; the poor and the sick must be cared for. I believe every Member in this Chamber is of that frame of mind. It is a question of how we think about these things. We do not seem to get down to talking to the people who really know how these things work out.

Mr. STAGGERS. Mr. Speaker, I would like to respond to the gentlewoman from New Jersey (Mrs. FENWICK) by saying that I agree 100 percent with what the gentlewoman has said. I know the gentlewoman very well. She has a fine record. I would say that she is perhaps one of the finest Members in this Chamber in all of the years I have spent in this Chamber. She believes in what is right for America. I just thought that I would give some of these facts to the gentlewoman hoping they might help her just a litle bit. I have observed her voting record and I believe that she has always voted for what she believed was in the best interests of our country and I think that this is in the best interest of our country. We held good hearings on it. It was passed unanimously as I said before by the subcommittee. I think it should be done. I believe the House should pass the legislation.

Mr. ROGERS. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. SISK).

(By unanimous consent, Mr. SISK was allowed to speak out of order.)

HUD LIMITS FANNIE MAE'S FUND'S ACCESS

Mr. SISK. Mr. Speaker, I wish to take this time to call to the attention of the House an article which appeared in the February 1 edition of the Washington Star, on page 1, under the headline "HUD Limits Fannie Mae's Fund's Access."

The story goes on to point out that the Secretary of Housing and Urban Development has refused to grant the Federal National Mortgage Association the authority it needs to issue commitments to purchase mortgages, so that more American families can buy their own homes.

I wish to call to the attention of the House that the Federal National Mortgage Association—despite its name—is not part of the Federal Government. It used to be, but in 1968 it was taken out of the Government. The Congress of the United States told this organization—known informally as Fannie Mae—that it should go out and raise its own funds and pay full Federal corporate income taxes and make money available for mortgages.

The Secretary of Housing and Urban Development was given some regulatory authority over Fannie Mae, including the right to set the outside limit on Fannie Mae's authority to borrow money and issue other obligations. The purpose of this authority was to assure that Fannie Mae did not overextend itself and damage its financial underpinnings. But Fannie Mae operates entirely on its own funds—it gets no money from the U.S. Government.

If you will read the article in the Star, you will find that the incumbent Secretary of Housing, Mrs. Patricia Roberts Harris, is using the debt limitation authority not to protect Fannie Mae's financial soundness—Fannie Mae has proven it is fully capable of taking care of itself in this regard—but rather to extract a political pound of flesh from the management of Fannie Mae.

Mr. Speaker, this action on the part of the Secretary of HUD is just one more example in a long series of incidents during the past year which have constituted a continuing policy of intimidation and harassment on the part of HUD over and against Fannie Mae. The upper echelon officers in the Department of Housing have used the privately operated gossip sheets of the housing industry as vehicles for a continuous campaign of vilification and doomsday forecasting, saying almost every other week that the management of Fannie Mae was going to be fired. HUD officials have allowed themselves to be quoted—anonymously, of course—as saying that Fannie Mae has not carried out its mission, that it has turned its back on the cities, and that it has failed the American people.

As might be expected in this kind of situation, neither Secretary Harris nor any of her senior staff have come up with any specific examples. The reason they have not come up with specifics is that Fannie Mae has in fact done an excellent job, as any careful examination of its record will show.

It is only fair to the Members of the House, Mr. Speaker, that I confess to having more than a passing interest in Fannie Mae. The chairman of the board and president of Fannie Mae, Oakley Hunter, is the man I defeated for my seat in Congress in 1954. We had a hard campaign, and during the campaign, feelings ran high. But as so often happens, once the campaign was over, we got to know each other better, and we have become friends.

It is suggested in the housing industry gossip sheets that the reason Mrs. Harris wants to sack the management of Fannie Mae is that Oakley Hunter is a Republican—and that is true. But what nobody bothers to point out is that since he came to Fannie Mae in 1970, he dropped completely out of politics. He has played no part in any political campaigns. He has kept Fannie Mae out of politics. Fannie Mae has not maintained any political slush funds. The operation of Fannie Mae has been entirely devoid of any political overtones.

During this past week there has been a flurry of rumors that Mrs. Harris was urging the President of the United States to exercise certain statutory authority that he has and to remove Oakley Hunter and two other members of the Fannie Mae board of directors "for cause." The implication was that this would create a situation where a bloodless coup could have been engineered in such a way that a majority of the board of directors of Fannie Mae—which numbers 15—would be obligated to Secretary Harris. The idea was to undertake this in such a way—if possible—as to preclude any opportunity for a judicial review of the legality of President Carter's removal action.

I do not know how much truth there was to this speculation. I do know that if such a course of action had been followed, it would raise a serious cloud of doubt about the integrity of the administration. This administration does not need another Marston case, but let me assure you that if this speculation should prove true, it will become a Marston case redoubled in spades.

If the President of the United States—or anyone else—has good cause for removing any member of the board of directors of the Federal National Mortgage Association, then he should remove that director, but it should be done in such a way that the rights of the shareholders of Fannie Mae are protected by affording ample time for an orderly review of the removal order through the courts. We have recently come through a very trying time in our history. If we learned one lesson from Watergate, it is that we must remember that ours is a government of laws, not of men.

I would hope that the Secretary of Housing and Urban Development would abandon the unjustified course of pressure tactics which she has been pursuing against Fannie Mae. Mrs. Harris is quoted in the February 2 issue of the Washington Post as expressing some skepticism about the willingness and ability of the private sector to shoulder its responsibilities. She seems to say that only Government can save us. This view is contrary to established national policy on housing matters, because the legislation creating the Department she heads clearly says that the private sector should be utilized to the greatest extent possible. Fannie Mae represents a unique blend of the strengths and flexibilities of the private sector and the sponsorship of the Federal Government. It can do much

to give meaning to private sector involvement in solving our housing problems and the Nation would be well served if Mrs. Harris would get off Fannie Mae's back.

Mr. ROGERS. Mr. Speaker, I have no further requests for time.

Mr. CARTER. Mr. Speaker, I thank the distinguished gentleman from Florida (Mr. ROGERS) and assure him we will call for a vote presently. In reviewing some of the things that have been brought out today, I found that the great State of New Jersey also receives $183 million in the same sort of payments for medicaid that the little island of Puerto Rico receives $30 million for at the same time. I think it is necessary that the poor people of New Jersey receive this assistance. I do not object to that at all. But it is my feeling that the people of Puerto Rico should be adequately cared for. This does not include food stamps. Food stamps, as most people know, come from the Department of Agriculture and not from the committee on which we serve. I strongly support this legislation as humanitarian and compassionate, and I urge that it be passed.

Mr. COLLINS of Texas. Mr. Speaker, will the gentleman yield?

Mr. CARTER. I will be happy to yield to the gentleman for a question.

Mr. COLLINS of Texas. I thank the gentleman for yielding. I want to know, if the gentleman asks to put the question; does the gentleman know the percentage figures for Texas and for New Jersey and for Puerto Rico.

Mr. CARTER. I can give them to the gentleman right now. He asked the question; I will give them to him. At the present time Puerto Rico is $30 million; for Texas it is $256 million; and for New Jersey it is $183 million. Does the gentleman have other questions?

Mr. COLLINS of Texas. I asked for the percentage, if the gentleman knew the percentage.

Mr. CARTER. I can give the gentleman the approximate percentage. It would not be as much.

Mr. COLLINS of Texas. It is 83 percent for Puerto Rico.

Mr. CARTER. I am sure that is right.

Mr. COLLINS of Texas. It is 60 percent for Texas and 50 percent for New Jersey.

Mr. CARTER. Yes, I think that is right. Yes, Mr. Speaker, I believe the gentleman is right on that. We must admit that, because Puerto Rico has 20 percent unemployment, 62,000 people without any visible means of support. I do wish they had some oil wells down there, but they do not have them.

I thank the Speaker.

Mr. CORRADA. Mr. Speaker, will the gentleman yield?

Mr. CARTER. I yield to the gentleman from Puerto Rico.

Mr. CORRADA. I thank the gentleman for yielding.

I would like to commend my colleagues, the gentleman from Florida (Mr. ROGERS) and the gentleman from Kentucky (Mr. CARTER), for their excellent work with respect to this bill.

Mr. Speaker, I rise in support of H.R. 9434, a bill that would expand the Federal participation in the medicaid program as it applies to Puerto Rico and the territories.

The bill provides for an additional $20 million in fiscal year 1978 and $30 million in fiscal year 1979 for medicaid expenditures in Puerto Rico and proportionate increases for Guam and the Virgin Islands. After fiscal year 1979 the funds available for payments would be increased by a percentage equal to the percentage increase in the Consumer Price Index.

The bill also eliminates the 50–50 matching requirement imposed on the medicaid program in Puerto Rico and the territories.

Mr. Speaker, since 1972 Puerto Rico's participation in the medicaid program has been restricted by legislation to $30 million per year. Therefore our Government has been forced to spend over $80 million per year in order to provide medical care to over 1.3 million residents of Puerto Rico who are considered to be medically indigent.

The government of Puerto Rico is deeply committed to provide the optimum health care for the medically indigent population in our island.

The line item in the health budget to provide services to the medically indigent has increased 162 percent in the last 10 years.

Another example of this commitment is the fact that we are spending $80 million to match $30 million which the Federal Government provides under the medicaid program. This, Mr. Speaker, is probably the highest matching ratio in the program, even though Puerto Rico is poorer than any State.

The fact that Puerto Rico's participation in the medicaid program is limited to $30 million per year on 50–50 matching ratio, has severely strained the resources of the Government of Puerto Rico, particularly, the health budget and has also constrained our ability to provide optimum health care to our medically indigent. Unless immediate action is taken through this legislation, our ability to provide these services will be severely hampered.

Mr. Speaker, we are experiencing a situation by which we find that we have to comply with Federal regulations and legislation requiring the states to provide more services, more sophisticated costs accounting and management information systems and the Government of Puerto Rico is having to bear the full burden of providing the services and developing the systems without any assistance whatsoever from the Federal Government, since most of our funds under the ceiling are already committed to providing the basic health care services.

To make things more difficult, during the last years most of the Federal legislation related to the delivery of health services to the medically indigent population has been based on the third party reimbursement concept. For example, this is true for mental health, family planning, community health services, rural health initiative, maternal and child health, et cetera. In the several States, the main source of third party reimbursement for these programs are the medicaid funds. Also because of the nature of the health economy in the mainland, medicare funds and several prepaid health plans become good sources of third party funding. In Puerto Rico the situation is quite different. Prepaid plans are few and there are no uncommitted medicaid funds available for third party purposes, because the only $30 million available are already being used within the system.

As a result of all this, any of such programs depending on third party reimbursement is doomed to failure in Puerto Rico. This is so because by disposition of law most of these programs provide only for "seed money" with a phaseout schedule providing the project enough time to become self-sufficient through third party funds. In Puerto Rico, we cannot foresee that this will ever be feasible because of the absence of third party payors, especially the main one available in the United States, the medicaid program.

If this trend continues, we in Puerto Rico will not be able to benefit from any of the new legislation our medically indigent counterpart in the United States are benefiting from. Furthermore, this tendency will make it very difficult for us to accept future such programs depending on third party payors, because we consider it will be unfair and unjust to start good health services in a community when we know ahead of time we will have to discontinue them in a few years, because we know we will not be able to obtain reimbursement. This situation is already eroding our relations with our needy population.

The limitations because of the ceiling also make it impossible for us to comply with the multiple requirements of the medicaid program like EPSDT, cost system and others. This is due to our difficult local health situation which demands from us to utilize our limited funds in the acute front of health services delivery.

Finally, Mr. Speaker, Congress has already included the funds needed to implement this legislation in its fiscal year 1978 budget resolution and the President has done likewise in his fiscal year 1979 budget.

This is a simple and straightforward bill and one of the highest priority to me and to the people of Puerto Rico. I urge my colleagues to support H.R. 9434.

Mr. CARTER. Mr. Speaker, I urge passage of the legislation and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. ROGERS) that the House suspend the rules and pass the bill H.R. 9434.

The question was taken; and the Speaker pro tempore being in doubt, the House divided, and there were—ayes 26, noes 14.

Mr. ROGERS. Mr. Speaker, I object to the vote on the ground that a quorum

is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 253, nays 106, not voting 73, as follows:

The Clerk announced the following pairs:

Mr. Ambro with Mr. Wiggins.
Mr. Cotter with Mr. Shipley.
Mr. Biaggi with Mr. Byron.
Mr. Rostenkowski with Mr. Chappell.
Mrs. Burke of California with Mr. Mahon.
Mr. Le Fante with Mr. Bauman.
Mr. Ashley with Mr. Anderson of Illinois.
Mr. Weiss with Mr. Frey.
Mr. Caputo with Mr. Mann.
Mr. Wydler with Mr. Broyhill.
Mr. Gilman with Mr. Kasten.
Mr. Aspin with Mr. Goodling.
Mr. McKinney with Mr. Teague.
Mr. Rinaldo with Mr. Krueger.
Mr. Marks with Mr. Quie.
Mr. Baldus with Mr. Ruppe.
Mr. Mineta with Mr. Kemp.
Mr. Risenhoover with Mr. Evans of Delaware.
Mr. Pepper with Mr. Pursell.
Mr. Dent with Mr. Bob Wilson.
Mr. Holland with Mr. Brown of Michigan.
Mr. Nix with Mr. Eckhardt.
Mr. Zeferetti with Mr. Goldwater.
Mr. Flood with Mr. Edwards of Alabama.
Mr. Metcalfe with Mr. LaFalce.
Mr. Bevill with Mr. Diggs.
Mr. Rodino with Mr. Murphy of Pennsylvania.
Mr. Hughes with Mr. Conyers.
Mrs. Collins of Illinois with Mr. Patterson of California.
Mr. Santini with Mr. Murphy of Illinois.
Mr. Traxler with Mr. Minish.
Mr. Blouin with Mr. Carr.
Mr. Milford with Mr. Michael O. Myers.
Mr. D'Amours with Mr. Maguire.
Mr. Ford of Michigan with Mr. Rahall.

Mr. BREAUX and Mr. EVANS of Indiana changed their vote from "yea" to "nay."

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

ANNOUNCEMENT AS TO VOTE

(Mr. DANIELSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DANIELSON. Mr. Speaker, due to official business of the Committee on International Relations, I was compelled to be absent from two rollcall votes on Thursday, January 19, 1978, and would like to announce how I would have voted had I been present.

Rollcall No. 2, an amendment to H.R. 2329 that strikes language allowing warrantless searches and seizures by enforcing officers where "there is reasonable grounds to believe that a person has committed or is attempting to commit an offense in his presence or view": I would have voted "aye."

Rollcall No. 3, H.R. 2329, to improve the administration of fish and wildlife programs: I would have voted "yea."

PROVIDING FOR CONSIDERATION OF H.R. 6362, FOREST SERVICE TIMBER SALES STUDY

Mr. MEEDS. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 974 and ask for its immediate consideration.

H. RES. 974

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6362) to establish an Advisory Committee on Timber Sales Procedure appointed by the Secretary of Agriculture for the purposes of studying, and making recommendations with respect to, procedures by which timber is sold by the Forest Service, and to restore stability to the Forest Service timber sales program and provide an opportunity for congressional review. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit. After the passage of H.R. 6362, the Committee on Agriculture shall be discharged from the further consid-

eration of the bill S. 1360, and it shall then be in order to consider said bill in the House.

The SPEAKER pro tempore. The gentleman from Washington (Mr. MEEDS) is recognized for 1 hour.

Mr. MEEDS. Mr. Speaker, I yield the usual 30 minutes for the minority to the distinguished gentleman from California (Mr. DEL CLAWSON), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 974 provides for the consideration of H.R. 6362, a bill to establish an advisory committee on timber sales procedure.

The rule provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture. The bill will be open to all germane amendments under the 5-minute rule. There are no waivers or points of order included in this rule.

The rule provides that after the passage of H.R. 6362, the Committee on Agriculture shall be discharged from further consideration of the bill, S. 1360, and it shall then be in order to consider said bill in the House.

Mr. Speaker, H.R. 6362 establishes an advisory committee with the U.S. Department of Agriculture which would study the procedures by which the Forest Service sells timber including, among other things, the means by which such timber is put up for sale, appraised, bid upon, and factors affecting pricing of such timber. Under the bill the recommendations and conclusions of the committee are to be reported to the House and Senate Committees on Agriculture no later than January 1, 1979 at which point the advisory committee would cease to exist.

Also, the bill would repeal subsection 14e of the National Forest Management Act of 1976 which presently requires that the Forest Service employ a sealed bidding procedure for the sale of timber. Implementation of this provision by the Forest Service has subjected timber purchasers and small communities in many western timber markets to an extraordinary degree of uncertainty. A small independent operator has no way of knowing whether a sale which he needs will be made under the sealed or oral bid method.

Subsection 14e of the National Forest Management Act was inserted in that act during markup of the House bill and had not been the subject of public hearings. It abruptly changed procedures for sale of national forest timber in the crucial Pacific Northwest Federal timber producing region and has destabilized the timber industry thereby depriving small operators of the opportunity to bid only as high as necessary to purchase needed timber. These operators had enjoyed such an opportunity for over a quarter of a century under the highly competitive oral auction timber sale method heretofore utilized by the Forest Service. There have been several recent failures of small mills in the Pacific Northwest.

Finally, the bill will require no additional appropriations as the operating costs of the Commission would be absorbed within the operating funds otherwise available for carrying out the activities of the Department of Agriculture.

Mr. Speaker, I know of no opposition to the adoption of this rule, and I urge its adoption.

Mr. DEL CLAWSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 974 provides an open rule with 1 hour of general debate for the consideration of H.R. 6362, the Forest Service timber sales study, which establishes an advisory committee on timber sales procedure. The bill will be open for amendment under the 5-minute rule.

The advisory committee would examine methods by which Forest Service timber is sold in order to submit a thorough report to the Secretary of Agriculture and the Agricultural Committees of Congress by January 1, 1979. H.R. 6362 would also repeal subsection (e) of section 14 of the National Forest Management Act of 1976 which requires sealed bidding on all national timber sales. This new procedure would provide the Department of Agriculture needed flexibility in determining the best bidding method on a case-by-case basis, without being locked into a predetermined statutory policy.

Mr. Speaker, the Senate has already passed this bill, and I recommend a favorable vote for the rule and the subject legislation.

Mr. Speaker, I yield such time as he may consume to my colleague, the gentleman from California (Mr. DON H. CLAUSEN).

Mr. DON H. CLAUSEN. Mr. Speaker I rise in support of the bill.

Mr. DEL CLAWSON. Mr. Speaker, I have no further requests for time.

Mr. MEEDS. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 2664, SIOUX INDIAN CLAIMS

Mr. MEEDS. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 958 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 958

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2664) to amend the Indian Claims Commission Act of August 13, 1946, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto without intervening motion except one motion to recommit. After the passage of H.R. 2664, the Committee on Interior and Insular Affairs shall be discharged from the further consideration of the bill S. 838 and it shall then be in order to consider said bill in the House.

The SPEAKER pro tempore. The gentleman from Washington (Mr. MEEDS) will be recognized for 1 hour.

Mr. MEEDS. Mr. Speaker, I yield the usual 30 minutes for the minority to the distinguished gentleman from Mississippi (Mr. LOTT), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 958 provides for the consideration of H.R. 2664, a bill to amend the Indian Claims Commission Act of August 13, 1946. The rule provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs. The bill will be open to all germane amendments under the 5-minute rule. There are no waivers of points of order in this rule.

The rule further provides that after the passage of H.R. 2664 the Committee on Interior and Insular Affairs shall be discharged from further consideration of the Senate bill, S. 838, and it shall then be in order to consider said bill in the House.

Mr. Speaker, I do not generally take time on a rule to get into the merits of legislation but, as chairman of the Subcommittee on Indian Affairs, I was the one who started this legislation or first introduced it about 3 years ago, and I would like to take a few minutes now so that the entire hour can be saved for those who would like to discuss the bill when we consider it.

Mr. Speaker we are, with H.R. 2664, dealing with the largest, most historical and socially significant as well as oldest and most important of all the Indian claims. I think it is no secret that I have not agreed with all Indian claims but certainly hope that we will seriously consider this one because it is, without question, the most important of all of them.

An understanding of the history of this claim is necessary for full appreciation of what transpired.

Under a special act of this body in February of 1877, the United States unilaterally stripped the Sioux Indians of the Black Hills of South Dakota. Without question it is one of the darkest pages in our dealings with the American Indians. In fact, the U.S. Court of Claims in 1975 said:

A more ripe and rank case of dishonorable dealings will never in all probability be found in our history.

Why is it then, Mr. Speaker, that we have never settled this claim? The history of why we have not is a classic of frustration and failure of our entire system of government, both judicial, the legislative, and the executive branches of this Government.

The history begins in 1920 when, by a special statute, the Court of Claims as-

sumed jurisdiction over the settlement of the Sioux claim. After a long time that case was heard before the Court of Claims.

In a 79-page opinion which is very ambiguous, it is difficult to say whether the case was dismissed on the merits or whether the Court of Claims felt it lacked jurisdiction to hear the matter. In any event, it dismissed the complaint.

In 1975 after long consideration, the Indian Claims Commission held that the taking in 1877 was, indeed, a fifth amendment taking in violation of the fifth amendment and that the United States had waived or abandoned the defense of res judicata. By that holding the Indian Claims Commission was in effect saying that interest at 5 percent could be paid and should be paid on the original claim which was held to be worth $17,500,000.

In 1975 the Court of Claims reversed the Indian Claims Commission saying that rightly or wrongly the Court of Claims had made a decision on the fifth amendment, and that that was res judicata, and it applied to the matter before the Indian Claims Commission, and it dismissed the case.

I go through that rather complicated history for the purpose of pointing out to the Members that the purpose of this legislation is not to decide the matter on the merits. That is still for the court to do. The purpose of this legislation is only to waive the defense of res judicata and to waive this technical defense, as we have done in a number of other instances in this body, so this most important claim can get before the courts again and can be decided without a technical defense and on the merits.

I said earlier that this is a history of missed opportunities and frustration and bitterness. Rightly or wrongly, this case is regarded in the Indian world as the prime example of white man's injustice. Despite this, the Sioux have continued to press in the courts and before the Indian Claims Commission and before the Congress for redress of these grievances. Some of the Sioux point to this long history of frustration and problems and demand a return of large parts of five States of this Nation, but most of the Sioux prefer to work through the system to achieve ultimate justice. Our failure to pass this bill will only lend credence to the charges and demands of the Russell Meanses of the world for much more than we are doing here. Conversely, the passage of this act will reward the long-suffering hope of the vast majority of the Sioux people who have had faith in the system. Just as importantly, it will write a more honorable finish to a chapter of American history that has had less than an honorable beginning.

Mr. Speaker, I reserve the remainder of my time.

Mr. LOTT. I thank the gentleman for yielding, Mr. Speaker.

Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is a 1-hour, open rule permitting consideration of H.R. 2664, a bill amending the Indian Claims Commission Act of 1946. The rule provides that after the passage of H.R. 2664, the Committee on Interior and Insular Affairs is discharged from further consideration of S. 838; and it is in order then to consider the Senate bill in the House. Both the House and Senate versions are identical to each other.

The purpose of this legislation is to authorize the Court of Claims to review on the merits the question of whether or not the United States took the Black Hills area from the Sioux Nation in violation of the fifth amendment to the Constitution, notwithstanding any defense of res judicata or collateral estoppel. The Sioux Black Hills claim is for the 1877 acquisition of their Black Hills country without the payment of just compensation. In 1975 the Court of Claims ordered the claim dismissed on the technical ground of res judicata without reaching the merits of the case. The Supreme Court denied a Sioux petition for writ of certiorari to review the Court of Claims judgment.

Therefore, the Sioux are left with no procedure in the law for further appeal of their claim, except through the vehicle of legislation. H.R. 2664 is that vehicle, and it will enable the Sioux Nation to appear in the Court of Claims to have their fifth amendment taking claim adjudicated on its merits.

H.R. 2664 failed to pass under suspension of the rules on September 27, 1977, by a vote of 173 to 239.

It is my understanding that there are objections to this legislation. I am advised that the Department of Justice would prefer to delay its consideration until the administration has time to review all the ancient Indian claims. There is also some concern that passage of this bill will set an unwarranted precedent while discriminating against other Indian tribes.

I am certain these matters will be discussed during general debate, and I do not oppose the rule.

Mr. Speaker, I have no further request for time and I yield back the balance of my time.

Mr. MEEDS. Mr. Speaker, I know of no opposition to the rule. I have no further request for time.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR THE CONSIDERATION OF H.R. 8336, CHATTAHOOCHEE RIVER NATIONAL PARK

Mr. SISK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 982 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 982

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 8336) to enhance the outdoor recreation opportunities for the people of the United States by expanding the National Park System by providing access to and within areas of the National Park System, and for other purposes, and all points of order against section 105(a) of said bill for failure to comply with the provisions of clause 5, rule XXI are hereby waived. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs, the bill shall be read for amendment under the five-minute rule. All points of order against the amendment recommended by the Committee on Interior and Insular Affairs now printed in the bill, beginning at line 22, page 9 through line 3, page 10, for failure to comply with the provisions of clause 7, rule XVI are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from California (Mr. SISK) is recognized for one hour.

Mr. SISK. Mr. Speaker, I yield 30 minutes to the gentleman from California (Mr. DEL CLAWSON), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 982 provides for the consideration of H.R. 8336 to establish the Chattahoochee River National Recreation Area in the State of Georgia and for other purposes.

This is a 1-hour open rule with time equally divided and controlled between the chairman and ranking minority member of the Committee on Interior and Insular Affairs.

The rule contains two waivers. The first waives points of order under clause 5, rule XXI, appropriations in a legislative bill, pursuant to section 105(a) of the bill. This is necessary because the section in question authorizes the expenditure of $73 million from both current and future appropriations to the Land and Water Conservation Fund. Technically, this is an appropriation.

The second waiver is for an amendment recommended by the Committee on Interior and Insular Affairs. The amendment beginning on line 22, page 9 of the bill and continuing through line 3, page 10 provides an additional $750,000 for certain historical events in the State of Kansas. The amendment is not germane to the bill and thus requires a waiver of clause 7, rule XVI.

Mr. Speaker, H.R. 8336 creates the Chattahoochee National Recreation Area. It authorizes the expenditure of $73 million for the purchase of 6,300 acres of land along a 48-mile segment of the Chattahoochee River, generally in the Atlanta metropolitan area. The bill further authorizes $500,000 in fiscal year 1979 to develop public facilities in the recreation area.

The Interior Committee also recommended two amendments to the bill. Title II would increase funds for the

Fort Scott, Kans., historical project by some $750,000.

Title III expresses the intent of Congress that all inholdings in the national park system be acquired within 4 years following the effective date of the bill. Grand Teton National Park in Wyoming would be exempt from this requirement. Although this amendment is also nongermane to the bill, it was not given a waiver by the Committee on Rules.

Mr. Speaker, H.R. 8336, as well as a similar bill in the last Congress which would have established a national park along the Chatahoochee River in Georgia, was given careful consideration by the Committee on Interior and Insular Affairs. I urge my colleagues to adopt House Resolution 982 so that we might proceed to its consideration.

Mr. DEL CLAWSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 982 provides an open rule with 1 hour of general debate for the consideration of H.R. 8336, a bill to establish the Chattahoochee River National Recreation Area in Georgia. The bill will be read for amendment under the 5-minute rule. Following this, the rule allows one motion to recommit.

The rule waives all points of order lying against section 105(a) of the bill. That section fails to comply with the provision of clause 5, rule 21, by providing an appropriation on a legislative measure. An additional waiver of points of order is made for title II of the bill, a subject not germane to a bill regarding the Chattahoochee River. Points of order were therefore waived for failure to comply with clause 7, rule 16, the germaneness rule.

Mr. Speaker, the Chattahoochee River is primarily of local concern. The State of Georgia has already shown its willingness to support the project by enactment of the Metropolitan River Protection Act. In fact, we understand much of the land in question has already been acquired by State and local governments. Georgia is enjoying a $55 million budget surplus, and the Federal Government is over $600 billion in debt.

The conclusion is simple: Georgia wishes to protect the Chattahoochee River, which they can afford to do. Though I agree that the Chattahoochee needs to be preserved, I oppose the passage of a bill which puts the responsibility into the wrong hands. My hope is that my colleagues will defeat the rule, or, failing that, defeat the bill.

Mr. SISK. Mr. Speaker, I yield 5 minutes to the gentleman from Georgia (Mr. McDONALD).

Mr. McDONALD. Mr. Speaker, I feel that this is an incredibly bad bill. The Chattahoochee River Recreation Area has recently been tabled; consideration of this in the Senate has been tabled because of the adverse aspects of this particular bill, and also because of the extremely high price tag, making this particular bill the most expensive cost per acre that we have been asked to consider.

There is nothing of national concern in this particular bill. The Chattahoochee River begins and ends in Georgia. The area involved is completely within the State of Georgia. What we are doing by opening a Pandora's box and considering the Chattahoochee River proposal is putting the Federal Government into the business of providing urban recreation areas. If we are going to set this precedent, or do this for the Atlanta area, it is only going to be right that we do it for the St. Louis area, for the Charleston area, and for the San Antonio area.

My colleagues, there is simply not enough money in the world to finance that venture, or that extension of Federal activities. As my colleague from California has already stated, the State of Georgia has done and is doing an excellent job in providing for the recreation areas for the Metropolitan Atlanta area. The State of Georgia currently has over 1,000 acres involved in the Chattahoochee River currently, and the Federal involvement in expanding that effort is totally unnecessary.

In the last administration, the spokesman for the Interior Committee came out against this bill for exactly that reason. The State of Georgia enjoys a $55 million surplus at this time, this year, when we are looking at a $60 billion deficit.

There is nothing of national concern here. Members may be told of some archeological site. Frankly, as the one member of the Georgia delegation who grew up on the Chattahoochee and has boated, fished, and hunted on it, there is nothing of archeological concern in the area. This was a muddy river that overflowed once or twice a year, and it is because of the man-made aspect of the dam that the water has cleared, and for the first time trout are in the river, which are not natural to the river. If Members consider the finding of an arrowhead or a broken piece of pottery as an archeological site and see it as significant, I submit that this applies to almost every acre of the United States.

There is going to be virtually no logical way of choosing the 14 separate parcels located along a 48-mile corridor.

We are opening a precedent an unworkable situation, and a very bad bill that has just been tabled by the Senate Interior Committee.

I hope my colleagues will vote to defeat the rule and, failing that, to defeat the bill, that sets a very dangerous precedent to expand the Federal activity of such an urban recreation area, the most expensive project of its kind and one which, if accepted, will open a Pandora's box for future bankruptcy of the Federal Government.

Mr. SISK. Mr. Speaker, I yield 5 minutes to the gentleman from Georgia (Mr. LEVITAS).

Mr. LEVITAS. Mr. Speaker, first of all, I would like to thank the gentleman from California for yielding this time to me. I would like to urge my colleagues to vote for adoption of the rule and ultimately vote for the bill itself.

I would like to begin by correcting one statement that was made by my colleague, the gentleman from Georgia, who stated that the bill has been tabled for consideration in a committee in the other body. That is not correct. The Senate committee never got a quorum today and after discussion, further consideration of the matter was postponed for later this week; so I want to set the record straight. The bill has not been tabled in the other body and the information I have provided was furnished by the office of the junior Senator from Georgia, who is a cosponsor of this bill in the other body, along with the senior Senator from Georgia; both Senators are sponsors of this legislation. In the other body we have every expectation that this bill will be voted on favorably very soon by the committee in the other body.

Now, as far as the river itself is concerned and this particular recreation area, it meets every one of the seven criteria set out by the Department of the Interior for a national park. Each of the criteria have been met by this particular unique treasure. We have been told it is only in one State. First of all, we should know that this particular river begins in the hills of north Georgia, runs down and forms the boundary between Alabama and the State of Georgia, crosses into Florida, and empties into the Gulf of Mexico.

The part of that river that is being proposed as a park is a unique treasure. It is similar to many other parks located near urban areas, such as the Gateway and Cayuhoga Park. It is not a new precedent being set, but it is saving a unique national resource.

It is estimated that the amount of use the national park will receive will be larger than any other national park in the United States. It is situated between two major interstate highways coming from the Midwest and from the East, and it is an opportunity for people from all over America to share in the enjoyment of this unique treasure, which in the absence of being made a national park will be lost forever, not only for ourselves, but for future generations.

I have, along with my colleague, the gentleman from Georgia (Mr. FOWLER), sent to each a "Dear Colleague" letter which deals with and refutes each of the points which my colleague, the gentleman from Georgia (Mr. McDONALD) has made.

This is a national treasure. This is a National Park. Rather than these sites being bumps on a log, as my colleague has indicated, they are, rather, beautiful pearls in a necklace, that necklace being the Chattahooche River where there are archeological and historically significant findings that go back as far as 10,000 years.

Mr. Speaker, this is a treasure that I trust Members of this body will make it a part of the National Park System.

Mr. SISK. Mr. Speaker, I yield 5 minutes to the gentleman from Georgia (Mr. FOWLER).

Mr. FOWLER. Mr. Speaker, I want to commend my colleague, the gentleman from Georgia (Mr. LEVITAS) for the gentleman's leadership on this bill. I would just like to tell my colleagues that there are seven Members of the Georgia dele-

gation who are cosponsors of this legislation.

The gentleman from Georgia (Mr. LEVITAS) has made the case for the national concern. There were 2.4 million people who used the Chattahoochee River last year, more than used our National Park in Yosemite.

The Southeastern States are not the only States affected. People from all over the country are now taking advantage of the rafting, canoeing, fishing, and just plain pleasure to be enjoyed in and along the Chattahoohee River.

Mr. Speaker, I urge the Members' favorable consideration of this legislation as uniquely in the long term national interest.

Mr. SISK. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. McDONALD. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 323, nays 41, "present" 1, not voting 67, as follows:

The Clerk announced the following pairs:

Mr. Ambro with Mr. Shipley.
Mr. Cotter with Mr. Mahon.
Mr. Rostenkowski with Mr. Chappell.
Mrs. Burke of California with Mr. Anderson of Illinois.
Mr. Kasten with Mr. Frey.
Mr. Diggs with Mr. Mann.
Mr. Biaggi with Mr. Caputo.
Mr. Whitten with Mr. Broyhill.
Mr. Flood with Mr. Edwards of Alabama.
Mr. Zeferetti with Mr. Goodling.
Mr. Eckhardt with Mr. McKinney.
Mr. Reuss with Mr. Bauman.
Mr. Pepper with Mr. Kemp.
Mr. Nix with Mr. Badham.
Mr. Dent with Mr. Horton.
Mr. Teague with Mr. Gilman.
Mr. Murphy of Illinois with Mr. Marks.
Mr. Rodino with Mr. Wydler.
Mr. Hughes with Mr. Broomfield.
Mr. Minish with Mr. Ruppe.
Mr. Fraser with Mr. Quie.
Mr. John L. Burton with Mr. Young of Alaska.
Mr. Ford of Michigan with Mr. Bob Wilson.
Mr. Blouin with Mr. Traxler.
Mr. Patterson of California with Mr. Santini.
Mr. Weiss with Mr. Charles H. Wilson of California.
Mr. Murphy of Pennsylvania with Mr. Le Fante.
Mr. LaFalce with Mr. Krueger.
Mr. Holland with Mr. Maguire.
Mr. Dingell with Mr. Carr.
Mr. Bonior with Mr. Rinaldo.
Mr. Rahall with Mr. Brown of Michigan.

Mr. HAMMERSCHMIDT changed his vote from "no" to "aye."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

FOREST SERVICE TIMBER SALES STUDY

Mr. WEAVER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6362) to establish an Advisory Committee on Timber Sales Procedure appointed by the Secretary of Agriculture for the purposes of studying, and making recommendations with respect to, procedures by which timber is sold by the Forest Service, and to restore stability to the Forest Service timber sales program and provide an opportunity for congressional review.

The SPEAKER pro tempore (Mr. WRIGHT). The question is on the motion offered by the gentleman from Oregon (Mr. WEAVER).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 6362, with Mr. BREAUX in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Oregon (Mr. WEAVER) will be recognized for 30 minutes, and the gentleman from Colorado (Mr.

JOHNSON) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Oregon (Mr. WEAVER).

Mr. WEAVER. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, we bring to the floor today H.R. 6362 which addresses an issue critical to scores of rural communities in the West whose economies are dependent on national forest timber.

H.R. 6362 would establish an advisory committee to study and make recommendations to the Secretary of Agriculture and to Congress on the procedures by which national forest timber is sold. The committee would be required to submit its report not later than January 1, 1979. Upon submission of its report, the committee would cease to exist.

H.R. 6362 also would repeal section 14(e) of the National Forest Management Act of 1976, which requires sealed bidding when national forest timber is sold, except where the Secretary determines otherwise by regulations.

Mr. Chairman, I believe an advisory committee whose purpose is to study and evaluate how national forest timber is sold would serve a very useful function at the present time. The role of the national forests in providing for the Nation's sawtimber needs is of singular importance because they contain most of the Nation's sawtimber inventory. And this role can only increase as sawtimber inventories on private lands are drawn down in the years ahead, as is anticipated. There have been very significant changes in timber supply sources for the forest product industries in recent years. There will be more changes in the years ahead, dramatic changes. I think it is time to examine the present system of allocating the timber resource of the national forests, to see how efficiently the present system is working, to see if it can be improved.

We cannot ask the Forest Service to make such an examination. The Agency would, in effect, be examining itself, and how productive would that likely be? Should Congress make an examination of this complex subject? Does it have the time? The expertise? I think not.

It is for these reasons that H.R. 6362 provides for an advisory committee. I am well aware of the administration's position in this regard, and I have a similar view. Nevertheless, there are worthy exceptions for every good rule. I believe that an advisory committee to study national forest timber sale procedure is, indeed, a worthy exception.

Mr. Chairman, I would like to say that while I feel the advisory committee is an important element of this bill, I will support the Foley substitute which deletes the advisory committee.

Mr. Chairman, section 14(e) was intended to prevent collusive bidding for national forest timber. The provision first appeared during markup of the House bill, which was parent to the National Forest Management Act. It should be clearly understood that section 14(e) was incorporated into the House bill without the benefit of public hearings. It should also be understood that the provision was substantially extended in conference—from applying only to sales of 1 million board feed or less to applying to all national forest timber sales—despite the fact that the Senate parent to the National Forest Management Act contained no comparable provision.

While the Forest Service has used both oral and sealed bidding in national forest timber sales, the predominant method used in the West—especially the Pacific Northwest—has been oral bidding. Section 14(e) generally calls for the use of sealed bidding. Implementation of the provision has been and remains controversial because it subjects timber purchasers and small communities in many western timber markets to an extraordinary degree of uncertainty.

The Forest Service is, effectively, the only seller of timber in many western timber markets. If a timber purchaser does not successfully bid for national forest timber, he has no alternative source of raw material.

This condition—together with the mechanics of sealed bidding—produce an onerous degree of uncertainty which prompted my introduction of H.R. 6362. Let me review the difference between sealed and oral bidding to aid understanding of the importance of this bill to scores of rural communities in the West whose economies are dependent on natonal forest timber.

Under sealed bidding, timber purchasers are allowed a single bid on the timber offered for sale. All bids are held secret until the day of the sale, at which time they are opened, and the timber is sold to the highest bidder. Under this procedure, a bidder could participate—actively and competently—in several successive timber sales in the timber market in which he operates and not be successful. Because he is unable to capture a national forest timber sale and because of no other supply sources of timber, the bidder will have to shut down any timber processing plants he may operate. Where the plants are located in small communities with a narrow economic base, there will be a loss of jobs for many workers, and the basis for community stability as well.

In contrast, when timber is sold under oral bidding, timber purchasers can make several consecutive bids for a sale. A purchaser who must obtain a sale to continue operating his mill, can react to the bids of other purchasers and secure his necessary raw material. He could even bid above the price he would normally pay so long as he is able to cover the fixed costs of operating his mill. Thus, oral bidding is well-suited to timber markets where there is a single seller of timber, which is the prevailing condition in many timber markets in the West. Repeal of section 14(e) of the National Forest Management Act will assure the full use of that procedure. It will assure that independent millowners in the West have an opportunity to protect their investments. It will assure that plants remain open and jobs secure. Repeal of section 14(e) will assure the existence of scores of rural communities in the West whose economies are dependent upon national forest timber.

There are some who argue that sealed bidding is necessary because it prevents collusion among bidders. Mr. Chairman, that argument is completely fallacious. The fact is there are many examples in the history of antitrust law enforcement of collusion under sealed bidding. Two noteworthy examples are United States against Westinghouse Electric Co. et al., the famous electrical equipment conspiracy of the 1950's and FTC against American Cyanamid Co. et al., the well-known tetracycline case. Sealed bidding in no way prevents collusion.

Mr. Chairman, I am opposed to collusion. I am confident that every Member of the House of Representatives is opposed to collusion. It is against the public interest, and it is unlawful. But repeal of section 14(e) does not remove or diminish the authority of the Secretary of Agriculture to take appropriate action to prevent collusive practices in the sale of national forest timber. Repeal of section 14(e) does not remove or diminish the authority of the Attorney General to enforce the antitrust laws of the United States. Repeal of section 14(e) of the National Forest Management Act, simply, allows the Secretary of Agriculture to use fully the bidding procedure best suited to the circumstances of particular timber markets, thereby assuring stability to many rural communities whose economies are dependent on national forest timber.

In conclusion, Mr. Chairman, I ask for speedy passage of this bill to maintain the stability of our economic community, and I repeat: I will be supporting the Foley substitute.

Mr. ULLMAN. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I yield to the gentleman from Oregon.

Mr. ULLMAN. Mr. Chairman, I rise just to commend the gentleman from Oregon (Mr. WEAVER) for his leadership in this effort to maintain a stable economic base for timber marketing in the West. The bill before us would do that and would correct the very inequitable sealed bid interpretation of the Forest Service. I commend the gentleman from Oregon (Mr. WEAVER).

Mr. WEAVER. I thank the gentleman.

Mr. JOHNSON of Colorado. Mr. Chairman, I yield 1 minute to the gentleman from Washington (Mr. PRITCHARD).

Mr. PRITCHARD. Mr. Chairman, as one who comes from an area which is very involved in timber and lumber management, I can tell the Members that this is in the best interest of the lumber industry and will definitely be in the best interest of the consumer, so I strongly support the gentleman from Oregon.

Mr. JOHNSON of Colorado. Mr. Chairman, I yield 5 minutes to the gentleman from Idaho (Mr. SYMMS).

Mr. SYMMS. Mr. Chairman, I am pleased to have been involved with the development of this legislation since its consideration before the Forests Subcommittee. The issue is of limited impact nationally but for those in the Western States who are reliant upon forest products for jobs and a strong local economy, the legislation we consider today is essential.

Historically, our small mill operators have depended upon the practice of oral bidding to insure a stable flow of timber into communities which are almost totally dependent on Federal timber purchases. The milling capacity of these communities represents a substantial capital investment, and it is most often the case that all other economic activity in the area has grown up in support of that basic forest industry.

Concentrated as this milling investment might be, these communities are in no way prepared to compete with large companies within the industry which operate on a regional or national basis. It was for this reason that for many years the Forest Service sanctioned oral auction as a means of contracting specific, rather than random, sales to dependent communities.

The Forest Service performance in implementing the regulations under section 14(e) of the National Forest Management Act has not given one cause for optimism. In initial regulations after NFMA was passed, the Forest Service virtually eliminated the use of oral bidding on national forest timber, a result that was hardly anticipated by the Members of Congress who were involved in the development of 14(e).

On June 2, 1977, the Forest Service published final regulations for the sale of national forest timber. Although under these final regulations the requirements for sealed bidding originally contained in the Forest Service interim regulations are considerably relaxed, the final regulations would still be adverse to the economic stability of local dependent communities.

The final regulations provide that in areas determined by the Forest Service to be dependent, a mix of bidding methods will be used amounting to approximately 75 percent oral and 25 percent sealed bidding by volume. The proportion of volume sold by oral auction may be increased if very large sales are involved or if the volume purchased by firms outside of the tributary area increases above historic levels.

Although the Forest Service is to be commended for significantly improving the final regulations in comparison to those originally drafted, the final regulations still would be adverse to the economic stability of local dependent communities. Even in communities which the Forest Service determines to be substantially dependent upon national forest timber, the Forest Service will offer up to 25 percent of the volume on a sealed bid basis. The "safeguard" which the regulations provide for increasing the percentage of timber offered by oral auction if a substantial portion of the sales end up being purchased by outside firms has the obvious and critical flaw that nothing will be done unless substantial, and in all likelihood permanent and irreparable, damage has been done to the local economy.

Many small operators in certain parts of the country specialize in specific types of sales that have particular species or grades of logs. These small operators must obtain every single sale which comes up having the kinds of products they specialize in. If, by chance, that sale is one of those offered under sealed bidding, it puts the operator in an untenable position due to uncertainty over what he must bid to obtain the sale.

Another difficulty is created by the fact that in the past few years the amount of timber offered from the national forests has been reduced significantly in some parts of the West. In these areas the Forest Service is selling hardly enough to maintain existing mills on a break-even point. Putting into jeopardy 25 percent of the volume in these areas would be enough to severely damage the local economy.

Oral bidding recognizes that these operators usually have no alternative source of timber supply from private lands. It also recognizes that these mills by virtue of their size are highly specialized and must depend upon access to the kinds and volumes of timber which insure their operation on an even schedule. The alternative is eventual closure and community-wide unemployment.

It should be pointed out that a good portion of the land in the Western States is in the Federal domain, and we are heavily dependent on timber sales from national forest. In the East, South, and Southwest, most of the timber-producing acreage is held in private ownership. Thus, it can be readily seen that the problems of the Western and Pacific Northwestern States are unique compared to other parts of the country. While Southern mills and most timber operations in the East can make up unsuccessful bids for Federal timber by bidding on abundant private forest lands, western timber supplies which are bid out of a dependent community's operating area create immediate deficits and eventual closure.

Abuse of oral bidding procedures has been nearly nonexistent in our Western States. Over the years, one indictment has been made and a conviction was obtained by Federal attorneys. It would be unfair to assert from that record that the oral bidding mechanism is the inducement to collusion among timber operators. Where collusion has occurred in Federal contracting, it was because there was a desire to collude, regardless of the bidding or contracting method in use.

The legislation before you today, H.R. 6362, addresses that issue directly in reasserting what has always been this Government's statutory authority all along—namely, to pursue and seek litigation in any circumstances which indicate the possibility of collusion or antitrust activities. The bill calls for an advisory committee to study the matter in depth and report back to Congress. Until we receive that Commission's report, we should not, in the meantime, penalize small western communities by forcing a bidding method upon them which is proving disruptive and contrary to their interests.

We are not asking that the entire forest products industry operate through oral bidding; simply that the West be allowed to resume its historic practice of oral bidding. The decision on the method of bidding to be used would rest, as it always has, in the hands of the Chief of the Forest Service, along with his ongoing responsibility to insure full value to the Government for sale of Federal timber and to insure that the laws on detection and prosecution of collusion are vigorously enforced.

As indicated in the report accompanying the bill, H.R. 6362, repeal of subsection 14(e) would not remove the power of the Forest Service to use the sealed bid method. It would simply remove the qualified congressional mandate to use the sealed bid method contained in that subsection. The Forest Service would be expected to continue its procedures for monitoring and reporting bidding behavior that indicated less than competitive situations.

Mr. Chairman, we have had short experience with sealed bidding in the Pacific Northwest, but we have already seen from its presence the dislocation of significant volumes of timber outside dependent communities that historically processed it. Unemployment in the Pacific Northwest, even within industries related solely to timber products, is already high. This legislation would do much to alleviate the fear of continued mill closures, unemployment, and relocation of our western labor force.

Mr. JOHNSON of Colorado. Mr. Chairman, I yield 5 minutes to the gentleman from Texas (Mr. BROOKS).

Mr. BROOKS. Mr. Chairman, I rise in opposition to H.R. 6362 and its counterpart S. 1360.

The timber on U.S. forest lands represents one of the most valuable assets the American people have. It not only produces substantial revenue for the Government, but it provides vitally needed products that help maintain our national way of life.

In an effort to protect this national treasure, Congress, little more than a year ago, directed the Secretary of Agriculture to require sealed bids for the sale of timber in the national forests. This was already the practice in the forests of all sections of the country but the West. There the practice has been to use auctions, with people bidding openly against each other.

There were two main reasons for the action taken by Congress. It wanted to prevent, or at least reduce, collusion among bidders. And it wanted to increase the revenue from timber sales. In the brief time the new bidding procedure has been in operation, it has shown promise of achieving both objectives. And now we have a bill on the floor to repeal it.

Collusion among bidders is hard to prove, but the Justice Department—which opposes this bill—says it has good reason to believe that collusive bidding exists in the sales of Federal timber. And it adds that it is far easier to enter into collusion in an auction than in a sealed bid process. We think that the sealed bidding technique generally provides a method of sale which best guarantees that timber will be available to all interested and that the Government will receive the most competitive price for it. The current statutory provision is thus

in our view entirely appropriate. We see no need for and oppose its alteration at this time by legislation along the lines of S. 1360 as passed by the Senate or H.R. 6362.

The Agriculture Department is also against this bill. Secretary Bergland says there is no basis for repealing, or even amending the existing law at this time. In the opinion of Secretary Bergland, the Department of Agriculture regulations provide ample protection to those communities where lumber companies are dependent on national forests for their timber.

The Office of Management and Budget opposes passage of H.R. 6362. A study conducted by the Forest Service shows that in just one section of the Cascade Mountains, sealed bidding for timber sales over a 6-month period produced $116 million more than the Forest Service's appraised price. In another section of the Cascades, where timber was sold at auctions, the total revenue for the period was only $19.2 million over the appraised price.

Mr. Chairman, there can be no justification at this time for Congress repealing a law that has barely begun to operate. And it is especially inappropriate to take such action when the early returns on the effect of the law show that it is working and can produce the results which were intended.

This is the public's property that we are selling. We owe it to the American people to protect that property against collusive bidding and to obtain the best price possible for it. We can do that by leaving the present law intact.

Mr. DUNCAN of Oregon. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I am delighted to yield to the gentleman.

Mr. DUNCAN of Oregon. As usual the distinguished gentleman from Texas, I think, has posed the only two arguments that could possibly be advanced in opposition to this bill; one, the assumption that collusion will vanish if we sell this timber at sealed bid, and that it will prosper if we sell it at oral bid. I would like to suggest to the gentleman that his assumption there is absolutely fallacious, and that there is no evidence to support the proposition——

The CHAIRMAN. The time of the gentleman from Texas (Mr. BROOKS) has expired.

Mr. DUNCAN of Oregon. Mr. Chairman, I ask unanimous consent that the gentleman be granted 3 additional minutes.

The CHAIRMAN. The time is controlled by the gentleman from Oregon (Mr. WEAVER). The gentleman's time has expired.

Mr. WEAVER. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. KREBS).

Mr. KREBS. Mr. Chairman, I have been in this House now for 3 years, and I have never seen as much lobbying of Members of the House as on this piece of legislation. This is despite the fact that this legislation is supposed to jeopardize only the small mill operator. Obviously, we would not have seen this type of activity if the opposition had not been true.

First of all, I think it should be stated in no uncertain terms that both the Department of Agriculture and the Justice Department are opposed to this bill, and they are opposed to it for good reasons. This bill, as has already been stated, has been on the books for approximately 14 months. During the 14 months this legislation has been on the books, despite the statements that have been made from the well earlier, there has not been a single mill closed in the Northwest and California as a result of sealed bidding use.

I have a letter from the Chief of Forestry, dated January 23, 1978, to that effect.

Furthermore, there is no question that in those areas of the United States where oral bidding had been used prior to 1976 and this is in the Northwest and California, in contrast to the Eastern and Southern States and the Lake States, where sealed bidding is all that has been used, and in those States they have never had any problems with collusive bidding, but in the Northwest and California, if we look at the figures we will see there has been ample evidence of collusive bidding, unless one is blind.

It is for this reason that we at the present time have six grand jury investigations in California and the Northwest through local collusive bidding. Some have already told us, and I am sure others will tell us, that collusive practices and precollusive practices are just as easy under sealed bidding as under oral bidding. This simply is not true. It is not true because under sealed bidding there is an element of surprise that we do not have under oral bidding. It is for this reason and this reason only that the timber industry would like to go back to the old days that existed prior to 1976 when some of them, not all of them, but some of them, engaged in practices that I submit are highly detrimental to the well-being of the American taxpayer.

Why do I say that? In the first 9 months of 1977, which has been the first year that this legislation has been in effect, the amount of money that has been paid under sealed bidding in excess of the amount of money paid under oral bidding in the Northwest and California has added up to the high amount of $28 million for 9 months only; so we can imagine what it would be for the whole year.

It is exactly for this reason we have seen all the lobbying going on for the last couple weeks.

Now, the committee voted this bill out by a landslide vote of 22 to 20. I think this should be some indication to us as to whether this, indeed, would be in the best interests of the American taxpayers to vote for this piece of legislation.

We have also heard claims made earlier in this well that supposedly in the Northwest and California that a national forest has a monopoly on timber. Let us look at the fact. The fact is that in a letter that I received from the Congressional Research Service, dated February 6, 1978, the State of Washington showed the following figures: 82 percent of the wood, the timber that has been sold and was sold in that year came from nonnational forests and only 18 percent from the national forests.

Oregon: 63 percent from the nonnational forests, 37 percent from the national forests.

California: 64 percent from the nonnational forests, only 36 percent from the national forests.

The same pattern is true for Idaho and Montana; so how can anyone stand here and tell us there is a monopoly in national timber in the States of Washington, California, Oregon, Idaho, and Montana?

Now, there is one additional figure I would like to share with you. In region one last year, this involves Idaho and Montana, the bids on the sale from sealed bidding were 25 percent higher than oral bids.

In region 5, which is California west of the Sierra Nevada, 38 percent; and in region 6, which is Oregon and Washington, 36 percent higher under sealed bids.

Mr. JOHNSON of Colorado. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. DON H. CLAUSEN).

Mr. DON H. CLAUSEN. Mr. Chairman, I rise in support of the legislation.

Mr. Chairman, prior to enactment of the National Forest Management Act, oral bidding was commonly used in timber sales from our national forests in the Northwest and in California while sealed bidding was used in the eastern national forests. This mixture of bidding procedures was in recognition of the unique characteristics of these different markets and permitted the necessary flexibility.

Subsection 14(e) of the National Forest Management Act requiring sealed bidding on all timber sales has removed this flexibility and imposed an unworkable bidding system on our mill owners in the Northwest and California.

Our mills have no alternative source of timber. They are dependent on sales from our national forests to insure a sufficient supply of timber to keep the mills operating. Oral bidding provided for an atmosphere of open competition and active bidding which assured purchasers an opportunity to obtain the timber necessary for them to maintain their operations. On the other hand, sealed bidding permits only one bid with no alternative action available if it is rejected. As a result, the economic viability of these businesses and our communities is being threatened.

In addition, the stated purpose of the sealed bidding requirement was to obviate collusion among bidders for national forest system timber. Yet, collusion in oral auction bidding is not pervasive as evidenced by the fact that the Justice Department has had only one indictment in 17 years during which time there have been thousands of sales valued at $0.5 billion annually.

Sealed bidding has gone through the test of time and has proven to be unsatisfactory. I urge my colleagues to support our efforts to correct this situation.

Mr. JOHNSON of Colorado. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. KETCHUM).

Mr. KETCHUM. Mr. Chairman, today the House is considering a measure of great importance to the future economy of the western timber industry, H.R. 6362. I certainly sympathize with those in the Congress who are unfamiliar with the problems of western timber concerns. During the past few legislative days all of us have been deluged with "Dear Colleague" letters from both sides of the issue, including my own.

Stated quite simply, H.R. 6362 would establish an independent 17-member Advisory Committee on Timber Sales Procedure to determine by January 1, 1979, the manner in which U.S. Forest Service timber is appraised, put up for sale, bid, and priced. The measure would also repeal subsection (e) of section 14 of the National Forest Management Act of 1976 which required the sealed bidding of all U.S. Forest Service timber sales except where determined by the Secretary of Agriculture.

My main concern with the bill, however, centers around this latter provision. For decades the West and Northwest have held timber auctions by oral bidding rather than sealed bidding. With enactment of Public Law 94–588, which eliminated the long held tradition of oral bidding, the timber industry west of the Mississippi was thrown into a quandry. Consequently this measure seeks to readjust what has amounted to an economically disastrous timber policy.

As the representative from the 18th District of California, which includes both the Sequoia and Inyo National Forests, I have a special stake in the outcome of this bill today. For the past 2 years I have seen firsthand the drawbacks of sealed bidding in the West. It is not working, and the outlook for local timber economies is extremely shaky at best.

By no means do I want to confuse the necessity of oral bidding in the West with sealed bidding in the South and East. The situations simply are not analagous, and this bill does not seek to press on the East and South the necessities of oral bidding in the West. The reason for the differences, however, is quite simple. Between 1964 and 1972 the East and South averaged timber sales of 800,000 board feet in comparison to the sales of over 11 million board feet in California alone during the same period. Furthermore, national forest timber comprises approximately 6 percent of the timber supply in the South while many communities out West are entirely dependent on national forest timber.

With these statistics in mind the need for oral bidding becomes obvious. A one industry town dealing in timber seeks to bid for the opportunity to cut certain timber in national forest lands. The representative from the mill congregates with other such representatives across the table and bids in open auction. With this opportunity to bid for valuable timber orally, all competitors are able to determine the going bid for timber.

Had sealed bids been used, the mill operator would have submitted what he regarded as a high bid. Later, he might find that his bid was too low and that he lost the one opportunity to make his timber operation solvent. The inherent problems for a small timber community are obviously overwhelming.

One more aspect of oral bidding I would like to stress is the concern over collusive practice. Quite frankly, collusion in oral auction bidding simply is not as pervasive as critics of this bill contend. Furthermore, the Justice Department has investigated less than a dozen investigations in the past 17 years with sales amounting to $500 million annually. I want to make it further understood that through enactment of this measure collusive practices will be minimized through the discretionary power given to the Secretary of Agriculture.

I regret the controversy which has surrounded such a simple and forthright concept in establishing oral bidding in the West. Safeguards have been set, and the Western timber industry can once again return to a reliable means of sustaining what otherwise would be a precarious and unstable economy.

Mr. JOHNSON of Colorado. Mr. Chairman, I yield 2 minutes to the gentleman from Oregon (Mr. DUNCAN).

Mr. DUNCAN of Oregon. Mr. Chairman, I rise in support of the legislation.

Mr. Chairman, I would like to have this opportunity to put things in perspective, as this debate continues between the merits of sealed bidding against oral bidding.

I think it is important to look at the legislative history and what was intended at the time the National Forest Management Act of 1976 was passed. It was very clear that Congress did not intend 100 percent sealed bidding although that was the initial Forest Service interpretation. Later the Forest Service changed its interpretation to 75 percent oral and 25 percent sealed bidding. We need this legislation to clear the record.

Opponents of oral bidding argue that it is easier to have collusion under such a method than under sealed bidding. Forest Service Chief John McGuire has testified that there is no evidence to support the conclusion that sealed bidding does any more to reduce collusion than oral auction. No evidence has ever been presented to Congress to support this conclusion. In over 70 years, there has been only one conviction of collusion in the timber industry. Certainly this record is not one which would support the need for drastic changes in present policies.

It can be argued that individuals prone to collude will do so under any bidding system. If collusion is occurring, the guilty should be prosecuted.

Mr. Chairman, you have hundreds of communities today dependent on National Forest timber. When I say dependent, they have one mill, two mills, and those bills must have logs if the community is to survive. Under oral bidding mill operators will bid much higher than the true value if necessary, to make sure they have a supply of logs to keep their mill going. Under sealed biding this kind of self protection is impossible.

If sealed bidding becomes the sole bidding procedure in the West, we are going to see towns with 15, 20, and 25 percent unemployment.

Mr. Chairman, it is important to point out that under either bidding method, oral or sealed, the public interest is fully protected because the sale cannot be sold for less than its fair market value as determined by the Forest Service in an appraisal. Where bids greatly exceed the appraised fari market value, the Government is most often extracting a premium price because of the scarcity of available timber and because the Government is a monopoly timber owner in many parts of the country. This premium for the raw material is immediately reflected in increased prices for wood products and in the housing with which it goes. Even if sealed bidding produces higher prices, and the evidence thereon is not at all satisfactory or definitive, it is not necessarily a desirable result. Inflation is still the No. 1 concern of the country. The Government should get a fair price—and will under the proposal under debate—but, of all parties, the Government should be the last to seek to extract the last cent and thus add to the flames of inflation while it preaches restraint to labor and management on the question of wage and price increases.

Mr. WEAVER. Mr. Chairman, I yield 2 minutes to the gentleman from Mississippi (Mr. BOWEN).

Mr. BOWEN. Mr. Chairman, I rise in support of this legislation and the substitute to be offered by the distinguished gentleman from Washington, the chairman of the Committee on Agriculture (Mr. FOLEY).

My part of the country is not directly affected by this bill. I know, however, there may be a number from the South here today listening to this debate. We do happen to have sealed bidding in the South, and have had it for a long while. It works because only about 6 percent of the timber sold in the South is from national forest lands. The rest is from privately owned lands.

In the West, of course, obviously the situation is quite different. There are some communities where 100 percent of the timber is Federal timber and, therefore, the entire existence of the community is in severe jeopardy under the present practice of sealed bidding.

I think one might well consider the statement made by the Chief of the Forest Service, John McGuire, who said in his testimony:

> There is no sound evidence that sealed bidding is any more effective in reducing collusion than is oral auction. Those inclined to collude will do so under any method. There is no substantial difference in risk of collusion whether oral or sealed bidding is used.

Mr. Chairman, the timber producers of the South feel that the West should be allowed to continue its historically

established and proved practice of open or oral bidding. Sealed bidding is appropriate for our part of the country, but open bidding is more appropriate for the West, and I urge my colleagues to support the amendment in the nature of a substitute to be offered by the gentleman from Washington (Mr. FOLEY).

Mr. WEAVER. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. PANETTA).

Mr. PANETTA. Mr. Chairman, the simple issue that is before us is the repeal of the law that is presently on the books and has only been on the books for 14 months. The issue really is whether this body wants to do anything about collusion that takes place in the sale of timber in our national forest areas. It is not my judgment that collusion exists. It is the judgment of the Department of Justice, in testimony and letters presented to the committee. Indeed, since 1960, the Department of Justice has investigated collusion in 10 areas and has brought criminal cases, and convictions have been rendered. What led to the passage of 14(e) was the fact that collusion did exist in the sale of timber. Subsection 14(e) is a flexible law. It gives the Secretary the discretion to decide whether sealed bidding should be used and whether oral bidding should be used. In fact, regulations were issued under this law only in June 1977 and in the issuance of those regulations, 25 percent of the dependent communities were required to have sealed bidding; 75 percent were allowed oral bidding. So what are we arguing about? The flexibility is here under the law. The Secretary of Agriculture says give us a chance to have this law work. That is all we are asking for. Let us see if this deals with the problem of collusion. Let us not proceed to repeal a law which has not had a chance to work and try to deal with the problem and the possibility of collusion. Let us not repeal 14(e).

Mr. WEAVER. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois (Mr. SIMON).

Mr. SIMON. Mr. Chairman, I am proud of our colleague, the gentleman from California (Mr. KREBS) for standing up on this issue in the public interest. I hear a lot of Fourth of July speeches about the free enterprise system. Let us make it competitive. Let us have the sealed bids. The experience in 14 months is that we get 25 percent more money for the public. That is what this is all about—whether that 25 percent goes to the public or whether it goes to a few lumber giants. I think our stand clearly ought to be for the public.

There is a Senator from Minnesota, MURIEL HUMPHREY, who was sworn in today over on the Senate side. Her husband worked hard in this area, and let me quote a couple of sentences from Hubert Humphrey:

> I am concerned that changing this law would give a small number of lumber giants the opportunity to engage in bidding practices which would possibly give them timber at a cost lower than would occur with sealed bidding. In fact, statistics support this concern.
>
> Now, this does not mean that oral bidding cannot take place. In fact, just the opposite is true. Oral bidding can and will take place when and where the Forest Service believes it is necessary to preserve the economic viability of local communities.

I have heard no one complain to my colleague, the gentleman from California, when he said that in 14 months not a single community has been hurt and not one single mill has been shut down because we have had genuine, competitive bidding.

Mr. SYMMS. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I will be pleased to yield to my friend, the gentleman from Idaho, who believes in the free enterprise system. I have heard him talk a great deal about that on this floor.

Mr. SYMMS. Mr. Chairman, I thank the gentleman very much for yielding.

I just wish to ask the gentleman this: Do they not sell cattle in Illinois by auction, through oral auctions? I always thought that was free enterprise.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. SIMON) has expired.

Mr. WEAVER. Mr. Chairman, I yield 2 minutes to the gentleman from Oregon (Mr. ULLMAN).

Mr. ULLMAN. Mr. Chairman, let me say that the talk of lumber giants being benefited by open bidding is just simply the furthest thing from the truth. The people who are going to be out of business are the little lumber mills that operate in an area totally surrounded by national forests. They are in areas where they are totally dependent upon national forests.

What can happen here is that the giants can come in from across the mountain and in a sealed bid take all of the timber out from under the local mills and leave them totally without a lumber supply. Community stability is at stake.

We should remember that under procedures in the Foley substitute there is an appraisal made of the timber in the sale. This appraisal determines the market value as determined by comparable sales. That is where they start. They do not sell this timber below this appraised valuation. So we should not believe this argument that somebody is going to come in and buy timber at less than market valuation.

After the appraisal is made, sealed bids are called for followed by an oral auction. This is what allows the local mills to stay in business. They can bid the price up and get the sales they need to stay in business.

I urge support of the Foley substitute.

Mr. JOHNSON of Colorado. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, I had not intended to participate in this debate at this time because I know that the gentleman from Washington (Mr. FOLEY) is going to offer a substitute which most of us will endorse. But there have been some questions raised, and I suppose because of the interest of the Members who have raised them, we should answer them here in this debate. Obviously the gentleman from California (Mr. KREBS), the gentleman from California (Mr. PANETTA), and the gentleman from Illinois (Mr. SIMON) would like to hear the answers.

I yielded to the gentleman from Texas (Mr. BROOKS) because he could not get time on his own side to try to give his point of view. These points of view that have been presented, as I see them, are not correct, and they should be answered.

I come from an area in Colorado where there are located three small timber mills, and we are not really very much affected by this particular situation. I am the ranking member of this subcommittee, however, and I feel that I have some knowledge that has not been expressed here today. I feel that the expressions that have been given lead to wrong impressions. They could leave one with the wrong conclusion even if we listen very carefully to the opposite views already given.

Therefore, I would like to spend just a little time, if I might, in discussing where 14(e) came from and what it was originally intended to do and how, as a result of the misinterpretation of the Forest Service and their twisting of the original language, we now find ourselves in a dilemma.

It was never intended that there would be a sealed bidding method used in totality. At the time that we passed 14(e) we thought we were going to stay with the oral auction method in most cases. Because the gentleman from California (Mr. KREBS) was concerned about the one incident in which they had a conviction of collusion under the oral auction system—that system has been going on for 17 years in the West, and they had one conviction—he felt because he was familiar with that particular circumstance that something should be done about it.

All of us, of course, would not favor collusion. Everybody is obviously opposed to collusion, so we did incorporate the language of section 14(e). The Forest Service at the conference committee assured us that they would not go to 100-percent sealed bidding. They were going to stay with the oral auction system.

After we passed the bill, lo and behold, they decided there was going to be 100 percent sealed bidding. That was their interpretation, that there had to be, under section 14(e) 100 percent sealed bidding.

The gentleman from Oregon (Mr. WEAVER) and I reminded them of the previous situation, so they have modified it so that now it only requires 25 percent.

They have vacillated all over the lot, and they really have not paid too much attention to the legitimate requirements of the people in the Northwest.

Mr. Chairman, I have been asking for some time about the question of collusion. There is one gentleman who no longer is with the Justice Department who has written a letter saying that it is easier to collude under the oral auction method than it is under the sealed bidding method.

When I ask them, "Why?", they just say, "Just because it is."

Will you please tell me the difference. If we really have a group of people who want to collude, can they not collude just as easily with one system as they can with the other?

The Chief of the Forest Service says that he cannot see any difference. I ask you if you can see any real difference in the methods. Why is it that one can, all of a sudden, collude more easily under the oral auction system than he can under the sealed bidding system?

Mr. DUNCAN of Oregon. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Colorado. I yield to the gentleman from Oregon.

Mr. DUNCAN of Oregon. Mr. Chairman, I want to join in supporting the gentleman's argument. I think it is very profound.

I would like to ask the gentleman if it is not true that some of the great antitrust cases were based upon collusive bidding. For example, out in our State, I can recall millions of dollars being recovered by school districts because of collusion in the sale of athletic equipment, every one of them under a sealed bid.

Asphalt manufacturing was another big case. All of those asphalt bids were under seal.

Mr. JOHNSON of Colorado. Municipal bonds also.

Mr. DUNCAN of Oregon. Municipal bonds also. The assumption that there is not going to be any collusion under sealed bidding is a fallacious one. Nobody wants collusive bidding.

Is it not true that the Senate bill that will be offered as a substitute contains specific instructions to the Secretary of Agriculture to prevent collusion and to use whatever bidding system might be suitable to prevent it? Is that not right?

Mr. JOHNSON of Colorado. The gentleman is absolutely correct.

Mr. DUNCAN of Oregon. All we are really doing is removing the mandate.

Mr. JOHNSON of Colorado. The gentleman is correct.

The CHAIRMAN. The time of the gentleman from Colorado (Mr. JOHNSON) has expired.

(By unanimous consent, Mr. JOHNSON of Colorado was allowed to proceed for 3 additional minutes.)

Mr. RYAN. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Colorado. I am glad to yield to the gentleman from California.

Mr. RYAN. Mr. Chairman, I am not from the Northwest, but I am from the West, as the gentleman knows. I come from San Francisco, from the suburbs, which do not have any big timber lands. There are none in my district. They do not have much of anything except for a few eucalyptus trees that surround the Golden Gate National Cemetery. Some of them were blown down a few weeks ago.

Mr. JOHNSON of Colorado. I know about that.

Mr. RYAN. We are trying to get a little subsidy there on the east bank for some dead trees which are causing some problems. However, I am not here to argue that matter.

I am interested in supporting the bill we have here. I am interested in the fact that almost all the Members from Oregon, Washington, Colorado, and up in that area are in support of this legislation.

I am interested in the fact that one of the most distinguished of our colleagues on this floor, the gentleman from Oregon (Mr. AL ULLMAN), speaks eloquently in favor of the small town and the small bidder who will be or is economically affected by this legislation.

I can sympathize with that position, but then I listened to the chairman of the full Committee on Government Operations, who has a long reputation in this Chamber for pursuing relentlessly the best value for the consumers, that is, the taxpayer's dollar, on this floor. He yields to no one in his capacity to be successful in doing that.

The gentleman from Texas (Mr. BROOKS) is opposed to it. Why is the gentleman opposed to it? Because the gentleman says it would cost the taxpayers more money. I have heard no one challenge that fact here on the floor.

Mr. JOHNSON of Colorado. I intend to get into that later.

Mr. RYAN. That will be fine, and I wish the gentleman would do that.

The $116 million, if the figure is correct, is a significant factor as far as I am concerned because I am for the taxpayers because that is also me in South San Francisco and in Burlingame and other areas where other taxpayers reside. Of course, as taxpayers we have a certain sympathy for the small towns in Oregon because those small ones cannot be as efficient as the giant corporate interests and they can submit lower sealed bids.

Is not the purpose of using the system of sealed bids because you only get one shot at it in a sealed bid? And therefore you will get to the point where there is intense competition and where there is intense competition then there is a lower one-shot bid which is lower than you are going to get if people begin to mill around—and that is not a play on words—in a particular area where there is going to be a contract let, and so the bidding itself begins at a much higher level than it would otherwise?

The CHAIRMAN. The time of the gentleman has expired.

Mr. JOHNSON of Colorado. Mr. Chairman, I yield myself 3 additional minutes. I trust the gentleman can finish his question soon.

Mr. RYAN. If the gentleman will yield still further, in other words, is it not going to allow for a higher low bid if we go to open bidding than under the sealed bidding system, under the previous system?

Then finally, why the sudden change after 14 months of an operation? Why do we go back to what it was? What has happened?

Mr. JOHNSON of Colorado. Mr. Chairman, to answer the gentleman's last question first, I have tried to explain earlier the interpretation that the Forest Service has placed upon section 14(e) is not what those of us who drafted the language expected it would be, so we do not have the result that we had in mind when we passed the Timber Management Act of 1976.

You will have to discern for yourself the difference in collusion and the possibility of collusion between the oral auction system and the sealed bid system, and I submit that there is not that much difference, and that either way you can get cheating if they want to do so. The fact is the Forest Service agrees with that. Only one person in the Justice Department has ever contradicted that, and we tend to rely on him too much, I think.

With reference to the amount that has been paid in, which the gentleman from Texas (Mr. BROOKS) has raised, I can tell you that there has been an increased amount of money that has come into the system, which the gentleman has acknowledged. The Forest Service says they are not yet sure whether this is because of the shift in methods because it has been only a short period of time that it has been in use.

I submit to the gentleman, and I will give the gentleman the argument, that there may be an increased amount of money under the sealed bid method. I do not accept that myself, but I will give it to you, just for the purpose of argument at this point because you wind up at the same place eventually.

You are talking about money that comes into the Federal Treasury, that is in terms of Federal income a very small amount of money, but it raises costs of doing business by the smaller timber operator and he will have to pass it on to his customer. The amount of money that comes to the Federal Government is relatively negligible under this system but the costs incurred by the small timber operator are significant as far as they are concerned. It is going to mean increased costs for them, so you will have to rely more and more on the large timber operators.

Mr. SYMMS. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Colorado. I will yield to the gentleman from Idaho (Mr. SYMMS) and the other gentleman in just a moment.

The gentleman from Oregon (Mr. ULLMAN) made the point that this is a small timber operator's bill. That is exactly right.

I do not want to get too personal on this, but none of the large timber companies have an interest in this bill, Weyerhaeuser, International Paper, Georgia Pacific, Louisiana Pacific, St. Regis, they do not have an interest in this bill because they harvest from private lands.

The companies that are interested in this are the small timber operators—not the large ones but the small ones. The gentleman from Oregon (Mr. ULLMAN) has made that point, and I just want to emphasize it.

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Colorado. Now I will be glad to yield to the phalanx facing me, and I yield to the gentleman from Texas.

Mr. BROOKS. I thank the gentleman for yielding.

I would say if the large timber operators are not involved in this, then the little ones have nothing to fear from each other.

Mr. JOHNSON of Colorado. That is not correct, and that is because the gentleman does not understand the problem they have out there.

Mr. BROOKS. Let me give the gentleman one answer to his question about collusion. I did not say that collusion would be eliminated by the sealed bidding. Everybody understands that one can rig the sealed bids rather handily if you have a good working understanding with the participants. But what the Department of Justice is indicating is that they feel that it is much easier to have collusive bidding in oral bidding, and I will tell the gentleman how. All you have to do when you have oral bidding is if the gentleman is leasing his trucks from me, and he is bidding against me, and I bid so much a thousand for that timber stand—and the gentleman is leasing his trucks from me—and I am just looking at the gentleman, and I like him; he is a fine, able, intelligent, articulate, hard working gentleman.

Mr. JOHNSON of Colorado. The gentleman is going to persuade me.

Mr. BROOKS. The gentleman will be leasing trucks from somebody else tomorrow maybe if he bids against me. That is what happens in oral bidding. It is not a matter of a fixed operation; it is just the intuitive pressure that you put on people. You do not have to tell them. If you have to tell them, you are in grade school. You just visit with them, and they understand. People with thievery in their hearts do not have to lay out the plan. They understand instinctively.

Mr. JOHNSON of Colorado. Mr. Chairman, I take back my time and deny that is what has happened. That is not what has happened. The testimony and the experience on the bidding in the West is contrary to what the gentleman just said. I would like to point out that what has actually happened in the West is that this oral bidding system has been what has allowed the smaller timber operator to maintain his operation. They have to have enough in the way of timber contracts so that they can plan their future operations. The only way they can contract is when they know that they can get the contract by oral bidding, and those people in the local areas will bid whatever is necessary to get the timber contract necessary.

Mr. AuCOIN. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Colorado I yield to the gentleman from Oregon.

Mr. AuCOIN. I appreciate the gentleman's yielding. I want to associate myself with the many points the gentleman has made today, and particularly the one that answered the assertion that the supposed increase in revenues from the sealed bidding method plays to the public interest. I think the gentleman makes the absolutely unassailable point, the one I can identify with, serving as I do as chairman of the cost of housing task force of the Housing Subcommittee, that any increase that is gained by that method is going to be passed along in component costs of housing, in lumber prices that go into the manufacture of every house built in this country that uses Federal timber. To say that contributing to the escalating cost of housing—already running 30 percent higher than the rise in general prices—is a help to the consumer is astounding to me. I think the gentleman makes a very good point, and I want to commend the gentleman.

Mr. JOHNSON of Colorado. I thank the gentleman.

Mr. SYMMS. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Colorado. I yield to the gentleman from Idaho.

Mr. SYMMS. I thank the gentleman for yielding.

I would like to make the point that the reason we want to act on this now is we do not want to wait until these mills are closing. I think that the gentleman from California (Mr. RYAN) brought the question up. I see this as a bigger concentration of big companies if the bidding procedure is not corrected, so the exact opposite of what the gentleman from California (Mr. KREBS) is afraid will happen will happen.

I would like to point to today's Wall Street Journal on page 8:

Stiff Penalties For Price Fixing Levied by Court

Eight Electric Device Firms, 11 Officers Get Big Fines, Prison Terms, No Parole.

Most of this business, as I understand it, was done through written or sealed bids; it was not done through oral options, and I would like to make the point.

I would like to substantiate what the gentleman from Oregon (Mr. ULLMAN) said about the small towns. For example, in my district the town of Princeton, Idaho, has one sawmill. It is the primary employer of everyone who works and lives in the town. They do not have large stands of privately held timber, so they have to buy timber from either the State of Idaho or the Federal Government—primarily the Federal Government.

Presently our State timberlands are being overcut to offset the restriction of Federal timber, but the dislocation and disruption in the towns is unbelievable because of the fact that people are wondering whether this small lumber company will get a bid. There are companies like the Weyerhauser and the Louisiana Pacific Co., and Georgia Pacific, who own or have large tracts of timber who are not as concerned about whether they get a particular bid or not to keep a mill open. It is the small company that is hurt in this, and that is why the gentleman from Colorado so correctly stated that the real interest in this is from the small lumber companies who do not own large stands of private timber and also from some large companies that do not have the timber.

Mr. JOHNSON of Colorado. The gentleman has made the point that I as one who comes from an area not as vitally involved has listened to the testimony and the evidence and reached that conclusion. The gentleman has stated it very well.

Mr. MARLENEE. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Colorado. I yield to the gentleman from Montana.

Mr. Chairman, I address a question to the gentleman from California about the question he raised, and I will tell the Members what has happened. The mills are closed. The Forest Service has been unyielding in its position on oral and sealed bids despite the fact that 25 percent were supposed to be sealed bids and 75 percent were supposed to be oral bids. There have been no bids left in Montana in the past 14 months. The gentleman is correct. It is a question of giants, of whether the giants control the timber industry and whether they get all the timber or whether some of the smaller mills have the opportunity to raise the bid one last time to get enough timber to keep themselves in operation, and when only the giants are left then we will see collusion in the timber industry.

I have one other point I would like to make: I would ask the gentlemen, my colleagues: Have they ever seen collusion at an auction sale?

Mr. KREBS. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Colorado. I yield to the gentleman from California.

Mr. KREBS. Mr. Chairman, I thank the gentleman from Colorado for yielding.

Mr. Chairman, first of all I think the gentleman in the well has stated that he was concerned only about one conviction, but I was concerned about a pattern existing in California, Washington, and Oregon.

Mr. JOHNSON of Colorado. The gentleman will acknowledge there was only one conviction.

Mr. KREBS. But there were six other grand jury investigations.

Mr. JOHNSON of Colorado. But there was only one conviction.

Mr. KREBS. But there were six other cases investigated by the grand jury.

Mr. JOHNSON of Colorado. But we are still faced with only one conviction.

Mr. KREBS. And six grand jury investigations.

The gentleman also correctly stated that promulgations by the Secretary of Agriculture involved 100 percent sealed bidding.

Mr. JOHNSON of Colorado. As they originally came out, they did.

Mr. KREBS. But that is what we have now. Since June 2 of last year we have only 25 percent sealed bidding.

Mr. JOHNSON of Colorado. That is correct. But if the gentleman will acknowledge, there is nothing to prevent the Forest Service going back to 100 percent sealed bidding. They flip-flop back and forth, so we do not know what they will ever do.

Mr. KREBS. Let me go back to the gentleman from Montana. I am a little curious about the position he has taken,

because I have a letter from Earl B. Salmonson, chief of the Forest Management Bureau, Division of Forestry, of the State of Montana. Does the gentleman know the State of Montana since 1925 has been using sealed bidding exclusively in the sale of its timber from its State-owned forests? More than that, let me read this to the gentleman:

> We have not had inquiries or requests to have oral auction bids, and to my knowledeg, there has been no effort to get the law changed to permit oral auction on State timber sales.

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Colorado. I yield to the gentleman from Illinois.

Mr. SIMON. Mr. Chairman, I thank the gentleman for yielding. I shall try to be brief.

Mr. Chairman, I have heard two fundamental arguments for moving ahead with this legislation. One is that oral bidding is just as effective and the second argument is that sealed bidding is going to drive prices up on housing. Obviously there is a slight contradiction. And if my friend, the gentleman from Colorado and my friend, the gentleman from Oregon—and I have great respect for both of them—are correct that sealed bidding sends prices up and therefore costs of lumber, then that is going to be passed on to the consumers, but by that argument we ought to give this lumber away, that is the timber on the public land.

Mr. JOHNSON of Colorado. It might not be a bad idea.

Mr. SIMON. I do not advocate that for a number of reasons. But I think our colleague, the gentleman from California (Mr. KREBS), has hit a right note and I certainly support him in this.

Mr. WEAVER. Mr. Chairman, I yield 2 minutes to the gentleman from Washington (Mr. BONKER).

Mr. BONKER. Mr. Chairman, I rise in support of the legislation.

Mr. Chairman, reduced to its simplest terms, we have here an issue in which the Justice Department has taken the attitude that "we haven't been very successful in convicting people for collusive bidding on Federal timber, so let's support legislation to take it out on those smaller firms who might want to cheat."

There are a few simple facts about lumbering in the Northwest which are central to this issue:

Smaller firms are nearly totally dependent upon a local supply of public timber. Loss of that supply threatens the survival of smaller firms. Smaller firms already face increased competition for a supply of public logs which is not keeping pace with demand. One of the reasons is that larger firms can export their own logs to Japan and turn around and compete for Federal timber to process in their mills. Oral auction is the means by which smaller mills can assure themselves a supply of logs.

What is amazing to me is that the Justice Department seems to have taken that very dependency upon local timber supplies for small mills as a reason for putting even more of a squeeze on them. The Justice Department seems to oppose oral auction precisely because it does guarantee a local supply.

The Justice Department has stated:

> In the past, oral bidding has permitted timber buyers to dominate timber sales in certain areas . . . When timber sales are offered within that area, the company bids to whatever level is necessary to purchase the timber.

And that is precisely the point. That is the virtue of oral bidding if you are a small mill totally dependent upon a local supply or a particular sale. A thirsty man will pay a lot for a glass of water.

But the Justice Department treats that virtue as a vice by claiming that this practice dissuades other bidders from entering the auction. Surely that, to the extent it does occur, is not collusion—it is survival.

The Justice Department, for all the fuss about this issue, has managed one case in which it got some convictions, and lost the only other case it got through a grand jury. This one case and a string of hypotheticals constitute the Justice Department case against oral auction.

The other argument raised against oral auction is that it returns less money to the Federal Government than does sealed bidding. Even though the Forest Service maintains that the data is still inconclusive on this point, even if true, is that any reason to drive another nail in the coffin of small mills? Many other Government programs, including the small business set-asides, recognize the national interest in maintaining the viability of small mills. I doubt that obtaining a few more dollars for the Treasury outweighs the survival of independent mills.

There is no better way to guarantee a tightly knit forest products industry dominated by a few giants than to prevent oral auction where it has historically been used. And I might add that the Justice Department record in price-fixing cases involving an industry dominated by a few giants is not so hot. In the long run, both the Treasury and the consumer—not to mention many smaller communities in the Northwest—will be the losers.

I hope it is unnecessary to add that this legislation is not an invitation to collusive bidding. When a smaller mill engages in illegal bidding—whether by sealed bid or oral bid—it should suffer the consequences, and this modification of the Forest Practices Management Act retains full authority to monitor bidding and take whatever action is necessary to prevent collusive bidding. All this legislation does is remove the statutory presumption in favor of sealed bidding.

Mr. Chairman, I urge support of this legislation. The Justice Department will survive its passage and continue to prosecute cases of rigged bidding. More importantly, it will help the little guys of western forestry survive.

Mr. Chairman, most of us in the Northwest support this legislation for one very good reason, and that is because our areas are primarily dependent on timber and the wood products industry. And we also represent—most of us—very small mills, and we want to see those mills survive.

I know that in my particular area we have experienced, over the last 4 to 6 years, a rather frightening decline of the small mill and the small lumber operator. This is due, in part, to the export of Federal logs and the fact that our mills have to compete with Japanese industry; but it also represents, I think, a continuing threat to small industry regardless of what line of work they are in.

My friend from Illinois said that he could not name one mill that has closed in the last 14 months, since this legislation has been in effect. But I have here a list of 16 sawmills and 4 plywood plants that have closed down in 1977. Whether we can attribute this to the sealed bid requirement or because it is just a combination of factors which have impacted these small businesses, the fact still remains that we are experiencing an undue decline of the small lumber mill in the Northwest.

I would like also to point out that so long as we have sealed bids, we are going to maintain artificially high prices on the cost of timber. It is important to remember that the Department of Agriculture appraises the land and sets a minimum amount so that the Govermnent can protect its investment. The program also has built-in guarantees against lower bid prices, but if we maintain artificially high prices through the sealed bidding system then we risk passing on higher prices to the consumers.

Mr. WEAVER. Mr. Chairman, I yield 2 minutes to the gentleman from Kentucky (Mr. BRECKINRIDGE).

Mr. BRECKINRIDGE. Mr. Chairman, I think there is little to add to the debate at this point, except that I personally find our predicament rather anomalous. The often-referred to opinion of the Department of Justice is an opinion penned by Antitrust Assistant Attorney General, Mr. Donald Baker, a man who was hired by the previous administration and who expressed in that opinion his views to a Democratic administration.

I would also note that, in addition to the Department of Justice views as expressed by Mr. Baker, that, strangely enough, the Office of Management and Budget—which, if it does nothing else, concerns itself with the taxpayers' dollars—is opposed to the views being advanced on the other side today, as is Secretary Bergland who represents and speaks for the Department of Agriculture.

Let me address, from that opinion, one or two of the positions made here today. We all know that fraud is available to those who would perpetrate it. We also know that as a matter of national practice at the Federal, at the State, and at the local levels, that that formula calculated to subvert would-be-fraud is the sealed bid process. As Mr. Baker said, we believe this because each bidder has only one bid, and the bids of others are secret. Therefore, each bidder must bid at a level which corresponds to his interest at that sale. To implement a collusive

arrangement under a sealed bid, a bidder would have to arrange the amounts bid by every active bidder. We all recognize the fact that it can be done, it has been done, it will be done, and it will be prosecuted; but, again, it is much more difficult to arrange collusive practices in the case of sealed bid than in the case of oral bids.

Of the ongoing six investigations referred to here, each will be tolled by the action of this committee today in support of this legislation.

Mr. WEAVER. Mr. Chairman, I yield 2 minutes to the gentleman from Montana (Mr. BAUCUS).

Mr. BAUCUS. Mr. Chairman, I need not repeat all the arguments we have heard so eloquently stated by the gentleman from Colorado, the gentleman from Idaho and others, in favor of this bill, and in favor of the Foley substitute.

Let me give another perspective to the discussion here by pointing out that in my State, particularly in western Montana, 51 percent of our State's income is attributable to the forest products industry. During these last several years the land base that is available for timber production, particularly public lands, is diminishing due to the many pressures affecting the use of public lands.

There are mills, particularly our small mills in Montana, that are in a very precarious balance. The gentleman from California (Mr. KREBS) stated that no mills have gone out of business, because of sealed bidding. I can tell the gentleman from California that mills in Montana in the last year have closed. I do not know whether this is due to sealed bidding or not, but I can say this: the practice in Montana is predominantly oral and if we go to sealed bidding, the likelihood is greater that the mills will have to close.

The gentleman also states that the State of Montana prefers sealed bidding. I might say to the gentleman that that is because there is virtually no State land involved in timber sales. In my State only 2 percent of timber sales are involved in State timberlands, whereas 60 percent are involved in Federal forest lands.

It is the smaller operators, not the larger ones, but the smaller ones that are dependent on public land sales. The larger ones have the resources that the smaller ones do not have.

I can state that in my State of Montana it is the smaller operators that are in a precarious balance between either surviving or not surviving unless the bill and the Foley substitute pass.

For the most part, sealed bidding is not appropriate in the West, because it denies mills in local communities the opportunity to respond to outside competition for nearby timber. In my district, as well as many other areas of the West, the national forests are the only source of timber and individual Forest Service timber sales tend to be large. Failure to successfully obtain one or two critical sales can create an economic hardship on a local mill and on the community which the mill supports. Oral bidding is often the best way to insure a full opportunity for small local mill operators to compete for the timber.

The enactment of this legislation would allow the Forest Service to return to historic bidding methods—oral and sealed. The legislation contains a clear direction to the Secretary on his obligation to combat collusion.

It would authorize continuation of the present Forest Service system of monitoring timber sale bidding patterns and require that the Forest Service notify the Justice Department if collusion is suspected. It eliminates the apparent mandate in section 14(e) of the National Forest Management Act to use sealed bidding in all situations and restores flexibility to use whatever bidding methods are determined will insure open and fair competition. Authority is provided to alter bidding methods or take whatever action is appropriate in situations in which collusions are suspected.

Other major provisions of Chairman FOLEY's substitute are that the Secretary must insure that the Federal Government receive not less than the appraised fair market value for the sale and that in his choice of bidding methods he must give consideration to the economic stability of communities dependent upon national forest timber.

The small mills and timber producers in the West are dependent upon Federal timber sales. The passage of this bill would allow traditional timber sale practices. It will allow flexibility in order that bidding procedures might be adjusted to the unique situations existing in any particular timber market. I urge the passage of this bill.

Mr. WEAVER. Mr. Chairman, I yield the remaining time to the gentleman from Washington (Mr. FOLEY).

Mr. FOLEY. Mr. Chairman, we have heard some comments that this is a bill which is favored by and will benefit the large timber companies. This is not the case. This is a bill, if anything, that seeks relief for small independent timber companies. The largest timber company in the United States, and a very fine company, owns 6.5 million acres of its own land in the continental United States. It leases approximately another 6 million acres in Canada. It has approximately 1 million acres under lease in Indonesia. This totals 13.5 million acres. That timber company does not need this bill. It is not concerned with the problem of obtaining individual Federal timber sales in order to remain in business. But there are many, many small companies, in the Northwest particularly, which are dependent on the individual sales put up by the Forest Service and which need the protection of oral auction. From World War II until the enactment of the 1976 act those sales have been predominantly by oral auction. We are seeking to provide the Department the flexibility to return to this historical pattern.

The Members who have spoken against this bill and have cited the various objections to it will be relieved to know that I am going to offer a substitute which should take care of all the problems they have raised about the bill itself. That substitute contains language requiring among other points that—

"In the sale of trees, portions of trees, or forest products from National Forest System lands (hereinafter referred to in this subsection as 'national forest materials'), the Secretary of Agriculture shall select the bidding method or methods which—

"(A) insure open and fair competition;

"(B) insure that the Federal Government receive not less than the appraised value as required by subsection (a) of this section;

"(C) consider the economic stability of communities whose economies are dependent on such national forest materials, or achieve such other objectives as the Secretary deems necessary; and

"(D) are consistent with the objectives of this Act and other Federal statutes.

The Secretary shall select or alter the bidding method or methods as he determines necessary to achieve these objectives. . . .

It further requires that if the Secretary selects oral bidding, he shall require that all prospective purchasers submit written sealed qualifying bids. In other words, the only people who are able to engage in the oral auction are those people who first submit sealed bids at least equal to the appraised value of the timber.

The substitute further directs the Secretary to monitor bidding patterns involved in the sale of national forest materials, and if the Secretary has a reasonable belief that collusive bidding practices may be occurring, then he shall report any such instances of collusive bidding practices or suspected collusive bidding practices to the Attorney General of the United States with any and all supporting data.

In addition, the language provides him with the authority to alter the bidding methods used within the affected area and to take such other action as he deems necessary to eliminate such practices within the affected area.

Simply, what this substitute will do is put the responsibility clearly on the Secretary of Agriculture, who has the responsibility for managing our national forests, to insure an adequate return to the American people from timber sales, to take appropriate steps to insure that there is no collusive bidding, and to insure that the dependent communities have a reasonable opportunity to keep small mills in continued operation. This is in the interest, I should think, of everyone here in this room and of the American people.

I do not have any objection to large timber companies. They have no real interest in this legislation. But I do not want to see dozens of small mills whose existence is threatened because of a shrinking timber supply, be forced by sealed bid requirements to overbid or underbid sales. In either case, they stand to lose the opportunity to continue in business. In the first place, overbidding places them in a situation with a commodity for which they paid too high a price. Should the mill owner underbid, he may find himself without sufficient volume to continue the mill's operation.

This is a bill and a substitute designed to be fair to the small timber operation and to those dependent communities in which they operate. I think those who are familiar with the problem firsthand recognize what is happening to these small mills under sealed bidding procedures when the mill owner does not have an opportunity, as under oral auction, to bid higher in order to insure an adequate timber supply to keep his mill in operation. On the other hand, overbidding certainly does no good, particularly for the consumer.

I am asking for your support today for the substitute which I will offer when we go under the 5-minute rule.

The CHAIRMAN. The time of the gentleman from Washington (Mr. FOLEY) has expired.

Mr. JOHNSON of Colorado. Mr. Chairman, I yield an additional 3 minutes to the gentleman from Washington (Mr. FOLEY).

Mr. JONES of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Oklahoma.

Mr. JONES of Oklahoma. Mr. Chairman, I want to commend the gentleman from Washington (Mr. FOLEY).

Mr. Chairman, I rise in support of the amendment offered by my colleague from Washington (Mr. FOLEY).

I support the amendment offered today for several reasons. First, and foremost, however, I will vote for this amendment, because it does not create another Federal advisory commission.

I do not pretend to have been privy to the lengthy debates that were conducted in the gentleman from Oregon's (Mr. WEAVER) subcommittee, and I am thus unable to discuss the merits of this amendment from a factual basis. I would, however, like to say something about the policy implications of this amendment.

Mr. Chairman, the President has attempted to cut back on the uncontrolled growth of the Federal Government in many ways. He has personally abolished over 400 nonstatutory advisory commissions. He has asked Congress to follow suit and abolish 21 commissions created by law. It is ironic that legislation to abolish these commissions is being considered in one part of the Congress while the House debates the creation of yet another commission.

I wonder sometimes if our left hand knows what our right hand is doing, Mr. Chairman. I think some of my colleagues on the Agriculture Committee were correct when they argued that the appropriate advisory commission already exists in the Department of Agriculture to address the problem before us today. I think they were even more correct when they stated that such an investigatory function envisioned by this bill belongs to Congress, and not to such an advisory commission attached to the executive branch.

Certainly the $60,000 budgeted to the Advisory Commission on Timber Sales Procedure does not even rate a footnote in the budget of the United States. Sadly, that much money and more is probably lost everyday in the vast maze of Government. A more important question might concern the amount of money this Commission might influence. I am personally conducting an investigation into the disbursement of funds by advisory commissions, and some of my preliminary fears concern the possibility of a multitude of incestuous relationships between the various commissions and the corporations and educational institutions that supply the membership of these commissions. I have written all the Cabinet Secretaries and requested detailed information from them on the composition and role of the advisory commission in their departments, and I hope to make a further report to the House on this matter in the near future.

Nevertheless, if the House passes this bill without the amendment, the new members of this Commission will take their seats next to the members of the other 108 advisory commissions that report to the Department of Agriculture. For some of the new members, it will be a familiar routine, since they probably already serve on one or more advisory commissions. I have been told that it is a way of life for some people. For example, one person in a Government health agency serves on nine different advisory commissions, including the Advisory Commission to the Director of this agency. This assignment must be one of the easiest, since the gentleman in question is the Director, and he should not find it difficult to advise himself.

I am certain that supporters of the bill will point to the fact that this Advisory Commission is only designed to last for 2 years. I certainly support the concept of sunset legislation, and I am pleased to see the inclusion of such a provision in H.R. 6362. Nevertheless, I am troubled by the underlying assumption that any advisory Commission is necessary in this instance. I would remind my colleagues that sunset provisions are not an end in themselves, but rather a tool to use in cutting back the ever-expanding Government bureaucracy. If we can arrest such growth in its infancy, so much the better.

I hope my colleagues will join me in supporting this amendment. I think it is a fair proposal and one worthy of support.

Mr. FOLEY. Mr. Chairman, the Department has consistently opposed the provision of this bill which would create a new advisory commission. My substitute would eliminate that provision.

Mr. KREBS. Mr. Chairman, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from California for a question and not debate.

Mr. KREBS. I thank the gentleman for yielding.

Mr. Chairman, will the gentleman be kind enough to point out where his substitute does anything except to take us back to 1976, before the enactment of the sealed bidding requirement?

Mr. FOLEY. What the substitute does is to provide specific guidance to the Secretary of Agriculture with respect to monitoring timber sales. That language is identical to that which is in the present subsection in 14(e), which the gentleman knows was part of the 1976 National Forest Management Act. It is retained in the substitute. The language directs the Secretary to make decisions on forest products and to review timber bidding practices in order to insure, one, a fair return to the Government; two, competitive practices in the sale of timber; and three, recognition of the concerns of dependent communities. In addition, and as the House is aware, the Secretary must meet the valid requirements of other statutes governing the various issues involved.

Finally, the substitute requires the Secretary to alter bidding methods as he may choose to assure that collusive practices are prevented. He has greater flexibility under the substitute to determine bidding methods than he has under the act. He is not held to any particular method of bidding. He can do whatever he deems necessary—indeed he is ordered to do it—to eliminate collusive practices.

Mr. DUNCAN of Oregon. Mr. Chairman, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Oregon.

Mr. DUNCAN of Oregon. Mr. Chairman, is it not true that the gentleman's substitute requires initial qualified sealed bids, which would be the base from which the oral bidding would thereby proceed?

Mr. FOLEY. The gentleman is correct.

Mr. McCORMACK. Mr. Chairman, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Washington.

Mr. McCORMACK. Mr. Chairman, I would like to associate myself with the remarks of my colleague, the gentleman from Washington (Mr. FOLEY), and congratulate him on offering his substitute.

The gentleman and I come from eastern Washington, and I share with him the recognition of the legitimate needs of a number of small timber operators in my district. In the Fourth Congressional District last year one mill was closed down. I can not attribute the closure to the sealed bidding system, but the closure does show how near the economic edge many of these small operators live.

Mr. Chairman, I think the Foley substitute will help to remedy this problem, and I offer my support of it.

Mr. JOHNSON of California. Mr. Chairman, I take this opportunity to add my support to Congressman FOLEY's recommendation for corrective legislation on the sealed bidding provision of the National Forest Management Act of 1976, section 14(e).

It is my understanding that hearings had been held on the issue during consideration of the National Forest Management Act of 1976 and no evidence was presented that national forest timber purchasers may be engaging in collusion.

This provision, I understand, was adopted anyway, directing the Secretary

of Agriculture, in general, to use sealed bidding methods.

It was adopted in a most difficult conference in the closing hours of the last Congress, so it is proper that we reconsider it now.

In initially implementing this section, the Forest Service virtually eliminated oral auction bidding on national forest timber sales.

The final regulations, although an improvement, would require that up to 25 percent of national forest timber be sold under sealed bids, even in dependent community situations.

Even this threatens disastrous effects on many dependent communities in my district.

Oral auction bidding has been the normal bidding method in most parts of the West.

It has been found to be in the public interest because it allows timber purchasers to respond to bidding competition in an open and free manner.

In many areas there are no alternate sources of timber supply to local mills.

National forests are in a virtual monopoly position.

In many cases, every timber sale is so important to a local mill, that injecting uncertainty as to what must be bid to obtain the sale, as is done under sealed bidding, puts the operator in an extremely difficult position.

He may put in what he considers a very high bid for a timber sale critical to his operations, but if someone else bids a little higher, he loses the sale and may be forced to close his mill.

When timber is sold by oral auction, however, timber purchasers are able to make several consecutive bids until they get the purchase.

A sawmill operator who needs the timber to keep his plant in production can assure his supply by increasing his bid on the spot.

He may have to pay more than he had planned to pay, but he gets the timber in the end.

This is why oral bidding, rather than sealed bidding, is the traditional method of timber sales in the regions where there are many dependent sawmill towns.

The legislation that the Congressman from Washington (Mr. FOLEY) is proposing would return historic methods of sales of Federal timber.

Additionally, it will preserve the Forest Service's flexibility to require sealed bidding, in those situations where deemed appropriate.

This is not an environmental issue, was disclosed during debate on this bill in the other body.

The CHAIRMAN. All time has expired.

The Clerk will read.

The Clerk read as follows:

H.R. 6362

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

ESTABLISHMENT

SECTION 1. There is hereby established an Advisory Committee within the Department of Agriculture to be known as the Advisory Committee on Timber Sales Procedures (hereinafter referred to as the "Committee").

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. FOLEY

Mr. FOLEY. Mr. Chairman, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. FOLEY: Beginning at page 1, line 3, strike out everything after the enacting clause and insert in lieu thereof the following:

That section 14(e) of the National Forest Management Act of 1976 (90 Stat. 2959; 16 U.S.C. 472a(e)) is amended to read as follows:

"(e)(1) In the sale of trees, portions of trees, or forest products from National Forest System lands (hereinafter referred to in this subsection as 'national forest materials'), the Secretary of Agriculture shall select the bidding method or methods which—

"(A) insure open and fair competition;

"(B) insure that the Federal Government receive not less than the appraised value as required by subsection (a) of this section;

"(C) consider the economic stability of communities whose economies are dependent on such national forest materials, or achieve such other objectives as the Secretary deems necessary; and

"(D) are consistent with the objectives of this Act and other Federal statutes.

The Secretary shall select or alter the bidding method or methods as he determines necessary to achieve the objectives stated in clauses (A), (B), (C), and (D) of this paragraph.

"(2) In those instances when the Secretary selects oral auction as the bidding method for the sale of any national forest materials, he shall require that all prospective purchasers submit written sealed qualifying bids. Only prospective purchasers whose written sealed qualifying bids are equal to or in excess of the appraised value of such national forest materials may participate in the oral bidding process.

"(3) The Secretary shall monitor bidding patterns involved in the sale of national forest materials. If the Secretary has a reasonable belief that collusive bidding practices may be occurring, then—

"(A) he shall report any such instances of possible collusive bidding or suspected collusive bidding practices to the Attorney General of the United States with any and all supporting data;

"(B) he may alter the bidding methods used within the affected area; and

"(C) he shall take such other action as he deems necessary to eliminate such practices within the affected area."

Mr. FOLEY. Mr. Chairman, let me emphasize that my amendment in the nature of a substitute, which has just been read addresses, I believe, all the reasonable questions that might be raised concerning this legislation. It clearly mandates that the Secretary of Agriculture, in cooperation with the Attorney General of the United States, take whatever actions he deems appropriate in order to prevent any pattern of collusive bidding on national forest materials.

This point has been made before, but I want to reiterate it: There is no history that would indicate to any reasonable individual, in my judgment, that collusive bidding can only occur in oral auction sales.

Quite the contrary, the most dramatic of all of our antitrust cases over the years have been those involving sealed bidding. United States against Westinghouse, one of the great antitrust cases of the 1950's, involved large electric manufacturing companies. These cases involved sealed bidding under an elaborate bid-rigging system.

Federal Trade Commission against American Cyanamid was also a case involving sealed bidding. Other examples had been given here.

In any case, Mr. Chairman, under my substitute, the Secretary of Agriculture, will have a clear responsibility to monitor all Forest Service timber sale bidding practices in the United States. If he has any evidence that there may be collusive bidding, he is fully authorized to alter the bidding method, and he must report, with all supporting data, whatever information he has to the Attorney General of the United States, who is charged with the enforcement of the antitrust laws.

Furthermore, no one can participate in this oral auction unless the company has already submitted qualifying sealed bids at least equal to the appraised value of the timber. Therefore, under terms of the substitute, the Government will obtain at least reasonable market value for its timber.

The only thing that the substitute eliminates from existing law is the fixed requirement for sealed bidding in all sales except where the Secretary determines otherwise by regulation. My amendment provides the Secretary with the flexibility necessary to use the appropriate bidding method. He is required to monitor all timber sales and to report any evidence of collusion to the Department of Justice.

Therefore, Mr. Chairman, I would think that every Member of this House and of the committee could fully support this substitute.

Mr. AuCOIN. Mr. Chairman, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Oregon.

Mr. AuCOIN. Mr. Chairman, I thank the gentleman for yielding.

I want to ask the gentleman this question: Is it not the gentleman's intent, in offering this amendment, to restore the flexibility to the Department to return to the historical patterns of bid methods that were used prior to the enactment of the National Forest Management Act? Is that not the gentleman's intent in offering the amendment?

Mr. FOLEY. Yes. In addition we give the Secretary the authority to take whatever action he finds necessary in order to carry out the other mandates of the substitute, including taking steps to avoid collusive bidding and to report the same to the Attorney General.

Mr. AuCOIN. I thank the gentleman, Mr. Chairman.

Mr. WEAVER. Mr. Chairman, I rise in support of the substitute amendment.

Mr. Chairman, when I first introduced this bill—I believe about 1 year ago—I introduced it with the advisory committee in it because I felt that many questions remained unanswered in the sales of Forest Service timber now that a new situation had developed in the Pacific Northwest, which, in effect, left the For-

est Service as the monopoly seller to hundreds of smaller independent mills.

The exigencies of time, however, are such that I believe at this time the advisory committee is best deleted from the bill.

For this reason, Mr. Chairman, I strongly support the Foley substitute and urge its passage today.

I would like to comment that under the substitute strong language is kept to set up the Forest Service as a watchdog over all sales of timber, monitoring them closely for any suspicion of collusion or any unusual practice; and if they find such, to immediately turn over the data to the Attorney General for prosecution.

With respect to collusion, Mr. Chairman, as the chairman of the full Commitee on Agriculture has said, the most famous cases were under the sealed bidding system.

Collusion will now be most carefully policed under the substitute amendment we have before us.

I would like to point out one thing to those who are not completely familiar with the practice of bidding on national forests. First, all bidders must submit a sealed bid. All bidders must submit a sealed bid regardless of whether it is a sealed bid or an oral auction.

Once those sealed bids are in, the oral auction comes on top of that. So that we will have a sealed bid, and then an oral auction on top of the sealed bid. So the Government, the taxpayers, get it both ways. They have both bids, the sealed bid and the oral auction, and the mills have the privilege of the oral auction so they can bid as high as possible to secure the timber they need.

AMENDMENT OFFERED BY MR. KREBS TO THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. FOLEY

Mr. KREBS. Mr. Chairman, I offer an amendment to the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Mr. KREBS to the amendment in the nature of a substitute offered by Mr. FOLEY: Section 14(e) as contained in the matter proposed to be inserted by the amendment in the nature of a substitute is amended by adding at the end thereof the following:

"(4) The Secretary of Agriculture shall take such action as he may deem appropriate to obviate collusive practices in bidding for trees, portions of trees, or forest products from National Forest System lands, including but not limited to requiring sealed bidding on all sales except where the Secretary determines otherwise by regulation."

The matter proposed to be inserted by the amendment in the nature of a substitute is amended by striking out the quotation marks and the period immediately following section 14(e)(3)(C) as contained in such matter.

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. KREBS. I yield to the gentleman from Illinois.

Mr. SIMON. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

The CHAIRMAN. A quorum of the Committee of the Whole has not appeared.

The Chair announces that a regular quorum call will now commence.

Members who have not already responded under the noticed quorum call will have a minimum of 15 minutes to record their presence. The call will be taken by electronic device.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 38]

Ambro	Edwards, Okla.	Murphy, N.Y.
Anderson, Ill.	Flippo	Murphy, Pa.
Andrews, N.C.	Flood	Nix
Archer	Flynt	Pepper
Armstrong	Ford, Mich.	Quie

Edwards, Ala.	Mikva	
Edwards, Calif.	Murphy, Ill.	

Accordingly the Committee rose, and the Speaker pro tempore (Mr. WRIGHT) having assumed the chair, Mr. BREAUX, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill H.R. 6362, and finding itself without a quorum, he had directed the Members to record their presence by electronic device, whereupon 332 Members recorded their presence, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

The CHAIRMAN. The gentleman from California (Mr. KREBS) is recognized for 5 minutes in support of his amendment.

Mr. KREBS. I thank the Chair.

Mr. Chairman and members of the Committee, the legislation which prompted our presence here today started out with an innocuous title to create a commission to study timber sales.

Under this innocuous title what the proponents of this legislation were really after was to repeal a law that has been on the books for a mere 14 months. As a matter of fact, the timber industry had been after the repeal of the legislation to provide for sealed bidding even before the ink literally dried on the paper.

What we are here today to do is to consider a substitute to the bill which the proponents now realize really did not make much sense, namely, the formation of yet another commission. They have proposed the substitute amendment, which would do nothing more and nothing less than the initial bill was designed to do, namely, to repeal the present law.

What does the present law provide? The present law provides that the Secretary shall use sealed bidding, except as otherwise provided by regulation. The Secretary has provided a sealed and oral bid mixture to protect the communities that are totally dependent on timber supplies by providing that 75 percent of the sales be by oral bidding and 25 percent of the sales by sealed bidding.

This, however, has not been satisfactory to those who seek to repeal this law; and we have had a lot of statements about mills supposedly closing.

Mr. Chairman, I think it is rather significant that all of my colleagues who have told us about all these mills that are closing in the Northwest and in California have not been able to come up with a single example to which they can point to show that a particular mill was closed because of the use of sealed bidding.

On the contrary, I have a letter here dated January 23, 1978, from the chief forester, who has monitored these sales. He stated, flatly, that as of January 23, 1978, not a single mill had closed because of the use of sealed bidding.

Mr. Chairman, what I think some of my colleagues have not said is that mills have been closing in the Northwest and in California for years for any number of reasons, long before the legislation which they are now trying to repeal was put into effect.

There have been statements made that the cost of housing would soar if we used sealed bidding. The fact is that the cost of average housing in the United States today is $40,000, and the cost of the timber in that house is $1,200.

Mr. Chairman, I ask the Members, when was the last time that any Member remembers that the timber industry has ever shared their profits with them? Is anyone really naive enough to think that they are going to share the additional income with the American taxpayer?

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. KREBS. I yield to the gentleman from Illinois.

Mr. SIMON. Mr. Chairman, I ask the gentleman from California (Mr. KREBS), is it true that under this new rule which has been in effect the past 14 months, compensation to the Federal Government has increased about 25 percent?

Mr. KREBS. Mr. Chairman, let me respond to that question in this fashion: During the first 9 months that this law was in effect, the law that the timber industry is now trying to repeal, the proceeds from the sale or sales through sealed bidding exceeded those through oral bidding by $28 million which, I submit, is no puny sum.

Mr. SIMON. Percentagewise, it is approximately 25 percent, is that correct?

Mr. KREBS. That is correct.

Mr. SIMON. So, in a very real sense, what this House faces is a choice of whether that 25 percent will go to the timber companies or to the public, is that a fair summation of the issue?

Mr. KREBS. The gentleman from Illinois (Mr. SIMON) in his usual articulate way has put his finger exactly on the issue. That is the reason the lobbyists for the timber industry have been crawling all over Capitol Hill for the last 2 or 3 weeks, calling on Members two or three different times.

The substitute offered by the chairman, the gentleman from Washington (Mr. FOLEY), has no other purpose except to repeal the sealed bid provision. That is the reason I ask the Members to vote for my amendment and give the present law a chance to continue to function in the very beneficial manner in which it has functioned in the past.

So I urge an aye vote for my amendment.

Mr. FOLEY. Mr. Chairman, I rise in opposition to the amendment offered to the amendment in the nature of a substitute.

Mr. Chairman, for those Members who were not in the committee when the debate occurred earlier, I have offered an amendment in the nature of a substitute for the committee bill that requires the Secretary of Agriculture to use such bidding methods, sealed or oral, as in his judgment will produce a fair and equitable return to the Federal Government. It will require that, if the Secretary determines to use oral auction, first there must be qualifying sealed bids at or above the appraised price.

The amendment offered by the gentleman from California (Mr. KREBS) to my substitute—and I hesitate to use this word—might be called a cynical effort to gut the substitute. It simply goes back to the existing law. It does so in the guise of an amendment to the substitute. It does not seek to perfect the substitute; it seeks merely to go back to the existing law. Why have a substitute at all? This substitute is necessary because regulations issued by the Department implementing subsection 14(c) of the National Forest Management Act of 1976 relative to bidding practices for sales of national forest timber have created a problem with the small communities who are dependent upon the small timber operators. This is not a bill that helps the large timber companies. Indeed they can be completely indifferent to this bill because they have their own private lands and they are not dependent upon our national forest timber for operation of their mills.

This is a bill that is designed to try to give the smaller mills a chance of surviving. It will increase the opportunity for competition in the timber industry.

I would think that those Members who are interested in seeing small businesses survive and in seeing competitive conditions in our national forest bidding practices, would vote against this amendment to my substitute because its effect, if anything, would be to hurt small businesses. The amendment in the nature of a substitute which I have offered is designed to help small businesses.

The suggestion has been made that if we have higher bidding under sealed methods, above the appraised value of the national forest timber, that that helps the taxpayers. This is simply not the case because the timber companies simply pass the additional cost on to the consumer, thus forcing higher and higher building material prices. Those Members who think they are doing their constituents a favor by forcing higher bids for raw lumber, which will increase the cost of building materials at a time when costs are at a high level, do not really understand how this higher bidding for raw lumber from the national forests will impact on prices paid for finished wood products.

The proposed amendment to the substitute guts its intent. We have all seen that before, where people come out with a little amendment, a harmless little amendment to a substitute, the basic purpose of which is simply to reverse the whole process of the legislation. I submit to the Members that the substitute protects the interests of the public, requires the Secretary of Agriculture to avoid collusive bidding, gives him discretion to choose the appropriate bidding method, allows him the flexibility to alter bidding methods to avoid collusive bidding, and requires him to submit all data on collusive bidding practices to the Attorney General of the United States for prosecution under the antitrust laws. Nobody in this Chamber, I think, can take exception to what the substitute provides. It simply provides a chance for those small mills dependent on Federal lumber to bid in oral auction after they have already submitted a qualifying sealed bid. This gives them a chance to protect their own supply by meeting their competition face to face.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Arizona.

Mr. UDALL. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the substitute amendment containing the language of S. 1360 offered by the distinguished chairman of the Agriculture Committee.

I believe this represents a sensible way to reiterate and clarify congressional intent of the National Forest Management Act of 1976 by providing the Forest Service with clear guidelines by which to conduct timber sales while still providing the Secretary of Agriculture with ample flexibility to determine the most appropriate methods.

We have seen in the West in recent times severe economic problems caused by drought followed by torrential rains, followed by destructive floods, depressed farm prices, copper strikes and mine closings, and a general lack of employment opportunities in the many small, often isolated communities of this vast area. All this, of course, in spite of phenomenal growth of industrial development and population density in the Sun Belt. Still the impact of this growth is felt mainly around major metropolitan centers while outlying areas continue to suffer.

Unfortunately, this situation was exacerbated by overly-restrictive Forest Service bidding regulations which threatened the economic life of many small communities in the West which are totally dependent upon a timber industry supplied almost solely by national forest materials. To impose a new and different bidding system on a single community mill operator that encourages the outflow of available timber and does not allow him adequate supplies can result in a devastating ripple effect throughout the local economy. Even in the interest of increased competition, efficiency and uniform procedure, this action by the Forest Service does not seem quite fair.

Because of the diverse nature of the timber industry around the country, it made sense to adopt bidding methods best suited to local needs and customs, and historically this has been done. In the Southeast, for example, where most timber is privately grown and very little in volume obtained from public lands, sealed bidding works well. But an open bidding system works best for mill operators in remote areas close to national forests where steady supplies and reduced transportation costs can insure continued operations and sources of employment.

Mr. Chairman, let me say again that this is sensible legislation which addresses the problem of economic dislocation occurring in some areas, mostly in the Northwest, as a result of the newly established sealed bidding system. It also addresses the need to assure the Government a fair return for products of the public lands by setting a base price of appraised value above which bids would be accepted, beginning with sealed bids and allowing the highest bidders to then move into oral auction. Competition is preserved and the Secretary has the flexibility to select the most appropriate method to suit each region's needs.

Finally, we give the Secretary authority to watch closely for any hint of collusive or anticompetitive practices and to refer suspected cases to the Justice Department for investigation and possible prosecution.

I commend the chairman and the Agriculture Committee for accepting S. 1360 which, if adopted, will go a long way toward alleviating some of these problems which we have had in the West in recent months. I hope my colleagues will listen closely to the debate and approve the bill.

Mr. SISK. Mr. Chairman, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from California.

Mr. SISK. I thank the gentleman for yielding.

Mr. Chairman, I with some hesitancy rise because I am getting into a battle between some good friends of mine on

both sides. But let me say in all frankness that, representing as I have for the last 24 years a substantial block of national forest in California, that it is important that we adopt the Foley substitute and that we defeat the pending amendment. As I say, I always hesitate to step on anyone's toes, but having represented the central California area's Sierra National Forest and other adjacent forests, we have yet to have had any problem previously in connection with oral bidding.

Mr. BROOKS. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, the basic purpose of the amendment is simply to preserve the thrust of the law that the Congress enacted just 1 year ago. The law is working well. It is producing exactly the results it was intended to produce, that is, a greater return for the Government on the sale of the Nation's timber resources, and it is producing this result without disrupting the local communities economically dependent upon the national forest timber preserves. Time and time again we have proven that the best means for the Government to sell its property is through the sealed bid mechanism. This is the basic procedure used in the Federal Property Act for the disposal of the Government's surplus real and personal property. It is equally applicable in a sale of timber from our national forests. Only through sealed bids can we be reasonably sure that the Government gets the highest return and that all of the potential purchasers have a reasonable opportunity to participate. The sealed bidding mechanism unequestionably reduces the opportunity for collusion. A return to the action mechanism for sales at this time is simply to accommodate the special interests, the small but very powerful group of timber operators in a certain geographic area of the United States represented by some of the finest members that you and I know. There is no justification for this special treatment. Why should we put at a disadvantage every other timber producer in the United States?

I would urge the Congress to accept the amendment offered by the gentleman from California (Mr. KREBS) that will preserve the basic principle of obtaining sealed bids in the sale of national forest timber throughout the Nation.

Mr. PANETTA. Mr. Chairman, I move to strike the last word.

Mr. Chairman, let us make no mistake about the substitute. The substitute targets at and repeals a key section of 14(e) which requires and emphasizes the use of sealed bidding. That is the heart and soul of the substitute which is essentially again to repeal the 14(e). This law did not just fall out of the sky. There was reason for passage of 14(e), and the reason was contained very recently in a letter to the Committee on Agriculture and to the Secretary of Agriculture which stated that the Department of Justice was involved in 10 areas of investigation with respect to collusion in the sale of timber and the latter made this statement:

> It is noteworthy that each of these investigations has concerned an area where oral bidding was the predominant method of selling timber.

That is not my view. That is the view of of the Justice Department in these investigations. That is the reason why 14(e) was enacted. In June of this year, for the first time, regulations were issued to implement 14(e), and the Secretary of Agriculture has said:

> Let us have a chance to implement this law to see if it works.

As a matter of fact, in a letter to the chairman of the Committee on Agriculture, John White, the Deputy Secretary of Agriculture at that time said the following:

> With regard to the bidding question, revised regulations were issued on June 2, 1977. We believe these regulations provide adequate protection for dependent communities. After careful review of these regulations and questions raised on the effects of the regulations, we conclude it is not necessary or desirable to change the basic statute under which they were developed. We, therefore, oppose enactment of H.R. 6362 or Senate Act, S. 1360 . . .

That is essentially the substitute.

So make no mistake about it: The Department of Agriculture opposes this substitute and he concludes with these words:

> We need to gain experience in implementing the law and will review the regulations at the end of one year of usage. We are committed to a fair and workable implementation of the law.

The point is, let the department have the chance to implement these laws. We do not have any evidence that this law is going to have the impact on dependent communities that has been stated. Let us give this law the chance to operate. The Department of Agriculture is against the substitute, the Justice Department is against the substitute, and OMB is against the substitute. I think Congress as well should be against the substitute and for this amendment.

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I yield to the gentleman from Texas.

Mr. BROOKS. Mr. Chairman, it is the position of the gentleman then that the amendment by the gentleman then that the amendment by the gentleman from California (Mr. KREBS) is a desirable amendment and we should pass the amendment and continue the present way things are operating and give the Secretary of Agriculture and the President of the United States and the administration the opportunity to prove the workability of this law passed by the Congress less than a year ago?

Mr. PANETTA. The gentleman from Texas is correct. In effect what the amendment does is restore a key element of 14(e), which emphasizes sealed bidding.

Mr. FOLEY. If the gentleman will yield, Mr. Chairman, the only effect of the amendment to the substitute has just the same effect as defeating the bill; does it not?

Mr. PANETTA. The amendment to the substitute in effect will restore 14(e).

Mr. FOLEY. So as far as that is concerned, if one is going to vote for the amendment to the substitute, one might as well just vote against the bill. It is the same effect.

Mr. PANETTA. It makes sense to vote against the substitute, it makes sense to vote for the amendment and for the bill.

Mr. FOLEY. Then the gentleman will concede my point. I thank him for yielding.

Mr. DINGELL. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, with all respect for my friends from the Northwest and with great affection, I say I understand why they are doing this. If I had as much political pressure on me as they appear to have, I might possibly consider taking the same course.

The hard fact of the matter is that only a little over a year ago we passed legislation which said we would go to sealed bidding on Federal timber sales. Now all of a sudden, before the process has had a chance to commence working, comes forth the Agriculture Committee with a most curious piece of legislation which is directed at doing away with those sealed biddings.

Now, the interesting thing is, first of all, that everybody has found that the Federal Government, the taxpayers, and the people of this Nation who own all the timber get more for the timber when timber sales are done by sealed bidding. The Department of Justice has found that there is less opportunity for collusion.

As a matter of fact, in the investigations of collusion that are being engaged in by the Department of Justice they find that the collusive bidding took place in connection with, not sealed bidding, but with oral bidding. That is where the rascality was.

Now, there is something else that is to this that I think is important. Everyone has talked about how this is going to help the small timber operator. The Department of the Interior says they have found no evidence that this mechanism, the sealed bid, has caused or will cause—in a letter to Mr. KREBS—the closure of small mills and in the lumber industry.

Now, what is wrong with sealed bidding? We use sealed bidding in connection with defense procurement; we use sealed bidding in connection with disposal of Federal property; we use sealed bidding in connection with Government contracts. What do we find when we get away from sealed bidding? We find that when we get away from sealed bidding, we have a great opportunity for collusion, rascality, and deprivation of the public interest.

Mr. JOHNSON of Colorado. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from Colorado.

Mr. JOHNSON of Colorado. Is the gentleman aware that there has only been one conviction of collusion in 17 years? Only one?

Mr. DINGELL. I think that probably indicates that we probably need a little more law enforcement in that area. I think what we ought to understand is that in every instance where the Government deals with lots of money—and there is lots of money involved in this timber business——

Mr. JOHNSON of Colorado. Will the gentleman yield further?

Mr. DINGELL. I cannot yield to my good friend right now. I will in just a minute.

There is lots of money involved here, and lots of money attracts folks who like to get this Federal property on the cheap. In order to obviate that, in connection with Government contracts for the procurement or sale of goods and services, we have always found that the best way to keep honest men honest and keep temptation out of the path of rascals is to see to it that we use sealed bidding.

The bill as drawn is opposed by every Government agency. The amendment as drawn is supported by every Government agency. Give sealed bidding, which protects the taxpayers, a chance to be used, and let us support the Krebs amendment; then, let us pass the bill.

Mr. DUNCAN of Oregon. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I yield.

Mr. DUNCAN of Oregon. The gentleman speaks with a great deal of authority on the subject of political pressures that are brought from time to time.

Mr. DINGELL. I have been the subject of political pressure for many years.

Mr. DUNCAN of Oregon. I know the gentleman speaks from experience, and I would not challenge him on that. I would suggest, however, that if he had been in attendance at the debate that preceded the introduction of this amendment, he would understand that this question of rascality of which he speaks, again with not only authority, but with considerable eloquence——

Mr. DINGELL. I am glad the gentleman appreciates my eloquence.

Mr. DUNCAN of Oregon. I do, but I would just like to ask the Members of this House to take a look at the amendment. The question of collusive bidding is not involved here.

Mr. DINGELL. The gentleman is wrong. What is involved is the prevention of collusive bidding.

Mr. DUNCAN of Oregon. Exactly, and both sides I will give credit to. I will give credit to both sides as being opposed to collusive bidding. The error of the gentleman's argument is to assume that there will be no collusion under sealed bids, and there is under oral bids.

Mr. DINGELL. No. I do not yield further because the gentleman has made a point that really does need answering. If he had read the amendment he might find that it does not—

Mr. DUNCAN of Oregon. I have.

Mr. DINGELL. The fact of the matter is that the amendment also requires steps to be taken to obviate collusive bidding.

Mr. WAGGONNER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, as I understand the proposed amendment offered by my colleague from California (Mr. KREBS), and its effect, the Krebs amendment would destroy the proposed Foley substitute and make present law effective. It would amend the substitute to that extent.

Now, we all know that there is nothing sacrosanct about either the sealed bid or oral bids. We all know there are occasions when one will better serve the interests of this Government and the people who buy these forest products than would the other.

So there is nothing wrong with the Secretary having that discretionary authority. I find it somewhat amusing that those who were so much opposed during the consideration of the Outer Continental Shelf amendments last week when sealed bids were discussed to be so much for them today. Last week sealed bids were all bad on the Outer Continental Shelf, but they are good now in the instance of timber to the exclusion of anything else.

Let us give the Secretary the discretionary authority to use sealed bids or oral bids and he will have the maximum authority to prevent collusion and protect the taxpayers of this country.

Mr. Chairman, the Krebs amendment ought to be voted down. The Foley substitute ought to be approved.

Mr. RONCALIO. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the substitute and for the amendment.

Mr. Chairman, I shall use but 1 minute to state that in my opinion a vigilant Department of Agriculture with the Justice Department cooperating can find collusive bidding where it wishes to and where it desires to search for it. It can detect where two sets of books are kept by a timber company or a sawmiller to defraud the Government. That has been the case time and time again.

But where, in the arid West, you have a small town whose economic life blood depends on the lumber cut in an adjoining lumber yard there is nothing improper when you give to the local firm an immediate right to oral bidding practices after their sealed bid comes in. He can top his bid with a cash bid. I see nothing wrong with this.

Therefore, for the first time in my record, I will vote against my esteemed friend from California and stay with the committee.

Mr. FOLEY. Mr. Chairman, will the gentleman yield?

Mr. RONCALIO. I yield to my friend, the gentleman from Washington.

Mr. FOLEY. Mr. Chairman, will the gentleman agree that the substitute offers more flexibility to determine the variances in bidding practices to avoid collusive bidding and fraud than does the Krebs amendment?

Mr. RONCALIO. Yes; I agree with the gentleman.

Mr. WEAVER. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the amendment.

Mr. Chairman, I just simply want to say that I support the Foley substitute and oppose the Krebs amendment.

I would point out that understanding operating procedures, the Forest Service offers first sealed bids and then all options after that, so we have both under that practice.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. KREBS) to the amendment in the nature of a substitute offered by the gentleman from Washington (Mr. FOLEY).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. KREBS. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 136, noes 239, not voting 57, as follows:

[Roll No. 39]

The Clerk announced the following pairs:

Mr. Ambro with Mr. Shipley.
Mr. Cotter with Mr. Mahon.
Mr. Rostenkowski with Mr. Chappell.
Mrs. Burke of California with Mr. Anderson of Illinois.
Mr. Nix with Mr. Frey.
Mr. Biaggi with Mr. Edwards of Alabama.
Mr. Mann with Mr. Kemp.
Mr. Dent with Mr. Kindness.
Mr. Flood with Mr. Broyhill.
Mr. Eckhardt with Mr. Ruppe.
Mr. Reuss with Mr. Quie.
Mr. Pepper with Mr. Bob Wilson.
Mr. Diggs with Mr. Horton.
Mr. Weiss with Mr. Goodling.
Mr. Murphy of Illinois with Mr. Marks.
Mr. John Burton with Mr. Bauman.
Mr. Flynt with Mr. Wydler.
Mr. Burke of Massachusetts with Mr. Holland.
Mr. Zeferetti with Mr. Bingham.
Mr. Blouin with Mrs. Chisholm.
Mr. Le Fante with Mr. Santini.
Mr. Maguire with Mr. Charles H. Wilson of California.
Mr. Krueger with Mr. Broomfield.
Mr. Andrews of North Carolina with Mr. Murphy of Pennsylvania.
Mr. Rahall with Mr. Treen.
Mr. Hillis with Mrs. Heckler.
Mr. Jones of Tennessee with Mrs. Holt.
Mr. LaFalce with Mr. Dicks.

Mr. SKUBITZ and Mr. MARTIN changed their vote from "aye" to "no."

So the amendment to the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. KREBS TO THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. FOLEY

Mr. KREBS. Mr. Chairman, I offer an amendment to the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Mr. KREBS to the amendment in the nature of a substitute offered by Mr. FOLEY: Section 14(e)(2) as contained in the matter proposed to be inserted by the amendment in the nature of a substitute is amended by adding at the end thereof the following: "Bidding at any oral auction shall start at an amount which is not less than the amount of the highest written sealed qualifying bid.".

Mr. KREBS. Mr. Chairman, I believe this is a very simple amendment and one that I thought would be noncontroversial in nature. All it really does is to provide that, according to the amendment in the nature of a substitute offered by the distinguished chairman of the Committee on Agriculture, the gentleman from Washington (Mr. FOLEY), the bids on any oral sale would start with the sealed bid process. After the sealed bid process had been completed, it would then move on to an oral bid. What my amendment does to the amendment in the nature of a substitute is it requires that any oral bidding that follows sealed bidding would have to start from the highest sealed bid figure. Which seems to me, under the circumstances, in light of the fact that we have been told all afternoon that collusion is just as easy on the sealed bidding as in the oral bidding that the least we can do in this bill is to start with the highest sealed bid rather than starting from scratch again and going through the charade of the sealed bidding again.

I urge that the House support my amendment.

Mr. FOLEY. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from California (Mr. KREBS) to the amendment I have offered in the nature of a substitute.

The amendment offered by the gentleman from California (Mr. KREBS) is not necessary, because the procedure that the gentleman from California would incorporate into the law is the one that is already used in oral bidding.

Mr. Chairman, I would like to read to the Members from a letter I received in my office written to me as chairman of the Committee on Agriculture from John R. McGuire, Chief of the U.S. Forest Service:

WASHINGTON, D.C.,
February 6, 1978.

Hon. THOMAS S. FOLEY,
Chairman, Committee on Agriculture,
House of Representatives,
Washington, D.C.

DEAR MR. CHAIRMAN: This letter is in response to your request for clarification of procedures which are followed in conducting an oral auction for a timber sale.

Each advertisement for a sale to be sold by oral auction specifies that a sealed bid, accompanied by a bid deposit, will be required as a prerequisite for participation in the auction. In the conduct of an auction, the sealed bids are opened at the specified time. The presiding officer verifies that the sealed bids are complete and that the deposit with bid is in order. Once the qualified participants are determined, the oral bidding begins. No reductions of the prices bid on any item are permitted after a sealed bid has been opened. When the oral bidding is completed and a high bidder determined, the high bidder signs a second bid form confirming his final bid price.

Sincerely,

JOHN R. MCGUIRE,
Chief.

This is a totally unnecessary amendment. It has already been incorporated into the timber sales procedures of the Forest Service as it conducts oral auctions. In rejecting it, we will not prohibit bidding from starting at the highest point. That is already what occurs under Forest Service regulation. But adoption of this amendment would require the bill to go back to the Senate and thus cause unnecessary delay in its passage. I hope the members of the committee will reject it.

Mr. JOHNSON of Colorado. Mr. Chairman, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Colorado.

Mr. JOHNSON of Colorado. I just wanted to endorse what the chairman of the Committee on Agriculture has said, urge defeat of the Krebs amendment, and let us get on with passage of the Foley substitute.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. KREBS) to the amendment in the nature of a substitute offered by the gentleman from Washington (Mr. FOLEY).

The amendment to the amendment in the nature of a substitute was rejected.

The CHAIRMAN. The question is on the amendment in the nature of a substitute offered by the gentleman from Washington (Mr. FOLEY).

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. KREBS. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 295, noes 78, not voting 59, as follows:

[Roll No. 40]

Eckhardt	Moakley	

The Clerk announced the following pairs:

Mr. Ambro with Mr. Shipley.
Mr. Cotter with Mr. Mahon.
Mr. Rostenkowski with Mr. Chappell.
Mrs. Burke of California with Mr. Anderson of Illinois.
Mr. Nix with Mr. Frey.
Mr. Biaggi with Mr. Edwards of Alabama.
Mr. Mann with Mr. Bob Wilson.
Mr. Dent with Mrs. Holt.
Mr. Flood with Mr. Bauman.
Mr. Eckhardt with Mr. Ruppe.
Mr. Pepper with Mr. Treen.
Mr. Reuss with Mr. Wydler.
Mr. Weiss with Mr. Goodling.
Mr. Burke of Massachusetts with Mr. Quie.
Mr. Obey with Mr. Broyhill.
Mr. Moss with Mr. Hillis.
Mrs. Chisholm with Mr. Moakley.
Mr. Blouin with Mr. Charles H. Wilson of California.
Mr. Diggs with Mr. Broomfield.
Mr. Mitchell of Maryland with Mr. Marks.
Mr. Zeferetti with Mr. Santini.
Mr. Murphy of Illinois with Mr. John Burton.
Mr. Bingham with Mr. Andrews of North Carolina.
Mr. Flynt with Mrs. Heckler.
Mr. Maguire with Mr. Le Fante.
Mr. Murphy of Pennsylvania with Mr. Madigan.
Mr. LaFalce with Mr. Krueger.
Mr. Jones of Tennessee with Mr. Dicks.
Mr. Rahall with Mr. Holland.

Mr. HUGHES changed his vote from "aye" to "no."

Mr. THONE changed his vote from "no" to "aye."

So the amendment in the nature of a substitute was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. WRIGHT) having assumed the chair, Mr. BREAUX, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6362) to establish an Advisory Committee on Timber Sales Procedure appointed by the Secretary of Agriculture for the purposes of studying, and making recommendations with respect to, procedures by which timber is sold by the Forest Service, and to restore stability to the Forest Service timber sales program and provide an opportunity for congressional review, pursuant to House Resolution 974, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. HAGEDORN

Mr. HAGEDORN. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Mr. HAGEDORN. I am, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. HAGEDORN moves to recommit the bill H.R. 6362 to the Committee on Agriculture.

The SPEAKER pro tempore. Without objection, the previous question is ordered on a motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER pro tempore. The question is on the passage of the bill.

The bill was passed.

A motion to reconsider was laid on the table.

PARLIAMENTARY INQUIRY

Mr. FOLEY. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. FOLEY. Mr. Speaker, is it not correct that under the rule the next procedure will be to call up the Senate bill, which is identical in language with the substitute just adopted, and consider it in the House?

The SPEAKER pro tempore. The gentleman is correct. The gentleman has that option to so move.

Pursuant to the provisions of House Resolution 974, the Committee on Agriculture is discharged from the further consideration of the Senate bill (S. 1360) to amend section 14(e) of the National Forest Management Act of 1976.

The Clerk read the title of the Senate bill.

The Clerk read the Senate bill, as follows:

S. 1360

An Act to amend section 14(e) of the National Forest Management Act of 1976

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 14(e) of the National Forest Manage-

ment Act of 1976 (90 Stat. 2959; 16 U.S.C. 472a(e)) is amended to read as follows:

"(e)(1) In the sale of trees, portions of trees, or forest products from National Forest System lands (hereinafter referred to in this subsection as 'national forest materials'), the Secretary of Agriculture shall select the bidding method or methods which—

"(A) insure open and fair competition;

"(B) insure that the Federal Government receive not less than the appraised value as required by subsection (a) of this section;

"(C) consider the economic stability of communities whose economies are dependent on such national forest materials, or achieve such other objectives as the Secretary deems necessary; and

"(D) are consistent with the objectives of this Act and other Federal statutes.

The Secretary shall select or alter the bidding method or methods as he determines necessary to achieve the objectives stated in clauses (A), (B), (C), and (D) of this paragraph.

"(2) In those instances when the Secretary selects oral auction as the bidding method for the sale of any national forest materials, he shall require that all prospective purchasers submit written sealed qualifying bids. Only prospective purchasers whose written sealed qualifying bids are equal to or in excess of the appraised value of such national forest materials may participate in the oral bidding process.

"(3) The Secretary shall monitor bidding patterns involved in the sale of national forest materials. If the Secretary has a reasonable belief that collusive bidding practices may be occurring, then—

"(A) he shall report any such instances of possible collusive bidding or suspected collusive bidding practices to the Attorney General of the United States with any and all supporting data;

"(B) he may alter the bidding methods used within the affected area; and

"(C) he shall take such other action as he deems necessary to eliminate such practices within the affected area.".

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 6362) was laid on the table.

GENERAL LEAVE

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill S. 1360 just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H.R. 7766. An act to authorize the mayor of the District of Columbia to enter into an agreement with the U.S. Postal Service with respect to the use of certain public air space in the District of Columbia.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4544) entitled "An act to amend the Federal Coal Mine Health and Safety Act to improve the black lung benefits program established under such act, and for other purposes."

REMARKS OF THE HONORABLE CARROLL HUBBARD ON LEGISLATION TO CREATE AN INDEPENDENT FEDERAL CONSUMER PROTECTION AGENCY

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. HUBBARD. Mr. Speaker, tomorrow the House of Representatives is scheduled to consider H.R. 6805, the Consumer Protection Act. As one Member of Congress who has vigorously opposed the creation of yet another unwieldly Federal regulatory bureaucracy, as H.R. 6805 would, I want to share the following article appearing in the February 1978 addition of the Reader's Digest with my House colleagues. This timely article by Ralph Kinney Bennett is entitled "Consumer 'Protection' Consumers Don't Need." It is as follows:

The issues are clearly drawn. Supporters like Sen. Abraham Ribicoff (D., Conn.) say the legislation would "ensure that regulatory agencies take into consideration the views of consumers before making important decisions which have significant impact." Opponents echo the argument of Rep. Samuel Stratton (D., N.Y.) that this is no time "to create a whole new layer of bureaucracy to do essentially what existing federal agencies ought to be doing now."

After more than eight years of debate on Capitol Hill, a showdown is near on what many consumerists believe is the single most important piece of domestic legislation—creation of a tax-funded Office of Consumer Representation (OCR). They envision it as a grand watchdog that would intervene on behalf of consumers in the regulatory rulings and decisions of the federal government. It would serve as a countervailing force to regulatory agencies which, they contend, are captives of business and unresponsive to the consumer.

OCR's chief backer, Ralph Nader, originally envisioned the proposed agency as a "consumer strike agency" that would move throughout the federal regulatory system and "revolutionize" government. Over the years, efforts to make the concept more palatable for Congressional passage have perhaps made it less of a "strike agency." But they have not changed the basic thrust of the legislation, which would enable OCR to intervene in federal court against those agencies it felt were contravening the consumer interest. It could request those agencies to use their subpoena powers to extract sensitive, competitive information from businesses. Nader says this power is needed "to defend against corporate crime, against rapacious business practices." Moreover, supporters claim that the agency would have no greater power than any private party involved in regulatory matters.

To equate OCR with a private party is misleading. In a detailed analysis prepared for the Chamber of Commerce of the United States, regulatory-affairs attorney Mark Schultz notes: "OCR would have greater rights of judicial review of other federal decisions than any business entity. OCR has statutory authority to review any decision or action of government. No other public, private or governmental entity enjoys this same right."

In fact, it is precisely this power—unchanged through each form the bill has taken—that caused former Special Prosecutor Leon Jaworski to warn in April 1977 that a consumer agency "would be vested with authority so broad it could easily be turned to the political advantage of those who control it. There are no checks sufficient to harness that authority."

OCR's potential to disrupt normal dealings of various businesses and industries is awesome. An air-fare increase, duly deliberated and approved by the Civil Aeronautics Board, could be blocked by OCR and involved in litigation. Approval of a drug after lengthy study by the Food and Drug Administration might nonetheless be halted indefinitely by OCR. Banks, businesses, industries could be left in a state of apprehension and confusion by a single administering agency acting in the name of an undefined "interest."

Former Sen. Sam Ervin (D., N.C.), one of the nation's most respected authorities on constitutional law, warns that an OCR "would have all the rights of a regulatory agency, yet none of the responsibilities. It would have more power than real consumers ever dreamed of exercising."

OCR backers like Nader and Presidential consumer-affairs adviser Esther Peterson nevertheless continue to press for the agency's creation. Back in 1971, the 92nd Congress was just seizing consumerism as a solid voter issue when the House of Representatives passed a consumer-agency bill by an overwhelming vote of 344 to 44. In the 93rd Congress, the vote for an OCR was 293 to 94. When the 94th Congress voted on the measure in 1975, opposition in the House had grown to the point that it was barely approved, 208 to 199. Although the Senate had also passed the bill, certainty of a Presidential veto torpedoed it.

Last year, despite President Carter's strong support, the consumer-agency bill failed to reach the floor of either chamber for a vote. Clearly, many Congressmen who had previously voted for the measure had changed their minds. Rep. Patricia Schroeder (D. Colo.), one of the most ardent consumerists on Capitol Hill, questioned the need for an agency which, she says, "may satisfy the desires of a few consumer-advocate lawyers, but not necessarily the consumer." More than 400 newspapers across the country, including *The Wall Street Journal*, Chicago *Daily News*, *Washington Star*, Houston *Chronicle* and Boston *Herald American*, have editorialized against a consumer agency.

Late last year, the White House and consumerists amended the bill (changing the name from Agency for Consumer Protection to Office of Consumer Representation, but not changing the essential thrust of the agency as a powerful instrument for intervention). House leadership counted noses and found that this bill, too, could not pass. Rather than risk defeat in the waning days of the Congress, supporters promised to drive for passage early this session.

Why the dramatic legislative turnaround?

Polls have shown the public to be concerned over a broad range of consumer problems, but they also reflect a disillusionment with government as the potential solution, a disillusionment that seems to have been nourished by many consumer-oriented laws passed by Congress in the past decade. Enacted into law were dozens of new statutes from the Hazardous Substances Act to the Fair Labeling and Packaging Act, from the National Traffic and Motor Vehicle Safety Act to the Consumer Goods Pricing Act. A White House office of consumer affairs was enlarged and a Consumer Product Safety Commission was created to eliminate unsafe products from the marketplace. The country seemed to be embarking on a new era of assured quality and safety.

But the public quickly discovered that federal involvement on behalf of the consumer too often meant exasperating and expensive intrusion. One of the first ways this hit the public was through a piece of bureaucratic intervention called the ignition interlock. In the name of consumer safety, Americans could not start their new cars unless they fastened themselves into a harness of seat- and shoulder-belts. Congress was hit with a blizzard of angry mail and finally rescinded the law—but not before it had cost consumers $2.4 billion extra for their new cars.

But soon there was another well-meaning, ill-conceived rush to protect everybody from everything.

For example, when the Employe Retirement Income Security Act (ERISA) was passed to protect employe pensions, companies faced immense additional clerical work loads. A few companies estimated that costs of ERISA paperwork would exceed the amount of their annual contribution to their retirement plans. In 1975, the first full year under the law, ERISA regulations were a factor in 23 percent of the 4000 defined-benefit pension plans dropped. In 1976, 7300 plans were dropped and ERISA rules were a factor in 35 percent of them.

Well-meant regulations have often tended to disconcert consumers. Many people (those with arthritis, for instance) have found themselves frustrated by government-decreed child-proof caps on medicine bottles.* It is likely that many others would be frustrated by a new proposal that power lawnmowers be fitted with a device that would shut down the engine every time the machine came to a halt. Such a device could increase power-mower prices by as much as $100.

The cost of all this "protection" has been staggering. Washington University's Center for the Study of American Business estimates that federal regulation cost $65.5 billion in 1976; that's about $300 per citizen.

At the root of consumerism lies an elitist notion, say the opponents of the proposed OCR, that a third party knows better than either producer or consumer. Writing in the New York Times, Robert T. Quittmeyer, president of the Amstar Corporation, calls this "the arrogant desire to substitute some personal vision of order for the apparent disorder of the marketplace."

Consumerists insist that Office of Consumer Representation officials will have no difficulty in determining just what is in the consumer's interest. That interest, says Ralph Nader's organization, Public Citizen, is usually "apparent and uniform." But is it? Here are a few vexing policy areas in which OCR would have to decide, Solomon-like, the consumer interest.

The Food and Drug Administration wants saccharin banned on the ground it causes cancer in rats who ingest it in massive quantities. But what of the tens of millions of Americans, who, knowing this want saccharin to control their weight or because they suffer from diabetes?

Consumerists tend to favor continued federal controls of natural gas which keeps prices low. Some consumers benefit—at least in the short run. But what about those consumers who may get sharply limited amounts of gas because of price-induced shortages?

Dubious light is cast on OCR when one considers the important aspects of consumer interest that would not be covered, under the bill, because of political expediency.

As the price for organized labor's backing of the bill, OCR legislation exempts any intervention in matters regarding union agreements on labor disputes. Yet such agreements and disputes affect consumers through the higher product prices caused in part by wage hikes or long work stoppages, or through the sheer unavailability of, say, certain makes of cars during an auto strike.

Also exempted from OCR scrutiny would be a great many activities of the Department of Agriculture, virtually removing one of the prime consumer interests—food and food prices—from any consideration. License-renewal proceedings of radio and television broadcasting stations have also been exempted. In fact, at least 37 different exemptions were "sold" for support of a consumer agency. Says Sen. James Allen (D., Ala.): "This is evidence to me that those advocating further federal involvement want an official slot in government at any price. They are prepared to trade scope so they can get power."

Richard O. Simpson, former chairman of the Consumer Product Safety Commission, raises an interesting question: "If we accept the premise that federal agencies are not responsive to the interests of consumers, by what logic should we create another federal agency and expect thereby to correct the deficiency?"

If it votes to create an OCR, Congress will be going on record as unable to control the many agencies which it has set up over the years, unable to make them respond to the needs of the people—who are, after all, the consumers. And President Carter, who has proclaimed himself the nation's "top consumer advocate" has pledged his Administration to *reducing* the bureaucracy while making it more efficient and responsive.

Sen. Robert Dole (R., Kan.), one of those who once backed a consumer agency but now strongly opposes such legislation, says: "If reorganization to make government more responsive and efficient is a sincere concept, why then do we need a super-agency to police that government? I find the two concepts utterly inconsistent. We should follow the President's lead in putting our governmental house in order before we create an independent agency to do it for us."

*Bottles with ordinary caps can be obtained, on request, at pharmacies.

SOCIAL SECURITY REFINANCING ACT

(Mr. MIKVA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. MIKVA. Mr. Speaker, today we are announcing the introduction of the Social Security Refinancing Act, a bill which will substantially ease the burden of social security taxes on middle-income taxpayers while maintaining the financial integrity of the social security system and the commitment to senior citizens.

The primary purpose of the social security amendments adopted last year was to meet the urgent need of keeping the social security system solvent. In responding to that sense of urgency, it has become clear that last year's action also resulted in an intolerably burdensome payroll tax for middle-income taxpayers and for many businesses. The urgent task now is to seek alternatives for financing the social security system which we believe are incorporated in the bill we are introducing today.

In brief, this bill will reduce the payroll tax burden by almost one-third; make the social security system actuarially sound for the next 75 years; reestablish a 100 percent reserve fund to protect beneficiaries from inflation and recession; and, return the system to its original design as a retirement program.

The Social Security Refinancing Act accomplishes these goals by removing the Disability Insurance Trust Fund (DI) and the Hospital Insurance Trust fund (HI) (also known as the medicare program) from payroll tax financing. This change in financing would insure a payroll tax rate below the 1978 tax rate for the next 42 years. The magnitude of the change is so great that the new tax rate even in the year 2051 would be about the same as the scheduled tax rate for 1982.

These substantial tax cuts do not sacrifice actuarial integrity. Before the social security amendments were adopted last year, the old age and survivors trust—the largest social security program providing benefits to 33 million Americans—was expected to run out of funds in 1983. Passage of the amendments assured continuation of the program until 2030. The Social Security Refinancing Act, by comparison, puts the system on an actuarially sound basis with a substantial reserve fund until 2051. This guarantees all current social security retirement and survivor beneficiaries and all current social security taxpayers that their retirement benefits are secure well into the middle of the next century.

The use of a payroll tax solely to fund the old age and survivors trust is consistent with the original purpose of the social security system established in the 1930's. The DI program was not created until 1957, and HI was not added until 1965. Under the Social Security Refinancing Act, both of these funds would derive their contributions from general revenues. The change is an appropriate one: the supplementary medical insurance trust of medicare currently is funded primarily from general revenues, and 35 percent of all DI beneficiaries receive benefits from the Treasury financed supplemental security income (SSI) program.

Also, payroll tax financing is advisable only where benefits bear a relationship to earnings, as in a private pension plan. Neither medicare nor disability benefits bear the same nexus with earnings as retirement benefits.

Last year's social security amendments saved the system from impending collapse, and its beneficiaries from poverty and welfare. But those amendments also revealed the intolerable burden of the regressive payroll tax and its antiemployment bias. It is imperative that we now look to new financing methods for HI and DI. The new source of funding should be from general revenues.

For years, this source has been resisted because of a generalized fear that access to general revenues would eliminate Congress ability to resist interest groups clamoring for new and increased benefits. That argument is no longer persuasive. The experience of other western countries has been that the use of general revenues is possible without losing control. Moreover, the Congress now has the Budget Control Act which is a much more visible demonstration of Congress fiscal restraint than the payroll tax.

The Social Security Refinancing Act which we are introducing today is a concept, we believe, whose time has come.

It is not only consistent with easing the payroll tax burden of middle-income families and employers but is also consistent with the goal of an improved, stable economy.

Mr. Speaker, at this time we would like to include a chart showing the tax rates, wage base, and the contributions over the next year.

SOCIAL SECURITY WAGE BASE LEVELS, TAX RATES AND CONTRIBUTIONS UNDER PRIOR LAW (PL), CURRENT LAW (CL), AND THE SOCIAL SECURITY REFINANCING ACT (SSRA)

Year	Wage base		Tax rates			$10,000 wage earner			$15,000 wage earner			$20,000 wage earner		
	PL	CL SSRA	PL	CL	SSRA	PL	CL	SSRA	PL	CL	SSRA	PL	CL	SSRA
1979	$18,900	$22,900	6.05	6.13	4.33	$605	$613	$433	$908	$920	$650	$1,143	$1,266	$866
1982	23,400	31,800	6.30	6.70	4.40	630	670	440	945	1,005	660	1,260	1,340	880
1985	27,900	38,100	6.30	7.05	4.40	630	705	440	945	1,058	660	1,260	1,410	880
1987	31,200	42,600	6.45	7.15	4.40	645	715	440	968	1,073	660	1,290	1,430	880

Year	Wage base		Tax rates			$25,000 wage earner			$30,000 wage earner			$40,000 wage earner		
	PL	CL SSRA	PL	CL	SSRA	PL	CL	SSRA	PL	CL	SSRA	PL	CL	SSRA
1979	$18,900	$22,900	6.05	6.13	4.33	$1,143	$1,404	$992	$1,143	$1,404	$992	$1,143	$1,404	$992
1982	23,400	31,800	6.30	6.70	4.40	1,474	1,675	1,100	1,474	2,010	1,320	1,474	2,131	1,399

A NATIONAL ACADEMY OF MEDICINE

(Mr. ALLEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALLEN. Mr. Speaker, I am today introducing a bill to establish a National Academy of Medicine, to educate and train the many qualified students and scholars seeking to become doctors, surgeons, and other medical specialists, who are today denied admission to our existing medical colleges.

Students of the subject have come to recognize that the doctor shortage in this Nation is becoming critical. Whether or not we ever establish a comprehensive program of national health insurance, we must educate and provide a sufficient number of doctors, if we are ever to have adequate and proper health care for the ever-increasing population of this Nation.

Presently we graduate only about 15,000 doctors a year. Of these a much smaller number enter the active practice of patient care. Those who do practice tend to cluster in the more affluent sections of our cities, towns, and larger metropolitan areas, while the less densely populated areas, in all too many cases, do not have any doctor at all practicing in their communities.

HEW says that 16 million of our citizens live in doctor-shortage areas. Nine million of these are in the rural areas. Adding to the problem is the fact that many of the brightest students who graduate from medical schools never practice medicine at all, preferring the more desirable working hours, conditions, and guaranteed salaries which are open to them in the field of research.

As a consequence, we find our public general hospitals—which should be the centerpieces of our entire health care industry—understaffed and compelled to import foreign nationals simply to keep their doors open for the poor and the sick in their areas.

Furthermore, this shortage of practicing physicians contributes significantly to the high and constantly rising costs of adequate and proper health care, which has risen beyond the reach of many of our citizens in the middle- and low-income brackets.

It is common knowledge that both the public and the private medical colleges of the Nation have for many years engaged in the practice of limiting their enrollments. Thousands of able and qualified young people who have applied for admission to medical schools have been turned away, every year.

Many have been bitterly disappointed in the past, because—rightly or wrongly—they have felt their rejection and denial of an opportunity to obtain a medical education was a result of unfair discrimination, having to do with their sex, race, or ethnic backgrounds. While admission policies of many medical colleges have undergone a laudable change in the past few years, it is still true that existing medical colleges, for one reason or another, continue to accept only a fraction of those applicants who are top students and scholars, and who have all of the qualifications to make excellent physicians. In the meantime, the doctor shortage only gets worse. The public general hospitals in all too many cases are so severely handicapped by the lack of adequate and competent physicians they can barely function.

Think of it—all of our medical colleges in this great Nation are graduating only about 15,000 new doctors a year. A drop in the bucket. As perceived by all too many citizens, this smacks of a deliberate policy of planned scarcity. I, for one, believe we should do something about it. We can no longer wait. We know it will take many years to educate and train new physicians, and we had better face up to this very real problem today, before the shortage escalates to crisis proportions.

The bill I am introducing, today, is but one small step we must take, if we are serious about trying to provide adequate health delivery services to the people of this Nation. The bill—by amending the Public Health Service Act—sets up a National Academy of Medicine under the supervision of the Surgeon General of the United States, with discretion, subject to the approval of the President, to create up to three branches to be spread geographically and according to population and the proximity of essential supporting hospital and other facilities throughout the United States. This Academy would educate and train 1,600 graduating doctors a year, at no cost to the students. But a condition of eligibility for his free medical education, would be the agreement of each applicant to serve as a commissioned officer in the regular corps of the Public Health Service after the completion of residency and internship—for a period of 6 years in the case of general practitioners and 9 years in the case of surgeons or other specialists—during which periods there would be withheld from their salaries monthy an amount to compensate the Government, in part at least, for the cost of their education and training, as may be determined as just and equitable by the Congress.

The Surgeon General would be empowered to assign and reassign the graduate doctors to places of service in the Public Health Corps where he determines the greatest need exists, with an emphasis on service in the public general hospitals and other public health facilities of the Nation.

The bill sets up a five-man Select Commission for the Academy, the Commissioners to be appointed by the President, to undertake the development and supervision of the Academy and provide for its curriculum, faculty, accreditation, admission standards, and courses of study.

Admission to the student body of the Academy would be decided by competitive examinations from among nominees selected by all Members of the U.S. Senate and House of Representatives, each of whom may make 10 nominations for each of three vacancies in each entering class in the Academy.

By this bill, a new Academy would be able, within a few years, to start sending out approximately 1,600 graduate doctors per year.

Mr. Speaker, I feel that the National Academy of Medicine is a long overdue idea whose time has come, and I solicit the support of my colleagues in its speedy passage.

INADEQUATE BRIDGES: HOPE FOR IMPROVEMENT IN 1978

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. CORCORAN) is recognized for 5 minutes.

Mr. CORCORAN of Illinois. Mr. Speaker, I was very interested to receive from the Carter administration its so-called highway/public transportation legislation proposal dated January 26, 1978, especially the section dealing with the bridge replacement and rehabilitation program. In that proposal, the administration recommends that the bridge program be expanded to include rehabilitation as well as replacement of bridges with a Federal share of 80 percent, increased from the present 75 percent share for bridge replacement programs. It also stated that up to 30 percent of the funds may be used for bridges which are located off the Federal aid system. This is certainly one area where bridge replacement funds can be and must be increased. Finally, the President's proposal would increase funding for the special bridge replacement program from $180 million annually to $1.9 billion over a 5-year period. These are certainly encouraging signs.

As many of my colleagues can attest to, the problems with the bridges in this country are critical and widespread. On November 21 of last year, I accompanied several transportation officials on an inspection tour of bridges in my district. These people represented the National Transportation Policy Study Commission and the Illinois Department of Transportation. Our purpose was to learn, first hand, the problems caused by unsafe and inadequate bridges in the area. On this inspection tour, we visited seven bridges, covering several types and various sizes. These bridges were located on major highways and on country roads as well as in cities.

We learned that, in this district, as in many others in the country, many of the bridges currently in use are reaching the end of their useful life. Take these facts as examples;

One highway bridge out of every five in the United States is deficient and dangerous to use. More than 100,000 spans are officially in that category now, and the number is rising.

Every 2 days, on average, another bridge sags, buckles or collapses.

Poor bridge approaches and lack of adequate signs and signals kill an estimated 1,000 Americans yearly, in addition to the 8 or 10 who die as a result of actual bridge failures.

These statistics and other findings appeared in a recent article in the U.S. News & World Report on January 9, 1978 entitled "Weak Bridges: Growing Hazard on the Highways." I bring this article to the attention of my colleagues and include it for printing in the RECORD in its entirety:

WEAK BRIDGES: GROWING HAZARD ON THE HIGHWAYS

At a time when cold weather is posing added problems, a survey of this country's highway bridges shows thousands so badly neglected that they comprise a "disaster just waiting to happen."

So reports a group of Federal Highway Administration engineers who have uncovered dangerous bridges in every part of the country.

Says W. J. Wilkes, director of FHA's Office of Engineering: "The hazard always grows at this time of the year, when bitter cold often causes the steelwork to become brittle, resulting in more bridge failures."

Among the findings of the survey—

One highway bridge out of every 5 in the U.S. is deficient and dangerous to use. More than 100,000 spans are officially in that category now, and the number is still rising.

Every two days, on average, another bridge sags, buckles or collapses.

Poor bridge approaches and lack of adequate signs and signals kill an estimated 1,000 Americans yearly, in addition to the 8 or 10 who die as a result of actual bridge failures.

DANGEROUS FAULTS

On highways built with federal aid—the nation's major roads—some 7,000 bridges are considered structurally unsound, FHA experts report, and another 25,000 are called "functionally obsolete" because they are narrow, have low overhead clearance or are poorly aligned with the road. Replacing these 32,000 unsafe bridges would cost about 10.4 billion dollars and would take 80 years at the present rate of the replacement program, the engineers estimate.

The cost of replacing all of the unsafe bridges, both those on federal-aid and nonaid local highways, is computed by FHA officials at 23 billion dollars.

Why have the nation's bridges been allowed to deteriorate to this extent? The main reason is that local governments tend to spend limited highway funds on other things first. A federal bridge-replacement program was started in 1972 to provide 75 per cent of the cost of needed work on city or State bridges, but only 475 million dollars has been authorized, and work is going slowly. Up to December, 1976, just 978 bridges had been or were being upgraded under this program.

Examples of what has happened to bridges as a result include—

A span over the Hudson River at Troy, N.Y., collapsed in 1977, fortunately with no deaths involved.

Two persons died when a bridge over the South Canadian River in central Oklahoma fell in 1976.

In 1975, a link over the Yadkin River near Siloam, N.C., collapsed, causing four deaths and 16 injuries.

The biggest modern tragedy was the collapse of the Silver Bridge over the Ohio River in 1967, with a death toll of 46 persons.

There are lesser problems, too, that are aggravating and time-consuming.

Near Weatherford, Tex., is a highway bridge with a 20,000-pound weight limit. But the county fire department there reportedly exceeds the legal limit by driving its 22,000-pound truck over the span routinely—because the detour would require 30 miles of driving and perhaps an hour of extra time.

Ten States with the most unsafe bridges

	Number of deficient or obsolete bridges
1. Iowa	14,000
2. Oklahoma	5,945
3. Pennsylvania	5,939
4. New York	5,750
5. Kansas	5,540
6. Texas	5,846
7. Missouri	4,786
8. Tennessee	4,755
9. Nebraska	4,500
10. Illinois	4,436

Rerouting of school buses around unsafe bridges is an increasingly common necessity. In one rural Midwestern community, this practice costs the schools an extra $12,000 a year.

In Indiana, a survey by Purdue University showed that more than 6,500 county bridges are unsafe for standard-sized school buses carrying 60 or 65 children. Several schools there have been forced to close from time to time as a direct result of bridge conditions.

Narrow bridges, built before 1935 when cars and trucks were smaller, lighter and fewer, are a particular problem. Three-fourths of all spans in the country are in this category, and many cannot handle modern traffic. Typically, a truck-bus collision in 1972 on a narrow bridge near Fort Summer, N.M.., killed 19. A similar accident in Fort Stockton, Tex., took 15 lives.

HOW COSTS SHOOT UP

Meanwhile, the number of deficient highway bridges in the country reported to the FHA is rising steadily.

In 1968, it was estimated that 88,900 of the nation's crossings were either structurally deficient or functionally obsolete. The replacement cost then was estimated at 14.8 billions. By last year, the number of unsafe bridges recorded had risen to 105,500, an increase of 15.7 per cent, and the estimated replacement cost had risen by more than 50 per cent.

In Congress, hearings have been started, and 14 bills are pending to expand the nation's bridge-upgrading program by as much as 2 billion dollars a year, from the present level of 180 million annually. No bill is likely to reach the floor of either house until next spring.

As one official remarked recently: "With at least 105,000 bridges that people use everyday now listed as unsafe and the number rising steadily, it's only a matter of time before a series of bridge disasters occurs that will make the recent dam breaks look like a Sunday picnic."

THE NEED FOR MORE COMPLETE FOOD LABELING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. WHALEN) is recognized for 5 minutes.

Mr. WHALEN. Mr. Speaker, in the CONGRESSIONAL RECORD of January 31, I discussed briefly some of the research being done in my office concerning the subject of food labeling. In my opinion, this is one of the most important consumer issues in the Nation today.

You may recall that the emphasis of my statement was on the interest private citizens have expressed in my efforts to require complete disclosure of ingredients on the labels of processed foods. Today I wish to share with my colleagues some of the items that have appeared in the press, reporting on what I am doing.

The first article appeared in the Chicago Tribune in mid-December and conveyed my interest in receiving letters from the citizens who are interested in the food labeling issue. As I noted before, that article resulted in dozens of letters coming into my office from concerned consumers all over Illinois.

A second article ran about a month later in several papers in the Cox news chain. It discusses some of the mail I received as a result of the first article. The Cox article, by Andy Alexander, also

gives a brief description of the current activity on the food labeling front.

Third, there is an article by Dave Hess that was syndicated recently by the Knight newspaper chain. It describes my current activities and discusses some likely next steps. This story recently appeared in one of my hometown newspapers, the Dayton Daily News.

At this point in the RECORD, I wish to insert the three articles:

[From the Chicago Tribune, Dec. 15, 1977]

ICE CREAM TRAGEDY SHOWS LABELING NEED

(By Carol Rasmussen)

U.S. Rep. Charles W. Whalen Jr. (R., Ohio) remembers Michael Grybsank. Many Chicagoans probably do, too.

Young Grybsank ate a bowl of butter finger ice cream at a friend's house and died shortly thereafter. He died because he was highly allergic to peanut butter, a sensitivity which he was so well aware of that he asked to see the carton of ice cream and could find no mention anywhere of peanut butter or peanuts as an ice cream ingredient.

So he ate the ice cream. It took too long to figure out that the food to which he was so sensitive was in the candy bar used in the flavoring of the ice cream.

The story about his death made national headlines back in 1972. Some people felt that this death, as unfortunate and unnecessary as it was, might at last be what the Food and Drug Administration (FDA) needed to make it see the value of listing all ingredients on food labels.

"There have been numerous efforts to broaden the laws on disclosure of food ingredients on labels," said Marc Rosenberg, special projects director to Congressman Whalen. "But all have petered out for one reason or another."

Congressman Whalen's interest in the problem, Rosenberg added, was piqued by a letter from one of his constituents who had recently learned that she had severe allegies and was encountering great difficulty in choosing foods that were safe for her because labels did not fully disclose all the ingredients used in the foods.

"He may not press the point further unless he sees there is public interest in the idea of full ingredient disclosure on food labels," Rosenberg added.

As the law presently stands, there are some foods that are standardized, explained Rosenberg, meaning all the ingredients that can be used in them are listed in a big fat book on the government's shelves, and labels on these foods do not have to disclose any ingredients, Rosenberg noted.

Its original purpose was to prevent fraud; a manufacturer couldn't claim that it was making, say, mayonnaise when the bottle really contained a look-alike that was something else.

But now that many foods can legally contain numerous chemical additives and people are beginning to recognize that allergies and other problems are attributed to some of them, many consumers feel they need to know all of the ingredients used in making all food products.

Beyond that, consumers should be told exactly what flavorings and colorings are used in any foods, standardized or not. "People look at the labels and when they see a long list of ingredients they assume everything is disclosed and it turns out that it's not," Rosenberg said. Labels presently only need state that flavorings and colorings are used, but they do not have to specify which ones.

In the case of yellow dye number 5, the American Academy of Allergy recently submitted a statement expressing concern that it was highly allergenic and they have patient histories of people getting sick from it, Rosenberg said.

On Feb. 4 of this year, the FDA proposed that this dye, when used, be listed on food labels, but to date it is still of proposal status, not a law, and therefore not mandatory.

Congressman Whalen thinks that if it can be shown that consumers really need to know all of the ingredients used in food products, then something might be done, Rosenberg said. He is asking that people write to him explaining the problems they face, if any, due to the lack of full disclosure of ingredients on food labels. His address is 1035 Longworth House Office Building, Washington, D.C. 20515.

[From the Lufkin (Tex.) News, Jan. 18, 1978]

CONGRESSMAN RECEIVES LETTERS ABOUT POOR LABELING

(By Andrew Alexander)

WASHINGTON.—It started with abdominal cramps. Then came the diarrhea, migraines and dizziness.

"This latter was so severe that when I got up I had to sit on the edge of the bed for five to ten minutes until my head quit whirling," wrote Irma Aleshire of Chicago.

After days of suffering, the 77-year-old retired physician finally traced the cause of her misery to the canned fruits she had been eating.

It seems the manufacturer had substituted less expensive corn syrup for sugar, but never noted the change on the can labels. Mrs. Aleshire, who has been highly allergic to corn for her entire adult life, had no way of knowing.

Her letter was just one of a bundle sent to Rep. Charles W. Whalen, R-Dayton, after a Chicago newspaper noted recently he was researching the problems of inadequate food labeling.

Most were from consumers with allergies who told horror stories of pain and misery caused because food labels had not warned them of what they would be eating.

Despite the pleas of America's estimated 15 million allergenics with special dietary needs, there has been little movement in recent years toward food labeling reform.

But with the new year there are signs of activity.

The Food and Drug Administration (FDA), whose job it is to enforce existing labeling laws, has said it will hold hearings on the problem.

And the House Subcommittee on Health and the Environment—for many years accused of neglecting the issue—will be holding its own hearings on reform by midsummer.

In fact, subcommittee chairman Rep. Paul G. Rogers, D-Fla., has already drafted a bill which would beef up labeling requirements.

Donald Dalrymple, a top subcommittee staffer, said last week he believes there is a good chance Congress will enact a new labeling law before adjourning later this year.

But with so many who suffer from allergies, the question is: Why has it taken so long?

Douglas M. Bloomfield, a legislative assistant to Rep. Benjamin S. Rosenthal, D-N.Y., who has been fighting for tougher labeling standards for years, says Congress is to blame.

"Congress responds more to crisis than to problems of this nature," he said. "This is a nagging, agonizing problem that goes on day after day, but there aren't a lot of people suddenly dropping over dead. And besides, the consumer side isn't organized, and where there is organization there's no funding to lobby."

"But on the other side," he said, "you've got pressure from some of the biggest commercial interests in the country."

Bloomfield was apparently referring to trade groups like the Grocery Manufacturers of America and the National Food Processors Association, which represents canned food producers.

The law today on food labeling is defined by a maze of confusing and seemingly illogical rules and regulations governed by FDA.

For example, "Standardized" foods (like ice cream) are required to contain certain "mandatory" ingredients, but none of those ingredients are required to be listed on the package. However, a long list of "optional" ice cream ingredients are required.

Other foods are required by FDA to list all their ingredients on the label—except for spices, flavorings and coloring additives which can be highly harmful to some allergenic consumers.

The result is often bewildering to the diet-conscious shopper.

"If it says 'plus flavor,' you still don't know which flavor was used," observed Marc H. Rosenberg, special projects director for Rep. Whalen.

"If you're buying a pizza mix and they use oregano in the sauce, they don't have to tell you that," said Bloomfield. "All they have to say is 'plus spice.'"

He also noted that in recent years a number of food coloring and flavoring additives have been found to be cancer-causing, yet they were frequently never required to be listed.

There are signs the food industry may be willing to agree to some modest changes in labeling requirements. For example, several industry spokesmen said they liked the Rogers bill, which calls for a listing of ingredients if FDA found them to have a "significant bearing" on the food product.

But the industry is still expected to adamantly oppose efforts to require a listing of every ingredient.

"They can go hog wild and pretty soon you have a label that's nine feet long with room for everything on it, including the name of the guy who cooked the food," mused Tony McHale of the National Food Processors Association.

McHale and some FDA officials say that food manufacturers frequently must vary their contents, substituting additives when some ingredients are in short supply. The result, they say, is that the cost of constantly switching labels will push up food prices.

"Every time you're forced to change a label," said McHale, "it's going to drive up the price, and somebody's got to pay for the extra cost."

But Dalrymple noted that food packages are already changed frequently to accommodate new coupon or discount offers. "If they can do that," he said, "I don't understand why they can't periodically change the information on the labeling."

Some industry spokesmen also warn that by revealing all ingredients, competitors might learn how to duplicate their product That is why they shriek at the suggestion by some consumer groups that the labels also contain a breakdown of the exact percentage of each ingredient used.

FDA consumer safety officer Ray Gill says proposed revisions in labeling should undergo a "cost-benefit analysis" to determine if there are really millions of consumers who would take advantage of the additional information.

A study by the General Accounting Office several years ago suggests there may be.

In addition to the millions of allergenics, GAO also estimated there are 23 million Americans with heart conditions and more than four million with diabetes or kidney ailments—most of whom need to avoid certain food ingredients.

"There are also dietary laws," noted Rosenberg. "If you're a Moslem or a Hindu, you want to know what you're eating."

In critical need of ingredient information are those allergic to chemical food additives, says Virginia Nichols, who runs a special food store for allergenics in Beavercreek, near Dayton. The store, which she says is one of only three of its kind in the nation, caters especially to "chemically sensitive" eaters.

She regularly flies in organically-grown chemical-free food from California. The air freight charges boost the prices, but the IRS has ruled that taxpayers may deduct that additional cost if the food is needed for their diet.

But the food industry is expected to oppose listing all chemical additives on the grounds that not enough people would benefit from the information.

[From the Dayton Daily News, Feb. 2, 1978]

WHALEN THROWS WEIGHT BEHIND CLEAR-LABEL EFFORT

(By Dave Hess)

WASHINGTON.—Rose Marie Vita's son became ill after eating a packaged spaghetti sauce mix.

Suspecting that her son might have been felled by an old nemesis, an allergy to corn and its byproducts, she wrote to the company that made the sauce and asked for a list of the ingredients.

The company, she said, "refused to tell me the list of ingredients."

Under existing food labeling laws, the company was within its rights to refuse. It is not required by law to list the various substances—oils, flavorings, colorings—in its products.

Vita, an Illinois businesswoman, says that is wrong: "Every American has the right to protect his health and indeed his very life."

Rep. Charles W. Whalen, Jr. (R–Dayton) agrees.

He is building a case for legislation to require all ingredients and chemicals that go into packaged foods be listed on the container.

Knowing the ingredients of packaged foods, Whalen said, "is of more than passing interest to millions of Americans who are allergic. In some cases, the answer to what's in the food can spell the difference between sickness and health."

The National Institutes of Health has estimated that about 35 million Americans suffer, in varying degrees, from some form of allergy.

Those who suffer from other chronic health problems—diabetes, high blood pressure, excess blood cholesterol, ulcers, hyperactivity—also have a right to know what is in their food, Whalen believes.

People whose diets are keyed to religious beliefs also should be told what they are eating, Whalen added.

Yet food labeling laws are severely restricted and sometimes unwittingly lead to misunderstandings about the actual content of many foods, Whalen said.

One of the classic examples cited by food-labeling advocates was the case of Michael Grybsank, who died from an allergic reaction to peanut extracts in an unlabeled box of ice cream.

Whalen calls ice cream a problem food because, under federal law, it is considered to be "standardized."

That means it must contain certain ingredients in order to be sold as genuine "ice cream."

The problem, Whalen said, is that no explanatory labeling is required for standardized foods because federal law presumes that people know what is in them.

"Even if that were true, that people did know," said Whalen aide Mark Rosenberg, "the fact is that these foods can also contain other things—artificial flavorings and colorings and the like—besides the basic ingredients that make them what they are."

An Indiana allergist, Dr. J. P. Ornelas, of Merrillville, said that the "average person consumes about five pounds of artificial dyes a year. And about 85 per cent of supermarket foods have artificial flavorings or artificial colorings or both."

Research has failed to prove whether an accumulation of these chemicals is harmful, said Ornelas. But his own practice, he said, along with other medical evidence, has shown that some widely used flavorings set off allergic reactions in people who also take aspirin.

Ornelas is critical of the various artificial flavorings used in cheaper, prepackaged ice creams.

Benzul acetate, for instance, a powerful nitrate solvent, is sometimes used to give ice cream a strawberry flavor, Amyl acetate, an oil paint solvent, imparts a banana flavor, Ornelas said. Ethyl acetate, a pineapple flavor, is used as a rug or leather cleaner, and its vapors have been implicated in cases of lung, heart and liver damage, he said.

Whalen is considering a petition to the Food and Drug Administration, asking it to use its existing powers to require more explicit labeling on food packages.

"We think FDA already has the authority, under its power to set 'standards of identity' for foods, to force fuller disclosure of ingredients," a Whalen aide said.

Whalen also indicated he might sponsor legislation to deal with the problem.

FLEXIBLE PARITY ACT OF 1978

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kansas (Mr. SEBELIUS) is recognized for 10 minutes.

Mr. SEBELIUS. Mr. Speaker, last week in a statement released in Kansas, I said that despite the fact that the administration has said no again to additional assistance and various parity proposals, that our Kansas farmers should not give up trying to change and improve current farm policy.

I made these comments after questioning Agriculture Secretary Bob Bergland about the possibility of immediate cash flow assistance under existing farm program authority in view of administration opposition to changing the 1977 Farm Act and various parity proposals submitted by the American Agriculture Movement.

Secretary Bergland, and I am paraphrasing his response, told us that it was too soon to judge the new farm act, that farmers should participate in the set aside, put their grain into the Government reserve and be patient. However, the farmers in High Plains wheat country facing immediate foreclosure or that financial precipice down the road, cannot take patience to the bank. Patience is about the only commodity in short supply in farm country nowdays.

I realize that the administration just does not think the current problems we are experiencing merit changing current farm policy. I also realize that without hope and faith, the farmer would never plant a seed in the ground. I am hopeful that given some recent encouraging developments over the past few weeks, that the administration will change current policy decisions just as was done during consideration of the farm bill when we were able to win the battle for improved target price deficiency payments for grain.

I am encouraged because I believe that more of my colleagues fully understand that we are in the midst of the worst financial crisis since the Great Depression and are sympathetic to the farmer's plight. I am encouraged because recent polls show the American public better educated to basic farm economics and that it is in the consumer's best interests that the farmer make a profit.

I am encouraged because several political pundits, whose columns are followed closely by everyone in Washington, are now reporting the farm problem is the No. 1 political issue throughout the country.

I am also encouraged by the fact while the farmers' march and pleas to be on a par with the rest of our society has hit an administration roadblock, we still have farm representatives who are not giving up and believe there is always more than one way to find answers to our problems.

Last week, my good friend and colleague, the Honorable BOB DOLE, Senator from Kansas, along with several cosponsors, introduced S. 2481, the Flexible Parity Act of 1978. Rather than simply repeat what my colleague from Kansas has said I will simply let his remarks explain in full this unique and new legislative approach. This bill has merit worthy of consideration in terms of gasoline and diesel fuel savings alone. I commend to the attention of my colleagues the following remarks by my Kansas colleague, Senator BOB DOLE. It is my intent to solicit cosponsors and reintroduce this legislation next week:

REMARKS BY SENATOR DOLE

I am introducing a bill today to adjust target prices for grain and cotton. Under my bill, which I call the Flexible Parity Act of 1978:

An individual farmer can choose the target price he needs up to parity, but must scale down his production accordingly;

My bill will not interfere with exports;

It will not contribute to foreign production increases;

It will not encourage substitutes; and

Under my bill, costs would be reasonable since scaled down production should result in higher market prices, resulting in reasonable level of deficiency payments.

Now for the first time, farmers will have a mechanism under which they can collectively control their production and each individual may select the target level and set-aside that is best for his farm operation. With this legislation there will be no necessity for set-aside payments since farmers will be receiving target price incentives up to the parity level.

I have considered a similar approach on soybeans, ice, sugar, and peanuts and I may wish to apply this principle to these crops after producers have had an opportunity to testify at Agriculture Committee hearings scheduled to commence February 23, 1978.

Cost estimates are not easy to assess for this flexible parity approach because of the difficulty in anticipating farmers' response to the various target prices and set-aside options available to them. However, since substantial improvement in farm prices would likely occur as the effects of the set-aside are felt, I believe that budget exposure would be relatively modest. I will illustrate with an example for wheat, corn, and cotton:

WHEAT EXAMPLE

Assume farmers choose on the average a 35 percent set-aside in order to be assured of $4 per bushel target price, assume further that the 35 percent set-aside will actu-

ally cut production by 25 percent resulting in a 1.5-billion bushel crop instead of a 2-billion bushel crop.

If this production adjustment, coupled with a vigorous export market promotion program, raised market prices to $3.50 per bushel, the additional amount of exposure for deficiency payments would be $750 million (.50 per bushel × 1.5 million bushels).

CORN EXAMPLE

Assume farmers choose on the average a 35 percent set-aside in order to be assured of a $2.85 per bushel target price. Assume further that the 35 percent set-aside will actually cut production by 25 percent, resulting in a 4.5-billion-bushel corn crop instead of a 6-billion-bushel crop.

If this production adjustment coupled with a vigorous export market program raised market prices to $2.85 per bushel, the additional amount of budget exposure for deficiency payments would be zero.

COTTON EXAMPLE

Assume farmers choose on the average a 35 percent set-aside in order to be assured of a 69-cent-per-pound target price, assume further that the 35 percent set-aside will actually cut production by 25 percent resulting in a 10,500,000-bale crop instead of a 14-million-bale crop.

If this production adjustment, coupled with a vigorous export market promotion program, raised market prices to 65 cents per pound, the additional amount of exposure for deficiency payments would be $210 million ($20 per bale × 10,500,000 bales).

Let me say very quickly what this bill will do. It applies to wheat, feed grains, corn, and cotton. It says to that American farmer, whether he be in Kansas or Arkansas or New Mexico or South Carolina or Tennessee or Illinois, that he can choose the target price that he might need for parity, but if he does that, he has to scale down his production. Let me give a quick example of how that would apply to a wheat farmer in the State of Kansas or any other State.

Under the present program, if he sets aside 20 percent of his production, then the so-called target price is $3 a bushel. I want to state very quickly that that is not a Government payment. The target price is the target price. If the market price is $2.90, there is a payment of 10 cents. If the market price is $3, there is no payment at all.

The problem in America today is that there is too much supply. We have too much wheat, for example. It depresses market prices. In order to restore the marketable competition, we have to reduce that supply. Farmers are willing to reduce that supply, but they would like to stay in business in the process so they can continue to produce for themselves, for American consumers, and for the hungry in the world and others who look to us for leadership in agriculture.

What I have done is try to devise a flexible parity concept which says that, if you reduce your production of wheat 25 percent, the target price is $3.25 a bushel; if you reduce your production 30 percent, the target price is $3.50 a bushel; on a 35 percent reduction, the target prices goes to $4; on 40 percent, it goes to $4.25; 45 percent, it goes to $4.50; 50 percent, it goes to parity—$5.04 a bushel. The same is true for corn, for feed grains, or for cotton.

Let me make it very clear that before the farmer can receive that increased target price, that incentive, he has to cut production. He cannot have it both ways. He cannot have full production and high target prices.

It seems to me, after weeks of research and searching for some alternative, that we have come up with an idea and a program that is geared toward the marketplace.

Some have suggested that we ought to raise the loan rates up to parity. I do not believe that. All we do by raising loan rates up to parity or some higher figure than they are now, on wheat or corn or whatever, is to interfere with exports. If the farmer has any future in America, it is in exports.

In addition, this will not contribute to foreign production increases. We are not setting up some artificial price that will encourage every other wheat producer to plant fence-to-fence and destroy the market.

Also, I think it is going to cost a very small amount, because if you cut your production, you are going to have fewer bushels on which to pay a target price in the first place. In the second place, the market price is going to be strengthened and the target price concept will not go into effect.

SIXTIETH ANNIVERSARY OF LITHUANIAN INDEPENDENCE DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, February 16, 1978, marks a special day in man's historic struggle for freedom and self-determination, for it was on that day 60 years ago that the Lithuanian people established their own government and proclaimed their independence.

The Lithuanian Council of Chicago is commemorating this 60th anniversary with a program at Maria High School auditorium on Sunday, February 12. The officers of this outstanding organization include Rimas Sarka, president; Vincent Samaska, executive secretary; Ignas Andrasiunas, Algis Jasaitis, Casimir G. Oksas, Mykolas Pranevicius, vice presidents; Irena Sankus, treasurer; Antanas Svitra, financial secretary; Stasys Mankus, recording secretary.

Trustees include Euphrosine Mikuzis, Teodora Kuzas, Charles K. Smilgys, and Oskaras Kremeris.

The members of the Lithuanian Council of Chicago are as follows: Kristina Austin, Petras Bucas, Elena Bucinskas, John Evans, Adele Gabalis, Juze Gulbinas, Petras Jokubka, Jura Jasiunas, Veronika Lenkevicius, Julius R. Kuzas, Jr., Juozas Kapacinskas, Algirdas Puzauskas, Julius Pakalka, Donatas Stukas, Pranas Sekmokas, Vladas Soliunas, Justinas Sidlauskas, and Jonas Valaitis.

The Lithuanians took the historic step of independence in 1918, at the close of World War I, and for 20 years thereafter, Lithuania enjoyed peace and freedom from oppression. During this period the Lithuanian economy stabilized, and there was a great renaissance of national literature and culture.

But in 1939, the Soviet Union began a campaign of intimidation on this tiny country and concentrated its armed forces on the Lithuanian frontier. This massive threat was followed on June 15, 1940, by actual occupation of Lithuania by the Red Army. The valiant Lithuanian Government had no alternative, but to concede to brutal Soviet demands.

Immediately the Communists began arresting and executing the Lithuanian patriots. Non-Communist political parties were liquidated, and leaders in these parties were imprisoned. Thousands of Lithuanians lost their lives or were forcibly moved in cattle cars to distant parts of Russia's occupied territorities in the East. The people were forced to vote in national elections in which only the Communist Party was represented. The Lithuanians, despite these hopeless odds, resisted heroically—but to no avail. The Soviets finally succeeded in forcibly annexing Lithuania and subjugating these courageous people.

Despite condemnation by the free world of this unlawful aggression against the sovereign rights of a free people, the Soviet Union still occupies Lithuania and maintains Communist troops within her borders. The national culture is gradually being destroyed and the Lithuanian people are forced to suffer under the harsh yoke of cruel Soviet oppression.

Mr. Speaker, I was glad to join with other Members of Congress a few years ago in appealing to Soviet authorities for the release of Simas Kudirka, a Lithuanian seaman who tried to obtain political asylum in the United States by boarding a Coast Guard vessel. Kudirka was eventually released after harassment and imprisonment by Soviet authorities, and he eventually made his way to the United States. This courageous Lithuanian addressed the Bicentennial Convocation on Global Justice, convened by the National Conference of Catholic Bishops, on life in Soviet-occupied Lithuania at the preset time, and a portion of that statement by Simas Kudirka follows:

The Universal Declaration of Human Rights, adopted by the United Nations December 10th, 1948 and the Helsinki Accord, adopted last year at the European Security Conference, are regularly being trampled upon by the Soviet government in its dealings with the Lithuanian people in general, and religious believers in particular.

Article 7 of the Declaration of Human Rights states: "All are equal before the law and are entitled, without any discrimination, to equal protection of the law . . ."

In Catholic Lithuania today, ever since the Soviet Union seized that country by force in 1940, one set of standards is applied to atheists, and a completely different set of unwritten standards is applied to believers.

Atheists are allowed and encouraged to meet, to study their teachings, and to propagate atheism by every means, including the mass media. Believers are discouraged from attending religious services, and are denied any access to mass media at all. Only small token editions of a handful of publications have been allowed, completely inadequate for 3 million people, most of whom are still Catholic by persuasion.

Believers are harassed and imprisoned for transgression of the least regulation, while atheists go scot-free after breaking the law by interfering with the religious rights of believers and even burglarizing, vandalizing and burning places of worship (those that are still remaining).

Article 8 of the Universal Declaration of Human Rights states: "Everyone has the right to an effective remedy by the competent national tribunals for acts violating the fundamental rights granted by the constitution or by law."

The Soviet constitution guarantees the rights of freedom of conscience, of worship, of association, and of the press. When Soviet authorities have daily violated these constitutional rights, repeated formal written complaints to the proper Soviet authorities by individuals and on occasion by thousands of signers have not only been ignored, but have brought upon the petitioners further injustices such as imprisonment and fines.

Article 9 of the Universal Declaration of Human Rights states: "No one shall be subjected to arbitrary arrest, detention or exile".

In one night alone, June 14–15, 1941, 34,260 Lithuanians were packed into cattle cars and sent on a harrowing journey to undisclosed regions in the Soviet Union. There were no trials; the only apparent reason for arrest of these thousands, including children, was that they were real or potential opponents of Soviet Communism. In all, it is estimated that some 300,000 Lithuanians suffered a similar fate, along with tens of thousands of Latvians and Estonians.

Julijus Steponavicius, the Archbishop of the capital city of Vilnius, has been forced into exile from his diocese for fifteen years. "To this day I do not know why I was exiled from my diocese, or how long the exile will last", he recently wrote in complaint to Lithuanian Premier Jonas Maniusis.

While I was still a prisoner in the concentration camp, on the eve of December 10, 1972, a freezing night, I secretly climbed a pole in the Potma prison compound and raised a makeshift flag of the United Nations for the whole camp to see the next morning, which was Universal Human Rights Day. The flag had been secretly pieced together from scraps of cloth by fellow prisoners. Tattered though it was, to us it symbolized hope. That hope, for me, was shattered once I reached the West and learned that the fate of Soviet political prisoners is not on the agenda of the United Nations, and is not likely to get there.

May I appeal to you, who represent the spiritual leadership of the free world, to put the human rights of the people in Soviet-occupied territories on your agenda.

SIMAS KUDIRKA.

Mr. Speaker, it is was for these reasons that I introduced House Concurrent Resolution 5 at the beginning of the 95th Congress, which follows:

H. CON. RES. 5

Whereas the Government and the people of the United States of America have maintained and enjoyed excellent and friendly relations with the Governments and peoples of the Baltic States Republics of Latvia, Lithuania, and Estonia, during the years of independence of these Republics; and

Whereas the concept of liberty and freedom of choice of government is still alive in this country, as it has been constantly since the Declaration of Independence; and

Whereas the evidence produced at the hearings of the select committee of the House of Representatives to investigate the incorporation of the Baltic States into the Union of Soviet Socialist Republics overwhelmingly tends to prove that the actions of the Union of Soviet Socialist Republics in relation to these free and independent Baltic Republics were contrary to the principles of international law and the principles of freedom; and

Whereas the people of this Nation have consistently shown great sympathy for the peoples of these three Republics, especially as a result of their enslavement and as a result of the inhuman exile and deportation of great numbers of law-abiding persons from their native lands to imprisonment in slave labor camps in the Union of the Soviet Socialist Republics: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of Congress that—

(1) the President of the United States of America should continue the American policy of nonrecognition of the unlawful absorption of the Baltic States Republics of Latvia, Lithuania, and Estonia into the Union of Soviet Socialist Republics, and continue the recognition of the diplomatic and consular officers of these Republics as the lawful representatives of these three nations in the United States of America; and

(2) the President should take such steps as may be appropriate, through the United States delegation to the United Nations, to raise in the United Nations the question of the forced incorporation of Latvia, Lithuania, and Estonia into the Union of Soviet Socialist Republics and request the United Nations to conduct an investigation of conditions in the said Baltic Republics to the intent and purpose that Soviet armed forces, agents, and colonists be withdrawn therefrom, and that the exiled peoples of these Republics be returned thereto in freedom, and that free plebiscites and elections be held therein, under the supervision of the United Nations, to let the people, in freedom, make their own election and choice as to government.

Mr. Speaker, on behalf of the many thousands of Lithuanian Americans residing within my own 11th Illinois Congressional District, whom I am privileged to serve, and also for Americans of Lithuanian heritage all over this Nation who are commemorating this anniversary, I urge the early enactment of this legislation.

On this occasion, I want to assure the courageous Lithuanians that our Nation continues to support their just aspirations for freedom and independence, and I want to express the fervent hope that the goal of Lithuanian self-determination shall soon be realized.

THE PEACE CORPS AND LIGHT CAPITAL TECHNOLOGY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland, (Mr. LONG) is recognized for 5 minutes.

Mr. LONG of Maryland. Mr. Speaker, helping the poor people of the world to help themselves is the principal goal of the U.S. foreign aid program. Through light capital technologies that will enable small farmers and rural craftsmen to create their own "sweat capital," we can initiate endogenous development among the hundreds of millions of small producers in the poor countries.

I should like to bring to my colleagues' attention a recent speech by Mary E. King, Deputy Director of ACTION, on the importance of appropriate technologies for involving the poor in their own development. In her speech, Ms. King recounts how Ecuadorean villagers heard of a new technology in use nearby—a methane generation plant producing cooking fuel and fertilizer—and how these villagers then asked a Peace Corps volunteer to help them build such a plant in their own village. This example illustrates the importance of providing poor people with information on existing technologies they can use and also demonstrates the eagerness of rural villagers to help themselves.

The existing network of 6,000 Peace Corps volunteers around the world could provide a vital link in a worldwide information and delivery system for light capital technologies. I hope my colleagues will take the time to read the speech which follows:

REMARKS BY MARY E. KING, DEPUTY DIRECTOR, ACTION AGENCY (PEACE CORPS), PARTNERS OF THE AMERICAS, SANTO DOMINGO, DOMINICAN REPUBLIC, SATURDAY, NOVEMBER 19, 1977

I am particularly pleased to address this meeting of the Partners of the Americas. The word "Partners" has a special significance for me, not simply because I am here representing the Peace Corps, another organization committed to the concept of partnership.

Indeed, we enjoy a special contractual agreement with the Partners to identify Volunteers to work in special education with mentally retarded, the blind and deaf. We have long worked together in agriculture, nutrition and health.

But the concept of partnership has meaning for me because of what I learned when I worked in the civil rights struggle in my country. The lessons are clear. Meaningful change comes about only when people work together in partnership, not as donors or recipients, but as equals, with an equal obligation to participate. The civil rights movement taught me that change cannot be bestowed from without nor can it be imposed from above; it can only be the result of the full participation of the people most affected.

So, too, in development.

It is clear that the principles relating to the involvement of people in their own development are universal: they apply to small communities, to nations, and to interaction between nations. Nothing can ultimately be substituted for the direct involvement of people, people who feel a deep sense of commitment to finding locally relevant solutions to local problems.

The Partners of the Americas and the Peace Corps have long held to these principles of participatory development. Today, as political leaders and development theoreticians increasingly come to these same conclusions, we have a special responsibility and a unique opportunity to serve as an example to the rest of the international community.

This leads me to my topic—"Appropriate Technology, the Key to Particpatory Development."

Technology can be defined as the application of scientific principles for the achievement of "Progress." But when we talk of Appropriate Technology, we are talking about an approach, an attitude, a way of looking at the nature of change—a strategy which leads to meaningful development through increased self-reliance at the local level.

Writing over 40 years ago, Mahatma Gandhi said that helping small-scale industries and otherwise strengthening local communities, "provides an outlet for the creative faculties and resourcefulness of the people . . . It may harness all the energy that at present runs to waste."

The Appropriate Technology approach to development taps this energy and talent, and is based on certain principles. Let me suggest these three principles for our thought and discussion:

1. Development begins at the community level and moves upward and outward to build nations; it cannot be imposed "from the top down"

2. The goal of development is self-sufficiency, not reliance on external resources with resulting dependency

3. No meaningful change can take place if people are not involved as full participants in the development and use of their own resources.

Generally, appropriate technology implies low cost, small-scale, labor-intensive solutions to local problems. Always, it implies understanding that undue reliance on finite resources will inevitably lead to social and economic dislocation, and that all solutions must be socially and culturally appropriate to the particular setting.

The means and processes brought to bear, then, are those that can be reproduced and continued locally, without the need for unrealistic amounts of outside capital or technical support. At their best, appropriate technologies should be replicable in other communities, but only when and where it makes sense in local terms. Basic to appropriate technology is the premise that each approach must be constantly evaluated and reevaluated to determine just how appro-

priate it is for a given time, place, culture and setting.

As you probably know, questions have been raised about the true intent and impact of appropriate technology. To some, appropriate technology is village-level "busy work," sidetracking people from addressing broader and more fundamental institutional and political reforms. Some see it as second-class "hand-me-down" technology—an inexpensive way for the "have" nations to keep the "have-nots" temporarily satisfied and quiescent while continuing to control the more modern means of production.

Much of this skepticism has been spawned from previous development schemes which in fact were heavy-handed and sometimes arrogant. Such efforts, regardless of intent, imposed Western models on cultures and places where such models were inappropriate or even destructive.

By focusing on the community level, appropriate technology can help a society gradually adjust to the necessary changes that development can cause while maintaining, preserving, even promoting local culture, values and identities. Previous development approaches too often, whether intentional or not, required the wholesale abandonment of cultural standards.

Appropriate technology seeks to work in harmony with the cultural traditions of the area. With its emphasis on limited scale, appropriate technology can serve as a buffer against the kind of bulldozer-mentality development which has abused so much of the world (including large parts of the United States, I might add).

Perhaps the best way to describe appropriate technology is by illustration. Let me briefly tell you about a situation I think you'll agree exemplifies development at its best—leading to the kind of locally-based progress and self-sufficiency we all want to see.

People in the small community of Ilumán in the Province of Imbabura, Ecuador, heard about a machine in nearby Araque which converted cattle manure into a gas for cooking and a fertilizer for the fields and gardens. They went to see this Araque Methane Gas and Fertilizer Plant and were given a demonstration of how it worked. It was, in their words, "maravilloso" and they began to discus how what they had seen could be usefully applied to their own village.

The Peace Corps became involved when these villagers sent a letter to the Volunteer who was working with the Araque project to ask for Peace Corps' help in establishing a similar methane digester operation in Ilumán. "We ask for your help," they wrote. "We will provide our total effort because we want to carry out this projected work for the benefit of our families."

In their letter, the farmers noted the need for better sanitation in their village. With the digester, manure would no longer be left along pathways or in other community places, but would be collected and converted into cooking gas. In addition, the resulting sludge would be an excellent fertilizer.

The villagers were very interested in the new source of fuel. To get firewood, they wrote, "we have to walk almost four hours to the hill of the hacienda, spend an hour to cut wood, and walk another four hours back to our house to cook with this wood, which lasts at most four days." Years ago, they could pick up the wood freely near their homes; now their land is denuded and bare, and they have to pay the owner of the hacienda for the privilege. "We are not satisfied living this way," they said.

Something else particularly attract the people of Ilumán. Cattle would be kept in a central stable in order to facilitate the collection of manure for the digester. Villagers had long wanted a stable, because theft of cattle was a major problem. Many were forced to guard their precious cattle in their own houses with their families during the night.

There were several basic, predictable gains which would result from the methane digester. Yet, there is more to the story. When the pipes for the methane gas were installed in the village, they were tested for leakage with water. The sight of clear running water in their houses prompted the village women to ask for a change in the plan. Our Volunteers are now working with them to convert the system so that it can deliver both water and gas, alternately, through the same pipes.

Three Peace Corps Volunteers served the people of Ilumán. But the actual work—and even more importantly, the enthusiasm and desire—was based in the local community itself. The villagers are committed to the very hard work of building the digester because they know the potential the system offers.

You know as well as I do that "biogas generators" like the one in Ilumán are not new. In various forms, such systems have been used for decades in India, China and elsewhere. To me, what is significant in this story is the development of human resources through the partnership of the Peace Corps Volunteers and the villagers—with appropriate technology. Although some of the skills and knowledge came from outsiders, there is no way that this technology could have been *imposed* from outside on that village.

No expert could have predicted that a group of villagers would decide to use an alternative energy technology because their cows were being stolen, or that others in their village would become interested in joining the project because a test for leaks in the methane pipes resulting in running water in the houses of participating families. And the project is successful not just because the Volunteers are committed but because the people themselves want it to be; they have invested their energy, their sweat, their hopes—themselves—to make it succeed.

Appropriate technology recognizes that true development takes place only when the people who are to benefit are truly involved and committed.

Development theoreticians and practitioners are increasingly realizing that the focus of appropriate technology should be village-level development—as an antidote to the failure of 25 years of large-scale, capital-intensive development. But the principles of appropriate technology are equally applicable at all levels of development; both in the United States and in other countries. As an example, let me cite the predicament in which the U.S. finds itself with its current health care system.

Hospitals in the U.S. have become classic examples of what happens when technology is applied for technology's sake, losing sight of people and their real needs

With massive expenditures of capital and professional energies, we in the United States have some of the most sophisticated medical training, records and facilities in the world. Yet at the same time, right in the nation's capital, the infant mortality rate of 29 per thousand live births in 1975 was higher than Taiwan's, which was 26. In that same year, the median income in Washington, D.C. was $9,583; in Taiwan it was $810. And life expectancy in Sri Lanka is higher than it is in Washington, D.C.

The hard fact is that in the U.S. something is wrong with our system of health. A single day in an American hospital can cost a patient several hundred dollars; care has become so costly that many don't even seek assistance when they need it.

We must, therefore, live with the contradiction of having highly sophisticated means to meet specialized problems and wholly inadequate, low-cost primary health care capabilities. The U.S. health system, in short, is inappropriate for large numbers of our nation's people. It has specialized and priced itself beyond reach of the basic needs of people in meeting the professional needs of practitioners and providers.

I believe that this situation can be turned around, especially if we're willing to learn from the experiences of other countries. Tanzania may be one example to study. President Julius Nyerere put it this way, "While other countries aim to reach the moon, we must aim for the time being to reach the village."

In 1972, over half of Tanzania's health budget went to hospital and high level care. By 1976, that number had dropped to 12%. The bulk of Tanzania's health budget last year was turned to more immediate primary care health needs.

The use of paraprofessionals, community based clinics, massive health immunization, and nutrition education programs—these are areas where the U.S. could learn a great deal from nations far ahead of us. The Peace Corps sends its volunteers to assist local communities. But equally important are the lessons they bring back to the United States.

The kind of volunteer exchange work in which you are involved has that same dual practical application. Texans going to work in their partner nation of Peru can go not only to assist Peruvians, but also to observe and study ways to improve basic social conditions and to foster crosscultural understanding. And visiting Peruvians can offer assistance and also absorb information in a similar fashion. Ecuador has a partner in Idaho. Maybe the people from the mountainous area of Iluman could teach a few things to people from the mountains of Idaho.

We are coming to realize just how much is left to develop right at home in the U.S., how much we have to learn from others. In many countries, for example, women have much higher professional status, have more to say about policy, more control of family and community life and have more of an integral role in community and village life than is true in parts of the United States. Where women's efforts and contributions are wasted or downgraded, everyone loses. Some of you can be an example and a model for us.

We truly are partners here in the Americas. Partners in need, partners in interests, partners in meeting the economic, social and political needs of all of our people.

The Partners of the Americas represent the pluralism of the Americas as we are entering a period of perhaps less formal but more intense cooperation. We need to consult closely with each other, to assist and learn from each other's work.

The development work of private volunteer groups such as the Partners of the Americas has been outstanding. And while development needs still far outstrip all current efforts, volunteer potential is boundless. If the people of the Americas can be involved—as volunteers—in meaningful, relevant work to improve the situation for all our people, together we can move to meet basic human needs, and meet them in technically and culturally appropriate ways.

Appropriate technology can be a thread tying our efforts and our roles together. The opportunity exists now to achieve real and positive gains by building on the desire and resources of the people for whom our development programs are designed.

Pablo Casals once found the Peace Corps exciting in this way:

It is new and it's always old. We have in a sense come full circle. We have come from the tyranny of the enormous, awesome discordant machine," he said, back to the realization that the beginning and end are people, that it is people who are important, not the machine; that it is people who account for growth, not just dollars or factories, and

above all that it is people who are the object of all our efforts.

It is that vision we must all retain. Otherwise all the programs, all the spending, all the efforts in which we're engaged lose their point and their meaning.

EXECUTIVE LEADERSHIP: THE KEY FACTOR IN DETERMINING THE SUCCESS OF THE WORLD HUNGER COMMISSION AND IN ADVANCING THE PRESIDENTIAL HUNGER INITIATIVE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. NOLAN) is recognized for 5 minutes.

Mr. NOLAN. Mr. Speaker, on Friday, February 3, 1978, President Carter announced that he would sign an Executive order establishing the Commission on Domestic and International Hunger and Malnutrition as proposed by House Resolution 784 and Senate Resolution 271. The Commission's success, however, depends upon firm Executive leadership.

In order for the Commission to function as intended by Congress and in order to advance the President's own world hunger initiative, I recommend the following:

Appointment of a roving Ambassador on World Hunger by the President, with a Special Assistant to the President title as well to make clear that the Ambassador is the President's own envoy and liaison contact within the White House mechanisms on hunger issues at home and abroad, with duties including but not limited to:

Selecting personnel for and chairing the Commission on World Hunger, and to provide continued nongovernmental input into planning on hunger-related issues.

Representing the President in interagency preparations for and representation at major multilateral world hunger forums like the World Food Council, the Food and Agriculture Organization of the United Nations, the International Agricultural Development Fund, et cetera.

Chairing interagency policy mechanisms related to improved domestic and international food assistance operations, and their relationships to other economic development assistance.

Representing the President in speaking to the American people in mobilizing citizen support for greater initiatives in the broad economic assistance area involved in hunger problems, recognizing that mass support is needed to win congressional approval.

Assign the new Ambassador and Special Assistant to the President responsibility for developing, with all executive departments concerned, a new Executive order guiding division of responsibilities on administration of domestic and international food assistance and other hunger-related programs now cutting across agency lines

Designating an Ambassador on World Hunger firmly implants Presidential leadership on all such programs, gives the White House the opportunity to coordinate executive policy with the Commission on World Hunger, and responds to the intent of Congress while going even further to demonstrate the President's personal concern and leadership. The Ambasssador's role thus will complement and strengthen the work of the Commission.

Whatever else happens, some order must be brought out of the present administrative confusion concerning food assistance efforts in which the Department of Agriculture, the Department of Health, Education, and Welfare, the Agency for International Development, the Departments of State and Treasury, and the Office of Management and Budget are all involved. Instead of the normal interagency committee procedures, designation of a top public figure of the President's choice, acting in his name, will carry far more weight in bringing about administrative policy coordination without necessarily shifting actual operating responsibility from cabinet departments. The Ambassador's office could function with a minimal staff of a deputy knowledgeable about these programs, perhaps an economist and a writer detailed from departments concerned, and secretarial support.

There are ample precedents for establishing a special ambassadorial role out of the White House; the post and its functions would be similar to but broader in concept than the food for peace role filled at the White House by Senator GEORGE MCGOVERN back in the Kennedy era. It proved effective then in raising the level of concern with food aid, and in linking it more directly to the Presidency, and could do so again now.

As the author of House Resolution 784, it was always my intention that the Commission on World Hunger should perform a substantive rather than ornamental function. By having the President's Ambassador on World Hunger chair the Commission, its role will be significantly upgraded, giving it the scope of authority necessary to perform the task envisioned by Congress. Such executive leadership, carried out in consultation with Congress, will focus attention on developing a clearly defined and coordinated national food, hunger, and nutrition policy.

INTERVIEW WITH FORMER SPEAKER JOHN W. McCORMACK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts, (Mr. O'NEILL) is recognized for 5 minutes.

Mr. O'NEILL. Mr. Speaker, I would like to call to the attention of my colleagues an article in the December publication of Friar magazine. This magazine is published monthly by the Order of Friars Minor of New York.

In an interview with Barbara Craig of this magazine, our former Speaker, John McCormack, evaluates the Carter administration, the aftermath of Watergate and Vietnam, and discusses his busy daily schedule since retiring from the House of Representatives nearly 8 years ago. I have often travelled around Boston with the former Speaker and must say that his daily schedule is a difficult one even for people who are half his 85 years of age. Speaker McCormack is a very energetic, active member of the Boston community and has retained the same love of life, humor and compassion for this great Nation of ours that he always had when he served in the House of Representatives. While his whole life was that of a legislator, he has now found fulfilling opportunities to help in a very personal way the people whom he represented in the Congress for four decades.

I commend to the attention of my colleagues the following articles about the most well known and admired citizen of Boston, John W. McCormack.

JOHN W. MCCORMACK

"Hope for the best . . . be prepared for the worst."

(By Barbara Craig)

A strong hand is needed at the helm if the United States is to remain the world's greatest power, according to former Speaker of the House, the Honorable John W. McCormack.

"I believe Jimmy Carter will prove to be a great president," he said. "He has deep faith in the Almighty. We need such a man in the White House. Jimmy Carter has always had a good family life. He lives as he believes. We need a strong President, a deeply religious one. Jimmy Carter is such a man. It is my hope, and my prayer, he will get the United States back on the right track again. This is a great country. It can be so much greater."

The silver-haired Democrat, now 85, was interviewed in his office in the John W. McCormack Post Office Building in his home town of Boston, Massachusetts. McCormack, who retired in 1970 after 42 historic years in Congress, is still as alert and erect as he was during his years in Washington.

The retired Speaker was reluctant to discuss Richard Nixon, Watergate and related matters. "I don't believe in kicking a man when he's down," said the long time Democrat leader. "I'm not going to discuss Watergate. I do have my opinions, but I prefer to keep them to myself." As an afterthought, he added: "I did send Mrs. Nixon a letter at Christmas. I wanted her to know that her family still had John McCormack as a friend."

McCormack termed "isolationism" one of the great threats to the Nation's future. "No matter how we feel, we can't cut ourselves off from the rest of the world," he declared. "The wrong kind of public opinion can be a dangerous thing.

"Before Pearl Harbor, we had what I believe was a dangerous public opinion. I don't like to use the word dangerous, but I must. As a result, we were only able to squeeze the Selective Service bill through the House by one vote! Imagine what would have happened after Pearl Harbor, if the military draft was not operative. We would have lost thousands of lives while we were setting the machinery in motion. As it was, it took almost three years for this Nation to convert to full wartime production.

"Not too long ago, a wave of isolationism swept this country. It was after Vietnam. Isolationism was going full speed. Now I think that trend has stopped. I think the people are aware of our loss of direct influence in Southeast Asia. I think they are aware that, despite detente, the Soviet is still bent on world domination.

"Now I know the first law of survival is self preservation. And for that reason the idea of isolationism can be so contagious it is almost galloping. But we must oppose the idea. We can't lock ourselves away from our friends in other parts of the world. They need us, and we need them.

"Another thing. We cannot afford to live purely in a world of hope. We cannot just

hope for the best in the world situation. It is well to have our Government hope for the best, but we must always be prepared for the worst. We must remain strong, and always on the alert. We've got to be prepared before the fact. There will never be another after-the-fact opportunity. After Pearl Harbor in 1941, we were able to mend our wounds, and defeat our foes. We will never have another after-the-fact opportunity again."

The veteran legislator is extremely proud of the role he played in getting the Social Security Act on the books. "I led the fight in the Ways and Means Committee back in the thirties," he recalled. "I remember people called it Socialism. I used to stand up in Congress and say, 'You call it Socialism. I call it dynamic democracy in the industrial age!'

"I remember fighting to get the Bill through committee, and fighting for rapid advancement of this important legislation to what we called 'the top of the hill'. Many Bills made it to the top of the hill, but not over. And it was several years before we could get them back to the top again. The important thing was to get the Bill over the hill, so it could become law.

"In the beginning, there wasn't much money. But it was a start, and we were able to improve the Bill as the years went by. We had it on the book. That was the important first step. We were able to make improvements as the years went by. Don't worry. If Social Security runs into any financial problems in the future, Congress will pass the necessary legislation."

Despite his alleged retirement, McCormack has a daily schedule that would leave most younger men exhausted.

"I spend my days at the office," he revealed. "I get phone calls from all parts of the country. And there is usually a tremendous amount of mail. I bring home a dozen letters or so at night, and reply to them myself." In addition, the former Speaker is called upon to make countless appearances in the Boston area, where he is an authentic folk hero. During his half-century in Massachusetts and national politics, countless thousands of Bostonians have called upon John McCormack for help, and never once has he been known to fail them.

"I remember when I was only thirteen," stated the old time politician, "I was interested in politics even then. I used to love to attend the street corner rallies in South Boston where I grew up and listen to the politicians. Back then, the big issue was women's suffrage. Everybody was against it. There wasn't one politician who would speak out in favor of it.

"It was at those street corner rallies that I made up my mind about giving the women the right to vote. It was the first decision of a political nature I ever made. I would go home and look at my dear mother. I knew she was a citizen. It was only a question of marking a ballot. And I would say to myself, 'who dares tell me my mother can not vote as well as any man, and better than most?' "

When he was thirteen, McCormack's father, a bricklayer, died, and he became the man of the house. In addition to his mother, there were two younger brothers.

"I had a newspaper route," he recalled, "and that brought in some money. Still, I had to quit school. I never was able to attend high school, or college. I've always regretted that. I have great respect for the educated man. Education is one of the greatest investments any country can make.

"Still, if I had to make a choice between a man who was brilliant, but lacked common sense, and one who had a limited education and common sense, I'd take the latter man. In choosing my staff members, I always favored the man with common sense. It's a most important factor."

McCormack continued, "After I left school, I got a job with Western Union for a while, and then I went to work in a broker's office. I was making three dollars and fifty cents a week. Then William T. Way, a Boston lawyer, offered me a job for four dollars a week. I asked the broker if he could match it. He couldn't, so I went to work as an office boy in a law office. That extra fifty cents was the turning point in my life. The broker went out of business a year later. By that time, I had become interested in becoming a lawyer.

"Mr. Way, a wonderful man, encouraged me to read law, and he made all the books he had in his law library available to me. It seemed like a hopeless task, and the odds were against me. Still when I became discouraged, I would look at my dear wonderful mother and all my sadness would go away. I wanted to become a lawyer. I wanted her to be proud of me. I'm sorry to say she died five months before I passed the Massachusetts bar examination at the age of twenty-one."

For a while, McCormack served as a practicing attorney. But politics had captured his heart, and in 1917, he was elected to delegate to the Massachusetts Constitutional Convention. When World War I broke out, he resigned and enlisted in the Army. Later, he served in the Massachusetts House of Representatives from 1920 to 1922, and in the State Senate for three years.

In 1928, the voters of the 12th Congressional District sent the young politician to Congress. He remained there until his retirement in 1970. His memories are many.

"I remember back in 1945 when we were having coffee in a small room we called "The Board of Education,' " he stated, "Sam Rayburn was at the table with me. There were a couple of others too. Harry Truman was also at the table, and somebody came up and handed him a note. His face went white, I remember that. He stood up and said he had to go some place, and then left the room. Later that day, we learned that Franklin Delano Roosevelt had died, and Harry Truman had become President."

Then there was the matter of granting statehood to Alaska and Hawaii. "For some reason," he revealed, "Mr. Sam (Rayburn) felt that all states should be a part of the mainland of the United States. Lyndon had cleared the way in the Senate for statehood for Alaska and Hawaii. But Rayburn was slow in bringing the matter upon the floor of the House. He was Speaker at the time, and his approval was needed before a Bill could be introduced.

"Well, Lyndon and I kept talking to Sam. We kept at him. We didn't stop. And finally, after three or four weeks, Sam said, 'I will not stand in the way'. This meant he wasn't changing his position. He was still opposed to having states that were not part of the mainland. It also meant he wasn't going to prevent the statehood Bills from being introduced in the House. Later, statehood was granted to both Alaska and Hawaii."

With a smile, McCormack added "I think what won Sam over was that Lyndon and I kept telling him we should grant statehood while there was a Democratic Congress. We told him we didn't want the Republicans to get the credit later on."

There is one memory that still haunts the former Speaker. "It was during the early forties," he said. "At the time, I was majority leader. I was summoned to the White House by President Roosevelt along with Sam Rayburn and other key Congressional leaders. We knew it was going to be an important meeting because we were told that General George Marshall, Secretary of War Henry Stimson and other key administration officials were going to attend.

"At that meeting, President Rocsevelt told us he needed an appropriation of two billion dollars from Congress during the next two years. He said he needed it for a super weapon, but he did not reveal specific details.

"Rocsevelt said the appropriation would have to be kept a secret, because he did not want the Hitler government to know about it. He said the Hitler government was trying to build the same super weapon and if they did, the Germans would win the war overnight, no matter what we did on the battlefield. He said no matter how many victories we won, we'd lose the war if the Hitler government got the super weapon first.

"Naturally, we got Congress to appropriate the money. It was supposed to be funds for airplanes, ships and other war materials. But, with the White House's permission, we had to let members of the Subcommittee on Appropriations in on the secret.

"I remember that every night before I went to sleep I would say a prayer. I would pray to God that we got the super weapon first. Later, the atomic bomb was dropped, and the war ended. President Roosevelt told me we would lose a million men when we invaded Japan. The atomic bomb saved their lives. The weapons we have nowadays are much more powerful. They must never be used."

For fourteen months, after the assassination of John F. Kennedy, McCormack was the heir apparent to that Presidency in the event of the death of Lyndon B. Johnson. "Every night I said a prayer for Lyndon," he disclosed. "I prayed he would remain in good health, and that he would remain fit to perform the duties of President"

He paused for a moment, pondered what he had said, and then, with a trace of pride, added "I never wanted to be President, you know. My life was in the U.S. House of Representatives. I was a legislator. That was the life I loved."

CONGRESS SHOULD GO BACK TO LAST DECEMBER'S SOCIAL SECURITY BILL, AND DO IT RIGHT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. REUSS) is recognized for 20 minutes.

Mr. REUSS. Mr. Speaker, last December the Congress enacted a major social security financing bill in response to the loss of revenue caused by the recent recession and to projections that raised the threat of imminent exhaustion of our social security trust fund accounts. The bill will raise payroll taxes for both employers and employees by a cumulative sum estimated as $185 billion in the 8 years 1979 through 1986. It also effects reductions in benefit levels estimated to cumulate to $25 billion by 1986.

The social security bill subjects the economy to excessive and needless fiscal bludgeoning. All of the three proposals that led up to its adoption would have been sharply restrictive, and the final bill was worse than any of the alternatives. The President's initial proposal would have had a net deflationary budget impact of $37 billion in 1986. The impact of the House and Senate passed versions would have been $40 and $42 billion respectively. However, the version that emerged from conference and was eventually signed into law adopted higher tax rates, and larger benefit reductions, than any of the other proposals and will take a massive $47 billion out of the economy

in 1986. The staff of the Joint Economic Committee estimates that, unless offset by other policies, this bill will lower real GNP by about $60 billion in 1986 and it will raise the unemployment rate by close to 3 percent.

Although President Carter hailed passage of the bill as an outstanding legislative accomplishment, he could hardly have been thrilled that his two innovative proposals—to infuse general revenue into social security during times of high unemployment and to tax employers more heavily than employees—were both rejected by the Congress.

In my opinion, this legislation, which follows the traditional pattern of financing social security by means of payroll taxes split evenly between employers and employees, is an unmitigated disaster; I fail to see how anyone can be pleased with it.

As a result of this bill workers will be burdened with far higher regressive payroll taxes. Employers will have to pay higher payroll taxes that will raise labor costs, force them to raise prices, and cause them to lose sales and thus force them to curtail production and employment. Economists are appalled that Congress has learned so little that it would choose to raise taxes when unemployment is still above 6 percent. And those economists who have made special studies of payroll taxation view the new legislation as a serious threat to growth and price stability for the indefinite future.

I hope my fellow Members of Congress are as nervous about what we have done as I am. I am somewhat relieved that for the first time in the history of social security legislation we appear to appreciate the need to compensate for the adverse economic effects of the measure by granting tax relief elsewhere. In addition, the final bill wisely added no new taxes until 1979 in recognition of the circumstance that the recovery from the recession remains fragile and incomplete. What is missing is recognition that a reduction in income taxes does not fully offset the economic harm done by an equivalent increase in payroll taxes, and that such a policy of payroll tax offset by means of income tax reduction therefore amounts to a sort of "Gresham's Law" of taxation in which bad taxes are steadily replacing good taxes.

Why are payroll taxes so harmful?

The part paid by employees is a proportional tax on wages up to a maximum taxable base. Labor income in excess of the base is not taxed at all, nor is nonlabor income such as rents, royalties, interest, and dividends. The social security tax is therefore a highly regressive and unfair form of taxation.

To raise these taxes while lowering the progressive income tax causes the net progressivity of our overall tax system to be reduced. Those who approve of this sort of assault on the tax system argue that the adverse equity effects are illusory because higher social security contributions will also lead to higher benefits. But this is cold comfort for the low-income worker who pays the heavy taxes and has to wait 20 years or more before retirement permits the inequities he has suffered to be corrected.

Raising the employer portion of the social security tax has very adverse economic consequences. Although the initial impact of an increase in the employer's contribution may be to reduce profits, ultimately the tax increase is either shifted backward and reflected in a slower rate of wage increase or it is shifted forward and reflected in higher prices.

In the former case the tax increase simply acts as a regressive form of income tax. In the latter case—which many economists feel to be the more likely—the increased labor cost will be passed forward into higher prices. Because this reduces consumer real income, real consumer outlays will decline and production and employment will therefore fall. In addition, the higher prices will lower the real quantity of money so that unless the Fed steps up the rate of nominal monetary growth—which it is unlikely to do in the face of more inflation—interest rates will rise. This will curtail expenditures on home construction and slow the growth of capital spending as well. These developments, of course, will further reduce production and employment.

Simulation studies conducted by the Senate Budget Committee and the Joint Economic Committee staffs show that a fully forward shifted employer payroll tax increase may reduce employment by twice as much as an equivalent yield increase in income tax, and the payroll tax will cause the rate of inflation to be relatively higher as well. In view of this, a more destructive way to combat stagflation than the raising of payroll taxes can scarcely be imagined.

The Gresham's law of taxation to which I referred earlier has been underway for many years. In 1960 contributions for social insurance came to 18.3 percent of total Federal revenue. By 1965 they had risen to 20 percent, by 1970 to 26 percent, and by 1976 to 32 percent. According to current forecasts social insurance taxes will rise to 33 percent of Federal revenue in 1979. Therefore, whereas social insurance taxes were less than one-fifth of Federal revenue in 1960, they will amount to one-third or more less than 20 years later. Meanwhile, the share of personal income taxes has remained roughly constant at about 45 percent, while the share of corporate income taxes has dropped sharply from 22 percent in 1960 to 17 percent in 1976.

Even if there were no net harm done by replacing income taxes by payroll taxes, it is simply silly for Congress to go through the painful process of producing a social security financing bill only to have to go through another arduous legislative round to undo the economic damage. It is time to stop this time-consuming charade and recognize that the only sensible approach to the financing of social insurance is through resort to the general fund of the Treasury. This would open the full financial resources of the Government to social security and unemployment compensation and would enable us to stop raising economically harmful payroll taxes. Perhaps most important, the borrowing power of the Treasury would be available so that resort to the general fund would permit us to avoid raising taxes during periods of economic slack when tax increases of any sort are harmful.

Those who oppose this approach claim that general fund assistance would be viewed as converting social security into a "welfare" program and that such a step would therefore be opposed by the elderly who feel they have earned their retirement benefits. It is, however, noteworthy that both the American Association of Retired Persons and the National Council of Senior Citizens have told the staff of the JEC that they do not subscribe to this view. Indeed, these organizations have expressed their fear that continued increases in the payroll tax will create resentment on the part of today's workers, a resentment that could provoke a taxpayers' revolt and rupture the intergenerational income transfer process that is effected by the social security program. These groups know that today's retired person is supported by the taxes paid by today's workers, just as his taxes previously paid for the benefits of persons who retired while he was still working.

The most serious obstacle to the use of general fund assistance comes from Congress' lack of faith in itself. If the general fund spigot is turned on, runs the argument, we will find it too tempting to raise benefits in election years. The truth is that Congress has shown little sign of embarking on spending binges since the inception of the congressional budget process in fiscal year 1976, and that, if anything, our fiscal policies have been conservative.

Further, the exceedingly heavy and rising cost of social security will surely make us very leary of any election year benefit increases. At all events, the safest way to avoid this problem is to adopt the President's proposal to trigger general fund infusion automatically by linking them to the unemployment rate. That way Congress would still have to find additional funds if it chooses to change benefit levels.

The social security system is already more heavily dependent on general revenues than some Members of Congress care to admit. The unshifted part of the employer's tax is a business cost which reduces profits and the business income tax liabilities of firms. Also, the earned income credit was passed in 1974 with the understanding that its purpose was to rebate the social security taxes paid by low-income workers. Finally, several of the recent proposals considered by Congress involved the use of general fund assistance. Specifically:

The administration proposed that between 1978 and 1980 funds be transferred from the general fund to social security when the unemployment rate exceeds 7 percent.

The House relied on equal payroll tax increases for both employee and employers. In order to maintain this parity

of employer and employee contributions and still generate sufficient revenue during recessions, the bill would have authorized Social Security to borrow general revenues if the assets of the social security trust funds drop below 25 percent of the preceding year's benefits.

The Senate bill adopted the President's proposal to raise the wage base for employers above that for employees. This measure was supported by the Finance Committee because no additional pension entitlements would be created, and also because it was thought that employers could deduct these higher payroll taxes from their taxable business income.

The realization by nonprofit institutions and State and local governments that they would not be able to charge a fraction of higher social security taxes against business income taxes produced complaints that prompted Senator DANFORTH to introduce two amendments to the Senate bill. The first amendment provided State and local government and nonprofit institutions with a 10-percent reduction in their social security tax liabilities. The second amendment provided that the revenue losses that result from the first amendment would be made up by transfers from the general fund. Ironically, from 1979 through 1986 the Senate bill would have transferred $13.5 billion of general revenues, about the same amount as proposed by the administration and previously rejected by the Senate.

I am led to the conclusion that we are only deceiving ourselves if we think we can preserve the fiction that social security is and should be financed from strictly earmarked payroll taxes. The payroll tax issue will not go away. The unemployment insurance system is currently in a financial shambles, and Congress will have to deal with that problem before long. Furthermore, a serious slowdown in the economy or unexpectedly adverse demographic or productivity trends would put social security right back into financial difficulty.

Because of the long-term demographic shift toward an older population, increased per capita contributions by the working population are necessary to support the retired. But further payroll tax rate and base increases will bring in relatively fewer dollars from relatively fewer, and increasingly burdened, employers and employees. Resorting to general revenues will be essential if our tax system is not to become oppressively inequitable and harmful to economic growth and price stability.

The payroll tax alternative is bound to become less and less acceptable to the present generation of workers. As James N. Morgan, an expert on social security, has said:

Simply raising payroll taxes on current workers will surely create a cumulative and massive problem for the future. When those generations get to retirement age they can appropriately ask why, since they paid much higher payroll taxes, they don't get proportionately higher benefits. We could postpone the showdown a while by raising payroll taxes again, but the problem would recur with the next generation.

Congress is kidding itself if it thinks it has solved the social security problem. It is time for a change. I suggest we undo the damage we have done by repealing the 1977 social security bill except for its decoupling provisions. Let us go back to the drawing board for a sensible solution. It is not as if there were none in sight.

H.R. 9718—CONSUMER REPRESENTATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. METCALFE) is recognized for 10 minutes.

Mr. METCALFE. Mr. Speaker, on January 31, 1978, the chairman and three members of the Consumer Protection and Finance Subcommittee of the Interstate and Foreign Commerce Committee circulated a "Dear Colleague" letter in support of H.R. 9718, the Consumer Protection Representation and Reorganization Act.

Because some of my colleagues may not have seen this letter, I am inserting it in the RECORD at this point.

SUBCOMMITTEE ON CONSUMER PROTECTION AND FINANCE, COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE,
Washington, D.C., January 31, 1978.

DEAR COLLEAGUE: As members of the Consumer Protection Subcommittee we have a special interest in legislation to create an Office of Consumer Representation. Since our Subcommittee has legislative and oversight jurisdiction over independent regulatory agencies, we have had an opportunity to observe how important it is that consumers be actively represented during the agency decision-making process.

Agency commissioners, administrators, and administrative law judges make daily decisions affecting the lives of consumers. These decisions are made after the agency holds informal and adjudicatory hearings designed to give interested consumers and businesses and opportunity to be heard on the proposed agency action. Unfortunately, all too often the consumer goes unrepresented in these hearings. This means that the decision maker is denied the benefit of hearing vigorous debate on the issue by representatives of both sides. As a consequence, the quality of the agency's decision suffers and the public loses.

Data compiled by the Senate Governmental Affairs Committee show how one-sided participation in agency rulemaking is now. According to the Committee's report "Public Participation in Federal Regulatory Agency Proceedings":

"At the FTC there were 843 industry submissions vs. 130 consumer group submissions for a trade regulation rule on the hearing aid industry.

"In an FTC proceeding on warranty terms, there were 346 industry submissions and 77 trade association submissions vs. 21 consumer group submissions.

"In the FTC proceeding on care labeling of textile products there were 172 industry submissions vs. 60 public interest group submissions."

The Office of Consumer Representation would correct this problem by serving as a legal advocate for the consumer viewpoint before the other agencies. The regulatory agencies will still be the ultimate decision-makers, but OCR will assure that the consumer viewpoint will be adequately represented. This means there will be a more balanced hearing record and ultimately more balanced agency decisions.

We urge you to vote for H.R. 9718 as a sensible step toward increasing consumer representation in the federal regulatory process.

Sincerely,

BOB ECKHARDT,
Chairman,
RALPH H. METCALFE,
CHARLES J. CARNEY,
JAMES H. SCHEUER.

LEGISLATION TO CREATE CENTRAL LIQUIDITY FACILITY ADMINISTERED BY NATIONAL CREDIT UNION ADMINISTRATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island (Mr. ST GERMAIN) is recognized for 30 minutes.

Mr. ST GERMAIN. Mr. Speaker, today I am joining with my colleague, HENRY S. REUSS, chairman of the House Committee on Banking, Finance and Urban Affairs, in the introduction of legislation to create a central liquidity facility (CLF) administered by the National Credit Union Administration.

For nearly five decades the credit union movement in the United States has attempted to create effective vehicles to meet its various liquidity requirements. Central liquidity legislation of one kind or another has been introduced in each of the last 20 Congresses. The more recent efforts were a result of our beloved and distinguished former colleague, Chairman Wright Patman. These bills all failed, principally because the credit union movement and its regulatory agencies could not agree upon the specific structure and functions of such a CLF.

This legislation addresses the problems of the past and is a result of many months of discussion, study, and drafting by all elements of the credit union community. The National Credit Union Administration, the National Association of Federal Credit Unions, the Credit Union National Association have worked very closely in the drafting of this legislation and are in agreement with the purpose, operation, and control of the CLF proposed by this legislation. This break from the past periods of disagreement and lack of unanimity in the credit union community is most heartening. A CLF for credit unions is no longer a luxury; it is an absolute necessity.

With the near unanimous passage of Public Law 95–22, credit unions were granted broad new lending authorities. These new powers, such as long-term mortgage lending, self-replenishing lines of credit, removal of the secured and unsecured loan limits, a broad grant of leeway investment authority, and certificates of deposit at various rates and terms, can potentially impair the liquidity needs of credit unions. In our actions earlier in this Congress, credit unions were provided with the ability to enhance their services to their ever-increasing membership, and, therefore, provide the financial consumers of this country with greater saving and lending alternatives. We believe the CLF will enable credit unions to offer their new

services and at the same time insure that these new powers will enhance and not detract from the basic financial services currently provided by credit unions.

The traditional sources of external liquidity for credit unions have been commercial banks, central credit unions, and other credit unions. In many cases, the reliability of these sources is easily threatened, as was the case during the more recent credit crunch periods when competition for funds was intense. At such times, commercial banks, credit unions, and all other financial institutions suffer the same liquidity pressures. In the past, the existing system of corporate credit unions has served the credit union industry well. These corporate credit unions, while relatively new to the movement, have, in most instances, been able to provide the necessary liquidity through their local, regional, and national network.

However, corporate central credit unions are vulnerable to seasonal fluctuations in share and loan demands, as are other credit unions. When money is tight, credit unions are forced to call their loans to centrals or withdraw their share investments. Large deposits at centrals tend to be "hot money," moving elsewhere when most needed by other credit unions. Compounding this vulnerability to seasonal fluctuations in share and loan demands and liquidity needs are the new powers which this Congress granted to Federal credit unions. If corporate central credit unions are to continue to provide the excellent service they have in the past, they must no longer be subject to seasonal or short-term credit adjustments or to protracted adjustments in the event of unusual or emergency circumstances.

The CLF, as proposed by this legislation, would offer credit unions a reliable source of liquidity, which will greatly enhance the existing system of corporate central credit unions. If the existing system of corporate central credit unions fail to supply the capital needed at reasonable rates, credit unions will be able to call upon the CLF for its needs. The CLF would have at its disposal a broad spectrum of approaches—short- and long-term advances, discounting of notes, national interlending, and most importantly, the open market. The mere existence of a CLF as an alternative source of liquidity will greatly enhance the credit unions' bargaining position in dealing with local money sources. If the local institutions are unable or unwilling to accommodate the credit union at reasonable rates, credit unions will then be able to turn to a greatly enhanced system of corporate centrals for the necessary funds. All U.S. financial institutions, except credit unions, have liquidity sources available to them, and the knowledge of these liquidity sources often impells local institutions to provide maximum accommodation.

Most importantly, it is not the intention of this legislation to create a new Federal network requiring a huge bureaucracy, overwhelming amounts of paperwork, and great sums of tax dollars. Quite to the contrary, the CLF as proposed by Chairman REUSS and myself, will, among other things, recognize and utilize the existing private system of Federal and State corporate central credit unions as the operational agents of the CLF. By utilizing this private system, the CLF will avoid costly duplication and will greatly enhance the availability of a reliable and stable source of liquidity for all of its members.

Credit unions are an integral element of our financial system. Their growth and service were certainly recognized in the passage of Public Law 95–22. We must not allow the new powers, which can and will impair liquidity, to alter the excellent services credit unions have provided in the past. We must provide credit unions with a central liquidity facility. For many years, credit union competitors have had such sources of liquidity administered by the Federal Reserve Board and the Federal Home Loan Bank Board. I urge all of my colleagues to join with Chairman REUSS and myself in the introduction, support, and passage of a central liquidity facility administered by the National Credit Union Administration.

A copy of the bill, as well as a section-by-section analysis, are attached for inclusion in the RECORD.

NATIONAL CREDIT UNION CENTRAL LIQUIDITY FACILITY ACT

SECTION-BY-SECTION ANALYSIS

Section 101—Amends the Federal Credit Union Act to add a new subchapter providing for a Central Liquidity Facility (CLF).

Section 301—States principal purpose of CLF is to improve financial stability by meeting credit union liquidity needs.

Section 302—Defines scope of credit union "liquidity needs" which include emergency, seasonal, and protracted needs for credit assistance.

Section 303—Establishes a Central Liquidity Facility within NCUA and under NCUA management.

Section 304—Sets forth requirements for CLF membership. Credit Unions primarily serving natural persons may be Regular members by purchasing CLF stock. Credit unions primarily serving other credit unions may be Agent members by purchasing CLF stock and agreeing to submit to NCUA regulations and supervision, and to perform intermediary functions on behalf of the CLF. The minimum stock purchase for both Regular and Agent members is one-half of one percent of the paid-in capital and surplus of the credit union itself or the credit unions it serves.

Section 305—Provides the CLF authority to issue capital stock and requires that at least one-half of the stock a credit union subscribes to, in order to become a CLF member, must be paid for at the time of membership. The remainder may be held in call by the member and must be invested in assets acceptable to NCUA.

Section 306—Authorizes a member credit union to apply to the CLF for extensions of credit to meet its liquidity needs, and enables the CLF to extend the needed credit on whatever terms and conditions are appropriate. The Treasury Department is also authorized to lend to the CLF up to $500 million if the CLF does not have sufficient funds to meet the credit union liquidity needs.

Section 307—Authorizes the NCUA Administrator, on behalf of the CLF, to manage the CLF, to promulgate regulations needed to operate the CLF, and to borrow from outside sources with or without a U.S. Government guarantee so long as U.S. guaranteed borrowings do not exceed 20 times the subscribed capital stock and surplus of the CLF. The Administrator may also borrow up to $500 thousand from the NCUA Share Insurance Fund to cover CLF start-up expenses and is authorized to represent the CLF in court, hire additional staff, and enter into contracts.

Section 308—Authorizes the GAO to conduct full and unrestricted audits of the CLF.

Section 309—Mandates that an annual review of CLF activities be made a part of the NCUA annual report.

Section 102—Provides for conforming amendments enabling Federal credit unions to purchase CLF stock and to borrow freely from the CLF.

Section 103—Amends 18 U.S.C. 709, to reserve names and initials relating to the "National Credit Union Administration," the "Central Liquidity Facility," and the "Share Insurance Fund," for exclusive use of NCUA, in order to minimize the possibility of fraudulent use of the names and initials.

AMTRAK'S FINE TRAIN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from West Virginia (Mr. STAGGERS) is recognized for 5 minutes.

Mr. STAGGERS. Mr. Speaker, needless to say, recent emergencies caused by severe winter storms have made all of us aware of travel difficulties. It is my sincere feeling the necessity for having adequate rail passenger service has been reemphasized.

I would like to call to the attention of my colleagues the article "Amtrak's Fine Train" in the Martinsburg Journal, Martinsburg, W. Va., of January 21, 1978, by Paul B. Martin, editor. I have known him for over 30 years, and Mr. Martin runs one of the finest newspapers in West Virginia. I do respect his judgment.

The article praises the service and convenience of Amtrak's "Shenandoah," which serves passengers between Washington, D.C., and Cincinnati, Ohio. The editorial is representative of numerous comments I have heard about this service.

"Buck" Martin's firsthand experience is great evidence, I believe, that passenger service on Amtrak does seem to be improving across the Nation. I feel that the preservation of rail service must continue to be essential as part of our national transportation system. The editorial follows:

[From the Martinsburg (W. Va.) Journal, Jan. 21, 1978]

AMTRAK'S FINE TRAIN

A couple of weeks ago we had some comments to make about Amtrak and our personal problems in arranging for a ticket to travel from Martinsburg to Cincinnati and back.

Well, we finally got our ticket and took our ride and we think Amtrak is deserving of a considerable amount of praise for the way The Shenandoah, the train from Washington to Cincinnati and back, is operated.

It has only two cars plus locomotive but the cars are comfortable, with reclining seats. The cars are also clean, the personnel is friendly and courteous and helpful and riding on the rails is easy. The train also runs

on time. There are clean restrooms and even special dressing rooms. One car is reserved for non-smokers and the other for smokers, so everyone should be happy. There is also a cafe which serves sandwiches, breakfasts and all types of drinks (alcoholic and non-alcoholic).

The trip from Martinsburg to Cincinnati takes 13 hours. The round trip fare is only $48, much cheaper than driving an automobile or flying in an airplane. Perhaps the nicest part of the trip, particularly in midwinter, is that all you have to do is get to the station, board the train and sit back and relax, without a worry in the world concerning the weather. In fact, coming back from Cincinnati we were joined by some folks whose commercial plane had been grounded by weather.

We congratulate Amtrak on its fine train, The Shenandoah, and recommend it highly to anyone looking for convenient and comfortable and economic means of travel.

EXPORT-IMPORT BANK FINANCING NOTIFICATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. NEAL) is recognized for 5 minutes.

Mr. NEAL. Mr. Speaker, I call to the attention of my colleagues three communications from the Export-Import Bank which have been referred to me as chairman of the Banking Subcommittee on International Trade, Investment, and Monetary Policy. The communications notify the Congress of three proposed Eximbank transactions to assist in the construction and operation of nuclear powerplants in the Republic of China, Brazil, and Spain.

Section 2(b)(3)(iii) of the act requires the Bank to notify the Congress of proposed loans or financial guarantees for nuclear-related exports at least 25 days of continuous session of the Congress prior to the date of final approval. Upon expiration of this period, the Bank may give final approval to the transaction unless the Congress dictates otherwise.

In the first transaction, the Bank proposes to extend an additional loan of $23,400,000 to Brazil's electric power company to assist in the purchase of U.S. goods and services to be used in modification and completion of that country's first nuclear powerplant. Eximbank has previously made loans and guarantees totaling $163,920,000 in conjunction with this project. The new credit proposed by Eximbank will cover 60 percent of the total cost of additional U.S. goods and services for the project. The loan will bear interest at the rate of 8¾ percent per annum and will be repayable over a 12-year period commencing June 30, 1979.

In the second transaction, the Bank proposes to extend a loan of $106,800,000 to the Republic of China's power company to assist in the purchase of U.S. uranium ore and its conversion, enrichment, and fabrication for use as fuel cores in the fifth and sixth nuclear powerplants built on Taiwan. Eximbank previously made loans and guarantees totaling $297,000,000 in conjunction with the financing of these two nuclear powerplants. The new credit proposed by Eximbank will cover 75 percent of the total cost of additional U.S. goods and services for the project. The loan will bear interest at the rate of 8¼ percent per annum and will be repayable over a 4-year period commencing October 31, 1984.

In the third transaction, the Bank proposes to extend a loan of $17,470,050 to finance the increased U.S. costs being incurred by Spain's electric utility companies in the construction of a nuclear powerplant. Eximbank previously authorized financial support totaling $114,412,200 in conjunction with the financing of the nuclear powerplant. The new credit proposed by Eximbank will cover 85 percent of the total costs of additional U.S. goods and services for the project. The loan will bear interest at the rate of 8¾ percent per annum and will be repayable over a 3-year period commencing July 10, 1981.

I am inserting the letters from the Eximbank pertaining to these transactions at this point in the RECORD and I welcome any comments any of my colleagues may wish to offer concerning these proposed loans:

EXPORT-IMPORT BANK
OF THE UNITED STATES,
Washington, D.C., January 19, 1978.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES,
The Speaker's Room,
Washington, D.C.

DEAR MR. SPEAKER: Pursuant to Section 2(b)(3)(iii) of the Export-Import Bank Act of 1945, as amended, Eximbank hereby submits a statement to the United States House of Representatives with respect to the following transaction:

A. DESCRIPTION OF TRANSACTION

1. Background and purposes

In late 1971, Eximbank authorized financial assistance of $138 million in the form of a credit of $69 million and a guarantee of commercial loans in an equal amount to Furnas Centrais Eletricas S.A. (FURNAS) to facilitate financing the U.S. costs for the Angra dos Reis Nuclear Power Plant, Brazil's first nuclear power plant, located on the coast between Rio de Janeiro and Sao Paulo. In May 1975, Eximbank increased the amount of its direct loan by $17.28 million and provided an additional guarantee of private bank loans of $8.64 million, for total Eximbank support of $163.92 million for this project. FURNAS has requested and Eximbank is prepared to provide an additional direct credit of $23.4 million.

FURNAS requires the additional financing for two primary reasons. First, in furtherance of the Government of Brazil's policy generally to conform to nuclear power plant guidelines reommended by the U.S. Nuclear Regulatory Commission (NRC), FURNAS has agreed to have its principal supplier, Westinghouse, revise its equipment supply and engineering services contract to allow for implementation of the latest NRC-recommended technical design criteria and safety standards. This policy is requiring ongoing reexamination and modification of the original designs of major plant components, together with the acquisition of additional plant-related equipment at a U.S. cost of approximately $16.0 million. These additional cost factors are common in current nuclear power plant projects as design technology of these plants continues to evolve. The equipment needed pursuant to plant modification includes components for upgraded piping systems, additional reactor components, a reactivity computer, additional controls, radiation protection equipment, laboratory equipment, security equipment and upgraded components included in many of the plant systems.

Second, FURNAS has requested Westinghouse to assume additional responsibilities in managing the project and coordinating the construction of the plant. FURNAS itself had performed this role but has now assigned it to Westinghouse, its major equipment and service contractor. These additional services will be performed by Westinghouse at a cost of approximately $14.2 million

In addition, FURNAS needs $5.0 million for the purchase of additional spare parts, $1.1 million for additional construction inspection services and $2.7 million to cover price escalation of equipment.

Eximbank considers the reasons for and the amount of the increased U.S. costs to be reasonable and necessary to complete this plant which is now scheduled for 1979.

2. Executive branch approval

In accordance with established procedures, Eximbank requested through the Department of State the views of the Executive Branch on the proposed transaction. State's Bureau of Oceans and International Environmental and Scientific Affairs advised that the Executive Branch has no objection to Eximbank's proceeding with this transaction. According to State, on the basis of its review of the proposed loan, it was decided that "U.S. non-proliferation objectives would best be served by our continued cooperation with Brazil on the Angra I project" and therefore the Executive Branch "recommended to the Nuclear Regulatory Commission that the export license for the initial fuel core of Angra I be issued." State noted further that "these decisions are consistent with and reinforce our stated policy of seeking more stringent safeguards for nuclear energy without impairing the significant contribution nuclear projects such as Angra I will make toward meeting the urgent and legitimate energy needs of Brazil as well as other countries."

3. Identity of the parties

FURNAS is the largest subsidiary of Eletrobras, which is the Federal Government of Brazil's electric power holding company. Since 1973 FURNAS has held the status of a regional power company responsible for the supply of power to Brazil's southeastern region and for the construction of all power developments and high voltage transmission systems of regional interest. FURNAS sells its power under long-term contracts to private and government-owned utilities.

The Federative Republic of Brazil will issue to Eximbank an unconditional guarantee for repayment of the Eximbank direct credit.

B. EXPLANATION OF EXIMBANK FINANCING

1. Reasons

The Eximbank direct credit of $23.4 million will facilitate the export of $39 million of U.S. goods and services. Eximbank perceives no adverse impact on the U.S. economy from the export of these goods and services. This transaction will have a favorable impact on employment for substantial numbers of United States workers, as well as on the United States balance of trade. Westinghouse has advised Eximbank that this sale will result in 2,984,000 manhours, which is equivalent to 1,435 man-years directly created. The majority of equipment and services will be supplied from Philadelphia, Pittsburgh and New York where the unemployment rates in September, 1977 were 6.9%, 6.1% and 8.5%, respectively. None of the goods to be exported are in short supply in the United States.

2. The financing plan

The total cost of United States goods and services to be purchased by FURNAS is $39 million which will be financed as follows:

	Amount	Percent of U.S. costs
Cash	$5,850,000	15
Eximbank credit	23,400,000	60
Private loans not guaranteed by Eximbank	9,750,000	25
Total	39,000,000	100

(a) Eximbank Charges.—The Eximbank Credit will bear interest at 8¾% per annum, payable semiannually. A commitment fee of 0.5% per annum will also be charged on the undisbursed portion of the Eximbank credit.

(b) The Eximbank credit and private loans, which total $33,150,000, will be repaid by the borrower in 24 semiannual installments beginning on June 30, 1979. Under this schedule, the first 7 installments and a portion of the 8th installment will be applied to repayment of the private loans and a portion of the 8th and all of the last 16 installments will be applied to repayment of the Eximbank direct credit.

Sincerely,

JOHN L. MOORE,
President and Chairman.

EXPORT-IMPORT BANK
OF THE UNITED STATES,
Washington, D.C., January 31, 1978.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES,
The Speaker's Room,
Washington, D.C.

DEAR MR. SPEAKER: Pursuant to Section 2(b)(3)(iii) of the Export-Import Bank Act of 1945, as amended, Eximbank hereby submits a statement to the House of Representatives with respect to the following transaction involving U.S. exports to the Republic of China.

A. DESCRIPTION OF TRANSACTION

1. Background and purpose

In mid-1974, Eximbank authorized financial assistance of $297 million in the form of a direct credit of $198 million and a guarantee of commercial loans in the amount of $198 million and a guarantee of commercial loans in the amount of $99 million to Taiwan Power Company (Taipower) to facilitate financing the U.S. costs of equipment, materials and services for the Maanshan Nuclear Power Plants No. 1 and No. 2 on the island of Taiwan. These plants were the fifth and sixth nuclear power projects in Taiwan. At the time no financial assistance was requested for the initial fuel core.

Taipower now requests financial assistance for the purchase in the United States of the initial fuel cores for the two Maanshan Power Plants and Eximbank is prepared to extend a direct credit of $106.8 million to Taipower for financing the purchase and export of uranium ore and its conversion, enrichment and fabrication for the initial fuel cores. Westinghouse Electric Corporation will be responsible for yellow-cake procurement and coordination of conversion and enrichment services, and will provide the fabrication services. The U.S. Department of Energy will provide the enrichment services. The total cost of the uranium and services is estimated to be $194 million which will be provided by the Eximbank direct credit, $48.5 million in private loans unguaranteed by Eximbank and a cash payment of $38.8 million.

2. Identity of the parties

Taipower, organized in 1946, is a corporation 95% owned by the Republic of China and its political subdivisions. It has the sole responsibility for the supply of electricity throughout the island of Taiwan. Taipower is one of the largest users of Eximbank's programs for its U.S. purchases and has maintained an excellent credit relationship with Eximbank.

The Ministry of Finance of the Republic of China will issue to Eximbank an unconditional, full faith and credit guarantee for repayment of the Eximbank direct credit.

3. Executive branch approval

In accordance with established procedures, Eximbank has requested through the Department of State the views of the Executive Branch on the proposed transaction. The Department of State's Bureau of Oceans and International Environment and Scientific Affairs has no objection to Eximbank's proceeding with this transaction. The Department of Energy advises that there is no actual or potential shortage of uranium ore in the United States; the enrichment services are covered by an existing contract with that Department; and there is more than sufficient capacity available for the fuel fabrication by U.S. firms.

B. EXPLANATION OF EXIMBANK FINANCING

1. Reasons

The Eximbank direct credit of $106.8 million will facilitate the export of $194 million of U.S. goods and services.

Eximbank perceives no adverse impact on the U.S. economy of these exports. This transaction will have a favorable impact on employment for substantial numbers of U.S. workers, as well as on the United States balance of trade. Westinghouse has advised Eximbank that its part of the transaction will result in 1,393 man-years of jobs created. The bulk of the Westinghouse work will be supplied from Pittsburgh, Pennsylvania and Columbia, South Carolina, which had unemployment rates of 6.9 and 4.7 percent respectively as of June 30, 1977. None of the goods or services to be exported are in short supply in the United States. While no actual foreign competition has been cited for this transaction, yellow-cake is available in South Africa, Canada and Australia; some enrichment facilities are available in Europe; and fabrication capabilities exist in many of the industrial nations.

2. The Financing plan

The total cost of United States goods and services for the initial fuel cores is $194,126,000, which will be financed as follows:

	Amount	Percent of U.S. costs
Cash	$38,825,200	20.0
Eximbank credit	106,769,300	55.0
Private loans not guaranteed by Eximbank	48,531,500	25.0
Total	194,126,000	100.0

(a) Eximbank charges.—The Eximbank direct credit will bear interest at the rate of 8.25 percent per annum, payable semiannually. A commitment fee of 0.5 percent per annum also will be charged on the undisbursed portion of the Eximbank credit.

(b) Repayment Terms.—The Eximbank direct credit and private loans, which total $155,300,800, will be repaid by the Borrowers in 6 semiannual installments (i) beginning October 31, 1984 for disbursements for the Maanshan No. 1 plant; and (ii) beginning July 31, 1985 for disbursements for the Maanshan No. 2 plant. Under the first repayment schedule, the first 3 installments will be applied to repay related disbursements under the private loans; and all the last 3 installments will be applied to repay related disbursements under the Eximbank direct credit. Under the second repayment schedule a portion of the first installment will be applied to repay related disbursements under the private loans and the balance of this schedule will be applied to repay related disbursements under the Eximbank direct credit.

Sincerely,

JOHN L. MOORE,
President and Chairman.

EXPORT-IMPORT BANK OF THE
UNITED STATES,
Washington, D.C., February 1, 1978.

The SPEAKER OF THE HOUSE OF
REPRESENTATIVES,
The Speaker's Room, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to Section 2(b)(3)(iii) of the Export-Import Bank Act of 1945, as amended, Eximbank hereby submits a statement to the United States House of Representatives with respect to the following transaction involving U.S. exports to Spain.

A. DESCRIPTION OF TRANSACTION

1. Background and purpose

In April, 1973, Eximbank authorized financial support in the form of a direct loan of $49,033,800, a guarante of private bank loans of $49,033,800 and a local cost guarantee of offshore loans of $16,344,600 to four Spanish electric utilities—Fuerzas Electricas de Cataluna, S.A. (FECSA), Empresa Nacional Hidroelectrica del Ribagorzana, S.A. (ENHER), Hidroelectrica de Cataluna, S.A. (HEC) and Hidroelectrica del Segre, S.A. (SEGRE) (Borrowers) for the ASCO II nuclear power plant, located on the Ebro River in the Province of Tarragona, 135 KM West of Barcelona. This plant is the companion plant to the contiguous ASCO I nuclear plant. The Borrowers have requested, and Eximbank is prepared to provide, an additional direct loan of $17,470,050 to finance the increased U.S. costs being incurred by the Borrowers for the ASCO II project.

The Borrowers require the additional financing primarily for two reasons. First, to conform to nuclear power plant guidelines recommended by the U.S. Nuclear Regulatory Commission (NRC), the Borrowers have agreed to have their principal supplier, Westinghouse, upgrade its equipment supply and safeguard systems to permit implementation of the latest NRC-recommended technical design criteria and safety standards.

Second, Westinghouse is to provide additional engineering and project coordination services. In addition, the costs for fuel fabrication to be provided by Westinghouse and fuel enrichment to be undertaken by the U.S. Department of Energy have increased.

These increased costs, which are associated with evolving nuclear power plant technology and which were not included in the original design of the project, are common in current nuclear power projects. Eximbank considers the reasons for and the amount of the increased U.S. costs to be reasonable and necessary to complete construction of this project.

In connection with a two-year delay in the projected start of commercial operations of the ASCO II plant, commercial banks will provide loans of $20,965,000 to refinance the first four semiannual installments of the existing private financing for U.S. costs of the project. Since the installments to be refinanced are currently guaranteed by Eximbank, Eximbank's guarantee will apply to such new loans.

2. Approvals of other Government agencies

In accordance with established procedures, Eximbank requested through the State Department the views of the Executive Branch on the proposed transaction. State's Bureau of Oceans and International Environmental and Scientific Affairs advised that the Executive Branch has no objection to Eximbank's proceeding with this transaction. According to State, the Government of Spain has agreed to open discussions with the United States on amending its present nuclear agreement for cooperation to make it

consistent with new agreements under the pending U.S. non-proliferation legislation. However, the present agreement meets all of the "intial criteria contained in such legislation," and hence, "the Executive Branch believes that the Eximbank financing proposed . . . would be fully consistent with and supportive of U.S. non-proliferation objectives."

3. Identity of the parties

FECSA, a privately-owned company established in 1951 and headquartered in Barcelona, is Spain's third largest electric utility. It participates in the ownership of and financing for the project to the extent of 40 percent.

ENHER, incorporated in 1946, is a "national enterprise" corporation controlled by Instituto Nacional de Industria, an autonomous agency of the Spanish State established in 1941 to promote the establishment and reorganization of industrial enterprises important to the economic development of Spain. ENHER is the sixth largest electric utility enterprise in Spain and is a 40 percent participant in ASCO II.

HEC was incorporated in 1946 and is the twelfth largest electric utility in Spain. It is privately owned and is a 15 percent participant in the project.

SEGRE, a closely held private company, is the twenty-first largest electric utility in Spain and is a 5 percent participant in ASCO II.

4. Nature and use of goods and services

The principal goods and services to be exported from the United States in connection with the increased U.S. costs are design services, start-up assistance, project site coordination and inspection services to be provided by the Bechtel Corporation, and a matrix fuel assembly core and turbine generator equipment to be supplied by Westinghouse.

B. EXPLANATION OF EXIMBANK FINANCING

1. Reasons

The proposed extension by Eximbank of a $17,470,050 direct credit will facilitate $20,553,000 of additional exports in the form of U.S. goods and services and higher prices for previously-contracted items.

Eximbank perceives no adverse impact on the U.S. economy from the export of these goods and services. This transaction will have a favorable impact on employment for substantial numbers of U.S. workers, as well as on the U.S. balance of trade. None of the goods to be exported are in short supply in the U.S.

2. The financing plan

The total cost of additional United States goods and services to be purchased by the Borrower is approximately $20,553,000, which will be financed as follows:

	Amount	Percent of U.S. Costs
Cash	$3,082,950	15
Eximbank credit	17,470,050	85
Total	20,553,000	100

(a) Eximbank Charges.—The Eximbank credit will bear interest at the rate of 8¾% per annum, payable semiannually on outstanding balances. A commitment fee of ½ of 1% per annum also will be charged on the undisbursed portion of the Eximbank credit.

Eximbank will charge a guarantee fee of 1% per annum on disbursed amounts of the new refinancing commercial bank loan and a commitment fee of ⅛ of 1% on the undisbursed amounts of such loan.

(b) Repayment Terms.—The portion of the Eximbank credit for additional plant costs will be repaid by the Borrowers in 20 semiannual installments commencing on July 10, 1981.

The portion of the Eximbank credit for additional fuel costs will be repaid by the Borrowers in 6 semiannual installments commencing on July 10, 1981.

Sincerely,

JOHN L. MOORE, Jr.

H.R. 9718, LEGISLATION TO CREATE AN OFFICE OF CONSUMER REPRESENTATION HAS SUPPORT OF BUSINESS EXECUTIVES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. PREYER) is recognized for 5 minutes.

Mr. PREYER. Mr. Speaker, below is the text of a letter that I recently received from the National Coalition for the Consumer. This letter not only points out some of the benefits of this legislation and clears up some of the misunderstanding surrounding it, but also points out the fact that a number of businessmen and corporations also support the legislation. I include it for the information of my colleagues.

NATIONAL COALITION FOR THE CONSUMER,
Washington, D.C., February 4, 1978.

DEAR MEMBER OF THE HOUSE OF REPRESENTATIVES: Through this letter we want to tell you why a group of concerned business executives support HR 9718, a bill to create an Office of Consumer Representation.

The idea of creating a small office to represent consumers before independent regulatory and executive branch agencies is not a radical idea. Congress has debated it for about eight years. In those eight years Congress has delegated more and more power to unelected regulators to make law. We frankly like the idea of having a small office, consolidated and created from existing programs, with the express job of finding out what consumers are saying and sharing consumer views with federal decision makers.

The deletion of special gathering powers in HR 9718 eliminated fears some business leaders had about being asked questions by the consumer office.

We believe it unreasonable for us to object to a small consumer office having the same rights of judicial review of regulators' decisions as those now enjoyed by companies and trade associations. Indeed, we feel that failure to accord consumers these same rights of representation could erode the confidence and continued vitality of our institutions of government and enterprise. We note with appreciation that the sponsors of HR 9718 have proposed that the consumer office will also represent the consumer interests of small business, many of whom suffer from the same deficiencies of representation before regulators as does the average consumer.

The proposed consumer office won't test products. It won't have authority to set up a vast or regional bureaucracy. It won't issue any regulations over business.

It will be mandated to ferret out conflicting or duplicative regulations that burden business and consumers unnecessarily, and thus will help hold down costs. It will automatically terminate in five years if, in Congress' judgment, it fails to do its primary job of representing consumer interests.

We, the undersigned, represent a larger group of business executives who believe the consumer office is needed to increase consumer confidence and consumer presence in government. (See attached list.) We don't consider ourselves consumer activists, but we wouldn't be responsible business executives if we were blind to consumer needs. H.R. 9718 is in our interest as well as in the interest of your constituents.

We urge your support for H.R. 9718 without weakening amendments.

Sincerely,

John W. Hechinger, Chairman, President, Hechinger Co.; Lawrence S. Phillips, President, Phillips Van Heusen Corp; Paul S. Forbes, Vice President for Communications and Public Affairs, Drug Fair; Avram Goldberg, President, The Stop & Shop Companies; Allen I. Bildner, Vice Chairman, President, Kings Super Markets, Inc.; Peter T. Jones, Senior Vice President and General Counsel, Levi Strauss & Co.; Sylvia Laurenti, Vice President, Consumers and Public Affairs, Consumers United Group, Inc.; Sidney Milwe, President, Stratford Town Fairs.

PERSONAL EXPLANATION

(Mr. RINALDO asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. RINALDO. Mr. Speaker, I rise in order to explain my absence from the floor earlier today.

Although I was scheduled to arrive in Washington this morning, the snowstorm currently blanketing much of the Northeast closed both LaGuardia and Newark Airports, resulting in the cancellation of all flights to Washington. Although I obtained space on a Metroliner, my arrival was necessarily delayed.

LEAVES OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. TRAXLER (at the request of Mr. WRIGHT), for today, on account of inclement weather conditions.

To Mr. PEPPER (at the request of Mr. WRIGHT), for today, on account of official business.

To Mr. HUGHES (at the request of Mr. WRIGHT) for today, on account of inclement weather conditions.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. COLEMAN) and to revise and extend their remarks and include extraneous matter:)

Mr. CONABLE, for 60 minutes, on February 9.

Mr. CORCORAN of Illinois for 5 minutes, today.

Mr. WHALEN, for 5 minutes, today.

Mr. SEBELIUS, for 10 minutes, today.

ADJOURNMENT

Mr. PANETTA. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 41 minutes p.m.), the House adjourned until tomorrow, Tuesday, February 7, 1978, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3167. A letter from the Secretary of Defense, transmitting the annual report of the Department of Defense for fiscal year 1979; to the Committee on Armed Services.

3168. A letter from the President and Chairman, Export-Import Bank of the United States, transmitting a draft of proposed legislation to amend and extend the Export-Import Bank Act of 1945, as amended; to the Committee on Banking, Finance and Urban Affairs.

3169. A letter from the President and Chairman, Export-Import Bank of the United States, transmitting a statement describing a proposed transaction involving nuclear facilities with four Spanish electric utilities, pursuant to section 2(b)(3)(iii) of the Export-Import Bank Act of 1945, as amended (88 Stat. 2335; 91 Stat. 1210); to the Committee on Banking, Finance and Urban Affairs.

3170. A letter from the senior vice president, Potomac Electric Power Co., transmitting the company's balance sheet as of December 31, 1977, pursuant to section 8 of the act of March 4, 1913 (37 Stat. 979); to the Committee on the District of Columbia.

3171. A letter from the comptroller, Washington Gas Light Co., transmitting the company's balance sheet as of December 31, 1977, pursuant to section 8 of the act of March 4, 1913 (37 Stat. 979); to the Committee on the District of Columbia.

3172. A letter from the Deputy Assistant Secretary of Defense (Administration), transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

3173. A letter from the General Counsel, Copyright Office, Library of Congress, transmitting notice of two proposed new records systems, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

3174. A letter from the Assistant Secretary of the Interior for Indian Affairs, transmitting a proposed plan for the use and distribution of the funds awarded to the Confederated Tribes of the Colville Reservation for and on behalf of the Joseph Band of Nez

Perce before the Indian Claims Commission in docket 186, pursuant to sections 2(a) and 4 of Public Law 93–134; to the Committee on Interior and Insular Affairs.

3175. A letter from the Chief Commissioner, U.S. Court of Claims, transmitting a report on the allowance of attorney expense claims in docket No. F–8, Estate of Stanley J. McCutcheon, Clifford J. Groh, Ronald G. Benkert, and William A. Greene, pursuant to section 20 of the Alaska Native Claims Settlement Act; to the Committee on Interior and Insular Affairs.

3176. A letter from the Chairman, Advisory Council on Historic Preservation, transmitting a report on the results of a study of ways to protect and enhance the historic resources in and around Gettysburg, Pa., pursuant to section 202(b) of the National Historic Preservation Act; to the Committee on Interior and Insular Affairs.

3177. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a draft of proposed legislation to authorize a supplemental appropriation for the extension of credit and the issuance of guaranties under the Arms Export Control Act for the fiscal year 1978, and for other purposes, to the Committee on International Relations.

3178. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the State Department's intention to consent to a request by the Government of Portgual for permission to transfer certain U.S.-origin military equipment to the Government of Colombia, pursuant to section 3(a) of the Arms Export Control Act; to the Committee on International Relations.

3179. A letter from the Assistant Secretary of State for Congressional Relations, transmitting the second report on the extent to which the Republic of Korea is cooperating with the Department of Justice investigation into allegations of improper activity in the United States by agents of the Republic of Korea, pursuant to section 28 of Public Law 95–92; to the Committee on International Relations.

3180. A letter from the Staff Secretary, National Security Council, transmitting notice of delays in the preparation of arms control impact statements for fiscal year 1979, required by section 36(b) of the Arms Control and Disarmament Act, as amended (89 Stat. 758); to the Committee on International Relations.

3181. A letter from the president, Gorgas Memorial Institute of Tropical and Preventive Medicine, Inc., transmitting notice of a delay in preparation of the Institute's annual report for fiscal year 1977, required by section 3 of the act of May 7, 1928, as amended; to the Committee on International Relations.

3182. A letter from the Chairman, Japan United States Friendship Commission, transmitting the first annual report of the Commission, covering fiscal year 1977, pursuant to section 5(b) of Public Law 94–118; to the Committee on International Relations.

3183. A letter from the Administrator, Energy Information Administration, Department of Energy, transmitting the monthly report on sales of refined petroleum products for October 1977, pursuant to section 4(c)(2)(A) of the Emergency Petroleum Allocation Act of 1973; to the Committee on Interstate and Foreign Commerce.

3184. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation under the authority of section 244(a)(1) of the Immigration and Nationality Act, together with a list of the persons involved, pursuant to section 244(c) of the act; to the Committee on the Judiciary.

3185. A letter from the Administrator, National Aeronautics and Space Administration, transmitting a report on professional and scientific positions established in the agency during calendar year 1977, pursuant to 5 U.S.C. 3104(c); to the Committee on Post Office and Civil Service.

3186. A letter from the Secretary, Railroad Retirement Board, transmitting a report on positions in grades GS–16, 17, and 18 during calendar year 1977, pursuant to 5 U.S.C. 5114(a); to the Committee on Post Office and Civil Service.

3187. A letter from the Administrator of General Services, transmitting an amendment to the approved prospectus for the Charles R. Jonas Federal Building, Charlotte, N.C., pursuant to section 7(a) of the Public Buildings Act of 1959, as amended; to the Committee on Public Works and Transportation.

3188. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to authorize appropriations to carry out the Standard Reference Data Act; to the Committee on Science and Technology.

3189. A letter from the Comptroller General of the United States, transmitting a report on enforcement of fair housing laws (CED–78–21, February 2, 1978); jointly, to the Committees on Government Operations, Banking, Finance and Urban Affairs, and the Judiciary.

3190. A letter from the Comptroller General of the United States, transmitting a report on handgun control (PAD–78–4, February 6, 1978); jointly, to the Committees on Government Operations and the Judiciary.

3191. A letter from the Chairman, U.S. Nuclear Regulatory Commission, transmitting a draft of proposed legislation to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes; jointly, to the Committees on Interior and Insular Affairs, International Relations, and Interstate and Foreign Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

[*Pursuant to the order of the House on Feb. 2, 1978, the following report was filed on Feb. 3, 1978*]

Mr. NEDZI: Committee on House Administration. H.R. 5981. A bill to amend the American Folklife Preservation Act to extend the authorizations of appropriations contained in such act; with amendment (Rept. No. 95–865). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ALLEN:

H.R. 10751. A bill to create a National Academy of Medicine, under the direct supervision of the Surgeon General, for the education and training of doctors of medicine, and other medical specialists who shall serve in the Regular Corps of the Public Health Service as commissioned officers thereof, to amend the Public Health Service Act, as amended (42 U.S.C. 201 et seq), and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ANNUNZIO (for himself and Mr. RICHMOND):

H.R. 10752. A bill to make additional immigrant visas available for immigrants from certain foreign countries, and for other purposes; to the Committee on the Judiciary.

By Mr. CUNNINGHAM (for himself, Mr. FOLEY, Mr. COUGHLIN, Mr. DORNAN, Mr. LAGOMARSINO, Mr. MANN, Mr. RYAN, and Mr. HARRINGTON):

H.R. 10753. A bill to amend the act commonly known as the Black Bass Act to provide further protection for steelhead trout, and for other purposes; jointly, to the Committees on Interior and Insular Affairs and Merchant Marine and Fisheries.

By Mr. MIKVA (for himself, Mr. BRODHEAD, Mr. GEPHARDT, Mr. TUCKER, and Mr. WIRTH):

H.R. 10754. A bill to amend the Social Security Act and the Internal Revenue Code of 1954 to provide that disability insurance benefits and the medicare program shall be financed from general revenues (pursuant to annual authorizations) rather than through the imposition of employment and self-employment taxes as at present, and to adjust the rates of such taxes (for purposes of financing the OASI programs) accordingly; to the Committee on Ways and Means.

By Mr. SCHULZE:

H.R. 10755. A bill to amend the Internal Revenue Code of 1954 to reduce individual income taxes; to the Committee on Ways and Means.

By Mr. GIAIMO:

H.R. 10756. A bill to rescind certain budget authority contained in the message of the President of January 27, 1978 (H. Doc. 95–285), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 10757. A bill to rescind certain budget authority contained in the message of the President of January 27, 1978 (H. Doc. 95–285), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 10758. A bill to rescind certain budget authority contained in the message of the President of January 27, 1978 (H. Doc. 95–285), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

By Mr. SIMON:

H.R. 10759. A bill to establish a national system of financing child and maternal health care and a system of protection against catastrophic health care costs, and to improve and expand health care for the elderly; jointly, to the Committees on Interstate and Foreign Commerce and Ways and Means.

By Mr. PHILLIP BURTON:

H.R. 10760. A bill to amend the act of October 2, 1968, an act to establish a Redwood National Park in the State of California, and for other purposes; jointly, to the Committees on Interior and Insular Affairs, and Education and Labor.

By Mr. DUNCAN of Tennessee:

H.R. 10761. A bill to amend part II of the Interstate Commerce Act to exempt motor vehicles used in the transportation of members of certain religious organizations from the application of such part, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. FORD of Michigan (for himself, Mr. QUIE, Mr. BALDUS, Mr. PHILLIP BURTON, Mr. CLAY, Mr. CONYERS, Mr. DIGGS, Mr. DUNCAN of Oregon, Mr. EILBERG, Mr. FARY, Mr. FAUNTROY, Mr. FRENZEL, Mr. JOHNSON of California, Mr. LAFALCE, Mr. MIKVA, Mr. MITCHELL of Maryland, Mr. MOAKLEY, Mr. RODINO, Mr. ROSENTHAL, Mr. BIAGGI, Mr. STEIGER, Mr. THOMPSON, Mr. VAN DEERLIN, Mr. WINN, and Mr. MURTHA):

H.R. 10762. A bill to authorize funds for the Hubert H. Humphrey Institute of Public Affairs; to the Committee on Education and Labor.

By Mr. GAMMAGE:

H.R. 10763. A bill to amend the Internal Revenue Code of 1954, title 26 of the United States Code, to provide that taxpayers who itemize deductions may deduct from taxable income an amount equal to the amount of social security taxes paid during the taxable year, or, in lieu of such deduction, any taxpayer may claim a tax credit in the amount of 15 percent of the amount of such social security taxes paid, whichever results in greater savings; to the Committee on Ways and Means.

By Mr. HAGEDORN:

H.R. 10764. A bill to direct the Secretary of Agriculture not to further limit, restrict, or prohibit the use of nitrites or nitrates as preservatives in meat products for a period of 2 years, and for other purposes; to the Committee on Agriculture.

By Mr. HIGHTOWER:

H.R. 10765. A bill to provide wheat, feed grain and cotton producers the opportunity to receive parity prices for the 1978 through 1981 crops; to the Committee on Agriculture.

By Mr. HILLIS (for himself, Mr. DORNAN, and Mr. BUCHANAN):

H.R. 10766. A bill to amend the Internal Revenue Code of 1054 to allow taxpayers to treat certain federally required nonproductive expenditures as not chargeable to capital account and as currently deductible; to the Committee on Ways and Means.

By Mr. HYDE:

H.R. 10767. A bill to amend the Internal Revenue Code of 1954 to allow taxpayers to individuals filing separate returns the income tax rates applicable to unmarried individuals, and for other purposes; to the Committee on Ways and Means.

By Mr. JEFFORDS:

H.R. 10768. A bill to establish an incentive program for producers to cull dairy cattle; to the Committee on Agriculture.

By Mr. JONES of Tennessee:

H.R. 10769. A bill to amend the Rural Electrification Act of 1936, as amended, to provide for the financing of telecommunication facilities for cable television and other broadband services in small towns and rural areas; to the Committee on Agriculture.

By Mr. LAGOMARSINO (for himself and Mr. PATTERSON of California):

H.R. 10770. A bill to provide rental assistance under section 8 of the U.S. Housing Act of 1937 for owners of mobile homes who rent the real property on which their mobile homes are located; to the Committee on Banking, Finance and Urban Affairs.

By Mr. MAGUIRE:

H.R. 10771. A bill to strengthen and improve the early and periodic screening, diagnosis, and treatment program, to establish a National Commission on Preventive Health, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Ms. MIKULSKI (for herself, Mrs. SPELLMAN, Mr. BEDELL, Mr. BROYHILL, Mr. BURGENER, Mr. CLEVELAND, Mr. COUGHLIN, Mr. EDGAR, Mr. GOODLING, Mr. HARRINGTON, Ms. HOLTZMAN, Mrs. LLOYD of Tennessee, Mr. MARTIN, and Mr. MATHIS):

H.R. 10772. A bill to amend title 39, United States Code, to prevent deceptive business solicitations by providing that any such solicitation which is designed to resemble a bill or statement of account shall be nonmailable matter; to the Committee on Post Office and Civil Service.

By Ms. MIKULSKI (for herself, Mrs. SPELLMAN, Mr. MITCHELL of Maryland, Mr. MOSS, Mr. OTTINGER, Mr. PATTERSON of California, Mr. PRICE, Mr. RICHMOND, Mr. ROSENTHAL, Mr. SARASIN, Mr. SOLARZ, Mr. STARK, Mr. WEISS, and Mr. WHITLEY):

H.R. 10773. A bill to amend title 39, United States Code, to prevent deceptive business solicitations by providing that any such solicitation which is designed to resemble a bill or statement of account shall be nonmailable matter; to the Committee on Post Office and Civil Service.

By Mr. MONTGOMERY (for himself, Mr. APPLEGATE, Mr. ICHORD, Mrs. HOLT, Mr. SIMON, Mr. FUQUA, Mr. ADDABBO, Mr. WAMPLER, Mr. SPENCE, Mr. LLOYD of California, Mr. WHITTEN, Mr. FLORIO, Mr. CHARLES WILSON of Texas, Mr. CORNWELL, Mr. YOUNG of Missouri, Mr. EMERY, Mr. D'AMOURS, Mr. CHAPPELL, Mr. DANIELSON, Mr. JOHN T. MYERS, Mr. HOLLAND, Mr. JENRETTE, Mr. PREYER, Mr. LEHMAN, and Mr. PANETTA):

H.R. 10774. A bill to amend title 38, United States Code, to improve the pension programs for veterans, and survivors of veterans, of the Mexican border period, World War I, World War II, the Korean conflict, and the Vietnam era, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. NEDZI (for himself, Mr. PERKINS, Mr. OTTINGER, Mr. BEDELL, Mr. KAZEN, Mr. PREYER, Mr. PEPPER, Mr. WOLFF, Mr. COHEN, Mr. RODINO, Mr. ROE, Mr. CONTE, Mr. LUNDINE, Ms. HOLTZMAN, Mr. CARR, Mr. LEVITAS, Mr. ADDABBO, Mr. ENGLISH, Mr. EILBERG, Mr. BAUCUS, Mr. HUGHES, Mr. MIKVA, Mr. PANETTA, Mr. WAXMAN, and Mr. WEISS):

H.R. 10775. A bill to establish a Hubert H. Humphrey Fellowship in Social and Political Thought at the Woodrow Wilson International Center for Scholars at the Smithsonian Institution and to establish a trust fund to provide a stipend for such fellowship; to the Committee on House Administration.

By Mr. NEDZI (for himself, Mr. PRITCHARD, Mr. BRODHEAD, Mr. CORMAN, Mr. TRAXLER, Mr. PATTEN, Mr. AKAKA, Mr. VAN DEERLIN, Mr. MOAKLEY, Mr. GUDGER, Mr. BOLAND, Mr. FISHER, Mr. KREBS, Mr. BUCHANAN, Mr. GUYER, Mr. BOLLING, Mr. DERWINSKI, Mr. HORTON, Mr. BURKE of Massachusetts, Mr. RUSSO, Mr. LEGGETT, Mr. WHALEN, Mr. ERTEL, Mr. WHITEHURST, and Mr. LAFALCE):

H.R. 10776. A bill to establish a Hubert H. Humphrey Fellowship in Social and Political Thought at the Woodrow Wilson International Center for Scholars at the Smithsonian Institution and to establish a trust fund to provide a stipend for such fellowship; to the Committee on House Administration.

By Mr. NEDZI (for himself, Mr. MCCORMACK, Mr. RICHMOND, Mr. MANN, Mr. PATTERSON of California, Mr. MCHUGH, Mr. RYAN, Mr. MINETA, and Mr. ZEFERETTI):

H.R. 10777. A bill to establish a Hubert H. Humphrey Fellowship in Social and Political Thought at the Woodrow Wilson International Center for Scholars at the Smithsonian Institution and to establish a trust fund to provide a stipend for such fellowship; to the Committee on House Administration.

By Mr. REUSS (for himself and Mr. ST GERMAIN):

H.R. 10778. A bill to amend the Federal Credit Union Act in order to improve the efficiency and flexibility of the financial system of the United States by establishing within the National Credit Union Administration a Central Liquidity Facility for Federal and State credit unions, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

H.R. 10779. A bill to amend the Federal Credit Union Act in order to improve the efficiency and flexibility of the financial system of the United States by establishing within the National Credit Union Administration a Central Liquidity Facility for Federal and State credit unions, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. SEBELIUS:

H.R. 10780. A bill to amend the terms and conditions of the producer storage program for wheat and feed grains to provide incentives for participation by farmers; to the Committee on Agriculture.

By Mr. SEBELIUS (for himself, Mr. SKUBITZ, Mr. WINN, Mr. THONE, Mr. JOHNSON of Colorado, and Mr. MARLENEE):

H.R. 10781. A bill to provide wheat, feed grain and cotton producers the opportunity to receive parity prices for the 1978 crops; to the Committee on Agriculture.

By Mr. SEIBERLING:

H.R. 10782. A bill to amend title I of the Higher Education Act of 1956 to establish a system of grants for urban universities; to the Committee on Education and Labor.

H.R. 10783. A bill to authorize the recovery of damages by indirect purchasers injured in their business or property by reason of anything forbidden in the antitrust laws, and for other purposes; to the Committee on the Judiciary.

By Mr. SMITH of Iowa (for himself and Mr. CONTE):

H.R. 10784. A bill to amend the Internal Revenue Code of 1954 to provide tax relief to small businesses by establishing a graduated income tax rate for corporations; to the Committee on Ways and Means.

By Mr. UDALL:

H.R. 10785. A bill to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 10786. A bill to amend Public Law 95-209 to increase the authorization for appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. UDALL (for himself and Mr. RONCALIO) (by request):

H.R. 10787. A bill to authorize appropriations for activities and programs carried out by the Secretary of the Interior through the Bureau of Land Management; to the Committee on Interior and Insular Affairs.

By Mr. COLLINS of Texas:

H.J. Res. 713. Joint resolution proposing an amendment to the Constitution of the United States relative to abolishing personal income, estate, and gift taxes and prohibiting the U.S. Government from engaging in business in competition with its citizens; to the Commttee on the Judiciary.

By Mr. FOUNTAIN:

H. Res. 1005. Resolution directing the Committee on Interstate and Foreign Commerce to conduct hearings to determine whether Federal safety standards for hang gliders are desirable and to determine the appropriate Federal agency to administer such standards; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally read as follows:

By Mr. BAUCUS:

H.R. 10788. A bill for the relief of the Mondakota Gas Co.; to the Committee on the Judiciary.

By Mr. MCFALL:

H.R. 10789. A bill for the relief of Marion Charlotte Williams; to the Committee on the Judiciary.

By Mrs. SMITH of Nebraska:

H.R. 10790. A bill for the relief of Dr. Francisco Dozon and his wife, Luzviminda Dozon; to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 6805

By Mr. BLOUIN:

Page 33, line 5, strike out the colon and insert in lieu thereof the following: "(except to communicate information under paragraph (1) (B) or (2) of this section)".

Page 33, line 13, insert "agency" after "any" and insert "or activity" after "proceeding".

Page 33, line 12, strike out "and (B)" and insert in lieu thereof "(B) export and import policies, (C)".

Page 33, line 15, strike out "(2) in any proceeding concerning" and insert in lieu thereof "(D)".

Page 33, line 16, insert before the period the following: ", or (2) in any agency proceeding or activity under the Export Administration Act of 1969 relating to any agricultural commodity".

Page 33, line 5, strike out the colon and insert in lieu thereof the following: "(except to communicate information under paragraph (1) (B) or (2) of this section)".

Page 33, line 5, insert "agency" after "any" and insert "or activity" after "proceeding".

Page 33, line 12, strike out "and (B)" and insert in lieu thereof "(B) export and import policies, (C)".

Page 33, line 15, strike out "(2) in any proceeding concerning" and insert in lieu thereof "(D)".

Page 33, line 16, insert before the period the following: ", or (2) in any agency proceeding or activity under the Export Administration Act of 1969 relating to any agricultural commodity".

By Mr. GLICKMAN:

Strike out all after the enacting clause of the amendment in the nature of a substitute made in order by House Resolution 872, and insert the following:

That this Act may be cited as the "Consumer Protection Act of 1977".

SEC. 2. DECLARATION OF POLICY.

(a) FINDINGS.—The Congress finds and declares the following:

(1) In the execution of its constitutional and statutory responsibilities, the Federal Government and the agencies thereof—

(A) should consistently, completely, and adequately represent the interests of consumers;

(B) should not promulgate regulations or adopt policies without first developing and considering information as to their impact on consumers; and

(C) should act in such manner as to protect and serve the interests of consumers.

(2) The most effective and cost-efficient way to assure such representation and protection of consumers is to establish—

(A) an independent Office of Consumer Counsel within each significant operating unit of the executive branch of the Federal Government; and

(B) a Division of Consumer Protection and Advocacy in the Department of Justice to assist and support such Offices and to serve as the coordinating agency for consumer advocacy.

(b) PURPOSES.—

(1) It is the purpose of the Congress in this Act to reorganize each significant operating unit of the executive branch to the extent necessary to assure that each such unit, through an independent Office of Consumer Counsel, maintains internal processes and procedures for adequately representing, protecting, and serving the interests of consumers at all stages in, and in all phases of, the formulation, implementation, and review of policies, programs, regulations, and legislative recommendations.

(2) It shall be the specific purpose of each Office to represent the interests of consumers before and within the Federal agency of which it is a part; to receive, transmit, evaluate, and report on consumer complaints; to develop and disseminate information of interest to consumers; and to perform other functions to protect and promote the interests of consumers. In the exercise of its functions, powers, and duties, each such Office shall be independent of all other offices and officers of the agency of which it is a part.

(3) It shall be the specific purpose of the Division of Consumer Protection and Advocacy of the Department of Justice, in addition to such other functions as may be assigned to such Division by law or by the Attorney General, to—

(A) provide data, information, advocacy-training, and other appropriate services to each Office and to provide a forum for coordinating the activities and assuring the independence and effectiveness of the Offices;

(B) assist any Consumer Counsel in representing the interests of consumers before the relevant Federal agency;

(C) promote, through appropriate litigation, legislative recommendation, and recommendations to any Office the protection of consumers with respect to—

(i) the safety, quality, purity, potency, healthfulness, durability, performance repairability, effectiveness, dependability, availability, truthful representation, and cost of any goods, services, credit or other property;

(ii) assuring consumer choice and competitive markets;

(iii) preventing unfair or deceptive trade practices and restraints on trade; and

(iv) the legal rights and access of consumers to speedy, effective, and inexpensive mechanisms for the resolution of consumer contraversies.

SEC. 3. DEFINITIONS.

As used in this Act, unless the context otherwise requires—

(1) The term "agency action" include the whole or any part of an agency "rule", "order", "license", "sanction", or "relief" (as defined in section 551 of title 5, United States Code), or the equivalent thereof, the denial thereof, or the failure to act.

(2) The term "agency activity" means any agency process, or phase thereof, conducted pursuant to any authority, or responsibility under law.

(3) The term "agency proceeding" means agency "rulemaking", "adjudication", or "licensing" (as defined in section 551 of title 5, United States Code).

(4) The term "commerce" means trade, traffic, commerce, or transportation, (A) between a place in a State and any place outside of such State, or (B) which affects trade, traffic, commerce, or transportation described in clause (A).

(5) The term "consumer" means any individual who uses, purchases, acquires, attempts to purchase or acquire, or is offered or furnished any goods, services, credit, or other property for personal, family, agricultural, or household purposes.

(6) The term "Consumer Counsel" means, with respect to a Federal agency, the officer who is appointed pursuant to this Act to represent the interest of consumers in accordance with this Act.

(7) The term "Federal agency" or "agency" means the Departments of Agriculture, Defense, Commerce, Energy, Health, Education, and Welfare (other than the Food and Drug Administration), Housing and Urban Development, Interior, Labor, Transportation, and Treasury; the Civil Aeronautics Board; the Consumer Product Safety Commission; the Environmental Protection Agency; the Federal Communications Commission; the Federal Maritime Commission; the Federal Trade Commission; the Interstate Commerce Commission; the Food and Drug Administration; the National Transportation Safety Board; the Securities and Exchange Commission; the General Services Administration; the Small Business Administration; the Postal Rate Commission; and any successors thereto.

(8) The term "Federal court" means any court of the United States.

(9) The term "interest of consumers" means any substantial health, safety, or economic concern of consumers involving goods, services, credit, or other property, or the advertising or other representation thereof, which is or may become the subject of any commercial offer or any transaction affecting commerce or which may be related to any term or condition of such offer or transaction. Such offer or transaction need not involve the payment or promise of a consideration.

(10) The term "Office" means any Office of Consumer Counsel established pursuant to section 4 of this Act.

(11) The term "participation" includes any form of submission.

(12) The term "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, the Canal Zone, Guam, American Samoa, and the Trust Territory of the Pacific Islands.

(13) The term "submission" means participation through the presentation or communication of relevant evidence, documents, arguments, or other information.

SEC. 4. ESTABLISHMENT.

(a) OFFICES OF CONSUMER COUNSEL.—

(1)(A) There shall be established within each Federal agency, within 60 days after the date of enactment of this Act and pursuant to a plan of reorganization prepared by the head of each such agency to provide for adequate representation of the interests of consumers, an independent Office of Consumer Counsel. Such reorganization shall provide that all existing consumer offices and staff within such agency shall be combined into that agency's Office of Consumer Counsel.

(B)(i) Except to the extent prohibited by law, the Director of the Office of Management and Budget is authorized and directed to review all other Federal programs and activities which have a consumer information advocacy, or related function and identify those which would overlap, duplicate, or conflict with the functions performed by these Offices. This review shall be carried out as a part of the President's first budget review process following establishment of the Office.

(ii) The Director of the Office of Management and Budget shall, one week after the submission of the President's budget to the Congress, report to the Committees on Appropriations and Government Operations of the House of Representatives and Appropriations and Governmental Affairs of the Senate the results of the review required by paragraph (1) of this subsection. Such report shall include (A) all activties identified as a part of the Office of Management and Budget's review; (B) a description of those activities including their costs during the fiscal year and how those activities overlap, duplicate, or conflict with the responsibilities of these Offices; and (C) the budgetary recommendations to the Congress to eliminate such activities.

(iii) Nothing in this subsection shall be construed to prohibit the Director of the Office of Management and Budget from including in the report required by paragraph (2) of this subsection, comments on the consumer related activities of independent regulatory agencies that overlap, duplicate, or conflict with the functions performed by these Offices.

(2) Each such Office shall be directed and administered by a Consumer Counsel. Each Consumer Counsel shall be appointed by the President, by and with the advice and consent of the Senate, for a fixed term of office not to exceed 3 years. The terms of office of the Consumer Counsel appointed initially shall be staggered, in a manner compatible with the oversight responsibilities of the Congress, to assure that all such terms do not expire simultaneously. Each Consumer Counsel shall be compensated at a rate not in excess of the maximum rate for GS–18 of the General Schedule under section 5332 of title 5, United States Code. Each Consumer Counsel shall be an individual who, by reason of training or experience, and attainments, is qualified to represent effectively and independently the interests of consumers. Upon the expiration of his term of office, each Consumer Counsel shall continue in office until reappointment or until the appointment and qualification of his successor

(b) DIVISION OF CONSUMER PROTECTION AND ADVOCACY IN THE DEPARTMENT OF JUSTICE.—

(1) There is established, within the Department of Justice, a Division of Consumer Protection and Advocacy, which shall be directed by the Assistant Attorney General for Consumer Protection and Advocacy.

(2) Chapter 31 of title 28, United States Code, is amended by adding immediately after section 507 thereof, the following new section 507a:

"§ 507a. Assistant Attorney General for Consumer Protection and Advocacy

"The President shall appoint, by and with the advice and consent of the Senate, an As-

sistant Attorney General for Consumer Protection and Advocacy, pursuant to the Consumer Protection Act of 1977.".

(3) The analysis of chapter 31 of title 28, United States Code, is amended by adding at the appropriate place the following new item:

"507a. Assistant Attorney General for Consumer Protection and Advocacy.".

(4) Paragraph (19) of section 5315 of title 5, United States Code, is amended by striking out "(9)" and inserting in lieu thereof "(10)".

SEC. 5. POWERS AND DUTIES OF EACH CONSUMER COUNSEL.

(a) IN GENERAL.—Each Consumer Counsel shall be responsible for exercising the powers, duties, and functions provided for in this Act.

(b) SPECIFIC POWERS AND DUTIES.—Each Consumer Counsel may, in carrying out his functions under this Act and to the extent funds are appropriated—

(1) select, appoint, employ, and fix the compensation (subject to the civil service and classification laws) of such officers and employees as are necessary to carry out the provisions of this Act, and shall prescribe the authority and duties of officers and employees;

(2) employ and pay the expenses of experts and consultants, in accordance with section 3109 of title 5, United States Code, at daily rates (including traveltime) not in excess of the maximum rate of pay for grade GS–18, as provided in section 5332 of such title 5;

(3) promulgate, in accordance with the applicable provisions of chapter 5 of title 5, United States Code, such rules, regulations, and procedures as may be necessary to carry out the provisions of this Act and to assure fairness to all affected persons;

(4) delegate authority for the performance of any function to any officer or employee under his direction and supervision;

(5) utilize, with their consent, the services, personnel, and facilities of State, regional, local, and private agencies and instrumentalities;

(6) accept voluntary uncompensated services, notwithstanding the provisions of section 3679(b) of the Revised Statutes (31 U.S.C. 665(b));

(7) conduct conferences and hearings and otherwise secure data and expression of opinion;

(8) accept unconditional gifts or donations of services, money, or property (real, personal, or mixed, tangible or intangible);

(9) designate representatives to maintain effective liaison with (A) the Assistant Attorney General for Consumer Protection and Advocacy, (B) other Offices, and (C) State and local agencies carrying out programs and activities related to the interests of consumers; and

(10) perform such other administrative activities as may be necessary for the effective fulfillment of his duties and functions.

(c) REPORTS.—Each Consumer Counsel shall prepare and submit a quarterly report, on the activities of his Office to the head of the Federal agency of which such Office is a part and to the Assistant Attorney General for Consumer Protection and Advocacy. The annual report of each Federal agency shall include a separate section, which shall be prepared independently by the Consumer Counsel for such agency, on the consumer protection activities of such agency and on such agency's effectiveness in representing, protecting, and serving the interests of consumers. Each such separate section of each such annual report shall include, but not be limited to, a description and analysis of—

(1) the activities of the Office including its representation of the interests of consumers;

(2) the relevant Federal agency actions and Federal court decisions affecting the interests of consumers;

(3) the appropriation by Congress for the Office, the distribution of appropriated funds for current fiscal year, and a general estimate of the resource requirements of the Office for each of the next 3 fiscal years; and

(4) the extent of participation by consumers in the activities of the Office, and the effectiveness of the representation of consumers before the agency of which the Office is a part.

(d) DUTIES OF EACH FEDERAL AGENCY.—Each office and officer of the agency of which an Office is a part shall provide such Office with such information and data as the Consumer Counsel requests, except as provided in section 11 of this Act. The budget requests and budget estimates of each Office shall be submitted by the agency of which it is a part directly to the Congress, and moneys appropriated for the use of such Office shall not be used by the agency of which it is a part for any other purpose.

SEC. 6. FUNCTIONS OF EACH CONSUMER COUNSEL.

Each Consumer Counsel shall—

(1) represent the interests of consumers within and before the agency of which his Office is a part to the extent authorized by section 7 of this Act;

(2) conduct and support research, and studies, to the extent authorized by section 10 of this Act;

(3) submit recommendations annually, to the Assistant Attorney General for Consumer Protection and Advocacy, the appropriate committees of the Congress, and the head of the agency of which his Office is a part, on measures to improve the operation of such agency and of the Federal Government in general in the protection and promotion of the interests of consumers, including, but not limited to, any reorganization recommendations, and recommendations relative to the elimination of duplicative or unnecessary rules and regulations promulgated by such agency which it considers not to be in the consumers' interests;

(4) receive, transmit to appropriate officials, and make publicly available consumer complaints, to the extent authorized in section 8 of this Act;

(5) conduct conferences, surveys, and investigations, including economic surveys, concerning the needs, interests, and problems of consumers: *Provided*, That such conferences, surveys, or investigations are not duplicative in significant degree of similar activities conducted by other Federal officials or agencies;

(6) cooperate with State and local governments and encourage private enterprise in the promotion and protection of the interests of consumers;

(7) keep the appropriate committees of Congress fully and currently informed of all the activities of his Office;

(8) encourage the adoption and expansion of effective consumer education programs;

(9) encourage the application and use of new technology, including patents and inventions, for the promotion and protection of the interests of consumers;

(10) encourage the development of informal dispute settlement procedures involving consumers;

(11) encourage meaningful participation by consumers in the activities of his Office;

(12) publish information and material obtained and developed in carrying out his responsibilities under this Act, including, but not limited to, a consumer register of matters that may be useful to consumers; and

(13) perform other activities which are recommended by the Assistant Attorney General for Consumer Protection and Advocacy or which he deems necessary for the effective fulfillment of his duties and functions.

SEC. 7. REPRESENTATION OF CONSUMERS.

(a) ADMINISTRATIVE REPRESENTATION.—

(1) If a Consumer Counsel finds that the result of a relevant proceeding or activity of the Federal agency of which his Office is a part may substantially affect an interest of consumers, such Consumer Counsel may, as of right, intervene as a party or otherwise participate in such proceeding or activity, for the purpose of representing an interest of consumers. If a Consumer Counsel finds, with respect to the Federal agency of which his Office is a part, that the result of any relevant agency proceeding, which—

(A) is subject to the provisions of section 553, 554, 556, or 557 of title 5, United States Code;

(B) involves a hearing that is required by any statute, regulation, or practice;

(C) is conducted on the record after opportunity for an agency hearing; or

(D) is subject to a requirement of public notice and opportunity for comment,

may substantially affect an interest of consumers, such Consumer Counsel may, as of right, intervene as a party or otherwise participate in such proceeding, for the purpose of representing an interest of consumers. A Consumer Counsel shall refrain from intervening as a party in any proceeding unless such intervention is necessary to represent adequately an interest of consumers. Each Consumer Counsel shall comply with the relevant statutes and procedural rules of general applicability governing the timing of intervention or participation in such Federal agency proceeding or activity. Upon intervening or participating in a Federal agency proceeding or activity, a Consumer Counsel shall comply with any relevant statutes and procedural rules of general applicability. The intervention or other participation of a Consumer Counsel, pursuant to this subsection, shall not affect the obligation of the Federal agency involved to assure procedural fairness to all participants.

(2) The Assistant Attorney General for Consumer Protection and Advocacy may, upon the request of a Consumer Counsel, assist such Consumer Counsel in any such Counsel's intervention or other participation in that Counsel's Federal agency proceeding or activity, pursuant to this subsection, and may, in an appropriate circumstance, recommend such intervention or other participation to any applicable Consumer Counsel.

(3) Whenever a Consumer Counsel determines to intervene or otherwise participate in his agency's proceeding pursuant to this subsection, such Consumer Counsel shall publish in the Federal Register a statement setting forth his findings under paragraph (1) and the specific interest of consumers sought to be protected. Upon intervening or participating, such Consumer Counsel shall file a copy of such statement in the proceeding.

(b) JUDICIAL REPRESENTATION.—

(1) The Assistant Attorney General for Consumer Protection and Advocacy may, as of right, and in the manner prescribed by law for an aggrieved person, initiate, intervene, or otherwise participate in a civil action in a Federal court for the review of an agency action of any Federal agency if such Assistant Attorney General determines that such action may substantially affect an interest of consumers. If the applicable Consumer Counsel did not intervene or otherwise participate in the relevant Federal agency proceeding or activity out of which such agency action arose, the court shall determine whether the initiation of a judicial proceeding pursuant to this subsection would impede or would be necessary to preserve the interests of justice.

(2) If the Consumer Counsel believes that the initiation of a Federal civil action by the Assistant Attorney General, or the intervention in such Federal civil action, is war-

ranted, it shall recommend such action to the Assistant Attorney General, who shall take such action if the conditions outlined in subparagraph (1) of this section are met. The Consumer Counsel shall have no power and authority to initiate or intervene in any Federal court proceeding.

(3) The initiation of a judicial proceeding, or any other participation, by the Assistant Attorney General for Consumer Protection and Advocacy, in a judicial proceeding pursuant to this subsection shall not alter or affect the scope of review otherwise applicable to the agency action involved.

(c) REQUEST FOR JUDICIAL REVIEW.—Whenever a Consumer Counsel, or the Assistant Attorney General for Consumer Protection and Advocacy, determines it to be in the interest of consumers, he may request the relevant Federal agency to initiate a judicial proceeding for review, or to take such other action, as may be authorized by law with respect to such agency. If such Federal agency fails to take the action requested, it shall promptly notify such Consumer Counsel or Assistant Attorney General of its reasons therefor, and such notification shall be a matter of public record.

(d) TITLE OF APPEARANCES.—Appearances before a Federal agency by a Consumer Counsel under this Act shall be in the name of his Office and shall be made by qualified representatives designated by the consumer counsel involved. Appearances by the Assistant Attorney General for Consumer Protection and Advocacy shall be in the name of the United States unless the Attorney General otherwise provides, in which case such an appearance shall be in the name of such Assistant Attorney General, and shall be made by qualified representatives of the Department of Justice designated by such Assistant Attorney General and in appearance before Federal agencies by qualified representatives designated by the Consumer Counsel involved.

(e) POWERS.—A Consumer Counsel is authorized, with respect to any Federal agency proceeding in which such Consumer Counsel is intervening or otherwise participating, to request such Federal agency to issue such orders as it is authorized to issue pursuant to its statutory powers, for the copying of documents, papers, and records; for the summoning of witnesses and the production of books and papers; and for the submission of information in writing. Such Federal agency shall issue any such orders upon a statement or showing by such Consumer Counsel as to the general relevance or reasonableness thereof.

(f) PROHIBITION.—No Consumer Counsel is authorized to initiate or intervene in any proceedings or activity before any State or local agency or court.

(g) RULES CHANGES.—Each Federal agency shall review its rules of procedure of general applcability, and, after consultation with its Consumer Counsel, shall issue any additional rules or modifications of existing rules which may be necessary to provide for such Consumer Counsel's orderly intervention and other participation, in accordance with this section, in its proceedings and activities which may substantially affect the interests of consumers.

SEC. 8. CONSUMER COMPLAINTS.

(a) IN GENERAL.—Whenever a Consumer Counsel receives from any person any complaint or other information which discloses—

(1) an apparent violation of law, agency rule or order, or a judgment, decree, or order of a Federal court relating to an interest of consumers; or

(2) a commercial, trade, or other practice which is detrimental to an interest of consumers;

such Consumer Counsel shall, unless he determines that such complaint or information is frivolous or outside the jurisdiction of the agency of which his office is a part, promptly transmit such complaint or information to the Federal official which has the authority to enforce any relevant law or to take appropriate remedial action. Each Federal agency shall keep the appropriate Consumer Counsel informed to the greatest extent practicable of any action which it is taking on complaints transmitted by him.

(b) NOTIFICATION.—Each Consumer Counsel shall, to the greatest extent practicable, notify producers, distributors, retailers, lenders, or suppliers of goods, services, and credit of all complaints of any significance concerning them received or developed under this section, unless such Consumer Counsel determines that to do so is likely to prejudice or impede an action, investigation, or prosecution concerning an alleged violation of law.

(c) PUBLIC AVAILABILITY.—Each Consumer Counsel shall maintain a public document room for public inspection and copying (at a reasonable charge, not to exceed cost), containing an up-to-date listing of all consumer complaints of any significance which such Consumer Counsel has received, arranged in meaningful and useful categories, together with annotations of actions taken in response thereto. Unless a Consumer Counsel, for good cause, determines not to make any specific complaint available, complaints listed shall be made available for public inspection and copying: *Provided*, That—

(1) the party complained against has had a reasonable time to comment on such complaint and such comment, when received, is displayed together with the complaint;

(2) the Federal official to whom the complaint has been referred has had a reasonable time to notify the Consumer Counsel what action, if any, he intends to take with respect to the complaint; and

(3) no unsigned complaints shall be placed in the public document room.

(d) EVALUATION OF AND REPORTING ON COMPLAINT HANDLING PROCESSES.—Each Consumer Counsel shall evaluate the complaints received and transmitted and the effectiveness and efficiency with which such complaints are acted upon by the Federal agency of which his Office is a part. A summary of such evaluations, and recommendations for improvement, shall be included in the reports prepared by each such Consumer Counsel pursuant to section 5(c).

SEC. 9. CONSUMER INFORMATION.

(a) IN GENERAL.—In order to carry out the purposes of this Act, each Consumer Counsel shall—

(1) develop on his own initiative and shall, subject to the other provisions of this Act, gather from the other offices and officers of the Federal agency of which his Office is a part and from any other source; and

(2) disseminate to the public (in such manner, at such times, and in such form as he determines to be most effective) information, statistics, and other data, including, but not limited to, any matter over which such Federal agency has jurisdiction concerning—

(A) the functions and duties of the Office;

(B) consumer products and services;

(C) problems encountered by consumers generally or conditions, situations, developments, or practices which may adversely affect consumers; and

(D) an index of notices of hearings, proposed and final rules and orders, and other pertinent activities of such Federal agency that may affect consumers.

(b) DUTY OF COOPERATION.—All Federal agencies which possess information which would be useful to consumers shall cooperate with the appropriate Consumer Counsel in making information developed and gathered under subsection (a) available to the public in understandable form.

SEC. 10. STUDIES.

Each Consumer Counsel may conduct, support, or assist research, studies, plans, investigations, conferences, and surveys concerning the interests of consumers: *Provided*, That such activities are not unnecessarily duplicative of similar efforts by other Consumer Counsels for any Federal agency, or by similar efforts otherwise conducted by any Federal agency, and that such activities shall in no way constitute the creation of product-testing laboratories.

SEC. 11. ACCESS TO INFORMATION BY CONSUMER COUNSELS.

(a) IN GENERAL.—Upon written request by a Consumer Counsel, the Federal agency of which his Office is a part, shall furnish or allow access to all documents, papers, and records in its possession which such Consumer Counsel deems necessary for the performance of his functions and shall furnish, at cost, copies of specified documents, papers, and records. Notwithstanding this subsection, a Federal agency may deny a Consumer Counsel access to and copies of—

(1) information classified in the interest of national defense or national security by an individual authorized to classify such information under applicable Executive order or statutes, and restricted data whose dissemination is controlled pursuant to the Atomic Energy Act (42 U.S.C. 2011 et seq.);

(2) personnel and medical files and similar files, the disclosure of which would constitute an unwarranted invasion of personal privacy;

(3) information which such Federal agency is expressly prohibited by law from disclosing to another Federal agency, including, but not limited to, such expressly prohibited information contained in or related to examination, operating, or condition reports concerning any individual financial institution prepared by, on behalf of, or for the use of an agency responsible for regulation or supervision of financial institutions;

(4) information which would disclose the financial condition of individuals who are customers of financial institutions; and

(5) trade secrets and commercial or financial information described in section 552(b)(4) of title 5, United States Code—

(A) obtained prior to the effective date of this Act by such Federal agency, if the agency had agreed to treat and has treated such information as privileged or confidential and states in writing to the appropriate Consumer Counsel that, taking into account the nature of the assurances given, the character of the information requested, and the purpose, as stated by the Consumer Counsel, for which access is sought, to permit such access would constitute a breach of faith by such agency; or

(B) obtained subsequent to the effective date of this Act by such Federal agency, if the agency has agreed in writing as a condition of receipt to treat such information as privileged or confidential, on the basis of its reasonable determination set forth in writing that such information was not obtainable without such an agreement and that failure to obtain such information would seriously impair performance of such agency's function.

(b) ACCESS TO TRADE SECRET INFORMATION.—Before granting a Consumer Counsel access to trade secrets or commercial or financial information described in section 552(b)(4) of title 5, United States Code, the Federal agency of which such Counsel's Office is a part shall notify the person who provided such information of its intention to provide such access, and shall afford such person a reasonable opportunity, not to exceed 10 days, to comment thereon or seek injunctive relief prohibiting such access. If a Federal agency denies access to any information to a Consumer Counsel, pursuant to this subsection, the head of such agency and the appropriate Consumer Counsel (and the Assistant Attorney General for Consumer Protection and Advocacy, if requested by such Counsel) shall seek to find a means of providing the

information in such other form, or under such conditions, as will meet such agency's objections.

SEC. 12. DISCLOSURE OF INFORMATION BY CONSUMER COUNSEL.

(a) IN GENERAL.—Except as provided in this section, section 552 of title 5, United States Code, shall govern the release of information by any Consumer Counsel, by any employee or agent of any Office, or by the Assistant Attorney General for Consumer Protection and Advocacy.

(b) PROHIBITION.—No Consumer Counsel, or officer or employee of any Office shall disclose to the public any information which was received solely from its Federal agency when such agency has notified the Consumer Counsel that—

(1) such information is within any exception set forth in section 552(b) of title 5, United States Code; and

(2) such agency has determined that such information should not be made available to the public.

If such Federal agency specifies that any such information may be disclosed to the public in a particular form or manner, such information may be disclosed by such Consumer Counsel in the form or manner specified.

SEC. 13. AUTHORIZATION OF APPROPRIATIONS

For purposes of this Act, existing appropriated funds should be utilized to the greatest extent possible. However, there are authorized to be appropriated such sums as are necessary, not to exceed for each office $500,000 for the fiscal year ending September 30, 1978.

SEC. 14. EFFECTIVE DATE.

(a) This Act shall take effect 60 calendar days following the date on which this Act is approved, or on such earlier date as the President shall prescribe and publish in the Federal Register.

(b) Any of the officers provided for in this Act may (notwithstanding subsection (a)) be appointed in the manner provided for in this Act at any time after the date of the enactment of this Act. Such officers shall be compensated from the day they first take office at the rates provided for in this Act.

SEC. 15. SEPARABILITY.

If any provision of this Act is declared unconstitutional or the applicability thereof to any person or circumstance is held invalid, the constitutionality and effectiveness of the remainder of this Act and the applicability thereof to any persons and circumstances shall not be affected thereby.

SEC. 16. TERMINATION.

(a) This Act shall terminate 5 years after the effective date of this Act, and the several Offices of Consumer Counsel and the Division of Consumer Protection and Advocacy of the Department of Justice shall be abolished as of the date of such termination.

(b) The President shall—

(1) commencing 2 years prior to the date of termination specified in subsection (a), conduct a review of these Offices' overall performance including, but not limited to, a study of the Offices' effectiveness in accomplishing their general purposes and promoting the general welfare; and

(2) not later than 12 months prior to the termination date specified in subsection (a), make public and submit to each House of Congress a report on the finding of the investigation conducted pursuant to paragraph (1), such report to include a recommendation that the authority of this Act be extended, that these offices be reorganized, or that the authority of this Act be allowed to lapse.

(c) The committees of the House and of the Senate having primary oversight responsibility with respect to the Offices shall, not later than 6 months prior to the termination date specified in subsection (a), conduct an inquiry into the performance and effectiveness of the Offices and make public a report of their findings, conclusions, and recommendations, including proposed legislation for such extension or reorganization of these Offices as they deem appropriate.

By Mr. HAGEDORN:

Page 13, after line 18, insert at the end of section 6 the following new subsection:

(j) The Administrator shall not intervene or otherwise participate in any Federal agency proceeding or activity or in a proceeding in a court of the United States involving judicial review of such agency proceeding or activity if such agency proceeding or activity affects two or more substantially conflicting interests of consumers. For the purposes of this subsection, two interests of consumers in a Federal agency proceeding or activity are substantially conflicting if a decision in such proceeding or activity leading to a significant improvement of one such interest would be likely to lead, directly or indirectly, to a significant impairment of the other.

Insert at the end of section 6 of the amendment in the nature of a substitute offered by the gentleman from Texas the following new subsection:

(j) The Administrator shall not intervene or otherwise participate in any Federal agency proceeding or activity or in a proceeding in a court of the United States involving judicial review of such agency proceeding or activity if such agency proceeding or activity affects two or more substantially conflicting interests of consumers. For the purposes of this subsection, two interests of consumers in a Federal agency proceeding or activity are substantially conflicting if a decision in such proceeding or activity leading to a significant improvement of one such interest would be likely to lead, directly or indirectly, to a significant impairment of the other.

By Mr. HOLLENBECK:

Section 9(d), on page 19, line 11, strike out the period and insert in lieu thereof the following: ", nor shall anything in this Act be construed to authorize the Administrator to request or direct the retesting of an aspect or characteristic of a consumer product or service when testing has been completed on such aspect or characteristic of that consumer product or service or a substantially identical consumer product or service within 18 months of the Administrator's request, unless a significant hazard to the consumer can be demonstrated."

By Mr. LEVITAS:

In section 6(a) of the amendment in the nature of a substitute offered by the gentleman from Texas, insert immediately after the first sentence thereof the following new sentence: "Whenever the Administrator intervenes or otherwise participates in any such proceeding or activity and such proceeding or activity may substantially affect more than one interest of consumers, the Administrator shall seek to represent each interest of consumers substantially affected.".

In section 6(d) of the amendment in the nature of a substitute offered by the gentleman from Texas, strike out paragraphs (2) and (3) and insert in lieu thereof the following:

(2) The Administrator may institute, or intervene as a party in, a proceeding in a court of the United States involving judicial review of any Federal agency action in which the Administrator did not intervene or participate if such court finds that such agency action adversely affects a substantial interest of consumers and, in the case of an intervention, that such consumers' interests would not otherwise be adequately represented in a judicial review of such action.

(3) The participation of the Administrator in a proceeding for judicial review of a Federal agency action shall not alter or affect the scope of review otherwise applicable to such agency action. Nothing in this subsection shall be deemed to grant to the Administrator a right of judicial review of any Federal agency action greater than the right to seek such review which is available to private persons. In any case in which the Administrator intervenes under paragraph (2), the court shall likewise permit the intervention of any person who has a substantial interest affected by such otherwise adequately represented in such proceeding.

In section 6(d)(4) of the amendment in the nature of a substitute offered by the gentleman from Texas strike out ", except that" and everything that follows through "regulatory nature".

In section 7 of the amendment in the nature of a substitute offered by the gentleman from Texas, strike out subsections (a) and (e), redesignating subsections (b), (c), and (d) as subsections (a), (b), and (c), respectively, and in subsection (b) (as redesignated) strike out "subsection (b)" and insert in lieu thereof "subsection (a)".

In section 17 of the amendment in the nature of a substitute offered by the gentleman from Texas, strike out ", or to a labor dispute" and everything that follows through "Labor Management Relations Act, 1947 (29 U.S.C. 171)".

In section 17 of the amendment in the nature of a substitute offered by the gentleman from Texas, strike out ": *Provided*, That" and everything that follows through the remainder of such section and insert in lieu thereof a period.

Insert at the end of section 6 of the amendment in the nature of a substitute offered by the gentleman from Texas, the following new subsection:

(j)(1) Notwithstanding any other provisions of law, the head of any agency which has conducted a rulemaking proceeding in which the Administrator has intervened or otherwise participated pursuant to subsection (a) shall, simultaneously with the promulgation or repromulgation of any rule or regulation pursuant to such proceeding, transmit a copy thereof to the Secretary of the Senate and the Clerk of the House of Representatives. Except as provided in paragraph (2), no such rule or regulation shall become effective if—

(A) within 90 calendar days of continuous session of Congress after the date of promulgation, both Houses of Congress adopt a concurrent resolution, the matter after the resolving clause of which is as follows: "That Congress disapproves the rule or regulation promulgated by the Administrator of the Office of Consumer Representation dealing with the matter of , which rule or regulation was transmitted to Congress on .", the blank spaces therein being appropriately filled; or

(B) within 60 calendar days of continuous session of Congress after the date of promulgation, one House of Congress adopts such a concurrent resolution and transmits such resolution to the other House, and such resolution is not disapproved by such other House within 30 calendar days of continuous session of Congress after such transmittal.

(2) If at the end of 60 calendar days of continuous session of Congress after the date of promulgation of a rule or regulation subject to paragraph (1), no committee of either House of Congress has reported or been discharged from further consideration of a concurrent resolution disapproving the rule or regulation, and neither House has adopted such a resolution, the rule or regulation may go into effect immediately. If, within such 60 calendar days, such a committee has reported or been discharged from further consideration of such a resolution, or either House has adopted such a resolu-

tion, the rule or regulation may go into effect not sooner than 90 calendar days of continuous session of Congress after its promulgation unless disapproved as provided in paragraph (2).

(3) For the purposes of paragraphs (1) and (2) of this subsection—

(i) continuity of session is broken only by an adjournment of Congress sine die; and

(ii) the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of 30, 60, and 90 calendar days of continuous session of Congress.

(4) Congressional inaction on or rejection of a resolution of disapproval shall not be deemed an expression of approval of such rule.

On page 13, line 24, of the amendment in the nature of a substitute offered by the gentleman from Texas, strike out "Federal agency shall" and insert in lieu thereof "Federal agency may".

By Mr. SHUSTER:

Page 31, on line 15, insert immediately after "involving" the following: ", presently or prospectively,".

Page 31, line 19, insert immediately before "adequacy" the following: "present or future".

Page 30, line 22, insert immediately after "involving" the following: ", presently or prospectively,".

Page 31, line 1, insert immediately before "adequacy" the following: "present or future".

H.R. 9718

By Mr. TRAXLER:

On page 14, after line 14, insert at the end of section 6 of the amendment in the nature of a substitute offered by the gentleman from Texas the following new subsection:

(j) The Administrator shall not intervene or otherwise participate in any Federal agency proceeding or activity or in any civil proceeding in a Federal court, and the Administrator may not initiate any civil proceeding in a Federal court, if such intervention, initiation, or participation is intended to restrict or limit, or has the effect of restricting or limiting, the manufacture or sale of firearms, ammunition, or components of ammunition, including blackpowder and gunpowder.

EXTENSIONS OF REMARKS

SKOKIE DECISION SHOWS "CALLOUS DISREGARD"

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, February 6, 1978

Mr. EILBERG. Mr. Speaker, I am disappointed that the Illinois Supreme Court has ruled that the Nazi Party can march in Skokie, Ill., to carry out the Nazi program of inflaming racial prejudices and bigotry.

I fear that the court has failed to recognize the clearly stated hope of the Nazis to incite violence. In its decision, the court has been insensitive to public safety in Skokie, and has shown a callous disregard for the pain and anguish of the Jewish members of the community.

Mr. Speaker, freedom of speech has always been a part of the Jewish community's tradition. But this is not a question of protecting freedom of speech. It is a case of abusing it, because the Nazis make no attempt to disguise the fact that they seek to abuse the U.S. Constitution in order to carry out their program of hatred, bigotry, and violence.

We have seen what the Nazi swastika represents. It is not a political symbol. It is a symbol of racism and genocide, and anyone who doesn't realize this is overlooking the tragic history of our own lifetime.

The Jewish community and other minorities in our country have every reason to believe that the Nazis would carry out their threats if they had the opportunity to do so. Therefore, it is entirely appropriate for the community in Skokie to pursue every constitutional remedy at its disposal to prevent the Nazis from marching.

The following story from the January 30 Philadelphia Evening Bulletin recounts the terror visited by the Nazis on a woman who now is a resident of the district which I represent in Congress. This story illustrates the need to guard against those who would abuse the Constitution and hide behind it as a means of carrying out the violence and genocide that my constituent, Mrs. Mina Kalter, and her family know firsthand:

APPROVAL OF SWASTIKA IS SLAMMED: NAZI SYMBOL STIRS A PAST MEMORY

(By Robert Freedman)

When Mina Kalter's father and three brothers returned from their first day of forced labor at the hands of the conquering Nazis, two of the boys had the Nazi swastika carved into the flesh of their foreheads. It was Sept. 11, 1939.

"This was the first time I remember seeing a swastika," Mrs. Kalter recounted. "Literally, I saw it in the flesh—in the flesh of loved ones," she said yesterday at her home in Northeast Philadelphia.

Mrs. Kalter, then 16-year-old Mina Barseches, was living in her home town of Pryeworska, Poland, an important rail center of 55,000 persons.

Germany had invaded Poland on Sept. 1. Poland surrendered on Sept. 27th.

Almost 40 years later, Mrs. Kalter cannot believe that the swastika, the symbol of Hitler's Third Reich, has been ruled permissible for public display by the Illinois Supreme Court.

In a 6-1 decision, the court's majority opinion, handed down Friday, said, "The display of these swastikas, as offensive to the principles of a free nation as the memories it recalls may be, is symbolic political speech intended to convey to the public the beliefs of those who display it."

Those who asked the Court for permission to display the swastika are members of the National Socialist Party of America, a relatively small band of Nazi who claimed the constitutional right to march with it through Skokie, a predominantly Jewish suburb of Chicago.

Like Mrs. Kalter, many of Skokie's Jews are survivors of the Holocaust that claimed the lives of more than nine million people, six million of them Jews.

Like Mrs. Kalter, many of Skokie's Jewish people came to the United States in the years following World War II in hopes of a new beginning and in hopes of forgetting the terror and agony suffered at the hands of the Nazis.

"The mere thought of the swastika stirs dreaded memories deep in the hearts and souls of the survivors," Mrs. Kalter said. "These are memories better left in the backs of our minds, deep in our souls," she said.

"It's not that we try to forget completely," she explained. "We just want to make it through each day without being confronted by this symbol again," she said while sobbing at the memories the Skokie case brought to her mind.

The symbol Mrs. Kalter spoke of was seen many times during the ten years she spent as a young woman during the horrible years of 1939 through 1949.

It is a symbol she blames for the deaths of 67 members of her family—parents, grandparents, one of three brothers and her aunts, uncles and cousins.

A day after she saw the swastika carved in the foreheads of her two brothers, she saw it on the wings and tail of a German plane as it dove on her town's synagog and dropped one bomb on it that also destroyed the Jewish community surrounding it.

Mrs. Kalter saw it on the arms of the troops who led her family and all the town's other Jews into that burned out community to establish a "ghetto."

She saw it in 1940 when the German troops with swastika armbands took her mother and father away, never to be seen again, because her mother was too sick to perform forced labor and her father too dedicated to his wife to let her go alone.

She saw the swastika that same year when two drunken Nazi officers threw an 11-year-old child to his death from an apartment while Mrs. Kalter watched.

She saw the swastika on the arm of the German guards she escaped from when she jumped from a truck she was riding in a work convoy and escaped to the Russian sector of Poland.

"So you see, the sign of the swastika, for those who survived the holocaust, is a sign of terror and humiliation," she said.

"This Illinois ruling is a desecration to the memory of the six million Jewish martyrs killed at the hands of the Nazis under that sign of the swastika."

"I wonder if this (the Illinois ruling) is what was meant by our founding fathers when they spoke of freedom of speech under the First Amendment?" she asked.

"This case has gone beyond the limits of the First Amendment because when I see a swastika, I feel the knives and guns at my back," she said.

Mrs. Kalter's two brothers now live with their families in Israel. She has visited them there three times since 1949 and one of them has been to Philadelphia.

Sol Kalter, her husband whom she met while in a Russian work camp in Siberia, is a watch maker in center city. They have three children and live in a single ranch-style home in the Bustleton section of Northeast Philadelphia.

I REMEMBER GREG

HON. JOHN W. WYDLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, February 6, 1978

Mr. WYDLER. Mr. Speaker, Gregory Thompson was my youngest nephew and he was killed a few days ago in an auto

accident. The funeral has been held and he has been buried. A few words about this fine young man.

Born as the last of three sons to my sister, Betty, and her husband, Tom, Greg proved to be the "personality" child of the family. Every family has one. His ways and mannerisms were so cute you could not get mad at him. While his brothers, Tom and Paul, were typical boys, Greg always instinctively knew when to stop in his playfulness.

As he grew into a man, he retained his softness and kept his appeal. It was based on a deep desire to be of help to those around him. Everyone sensed it.

All during his childhood Greg had wanted to be a lawyer, but just before college he came to see me. He stated he had changed his mind and wanted to be a doctor. Although I didn't understand it then, I later was told he chose medicine to help others, and that not only became his dream but his passion.

For some reason, although he attained many honors—including Phi Beta Kappa and Phi Kappa—he did not get accepted to the medical school. He never asked for any help—not even a recommendation from me. He wanted to do it on his own.

He was still trying when he was killed. It was on a trip from a medical school interview that the accident happened. It was likely he was close to realizing his life's dream.

He died at 28, after much living, but before a full life. He almost died of a childhood disease at 6 years old. God spared him that death. He experienced all life's emotions, good and bad, except the final satisfaction of helping others as a doctor. That's the bitter. The sweet is his memory.

Death, of course, brings every man to earth. But it does not eradicate the measure of the man.

At the parlor I overheard a young girl say to my sister; "He had magic in him." I'm too old to know what that means, but I am not too old to know it is beautiful to be thought of that way. I was stunned to meet his fifth grade teacher who came to pay his respect to a boy he taught 20 years before.

I knew him better as a boy than a man, but he had depth. He asked his parents this Christmas to give him something he could keep. They gave him a ring and he will keep it forever.

He refused my help and disliked the authority my position implied over his life, particularly during the Vietnam War. In a way that period changed him and hurt him.

He was concerned for others but independent as a person. He was soft toward others but strong within. He loved to learn and to serve. He was an idealist in a real world.

It would have pleased him that when a problem arose about opening his grave for burial at the St. Michael's Cemetery on Tuesday, I with all my congressional regalia could do nothing to get it done, that a bishop with all the church hierarchy could do nothing, but that his brother, Tom, with a personal visit and appeal to the grave diggers got it done. It would have pleased him, and it pleased me.

Greg did accomplish much. As a research assistant at Stony Brook, as an instructor at Suffolk and Nassau Community Colleges, as the apple of his parents eyes, and the bridge between his brothers and family.

He has been and will be truly mourned by many. No man gets more. He will see God, and my bet would be he is close up with the helpful angels.

My father started a family tradition. Whenever he left to start a trip he alwas said goodbye by shouting "Yo-Ho." It came to mean—I enjoyed seeing you and will do it soon again.

Greg's brother Paul sent the usual flowers to the funeral. The card had an unusual message. It said only, "Yo-Ho."

No better sendoff can be imagined for a journey we all make.

KENTUCKY STATE YMCA VISITS WASHINGTON

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, February 6, 1978

Mr. MAZZOLI. Mr. Speaker, I would like to welcome delegates from the State YMCA of Kentucky, who will be visiting Washington this week.

Among its other activities, the YMCA folks will be visiting Capitol Hill on Monday, Tuesday, and Wednesday of this week.

On Wednesday, before returning to Kentucky, the group will host a prayer breakfast for the Kentucky congressional delegation.

I would like to introduce the visitors to my colleagues on the House of Representatives:

Mr. Michael D. Haynes, Executive Director, State YMCA of Kentucky, Louisville, Ky.; Mr. Thomas Anderson, Mount Sterling, Ky.; Mr. and Mrs. Carl Brown, Louisville, Ky.; Mr. and Mrs. Mike LaVera, Louisville, Ky.; Rebecca Moore, Louisville, Ky.; Beverly Tyson, Louisville, Ky.; Thomas Whitus, Louisville, Ky.; Jane Harkess, Louisville, Ky.; Angela Gillum, Morehead, Ky.; Karen Cutliff, Bowling Green, Ky.; Melanie Vanderpool, Jeffersonville, Ind.; Jimmy Ward, Salt Lick, Ky.; Rusty Skinner, Mount Sterling, Ky.; Leslie Brown, Louisville, Ky.; David Calvert, Jeffersonville, Ky.; Lucy Ann Davis, Pikeville, Ky.; G. Marie Henson, Louisville, Ky.

Also: Barry Hickey, Mount Sterling, Ky.; Meg Hammer, Louisville, Ky.; Libby Deiss, Lousiville, Ky.; Jude Muller, Louisville, Ky.; Lea Anne Pauley, Louisville, Ky.; Cheryl Scheck, Williamstown, Ky.; Cecil Colliver, Mount Sterling, Ky.; Janet Foley, Louisville, Ky.; Kevin Barnard, Mount Sterling, Ky.; Janie L. Parker, Paducah, Ky.; David Hadden, Mount Sterling, Ky.; Sally Nasser, Louisville, Ky.; Joe Peters, Mount Sterling, Ky.; Julian Tackett, Lexington, Ky.

Also: Luanne Smith, Paducah, Ky.; Jean Bird, Bowling Green, Ky.; N. Beth Luther, Jeffersonville, Ind.; Charles R. Deaton, Pikeville, Ky.; Mark Dever, Madisonville, Ky.; Charles Zoellers, Pikeville, Ky.; Elizabeth Hamilton, Morehead, Ky.; Laura Hughes, Anchorage, Ky.; Kent Greenfield, Princeton, Ky.; Mindy Wigginton, Fredonia, Ky.; Joe C. Baker, Princeton, Ky.; Curtis Brown, Princeton, Ky.; and Jay Callis, Pendleton, Ky.

1978 WATERWAYS JOURNAL PLATFORM

HON. DAVID C. TREEN

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, February 6, 1978

Mr. TREEN. Mr. Speaker, earlier this year the Waterways Journal published a list of issues it considers vital to the future of waterborne transportation in this country.

The Waterways Journal asked that we in Congress consider this platform as we develop transportation legislation during 1978. Accordingly, I am placing it in the RECORD for the benefit of my colleagues:

1978 WATERWAYS JOURNAL PLATFORM

The United States stands at the crossroads in 1978. One road leads to the opportunities created by an expanding economy, wise use of the nation's natural resources and the proper conservation of all forms of energy. The other road leads to a declining economy, higher unemployment and a deepening energy shortage. The Waterways Journal recognizes that 1978 will be a year of decision, and the decision will be determined largely by those elected to the Congress in this national election year.

This year, more than ever before, it is essential that all waterway interests must stand united in support of the policies we are convinced are in the national interest.

One of the responsibilities of the second session of the 95th Congress is to enact a new national transportation policy. We urge that the new policy include:

Recognition that the nation's inland waterways are vital to national security. The 25,000 miles of navigable channels are the least vulnerable to enemy attack from without and from sabotage within. The waterways provide the safest and most efficient mode of transport for nuclear devices and all hazardous cargoes. The inland waterways make possible the use of shipyards in time of emergency and the inland waterways fleets can be expanded to meet emergency needs faster and cheaper than any other form of transport.

Recognition that all waterways shall be open to all and be free of any form of user charge that would significantly impair their use as part of a viable transportation system.

Recognition that the national interest is best served by a coordinated transportation system in which full use is made of the inherent advantages of each mode of transport.

Recognition of the inherent danger of permitting any form of transportation to own or operate a competing mode of transport.

The 95th Congress is charged with the responsibility of developing and adopting a new national water policy. Water is one of the nation's most valuable natural resources. The expeditious and efficient development and conservation of this resource must not be thwarted, nor diverted to serve any selfish interest. Protection and efficient use of water must not be surrendered to zealous environmentalists, nor to a few government agencies, nor to any industry. All environmental proposals should be fully described to the public in terms of objectives, projected benefits and costs.

In formulating a new national water policy, Congress should:

Retain full control of authorizing and funding all water resources projects, including new dams, and should establish a time schedule to assure the economical and efficient construction of all such projects.

Reject all proposals to transfer control

over water resource projects to any new and untried federal agency, or to state or local agencies.

Insist on an equitable benefit/cost formula for all projects.

Insist on the full use of the multipurpose concept as exemplified in the Pick-Sloan Plan of the Missouri basin in authorizing all future projects.

We recognize the worldwide reputation of the U.S. Engineers and commend the Corps for its exemplary record in protecting environmental standards as well as for its work in improving and maintaining the inland waterways. We are unalterably opposed to any proposal to transfer the civil functions of the U.S. Engineers to any other agency.

We reaffirm our support of the U.S. Coast Guard and its policy on adequate bridge clearances. We commend the Coast Guard for its promotion of marine safety and support its proposal that radiotelephones be installed at all drawbridges. We urge the expediting of the evaluation of protective works at all bridges and locks.

We call attention to the serious shortage of trained personnel for all phases of the maritime industry and urge the expansion of maritime studies in institutions of higher learning. We strongly support expansion of the National River Academy, and we recommend to all inland waterway interests that they increase their financial support of maritime curricula and research. In support of this recommendation, we urge the establishment of a National Waterways Museum which will serve as a focal point for maritime research.

We recognize the growing popularity of pleasure boating and reaffirm our support of pleasure boat owners and of all phases of the recreational boating industry. We welcome the support of these groups for the program of water resources development.

Finally, we call to the attention of the Congress and of the American people the need for a fuller understanding of the vital role of the water resources program in building a strong and prosperous nation.

SRI LANKA CELEBRATES ANNIVERSARY OF INDEPENDENCE

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, February 6, 1978

Mr. McCLORY. Mr. Speaker, I would like to congratulate the people of Sri Lanka on their National Day, February 4. It marks the date, 30 years ago, when this magnificent island nation off the tip of India achieved independence from Great Britain although Sri Lanka remains a member of the Commonwealth of Nations.

Once known as Ceylon, Sri Lanka appears to have changed direction during national elections last July. It modified its form of government and elected its first Executive President, Mr. J. R. Jayawardene, who is responsible to all the people for all decisions made by the executive branch.

The United National Party, which Mr. Jayawardene represents, won a vast majority of seats in the legislative branch giving him and his party a powerful mandate to carry out its programs.

Mr. Speaker, I have had the honor of visiting Sri Lanka. It is a land of beauty, of extraordinary potential, of abundant vegetation, and gifted with great aspirations. We are told its new government is moving boldly to revive the economy, to stimulate savings and investment, and to move toward steady, sustained growth.

As Sri Lanka seeks to achieve this kind of stability, it is turning more toward a philosophy of private enterprise which we in the United States so well understand.

Mr. Speaker, we in this country and our free world allies have a great stake in others who prefer the ballot box to imposed dictatorship. I wish the people and the elected leaders of Sri Lanka well as they mark their National Day with new hopes and new plans.

CONVERTING TO WIND

HON. CECIL (CEC) HEFTEL

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Monday, February 6, 1978

Mr. HEFTEL. Mr. Speaker, it is both ironic and unfortunate that Congress has been unable to complete action on President Carter's energy program, almost 1 year after it was first proposed. But even as we continue to focus on the immediate problem of developing a workable and substantive program, it is important that we also pay heed to those among us who propose alternative solutions to our future energy requirements.

One of these innovators is Honolulu architect Jim Charlton, who offers this simple truth about energy: "The energy crisis exists not in the lack of energy, but in its storage and conversion to appropriate use." While most of us are embroiled in controversy over oil, Mr. Charlton has visions of harnessing the wind.

In a recent article written by Bruce Benson for Honolulu Magazine, Mr. Charlton describes his plan for capturing windpower, not through the use of windmills, where most windpower research is concentrated, but by channeling or vectoring the wind into confined spaces to spin rotors and power conventional generators.

Mr. Charlton's ideas deserve widespread dissemination, Mr. Speaker, and I request that the magazine article be inserted into the CONGRESSIONAL RECORD at this time.

CONVERTING TO WIND

(By Bruce Benson)

The view from Jim Charlton's high-rise living room is like a playpen for the imagination, and Charlton is busy playing with Honolulu's energy problems. He has placed his drawing board next to one window of his Moiliili condo where, at a glance, he can take in the Pali, Waialae Kahala, all of Diamond Head and Waikiki, and the new reef runway. He then proceeds to redesign the city on his sketch pads.

Charlton's renderings portray a place of unfamiliar-looking structures and devices that call to the wind for their source of power. But Charlton is an architect, not an artist of science fiction, and though his landscapes seem strange they are rooted in real architectural possibilities. The operating principle for his wind-powered Honolulu of the future is at once so simple, yet so filled with potential, that several engineers and scientists are encouraging him to pursue it.

Traditional wind research has concentrated on ways of building bigger, more efficient blades of windmills to catch the breeze and spin. Researchers nowadays are also going to great lengths to find the best sites for locating their wind power generators. Dr. Edward Teller, for example, and his associates at Lawrence Livermore Laboratory in California are deep into a research project on Oahu to measure wind patterns in the hills and mountains, using laser beams and complicated mathematical models in their search for the optimum winds.

Charlton too is interested in optimizing wind flow, but with a different twist. He proposes to enhance the breezes at his structures instead of bounding across hill and dale to find the most perfect wind sites.

He notes that any surface can be said to direct the wind. A mountain range, a rolling plain on the side of a building all control or vector the wind. In fact, engineers are well aware of wind forces on buildings, and several specialists have built entire careers out of calculating wind stress, especially on high-rises. They have worked out rather precise formulas to determine what must be done for structures to stay put and not wobble dangerously in windy cities such as Honolulu.

It is this force that Charlton thinks can be harnessed, and then concentrated. "The wind force so expensively resisted can be converted to a power supply," he says. "You use the contours and planes of a building to direct the wind where you want it. In this case I am talking about directing it toward a narrow opening that is designed as an integral part of a structure. At this opening you place an impeller, a spinning blade on a shaft. The shaft can either rise across vertically with the building or, in the case of low buildings run across horizontally."

His sketches reveal angulated planes that beckon the breeze to flow toward them. This is done by orienting one side of a structure generally toward the wind, then dividing that side into two surfaces. The surfaces angle inward in a concave shape. It is as if you put your fingertips together to describe the bow of a ship.

What the architect is doing is designing a structure with a built-in Venturi effect. He is channeling the wind from a broader aperture to a narrower one. At the point where the two inward-sloping walls or surfaces meet each other is where Charlton deliberately leaves an opening for the wind to spill through.

The Venturi slot increases the flow velocity of the wind since it is a well-established principle that a fluid, such as the wind, gains acceleration when constricted in a channel. The volume of air along the two angled walls then pass through the impeller located at the slot. The spinning impeller driven by the accelerated wind provides the energy to power a conventional generator for the production of electricity.

"Our goal at this point is to come up with first-generation, high-velocity small-scale wind rotors that are built into structures like appliances, vectoring energy into a collection system that is more efficient than your typical windmills," says Charlton.

Because the wind is an intermittent power source, the use of architectural enhancement of wind flow for energy has to be viewed at present as a part-time energy supplier, although Charlton has some ideas on ways of storing energy in a structure to draw upon when the wind ceases. Hawaiian Electric Co.'s market research director Alan S. Lloyd refers to intermittent power sources as "fuel oil displacers."

So just how much fuel oil could Charlton's concept displace? Lloyd says a typical tall office building in downtown Honolulu could

use something in the neighborhood of 700,000 kilowatt hours per month, assuming the building provides 270,000 square feet of rentable space and is in service about 350 hours a month.

Charlton's research indicates that a wind speed of 15 miles per hour could produce 340 kilowatts of energy per hour. That's 119,000 kilowatts over 350 hours, or 17 per cent of the building's power requirements. At a wind speed of 20 miles per hour he figures the wind could develop 800 kilowatts per hour. That's 280,000 kilowatts in a month, amounting to 40 per cent of the structure's requirements.

Hawaiian Electric manages to wring 588 kilowatt hours out of one barrel of oil. Charlton's theoretical office building could displace 476 barrels of oil per month simply by catching and using the wind that now escapes work.

All of this is assuming the wind will blow constantly at 20 miles per hour past the structure's built-in impeller system during the time the tenants are around. The actual average could be less . . . or even more. But with a power storage system the building could collect its wind-given kilowatts 24 hours a day, feeding them into the electrical system when needed. Kinds of power storage under investigation by many researchers include fluid-driven pumps, sophisticated flywheels, batteries and the hydrogenation of water. The latter approach calls for dissociating water into hydrogen and oxygen, storing the hydrogen as a fuel for later use by a power plant.

Energy through architecture isn't limited to large-scale buildings, according to Charlton. The concept could provide the power for single-family homes, especially hillside houses, providing far more than the thousand kilowatts per month for which the typical householder is now paying close to $50.

CONVERTING TO WIND

The architect also thinks it's possible to construct what he calls wind dams—long airfoils of some light frame construction. The dams could be hinged at their fulcrum to change their pitch or angle to the wind. They could be built horizontally and placed on plains or deserts or the roofs of factories and barns. They could be built vertically, and installed in the escarpments of the Pali, then painted green to camouflage their existence.

Charlton confesses that he is a dreamer and a romantic. As a youth of the Depression he recalls picking up a book of designs by Frank Lloyd Wright. That was a revelation, he says. He searched out Wright in Wisconsin and was put to work painting the walls of Wright's buildings. Later came cross-country trips by motor caravan to Taliesin West where he and other students labored in the desert as Wright created startling forms of stone and redwood from plans that existed only in his own mind.

Charlton also flew missions over Germany as a fighter pilot in World War II which further shaped his feelings about man's relationship to the air. Although a dreamer, three decades of his own practice have left him anchored firmly enough in practicality to know that life these days presents problems of a different order. It's hard enough to get a new traffic light put at the street corner let alone veer away overnight from the present madness of high-energy high-rises.

His ideas on energy from architecture, however, are perhaps a weather vane to future forms, the kind of thinking that is different enough to help people start looking in a new direction for less expensive power. He has stirred sufficient interest to be taken seriouly for possible funding in two programs set up to encourage just his kind of brainstorming.

One is a new program at the Energy Research and Development Administration (ERDA), where he has been advised to submit a proposal for further research. His project would fall under what some are calling ERDA's "Blue Sky" section—an upcoming funding source to provide modest grants for ideas of merit by people working without the benefit of full-time institutional or corporate facilities.

Another place offering encouragement is the Hawaii Natural Energy Institute at the University of Hawaii. Investigators George T. Koide and Patrick K. Takahashi have just released a report that recommended further research on the actual implementation of seven new potential ways to derive energy from the sun and wind. Charlton's ideas are included.

He is making no claims to originality in vectoring the wind. Rather, his strength seems to lie in bringing his background of aviation and architecture to an idea and then refining the implications. "I feel like the guy who has just realized that the wheel is round when others still don't see its potential," he says, "and I have to go around telling everybody."

TRIBUTE TO C. JASPER BELL

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, February 6, 1978

Mr. SKELTON. Mr. Speaker, although it is my sad duty to report the death of a former Member of this body, my words today are not meant to be a lamentation, but rather a tribute to the long and distinguished career of C. Jasper Bell of Lee's Summit, Mo. Mr. Bell, who for 14 years represented the fourth district, the same district I have the honor of representing, died last month at the age of 93.

Mr. Bell's political career began in 1925, as a city councilman in Kansas City, Mo. In 1931 he was named judge of the Jackson County Court in Independence. In 1934 he was elected to the U.S. Congress from the fourth district, a position he held until retiring in 1948.

During his years in Congress, C. Jasper Bell distinguished himself in many areas. He made national headlines as chairman of a special investigating committee that exposed the "Townsend Plan" and others as moneymaking schemes. He served as chairman of the House Committee on Insular Affairs and sponsored legislation leading to the granting of independence to the Philippine Islands after World War II.

After retiring from politics in 1948, Mr. Bell helped form the Mosman, Rogers & Bell law firm, now the Rogers, Field, Gentry, Robertson & Benjamin law firm. For many years he was one of the leaders of Kansas City's legal community.

The life of Representative C. Jasper Bell was a remarkably full one. As a judge, as a Congressman, as an attorney, as a family man, as a citizen, he embodied all of the virtues of the public and private man.

SENATE COMMITTEE MEETINGS

Title IV of the Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meeting scheduled for Tuesday, March 7, 1978, may be found in Daily Digest of today's RECORD.

MEETINGS SCHEDULED

FEBRUARY 8

9:00 a.m.
Human Resources
Aging Subcommittee
To continue oversight hearings on proposed extension of amendments to the Older Americans Act.
Until noon 457 Russell Building

9:30 a.m.
Environment and Public Works
To hold hearings on proposed authorizations for fiscal year 1979 for the Nuclear Regulatory Commission.
4200 Dirken Building

Environment and Public Works
Transportation Subcommittee
To hold hearings to receive testimony on issues relating to the Federal highway program, including the level of Federal support, completion of the Interstate System, and the costs of maintenance on the Federal highway system.
1318 Dirksen Building

Human Resources
Child and Human Development Subcommittee
To hold hearings to review the current programs on child care and child development and the need for additional legislation.
Until 12:30 p.m. 4232 Dirksen Building

Human Resources
Health and Scientific Research Subcommittee
To hold hearings on the extension of NIH research authorities and community mental health centers.
Until 12:30 p.m. S-207, Capitol

Judiciary
Constitution Subcommittee
To hold hearings on S. 35, proposed Civil Rights Improvements Act.
2228 Dirksen Building

10:00 a.m.
Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the Fine Arts Commission, Woodrow Wilson Center, National Capitol Planning Commission, and the National Gallery of Art, Department of the Interior and related agencies.
1114 Dirksen Building

Appropriations
Defense Subcommittee
To resume hearings, in closed session, on proposed budget estimates for fiscal year 1979 for the defense establishment.
1223 Dirksen Building
Banking, Housing, and Urban Affairs
To continue oversight hearings on the budgets of bank regulatory agencies.
5302 Dirksen Building
Budget
To resume hearings in preparation for reporting the first concurrent resolution on the fiscal year 1979 congressional budget.
6202 Dirksen Building
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold hearings on proposed authorizations for fiscal year 1969 for the U.S. Railroad Association.
235 Russell Building
Energy and Natural Resources
Energy Production and Supply Subcommittee
To hold oversight hearings on the Federal coal leasing policy and its impact on western coal development.
3110 Dirksen Building
Finance
International Trade Subcommittee
To hold hearings on H.R. 5643, to implement the U.N. Convention on the means of prohibiting and preventing illicit import, export, and transfer of ownership of cultural property.
2221 Dirksen Building
Select Intelligence
To hold hearings on S. 1566, to establish procedures for electronic surveillance in the area of foreign intelligence information.
6226 Dirksen Building
Select Small Business
To hold hearings to delineate the problems of attracting capital to small and medium sized independent enterprises.
424 Russell Building
Joint Economic
To continue hearings on the President's economic report.
2337 Rayburn Building
10:30 a.m.
Human Resources
Education, Arts, and the Humanities Subcommittee
To hold hearings on S. 2473, proposed College Opportunity Act.
318 Russell Building
2:00 p.m.
Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1970 for public works projects.
S–126, Capitol

FEBRUARY 9

7:00 a.m.
Human Resources
Child and Human Development Subcommittee
To hold hearings on the reauthorization of the ACTION agency (P.L. 93–113).
Until 11:00 a.m. 4232 Dirksen Building
9:00 a.m.
Commerce, Science, and Transportation
To hold hearings on the nominations of Edith B. Sloan and Susan B. King, both of the District of Columbia, each to be a Commissioner of the Consumer Product Safety Commission.
235 Russell Building
Governmental Affairs
Civil Service and General Services Subcommittee
To mark up H.R. 3447, H.R. 3755, and S. 1559, bills relating to civil service survivor annuities; H.R. 6975, increasing the number of hearing examiner positions which may be established by the Civil Service Commission at the GS–16 level; and S. 1265 and 1267, bills relating to the maintenance and orderly disposition of public records.
S–210, Capitol
9:15 a.m.
Human Resources
Health and Scientific Research Subcommittee
To hold hearings on S. 2474, to extend through fiscal year 1983 the Public Health Service Act.
Until 12:30 p.m. 6226 Dirksen Building
9:30 a.m.
Environment and Public Works
To hold hearings on proposed fiscal year 1979 authorizations for Regional Commissions of the Public Works and Economic Development Act of 1965, and the Appalachian Regional Commission.
4200 Dirksen Building
Judiciary
Constitution Subcommittee
To continue hearings on S. 35, proposed Civil Rights Improvements Act.
2228 Dirksen Building
10:00 a.m.
Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the Advisory Council on Historic Preservation, Museum Services, and Pennsylvania Avenue Development Corporation.
1318 Dirksen Building
Budget
To continue hearings in preparation for reporting the first concurrent resolution on the fiscal year 1979 congressional budget.
6202 Dirksen Building
Finance
Public Assistance Subcommittee
To resume hearings to receive testimony from Secretary of Labor Marshall on S. 2084, the proposed "Better Jobs and Income Act".
2221 Dirksen Building
Governmental Affairs
To hold hearings on the handling of discrimination complaints in the Senate (pursuant to Rule 50 and Section 310 of S. Res. 110).
3302 Dirksen Building
Joint Economic
To continue hearings to receive testimony on the President's economic report from Treasury Secretary Blumenthal.
5110 Dirksen Building
10:30 a.m.
Judiciary
To hold hearings on the nomination of Paul A. Simmons, of Pennsylvania, to be U.S. district judge for the western district.
2228 Dirksen Building
Judiciary
Criminal Laws and Procedures
To resume hearings to examine the erosion of law enforcement intelligence gathering capabilities.
457 Russell Building
11:00 a.m.
Foreign Relations
Arms Control, Oceans, and International Environment Subcommittee
To resume hearings on S. Res. 49, favoring international agreement to a treaty requiring the propagation of an international environmental impact statement for any major project expected to have significant adverse effect on the physical environment.
4221 Dirksen Building
11:30 a.m.
Commerce, Science, and Transportation
To hold a business meeting.
235 Russell Building
2:00 p.m.
Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1979 for public works projects.
S–126, Capitol

FEBRUARY 10

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold oversight hearings on the implementation of the National Science and Technology Policy Act (P.L. 94–282).
235 Russell Building
Judiciary
Juvenile Delinquency Subcommittee
To hold oversight hearings on the Drug Enforcement Administration's efforts to control drug trafficking on U.S. borders with Mexico.
2228 Dirksen Building
10:00 a.m.
Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the Department of the Interior
1114 Dirksen Building
Appropriations
Defense Subcommittee
To resume hearings, in closed session, on proposed budget estimates for fiscal year 1979 for the defense establishment.
1223 Dirksen Building
Energy and Natural Resources
Energy Production and Supply Subcommittee
To resume oversight hearings on the Federal coal leasing policy and its impact on western coal development.
3110 Dirksen Building
Foreign Relations
African Affairs Subcommittee
To meet in closed session to receive testimony from administration officials on foreign military activities in Africa.
S–116, Capitol
Select Small Business
To resume hearings to determine the problems of attracting capital to small and medium-sized independent enterprises.
424 Russell Building
Joint Economic
To continue hearings to receive testimony on the President's economic report from Secretary of Commerce Kreps and Secretary of Labor Marshall.
345 Cannon Building

FEBRUARY 15

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold oversight hearings on the National Bureau of Standards.
235 Russell Building

FEBRUARY 20

9:30 a.m.
Environment and Public Works
To hold hearings on proposed fiscal year 1979 authorizations for programs within the Department of the Interior, including General Services Building proposals.
4200 Dirksen Building
10:00 a.m.
Appropriations
Interior Subcommittee
To hold hearings on proposed budget

estimates for fiscal year 1979 for the Navajo-Hopi Relocation Commission.
1114 Dirksen Building

Banking, Housing, and Urban Affairs
Housing and Urban Affairs Subcommittee
To hold hearings on proposed fiscal year 1979 authorizations for HUD.
5302 Dirksen Building

Foreign Relations
To hold hearings on the International Sugar Agreement (Exec. A, 95th Cong., 2d sess.).
4221 Dirksen Building

6:00 p.m.
Human Resources
Child and Human Development Subcommittee
To resume hearings to review the current programs on child care and child development and the need for additional legislation.
Until 9:00 p.m. 4232 Dirksen Building

FEBRUARY 21

9:00 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on proposed fiscal year 1979 authorizations for NASA.
235 Russell Building

9:30 a.m.
Environment and Public Works
To hold hearings on proposed fiscal year 1979 authorizations for the Economic Development Administration.
4200 Dirksen Building

10:00 a.m.
*Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the Office of Water Research and Technology.
1114 Dirksen Building

Appropriations
Labor-HEW Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the Health Service Administration, Department of HEW.
S-128, Capitol

Banking, Housing, and Urban Affairs
Housing, and Urban Affairs Subcommittee
To continue hearings on proposed fiscal year 1979 authorizations for HUD.
5302 Dirksen Building

Budget
To receive testimony from Director Bosworth, Council on Wage and Price Stability, in preparation for reporting the first concurrent resolution on the fiscal year 1979 congressional budget.
6202 Dirksen Building

Commerce, Science, and Transportation
Merchant Marine and Tourism Subcommittee
To hold hearings on S. 2158, to permit the storing of foreign-caught shark fins at U.S. foreign trade zones for eventual exportation to foreign countries.
5110 Dirksen Building

Foreign Relations
To hold hearings on H.R. 7819, S. 1256, and S. 1257, to guarantee fair and equitable compensation for Americans injured in auto accidents with diplomatic personnel, and to require compulsory auto liability insurance for all diplomats.
4221 Dirksen Building

Human Resources
Education, Arts, and the Humanities Subcommittee
To resume hearings on S. 1753, to extend and amend the Elementary and Secondary Education Act
Until noon 4232 Dirksen Building

2:00 p.m.
Appropriations
Labor-HEW Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the Center for Disease Control, Department of HEW.
S-128, Capitol

FEBRUARY 22

9:00 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To continue hearings on proposed fiscal year 1979 authorization for NASA.
235 Russell Building

Human Resources
Employment, Poverty, and Migratory Labor Subcommittee
To hold hearings on proposed legislation to extend the Comprehensive Employment Training Act (CETA).
Until 12:30 p.m. 4232 Dirksen Building

10:00 a.m.
*Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the Office of the Secretary.
1114 Dirksen Building

Appropriations
Labor-HEW Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the National Institutes of Health, Department of HEW.
S-128, Capitol

Appropriations
Military Construction Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for military construction programs.
1224 Dirksen Building

Banking, Housing, and Urban Affairs
To hold oversight hearings on HUD crime and riot reinsurance programs.
5302 Dirksen Building

Environment and Public Works
To hold hearings on proposed fiscal year 1979 authorizations for the Army Corps of Engineers.
4200 Dirksen Building

Joint Economic
To resume hearings on the President's economic report.
1202 Dirksen Building

Rules and Administration
To hold hearings to receive testimony in behalf of resolutions requesting funds for activities of Senate committees and subcommittees, to be followed by consideration of these resolutions and other committee business.
301 Russel Building

2:00 p.m.
Appropriations
Labor-HEW Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1979 for the National Institutes of Health, Department of HEW.
S-128, Capitol

FEBRUARY 23

9:00 a.m.
Human Resources
Employment, Poverty, and Migratory Labor Subcommittee
To continue hearings on proposed legislation to extend the Comprehensive Employment Training Act (CETA).
Until 12:30 p.m. 4332 Dirksen Building

9:30 a.m.
Environment and Public Works
Resource Portection Subcommittee
To hold hearings on S. 1820, to preserve examples of America's diverse natural ecological resources for classification, identification, and protection.
4200 Dirksen Building

10:00 a.m.
Appropriations
HUD-Independent Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the Veterans' Administration.
1818 Dirksen Building

Appropriations
Interior Subcommittee
To hold hearings to receive testimony from Secretary of the Interior Cecil Andrus, on proposed budget estimates for fiscal year 1979 for the Department of the Interior.
1114 Dirksen Building

Appropriations
Military Construction Subcommittee
Labor-HEW Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1979 for the National Institutes of Health, Department of HEW.
S-128, Capitol

Appropriations
Military Construction Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1979 for military construction programs.
S-146, Capitol

Banking, Housing, and Urban Affairs
International Finance Subcommittee
To hold oversight hearings on U.S. export policy.
5302 Dirksen Building

Rules and Administration
To continue hearings to receive testimony in behalf of resolutions requesting funds for activities of Senate committees and subcommittees, to be followed by consideration of these resolutions and other committee business.
301 Russell Building

2:00 p.m.
Appropriations
Labor-HEW Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1979 for the National Institutes of Health, Department of HEW.
S-128. Capitol

FEBRUARY 24

9:30 a.m.
Environment and Public Works
Resource Protection Subcommittee
To continue hearings on S. 1820, to preserve examples of all of America's diverse natural ecological resources for classification, identification, and protection.
4200 Dirksen Building

10:00 a.m.
Appropriations
HUD-Independent Agencies Subcommittee
To continue hearings on proposed budget estimates for fiscal years 1979 for the Veterans Administration.
1318 Dirksen Building

Appropriations
Labor-HEW Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the Alcohol, Drug Abuse, and Mental Health Administration, Department of HEW.
S-128, Capitol

Foreign Relations
To resume hearings on the International Sugar Agreement (Exec. A. 95th Cong., 2nd sess.).
4221 Dirksen Building

Rules and Administration
To continue hearings to receive testimony in behalf of resolutions requesting funds for activities of Senate committees and subcommittees, to be followed by consideration of these resolutions and other committee business.
301 Russell Building

FEBRUARY 27

10:00
Banking, Housing, and Urban Affairs
To hold oversight hearings on the impact of building codes on housing rehabilitation.
5302 Dirksen Building
Banking, Housing, and Urban Affairs
International Finance Subcommittee
To resume oversight hearings on U.S. export policy.
Room to be announced
Govermental Affairs
Federal Spending Practices and Open Government Subcommittee
To hold oversight hearings on the SBA minority business program.
3302 Dirksen Building
Joint Economic
To resume hearings on the President's economic report.
1202 Dirksen Building

2:00 p.m.
Appropriations
Labor-HEW Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the Health Resources Administration, Department of HEW.
S-128, Capitol

FEBRUARY 28

9:00 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To resume hearings on proposed fiscal year 1979 authorizations for NASA.
235 Russell Building

9:30 a.m.
Human Resources
To hold a business meeting to consider recommendations it will make to the Budget Committee for the fiscal year 1979 budget in accordance with the Congressional Budget Act.
Until noon 4232 Dirksen Building
Veterans' Affairs
To consider committee budget resolution.
412 Russell Building

10:00 a.m.
Appropriations
Interior Subcommittee
To consider additional funding for items of the Department of the Interior and related agencies, proposed to be included in a second supplemental appropriations, and to hold hearings on proposed budget estimates for fiscal year 1979 for Alaska Land Use.
1114 Dirksen Building
Appropriations
Military Construction Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1979 for military construction programs.
S-146, Capitol
Budget
To receive testimony from Energy Secretary Schlesinger in preparation for reporting the first concurrent resolution on the fiscal year 1979 congressional budget.
6202 Dirksen Building
Environment and Public Works
Water Resources Subcommittee
To mark up H.R. 7744, to permit the contract dredging for improvement of rivers and harbors by private industry.
4200 Dirksen Building
Select Small Business
To hold hearings on small business aspects of the Administration's 1978 tax program.
424 Russell Building
Rules and Administration
To resume hearings to receive testimony in behalf of resolutions requesting funds for activities of Senate committees and subcommittees, to be followed by consideration of these resolutions and other committee business.
301 Russell Building

10:30 a.m.
Appropriations
Labor-HEW Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the Department of HEW.
S-128, Capitol

2:00 p.m.
Appropriations
Labor-HEW Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the Office of Education, Department of HEW.
S-128, Capitol

MARCH 1

9:00 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To resume hearings on proposed fiscal year 1979 authorizations for NASA.
235 Russell Building

10:00 a.m.
Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the Bureau of Outdoor Recreation, and Land and Water Conservation Fund.
1114 Dirksen Building
Appropriations
Labor-HEW Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for elementary and secondary education programs, Department of HEW.
S-128, Capitol
Budget
To continue hearings in preparation for reporting the first concurrent resolution on the fiscal year 1979 congressional budget.
6202 Dirksen Building
Joint Economic
To resume hearings on the President's economic report.
1202 Dirksen Building

2:00 p.m.
Appropriations Labor: HEW Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for school assistance in Federally-affected areas, and emergency school aid programs, Department of HEW.
S-128, Capitol

MARCH 2

10:00 a.m.
Appropriations
HUD-Independent Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the Consumer Product Safety Commission.
1318 Dirksen Building
Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the National Park Service.
1114 Dirksen Building
Appropriations
Labor-HEW Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1979 for the Office of Education, Department of HEW.
S-128, Capitol
Budget
To receive testimony from Defense Secretary Brown in preparation for reporting the first concurrent resolution on the fiscal year 1979 congressional budget.
6202 Dirksen Building

2:00 p.m.
Appropriations
Labor-HEW Subcommittee
To continue hearings on proposed budget estimates for fiscal eyar 1979 for the Office of Education, Department of HEW.
S-128, Capitol

MARCH 3

9:30 a.m.
Environment and Public Works
Resource Protection Subcommittee
To mark up S. 1820, to preserve examples of America's diverse natural ecological resources for classification, identification, and protection, and S. 1140, to encourage and assist States in development of improvement programs for the conservation of "nongame" species of fish and wildlife.
4200 Dirksen Building

10:00 a.m.
Appropriations
Labor-HEW Subcommittee
To hold hearings on spending practices of individual departments (Mission Budgeting) at HEW, and on proposed budget estimates for fiscal year 1979 for the Health Care Financing Administration, Department of HEW.
S-128, Capitol

11:00 a.m.
Appropriations
HUD-Independent Agencies Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1979 for the Consumer Product Safety Commission, Office of Consumer Affairs, and Consumer Information Center.
1318 Dirksen Building

MARCH 6

9:30 a.m.
Environment and Public Works
Transportation Subcommittee
To resume hearings on issues relating the Federal highway program, including the level of Federal support, completion of the Interstate System, and the costs of maintenance on the Federal highway system.
4200 Dirksen Building

2:00 p.m.
Appropriations
Labor-HEW Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1979 for the Office of Education, Department of HEW.
S-128, Capitol

6:00 p.m.
Veterans' Affairs

HOUSE OF REPRESENTATIVES—*Tuesday, February 7, 1978*

The House met at 12 o'clock noon.

Dr. Fuad Nucho, S.T.D., Ph. D., pastor, St. Stephen Lutheran Church, Baltimore, Md., offered the following prayer:

O Lord God, source of truth, love, and freedom: We thank Thee for our being and well-being, and turn to Thee for guidance, inspiration, and support. Add Thy blessing to the efforts of these Thy servants, the Representatives of our people, as they seek to serve our country. Prepare and direct their minds and

hearts that they may discharge their responsibilities wisely and faithfully, with integrity and imagination. Grant that their thinking may be sound, their motives honorable, their expectations realistic, and their decisions right. Bless their loved ones and all our people, and help our Nation to be equal to the challenge of our times. Give us the courage to stand for the right, and the determination to strive for excellence in all things. Amen.

CALL OF THE HOUSE

Mr. ROUSSELOT. Mr. Speaker, under rule I, clause 1, of the rules of the House, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. WRIGHT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 41]

Ambro	Gephardt	Pattison
Andrews, N.C.	Giaimo	Quie
Archer	Gibbons	Rangel
Armstrong	Goodling	Rostenkowski
Bellenson	Hansen	Ruppe
Bingham	Harsha	Sarasin
Breaux	Hawkins	Scheuer
Brown, Calif.	Heckler	Shipley
Brown, Mich.	Holland	Shuster
Brown, Ohio	Holt	Skubitz
Burton, John	Hyde	Smith, Iowa
Cederberg	Jeffords	Solarz
Coleman	Jenrette	Steiger
Conyers	Jones, Tenn.	Stockman
Cotter	Krueger	Teague
Dent	LaFalce	Thompson
Diggs	Le Fante	Thornton
Dodd	McDonald	Treen
Dornan	McFall	Tucker
Drinan	McKinney	Udall
Eckhardt	Martin	Ullman
Edwards, Ala.	Mikva	Vander Jagt
Evans, Colo.	Mitchell, Md.	Weiss
Fithian	Murphy, Ill.	Whitten
Flood	Myers, Michael	Wydler
Ford, Mich.	Nix	Yates
Fountain	Obey	Zeferetti
Fraser	Ottinger	
Frey	Patterson	

The SPEAKER pro tempore (Mr. WRIGHT). On this rollcall, 347 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

PRIVATE CALENDAR

The SPEAKER pro tempore. This is Private Calendar day. The Clerk will call the first individual bill on the Private Calendar.

KWONG LAM YUEN

The Clerk called the bill (H.R. 1798) for the relief of Kwong Lam Yuen.

Mr. ROUSSELOT. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

MORRIS AND LENKE GELB

The Clerk called the bill (H.R. 3084) for the relief of Morris and Lenke Gelb.

Mr. WYLIE. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The SPEAKER pro tempore. This concludes the call of the Private Calendar.

OVERSIGHT HEARINGS ON RECENT GRAIN ELEVATOR EXPLOSIONS

(Mr. GAYDOS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GAYDOS. Mr. Speaker, the series of recent grain elevator explosions have prompted grave concerns about the health and safety conditions of those employees who work in the grain industry. Labeled as the worst disasters in the history of the U.S. grain industry, the recent explosions have claimed the lives of more than 60 persons. Every effort must be made to prevent a recurrence of such tragic loss of life and to insure a safe and healthful workplace for all workers.

Accordingly, the Subcommittee on Compensation, Health and Safety is continuing its oversight hearings on the Occupational Safety and Health Act, focusing on the recent explosions in Galveston, Tex., and Westwego, La. The disaster at Farmers Export Corporation in Galveston on December 27 took the lives of 18 persons and a December 22 explosion at Continental Grain Co.'s facility in Westwego resulted in 36 fatalities.

The oversight hearings will resume in Galveston at 9 a.m., February 9, in the first floor jury assembly room, Galveston County Courthouse, 722 Moody Street. The following persons have been invited to testify: The mayor, city manager, and fire marshal of Galveston; representatives of the Texas State air pollution board; employees of the Federal Grain Inspection Service and Farmers Export Corp.; and management representatives of Farmers Export Corp.

After concluding the Galveston hearings, the subcommittee will then travel to New Orleans for additional hearings on February 10 and 11. The Louisiana hearings will begin at 9 a.m. both days in the Jefferson Parish council chambers, Second and Derbigny Streets, Gretna. The following persons have been invited to testify: The lieutenant governor, James Fitzmorris of the State of Louisiana; Mayor Ernest Tassin of Westwego; Sheriff Cromvich of Jefferson Parish; State Fire Marshal Raymond B. Oliver; State Agriculture Commissioner Gilbert Dozier; employees of both Continental Grain Co. and the Federal Grain Inspection Service; Continental Grain representatives; and Mr. James Coerver, Director of the Bureau of Environmental Services, Office of Health Services and Environmental Quality.

Subsequent hearings will be conducted in Washington, D.C., when representatives of the scientific community, the insurance industry, the grain elevator industry, labor organizations and Federal agencies will be invited to participate in the hearings.

CONSUMER REPRESENTATION IS AN IDEA WHOSE TIME HAS PASSED

(Mr. LEVITAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVITAS. Mr. Speaker, later today the House will consider a bill which is the so-called Consumer Protection Agency legislation. I think it is very significant that on this morning the prestigious Washington Post in its editorial column has editorially suggested that this legislation not be passed. The Washington Post concluded, as have many of us, that a new executive agency called the Consumer Protection Agency or the Office of Consumer Representation is an idea whose time has passed.

FINANCES OF THE U.S. GOVERNMENT OUT OF CONTROL

(Mr. BURGENER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BURGENER. Mr. Speaker, the President's 1979 budget provides ample proof that the finances of the U.S. Government are out of control. But to hear the President talk, this is a conservative budget and thus far he has managed to convince many of the press as well. But the facts speak otherwise:

Compared to 1978, outlays will rise 33 percent faster than the rate of inflation, and budget authority—that license for both present and future spending—will jump an astonishing 13 percent. Most important, we are now in our 35th consecutive month of economic recovery, yet the budget deficit remains unchanged at over $60 billion—and this coming from a man who solemnly pledged to balance the budget within 4 years. A promise, I might add, he has now unceremoniously dropped.

Let us look at the detail of this budget—because in so doing we can only conclude the budget is at best unrealistic and at worst deliberately distorted.

There are sensitive and important programs which have been eliminated or reduced by the President which any informed observer knows Congress will restore—water projects, school impact aid, veterans' cost-of-living adjustments, farm programs, and so forth. At the same time there are more than 20 new social program spending schemes, not the least of which is the proposed federally owned and operated consumer cooperative bank.

This rather incredible scheme passed the House last year by one single vote—after extensive arm twisting. The cost would be $1.6 billion in budget authority and $300 million in outlays for fiscal year 1979.

I fear Congress will fail to eliminate many of these costly and unnecessary social spending schemes.

Now in all fairness to the President, he inherited a Federal budget of runaway proportions from a Congress which has consistently rejected any attempt to restrain the growth in spending. Yet rather than try to slow this raging juggernaut, he has simply hopped aboard. He may have fooled the media so far, but he is going to have trouble convincing the American people that a $60 billion deficit, which could grow to over $80 billion, is either necessary or in their best interest.

NECESSARY FOR A NEW BUDGET WITH A NONINFLATIONARY DEFICIT

(Mr. REGULA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. REGULA. Mr. Speaker, I would like to compliment the President on a master stroke of public relations. He has sent us a budget which the press has obligingly called "restrictive," "tight," and "lean." For all the world he appears a born-again conservative.

In fact it is a budget constructed to give the illusion of something that is not really there. Take the deficit of $61 billion, for example, and see what is likely to happen to that.

First, the President has made cuts in programs such as water resources, power projects, impact aid, veterans, and the like that he knows full well the Congress will restore. So add $3 billion right at the start. Then add back in money to make up for the wholly unrealistic cost estimates in some entitlement programs like farm price supports and disaster loans, and we have the deficit up to $70 billion just to pay for programs already passed. Now let us assume that the spending shortfall of $22 billion planned in the budget will not occur. This means outlays, and hence the deficit could go up by $22 billion. That puts us at $92 billion, and we have not done anything new.

Finally, if we accept the fact that those revenue-raising items the President refers to as tax "reform" are not adopted by the Congress, we have to knock out the $9 billion in revenues these measures would have raised. Suddenly, the budget deficit for 1979 could well be pushing a $100 billion, and this is before the Congress passes any new programs of its own, considers the forthcoming urban policy, more aid to New York City or to the Postal Service, or added relief for the hard-pressed farmers.

The irony of all this is that the Congress will be blamed by the White House for "busting" the budget when, in fact, the President has sent us a budget with a potential deficit of $100 billion already built into it.

I, for one, have absolutely no intention of being a party to an inflationary budget deficit, to say nothing of one in the $100 billion range. This budget must be completely reworked. The programs zero based budgeting should have eliminated or reduced will have to be cut by Congress; the wholesale increases the President has lavished on hundreds of social welfare programs must be pared back to more reasonable levels, and a new budget, with a noninflationary deficit provided to the American people.

ADDITIONAL FEDERAL JUDGESHIPS

Mr. RODINO. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 7843) to provide for the appointment of additional district and circuit judges and for other purposes, as amended.

The Clerk read as follows:

H.R. 7843

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the President shall appoint, by and with the advice and consent of the Senate, three additional district judges for the northern district of Alabama, one additional district judge for the middle district of Alabama, two additional district judges for the district of Arizona, two additional district judges for the eastern district of Arkansas, one additional district judge for the northern district of California, three additional district judges for the eastern district of California, one additional district judge for the central district of California, two additional district judges for the southern district of California, two additional district judges for the district of Colorado, one additional district judge for the district of Connecticut, three additional district judges for the middle district of Florida, five additional district judges for the southern district of Florida, four additional district judges for the northern district of Georgia, one additional district judge for the southern district of Georgia, three additional district judges for the northern district of Illinois, one additional district judge for the eastern district of Illinois, one additional district judge for the northern district of Indiana, one additional district judge for the southern district of Iowa, one additional district judge for the district of Kansas, two additional district judges for the eastern district of Kentucky, three additional district judges for the eastern district of Louisiana, one additional district judge for the middle district of Louisiana, one additional district judge for the western district of Louisiana, one additional district judge for the district of Maine, two additional district judges for the district of Maryland, three additional district judges for the district of Massachusetts, three additional district judges for the eastern district of Michigan, two additional district judges for the western district of Michigan, one additional district judge for the district of Minnesota, one additional district judge for the eastern district of Missouri, two additional district judges for the western district of Missouri, one additional district judge for the district of Nevada, one additional district judge for the district of New Hampshire, two additional district judges for the district of New Jersey, one additional district judge for the district of New Mexico, one additional district judge for the northern district of New York, one additional district judge for the eastern district of New York, one additional district judge for the eastern district of North Carolina, one additional district judge for the middle district of North Carolina, one additional district judge for the western district of North Carolina, one additional district judge for the northern district of Ohio, one additional district judge for the southern district of Ohio, one additional district judge for the western district of Oklahoma, one additional district judge for the eastern and northern districts of Oklahoma, two additional district judges for the district of Oregon, two additional district judges for the middle district of Pennsylvania, three additional district judges for the district of Puerto Rico, three additional district judges for the district of South Carolina, one additional district judge for the district of South Dakota, one additional district judge for the middle district of Tennessee, three additional district judges for the northern district of Texas, one additional district judge for the eastern district of Texas, four additional district judges for the southern district of Texas, one additional district judge for the western district of Texas, one additional district judge for the district of Utah, two additional district judges for the eastern district of Virginia, two additional district judges for the western district of Virginia, one additional district judge for the eastern district of Washington, one additional district judge for the western district of Washington, one additional district judge for the southern district of West Virginia, one additional district judge for the eastern district of Wisconsin, one additional district judge for the western district of Wisconsin, and one additional district judge for the district of Wyoming.

(b) One of the two existing district judgeships for the northern, eastern, and western districts of Oklahoma, heretofore provided for by section 133 of title 28 of the United States Code, shall hereafter be a judgeship for the northern district of Oklahoma only, and the other such judgeship shall hereafter be a judgeship for the western district of Oklahoma only. The more senior of the present incumbents in those two present judgeships shall henceforth serve only in the western district, and the more junior of the two shall henceforth serve only in the northern district. Both such present incumbents shall henceforth hold their offices under section 133, as amended by this Act.

(c) The existing district judgeship for the eastern and western districts of Washington, heretofore provided for by section 133 of title 28 of the United States Code, shall hereafter be a district judgeship for the western district of Washington only, and the present incumbent of such judgeship shall henceforth hold office under such section 133, as amended by this Act.

(d) In order that the table contained in section 133 of title 28 of the United States Code will, with respect to each district therein, reflect the changes in the number of judgeships made by this Act, such table is amended to read as follows:

SEC. 2. The President shall appoint, by and with the advice and consent of the Senate, one additional district judge for the eastern district of Kentucky, one additional district judge for the district of Minnesota, one additional district judge for the northern district of Ohio, and one additional district judge for the southern district of West Virginia. The first vacancy in the office of district judge in the judicial districts named in this section occurring after the effective date of this Act shall not be filled.

SEC. 3. The President shall appoint, by and with the advice and consent of the Senate, one additional circuit judge for the first circuit, two additional circuit judges for the second circuit, one additional circuit judge for the third circuit, three additional circuit judges for the fourth circuit, eleven additional circuit judges for the fifth circuit, two additional circuit judges for the sixth circuit, one additional circuit judge for the seventh circuit, one additional circuit judge for the eighth circuit, ten additional circuit judges for the ninth circuit, one additional circuit judge for the tenth circuit, and two additional circuit judges for the District of Columbia.

SEC. 4. In order that the table contained in section 44(a) of title 28, United States Code, will, with respect to each circuit, reflect the changes in the number of judgeships made by this Act, such table is amended to read as follows:

"Circuits	*Number of judges*
District of Columbia	11
First	4
Second	11
Third	10
Fourth	10
Fifth	26
Sixth	11
Seventh	9
Eighth	9
Ninth	23
Tenth	8".

SEC. 5. Section 3 of the Act entitled "An Act to provide that chief judges of circuit courts and chief judges of district courts having three or more judges shall cease to serve as such upon reaching the age of seventy" (Public Law 85–593, approved August 6, 1958 (72 Stat. 497)) is amended by striking out ", except that the amendment made by section 136 shall not be effective with respect to any district having two judges in regular active service so long as the district judge holding the position of chief judge of any such district on such date of enactment continues to hold such position".

SEC. 6. (a) The first section and section 2 of this Act shall take effect immediately upon the President's promulgation and publication of regulations establishing procedures and guidelines for the selection, on the basis of merit, of nominees for United States district court judgeships authorized by this Act.

(b) The President may waive such regulations with respect to any nomination by notifying the Senate of the reasons for such waiver.

(c) Following the promulgation and publication of such regulations, no nomination or appointment to a United States district court judgeship may be invalidated on the basis of the President's failure to comply with this section or with any regulation promulgated under this section.

(d) This Act, other than the first section and section 2, shall take effect on the date of enactment of this Act.

SEC. 7. The Congress—

(1) takes notice of the fact that only 1 per centum of Federal judges are women and only 4 per centum are blacks; and

(2) recommends that the President, in selecting individuals for nomination to the Federal judgeships created by this Act, give due consideration to qualified women, blacks, Hispanics, and other minority individuals.

The SPEAKER pro tempore. Is a second demanded?

Mr. McCLORY. Mr. Speaker, I demand a second.

Mr. BAUMAN. Mr. Speaker, is the gentleman from Illinois (Mr. McCLORY) opposed to the bill?

The SPEAKER pro tempore. Is the gentleman from Illinois (Mr. McCLORY) opposed to the bill?

Mr. McCLORY. No, I am not, Mr. Speaker.

Mr. BAUMAN. I demand a second, Mr. Speaker.

The SPEAKER pro tempore (Mr. MURTHA). The gentleman qualifies. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. RODINO) will be recognized for 20 minutes, and the gentleman from Maryland (Mr. BAUMAN) will be recognized for 20 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. RODINO).

Mr. RODINO. Mr. Speaker, I yield myself such time as I may consume in those 20 minutes.

Mr. Speaker, the House this afternoon has an opportunity to address as deep a concern as almost any that will face the Congress in 1978: The quality of justice in our Federal court system.

In recent years, that quality has been steadily eroding. The effectiveness of the U.S. district courts and the very operation of the U.S. circuit courts of appeal have been hampered by increasing congestion and frustrating delay.

Because those twin problems are partially the result of inadequate judicial manpower, H.R. 7843 authorizes the creation of 110 additional judgeships for the district courts and 35 additional judgeships for the circuit courts.

The Judiciary Committee, in reporting H.R. 7843 by a vote of 31 to 2, recognizes, of course, that simply adding more judges can only be a partial solution to the current problems facing the courts. A genuine, constructive, long-range solution must also include modifications in jurisdiction and other innovative approaches to modernization. But in order to achieve those goals without prejudicing individual rights, the committee is convinced that these new judges are critically needed at this time.

In 1950, only 92,000 cases were filed in our U.S. district courts. Last year, however, more than 177,000 cases were filed in those same courts.

And the figures for our Federal appellate courts are even more alarming. In 1953, 25 years ago, only 3,226 appeals were filed in the circuit courts. By 1967

the year before the Congress last acted to provide additional judgeships, the figure had risen to 7,903, but even that lofty figure translated into only 90 appeals filed per judge. Last year, however, better than 19,000 appeals were filed in our Federal courts—nearly six times the 1953 figure—and an average of 197 appeals per judge. That is more than double the figure that prompted the Congress to act 10 years ago.

When the most recent requests for new judgeships by the Judicial Conference of the United States came before the Congress early last year, they were referred to the Subcommittee on Monopolies and Commercial Law which undertook a careful 6-month examination of the Conference proposals. For a variety of reasons, including the extraordinary constitutional responsibilities exercised by the House during the 93d Congress, the prior quadrennial request of the Conference for 51 additional district judgeships in 1972 had not been acted upon. Thus at the start of the subcommittee's inquiry, the Congress was faced with an unprecedented request for 107 new district court judgeships, reflecting in fact the results of two quadrennial surveys.

Therefore, the subcommittee engaged in a painstaking scrutiny of the Conference requests. Many have said—and I believe it to be true—that the Subcommittee inquiry was one of the most exhaustive congressional analyses of the needs of the Federal courts undertaken in the post war era.

The subcommittee examination produced a number of important concerns with the method employed by the Judicial Conference in evaluating the judgeship needs of its district courts. Those problems are outlined in the committee report that accompanies this bill, but I am delighted to be able to report here today that the Chief Justice and other prominent representatives of the Conference have pledged to work closely with the committee and with the Congress in the future to develop newer, more reliable tools for evaluating these needs.

But that the Judicial Conference methodology is not presently without problems is hardly to state that the view of the committee is that its requests for judgeships are without merit.

It is abundantly clear, in fact, by all reasonable indicators—case filings, weighted case filings per judge, median time from filing to disposition of both civil and criminal cases, backlog, and statutory demands of the Speedy Trial Act—that the judicial manpower needs of the Federal courts have never been more substantial.

In order to meet those needs the committee wrestled with various hard and set formulas for determining precisely when a district court required additional help. For a variety of reasons, most importantly the need to retain flexibility so as to meet individual contingencies, the committee did not adopt any precise standard but it did follow a general rule of thumb that 350 weighted filings per judge was sufficient to warrant an additional judgeship.

Given the current backlog and the increasing amount of Federal litigation annually the committee believes that its general 350 guideline is the most responsible gage for congressional action.

Therefore, the 110 judgeships authorized by H.R. 7843 for the district courts and the 35 judgeships created for the circuit courts are demonstrably necessary to meet current needs. Never in our history, however, have this number of additional judgeships been created by a single act. Certainly then the bill before us is wholly fair—no area of the country has been denied help, and judgeships—in many cases seven, eight, even nine new judgeships—have been approved for every State for which a request was made.

The support for these judgeships and for this bill, Mr. Speaker, exists at all levels of the bench and bar, and the support is nationwide. The Judiciary Committee has received correspondence from lawyers, judges, and bar associations in almost every State of the Nation.

The Attorney General of the United States has stated the case directly:

> . . . We need more federal district judges. It is imperative that Congress act soon to create such additional judgeships and that the number of judgeships created realistically address the true present need, rather than what the need may have been several years ago. . . . A similar need exists for new circuit judgeships.

And Justin Stanley, president of the American Bar Association, also made an urgent plea in testimony before the committee last March. According to President Stanley:

> . . . In 1976 the need for additional judges was demonstrably great. This year that need is even greater . . .
>
> That need in my opinion, calls for prompt action on the part of the Congress.

And the Chief Justice has repeatedly urged this legislation saying as recently as December 10 that it was very "badly needed."

Finally then, Mr. Speaker, a brief word about sections 6 and 7 of the committee bill. Section 6 is the so-called merit selection provision and section 7 is the affirmative action language. Neither acts to limit, circumvent or in any way interfere with the President's article II power to nominate and, with the advice and consent of the Senate, to appoint Federal judges. But section 6, in dealing with the 110 district judgeship authorized by the bill, and section 7 in dealing with all the new positions, merely presents the strong view of the Congress that merit selection procedures and procedures to insure the consideration of qualified blacks, women, Hispanics, and other minorities be developed to the extent possible.

Mr. Speaker, H.R. 7843 is a good bill—in many ways a truly monumental piece of legislation. It is the product of a full year's work by the Judiciary Committee, including 7 days of markup at the full committee level following the subcommittee's own 6-month examination. All members of the committee, of course, deserve credit for the long hours of work put forward to craft this bill, but I personally want to thank BOB MCCLORY for his leadership, and want to express my gratitude for the enormous effort and support of the subcommittee membership with whom I worked so closely: JACK BROOKS, WALTER FLOWERS, JOHN SEIBERLING, BARBARA JORDAN, RON MAZZOLI, BILL HUGHES, BOB MCCLORY, CHUCK WIGGINS, and BILL COHEN. Without their efforts, this landmark bill would hardly have been possible.

Mr. Speaker, the House today can take a major step toward resolving a critical Federal problem. I urge the adoption of H.R. 7843.

Mr. SPEAKER, I yield such time as he may consume to the ranking minority member, the gentleman from Illinois (Mr. MCCLORY).

Mr. MCCLORY. Mr. Speaker, I rise in support of H.R. 7843, a bill to create additional judgeships. As reported, the bill would create 110 new district judgeships and 35 new circuit judgeships.

This is the largest judgeship bill in the history of the Republic. It would increase authorized judgeships by almost 30 percent. The enormity of this increase places critical stress on how these new judges are to be appointed. Recent events have underscored the need to maintain an impartial system of justice free of the politics of the past.

Consequently, the authorization of the 110 new district judgeships is made contingent upon the establishment of procedures to insure the merit selection of those appointed. In other words, under the bill, if those procedures are not promulgated, the 110 district judgeships are not created. This condition is placed only on the creation of district judgeships since a system for merit selection of circuit judges is already in place.

I am certain that we have all heard that President Carter promised to take the judiciary out of politics, but that either he or Attorney General Bell, or both, agreed with Senator EASTLAND in December of 1976 to limit the effect of that promise to circuit judgeships. The language in the bill would thus prompt the President to fulfill his promise to the American people.

The merit selection of district judges is critical to the legislation. To allow one President—no matter who he is—to reshape the Federal judiciary without such safeguards is an awesome prospect.

It should not be overlooked that the large number of judgeships authorized by the bill has been made necessary by political maneuvering in prior Congresses. In 1976, the committee reported to the House a district judgeship bill containing 49 judgeships. Although that bill was amended by me to delay the effective date until a newly elected administration was sworn in and thus keep the bill out of politics, some House Members were fearful that President Ford would be reelected, and the bill was killed. Just 14 months later the committee voted to recommend 110 judgeships—more than double the previous number.

But in suggesting that politics has brought us here, it must be noted that the politics was not partisan but personal. Our subcommittee of 10 members—7 Democrats and 3 Republicans—agreed unanimously to approve judgeship on the basis of actual needs; our

recommendation was for 81 district judgeships. In fact our objectivity required us to deprive the States we represent of judgeships that were requested by the Judicial Conference or the district courts in our respective States. But a bipartisan coalition overturned this result in full committee and added 29 additional judgeships.

In view of the great pressures surrounding the creation of additional judgeships—pressures from judges and pressures from Members of this body, pressures which the committee found hard to resist, it is imperative that safeguards be placed within the selection process. And in this regard, the bill goes as far as the Constitution permits.

In the first session of this Congress no bill was given as much thought and study by our committee as this bill. And there were many lessons to be learned.

First. The request for 132 judges made by the Judicial Conference was simply too large to handle. Although I am certain that the request was on the high side, even the most accurate request would have been too large to digest. Thus, the fault lies more with the Congress for having waited for the needs of the judiciary to have become so aggravated. And, of course, that happened because the Congress was awaiting a Democratic administration.

These political facts of life contribute to a sense of panic in the judiciary which only further exacerbates the problem. On the basis of the past, judges have good reason to fear that if the present administration were unseated in 1980 by a Republican who served two terms, it might be a long time before the next judgeship bill. Thus there is a natural inclination to inflate needs, lobby hard, and reach for as much as possible.

The solution for this problem is more frequent reviews and more limited bills. If instead of espousing "omnibus" bills the committee were to address the needs in segments on a rotating basis—say, three circuits and its districts the first year, three other circuits the next, and so on, the committee could focus on true needs and there would be less temptation to logroll.

Second. The experiment of the Judicial Conference in projecting needs to justify judgeships must be terminated. The practice is to make projections selectively to justify requests unsupported by actual needs. It thus prompts district judges to request additional judgeships which are known to be unnecessary in order to enter the projected judgeship sweepstakes.

Moreover, the projections made in the past have not been accurate. This is particularly troubling in view of the constitutional tenet that a sitting judgeship cannot be repealed. And in the near future, it appears that the workload of the courts may be reduced rather than increased. Congress may very well pass legislation to limit diversity jurisdiction, thereby curtailing the judicial workload by about 25 percent. Also, the bankruptcy reform recently enacted by this body and the magistrates bill in our committee may likewise lighten the load. Projections at this time are hazardous at best.

Third. It would be helpful if some independent agency could evaluate and comment upon the asserted needs for additional judgeships. Regrettably, neither the Justice Department nor the American Bar Association were willing and able to do so. Thus the committee is left without assistance to assess the self-serving statements of the judiciary. Of course, this is ultimately not the fault of the judiciary but of the Congress. If no one is willing to come forward with a helpful critique, we must seek it out.

Fourth. The information submitted by the Judicial Conference to support its requests has been inadequate. With regard to each district, it was never very clear what part of the workload was borne by magistrates, senior judges, or visiting judges. It was particularly incongruous that magistrates—who were authorized and empowered to share part of the judicial burden—were ignored as a resource of the district court. In some instances magistrates, in fact, were being used to handle a substantial part of the load, yet judges were being credited with the results. It might thus appear that judges were overworked when they were not. In other instances judges may have been overworked but only because they would not delegate authorized minor tasks to magistrates as Congress had envisioned. Thus in some instances additional magistrates would have sufficed. Yet to add to the confusion, some statistics in some districts were adjusted by the Judicial Conference to reflect the fact that magistrates had done the work. But this was done erratically both among categories of cases and among the districts.

Then, finally, the weights accorded the various categories of cases to reflect the time consumed appeared outmoded to all. This required a great deal of double counting of cases. Time and again, the committee approved a judgeship where the district in question fell below the standard of 400 weighted cases per judge because of the complexity of cases filed in that court. But this reasoning counts those complex cases twice—first in weighting the caseload upward and then a second time in justifying discounting the difference between the district's weighted caseload and the 400 figure. If only Members of Congress made these arguments, then one might suspect mere political rationalizations were being made. But since the judges and the Judicial Conference made them as well, it would appear that the weights accorded various categories of cases need to be updated to reflect the time that judges actually spend on them.

Mr. Speaker, there is no question that the judiciary is much in need of additional judgeships and has been for several years. We must end the delay that is bogging down our Federal justice system. I urge my colleagues to support this legislation.

Mr. RODINO. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. Mr. Speaker, I rise in strong support of the judgeship bill (H.R. 7843) reported by the Judiciary Committee.

But first I would like to commend the chairman of the Judiciary Committee (Mr. RODINO), who has worked extremely hard on the bill to insure that judgeships are added only where there is an objectively demonstrated need. I think the chairman has done everything possible to make this bill fair and balanced and to resist political pressures to add judgeships in districts that simply did not need them.

I would like to turn now to a subject of great importance, namely the merit selection of district court judges. Section 6 of the bill, states that the creation of the 110 new district court judgeships contained in the bill will become effective only upon the President's promulgation of regulations containing procedures and guidelines for the merit selection of the new district court judges.

Mr. EDGAR. Mr. Speaker, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Speaker, I thank the gentleman for yielding.

I commend the gentleman for his leadership in providing in this bill the merit selection process.

I wonder if the gentleman could explain why that process is not stronger, why there is not language in the bill that would provide merit selection, mandating it to the White House.

Mr. SEIBERLING. Mr. Speaker, there are several reasons for that. First of all, as we know, the President ran into one of the hard political facts of life when, after his election, he looked into the implementation of his pledge to nominate judges on a merit basis. The problem is that Members of the other body like to reserve the powers they have by virtue of the Senate's role in approval of nominations of Federal judges by the President. So in order to enable him to come up with a merit selection system that would have a chance of being accepted, it was necessary to give him considerable flexibility in working out the details.

Furthermore, while it is probably permissible under the Constitution for the Congress to impose a detailed procedure for the screening of potential nominees for Federal judgeships before the President makes his selection, it seemed desirable, as a matter of comity, to recognize that the selection is, after all, the President's constitutional prerogative and that we should be careful not to intrude unduly on his exercise of that responsibility.

Mr. Speaker, the concept of merit selection of district court judges is not new. For the last 20 years, it has been supported by the American Judicature Society and the American Bar Association. Before our consideration of H.R. 7843, merit selection had received almost no attention in Congress. But the concept was given new life when Jimmy Carter made the following pledge during his campaign for the Presidency in 1976:

> All federal judges . . . should be appointed strictly on the basis of merit without any consideration of political aspect or influence. We can no longer afford to treat the administration of justice as political patronage.

Last year, Tom Ryan of the Missouri Public Interest Research Group, who has

worked very hard to promote merit selection of Federal judges, suggested that merit selection should be tied to the creation of the new judgeships in the omnibus judgeship bill. I offered the amendment in the subcommittee, but it lost. Then Representatives RON MAZZOLI, ROBERT MCCLORY, and I offered it last November 30 in the full Judiciary Committee, which adopted it by a 20 to 12 vote.

House passage of H.R. 7843 today will constitute the first effort by the House to remove partisan political patronage from the judicial selection process. House passage will also constitute a formal House endorsement of Jimmy Carter's campaign pledge.

Some people question our constitutional power to require merit selection of judges. I asked the Library of Congress to examine that issue, and its conclusion was that Congress very definitely has the power under article I of the Constitution, which authorizes Congress to place qualifications on congressionally created offices such as Federal district court judgeships. I would note also that the Library of Congress analysis appears to support the constitutionality of a statutory provision requiring merit selection of district court judges even if the provision is made far more binding than the one we have included in H.R. 7843.

It must be understood that the House bill would require the President to promulgate merit selection regulations before the 110 new judgeships would even be created. However, after promulgating the regulations, the the President could waive them by notifying the Senate in any particular case of the reasons for the waiver.

Of course, because of the requirement of germaneness, the merit selection provision only applies to the new judgeships. It would not technically apply to existing judgeships. Nonetheless, we hope that the President would exercise his inherent power to extend the regulations to all judgeships, in the same way that President Carter has already promulgated regulations creating panels in each judicial circuit to recommend qualified individuals for nomination to court of appeals judgeships and all other Federal court judgeships except on the district courts. President Carter's executive orders on this matter, which follow these remarks, represent a very important first step in removing partisan politics from the selection of Federal judges. President Carter and Attorney General Bell deserve our praise and that of the American public for their efforts to promote and achieve merit selection of all Federal judges.

While the executive orders do not reach district court judgeships, President Carter and Attorney General Bell have undertaken a quiet campaign to persuade individual Senators to create their own merit selection advisory panels, whose function is to recommend one or more names of qualified individuals to a Senator. It is very significant that the Senators from a dozen States have created their own panels and have taken positive steps to insulate themselves from undue political pressures in the selection of district court judges. While we commend the efforts of these Senators, we believe that the citizens of every State deserve to have their judges chosen on the basis of merit.

The need is especially great right now, since H.R. 7843 will increase the number of Federal judges by 30 percent and the appointment of these new judges will determine the quality of justice in America for the next generation.

The quality of justice in America does depend on the quality of our Federal district court judges, who get lifetime appointments. That is why it is so important that they be chosen on the basis of their quality and proven excellence, rather than on the basis of partisan political patronage. Unfortunately, the Senate-controlled patronage system has chosen Federal judges for decades under both Democratic and Republican Presidents alike. Even though many of the judges chosen in this manner have been perfectly good, and even though some Senators have sought the most qualified individuals possible for nomination to the Federal bench, the patronage system should now be replaced by a merit selection system. It is gratifying that the Senators from my own State of Ohio have adopted a system of panels to recommend nominees for Federal district judges in Ohio on a merit basis.

The merit selection provision, you will note, does not define the term "merit." What is important is the fact that merit selection is to be contrasted to the patronage system.

At the same time, we are fully aware that under President Carter's executive orders, merit involves the following: Good standing in the bar, good reputation, integrity, good character, sound health, outstanding legal ability, commitment to equal justice under law, traits indicating the likelihood of proper judicial temperament, training, experience, expertise, and the ability to serve the community's needs. We have no quarrel with these criteria.

Nor does the merit selection provision specify the kinds of procedures which must be established by the President. We intend for the President to have broad discretion. We intend for the President to consult fully with the Senate in order to achieve a workable system that is based on merit rather than on patronage.

Under the bill, it would, in my opinion, be entirely appropriate for the President to promulgate regulations stating that he will consider Senators' recommendations only if the Senators have established their own merit selection advisory panels. Alternatively, the President could decide to establish his own advisory panels in each State or he could utilize the circuit court panels to make recommendations for judgeships within the circuit. There may be other appropriate procedures, with or without the direct participation by individual Senators. Supporters of the merit selection provision are very flexible on the specific procedures, so long as a genuine merit selection system is established.

One of the purposes of any merit selection system is to give all qualified individuals a reasonable opportunity to be considered for nomination to a Federal district court judgeship. This includes nonestablishment lawyers and other individuals whose training and varied experiences and ability qualify them for nomination.

The point also needs to be made here that, unlike U.S. attorneys and other officers who are appointed to serve at the pleasure of the President and who are responsible to the President through the Attorney General, our Federal judges are appointed for life and are responsible only to the Constitution and laws of the United States. That fact alone makes it inappropriate for judges to be appointed under a patronage system.

Editorials from the New York Times, the Washington Post, and the St. Louis Post Dispatch have supported merit selection of Federal judges. Last August, the American Bar Association again went on record in favor of merit selection. In addition, merit selection is supported by the American Judicature Society, Congress Watch and Common Cause.

I would like to indicate my strong support for section 7 of the bill, which recommends that the President give "due consideration" to the nomination of qualified women, blacks, Hispanics, and other minority individuals to Federal judgeships created by the bill. I do not consider this incompatible with merit selection, since any procedure for merit selection should adopt an affirmative action approach to seek to redress the serious lack of balance in the numbers of women and minorities on the Federal bench. It is the Federal courts which are supposed to achieve and protect "equal justice under law" where that need is greatest to eliminate discrimination and the appearance of discrimination.

Mr. BAUMAN. Mr. Speaker, I yield myself 4 minutes.

Mr. Speaker, I think it is highly unfortunate that a small group of elite Members in this House of Representatives feels that it is their prerogative to decide whether or not the total membership that represents all the people of the United States will have a right to vote on important legislation of this character.

I asked why this bill was brought up under suspension. I was told blithely that everybody had been accommodated on the Committee on the Judiciary.

Well, that is just great. But there are a lot of us here who do not serve on the Committee on the Judiciary, and we are debating, under a restrictive, no-amendment, 40-minute suspension situation, the largest single creation of Federal district judgeships in the history of this Republic, and none of us has a chance to do anything about it except to vote for or against. Apparently the Committee on the Judiciary thinks we are a booboisie that that does not have sense enough to deal with these very sensitive judicial issues.

The bill provides for more than a hundred additional judges for President Carter to name. Many of us would have liked to have had a chance to address and amend the provisions of this bill,

not to give Maryland still more judges, although we get two additional in this bill, but simply to clean some of the bill's worst provisions.

I suggest that the Members read page 17 of the bill. I suggest they read what I was told is a constitutional provision—we might call it the Marston plan—which allows the Congress to pat itself on the back for supposedly supporting merit selection of Federal judges. But the bill gives the President wide discretion in the selection and appointment of Federal judges and allows him to waive merit selection on his own word alone.

This certainly is not merit selection. Perhaps we should set up a commission to select judges, and allow it to recommend nominess for the judiciary. But we are not allowed to offer such an amendment.

I also want to call the attention of the membership—these Members who do not have the right to vote on amendments and who have to swallow this thing whole or get nothing at all—to section 7 of the bill. I do not know of any precedent in Federal law that suggests a racial or sexual quota for appointment to Federal office. I know there are many laws—and they are good laws—that say we cannot discriminate on the basis of sex, age, creed, or ethnic background.

But on page 17 we are told that the President is supposed to select Federal judges, taking into "due consideration," whatever that is, qualified women, blacks, Hispanics, and other minority individuals.

I wanted to offer a conservative amendment to require that we appoint a certain number of conservatives to the Federal bench. They certainly are a minority on the Federal bench. We have had judges writing laws in this country for the last 25 years overthrowing the will of Congress and kicking the people in the teeth relative to their popular concerns such as busing, abortion, and other issues. And now you are telling us that we do not have any right to offer an amendment to give balance to this bill so that the President may also give due consideration to other views.

No, friends, this is not the way to consider this bill. If it were cleaned up with amendments and brought out under an open rule and considered in due time, as the other judgeship bills in the past, I assume, have been, then we ought to vote for it. But it only takes one-third to put this bill back into committee, let them have a rule, let them come out, again and let them give us the right to amend, the right to vote. There is absolutely no need to jam this thing through so the President can sign a bunch of midnight judges into positions without proper consideration by both Houses of Congress.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from California.

Mr. ROUSSELOT. I thank the gentleman for yielding.

Mr. Speaker, I just heard our distinguished minority member of the Committee on the Judiciary say that if he had his druthers, the number of new judges would have been 81. And his rationale, as I understand it was, that 81 new judges would mean that each district judge would handle roughly, 400 filings per year per judge. I do not understand, if both the minority from our side and the chairman of the committee favored a more restrained number 81 to be exact—why we have to have this under suspension, and be forced to take it or leave it at 145. And I am really disappointed that we did not hear a better discussion of why the bill is given to us in a manner that we have to take it at 110 or leave it. There is no chance to amend it down to 81.

Mr. BAUMAN. Mr. Speaker, I yield 4 minutes to the gentleman from Texas (Mr. BROOKS).

Mr. BROOKS. Mr. Speaker, it is with deep regret that I must oppose the legislation before us. While I believe there is a need for the creation of new judgeships, I feel that the bill as reported by the Judiciary Committee is far too extravagant.

The Subcommittee on Monopolies and Commercial Law gave thorough consideration to the requests of the Judicial Conference and recommended the creation of 81 new Federal court district judges. The full Judiciary Committee increased this number to 113.

Creating a Federal district court judgeship is no trifling matter: each one costs $286,000 the first year and nearly $250,000 every year after that. Circuit court judgeships are hardly less expensive, costing $250,000 the first year and $201,000 every year after that.

But beyond mere costs, though they are critically important, I feel we are asked to rubber stamp the requests of the Judicial Conference if we pass the bill as reported by the Committee.

In 1950, we had only 218 Federal district court judges. By 1969 we had 400. Now we purport to add 110 more by H.R. 7843. The Subcommitee on Monopolies and Commercial Law found 81 to be necessary, not 110.

We cannot simply keep adding judges as our responses to the problems of the courts. It is foolishness because we are heading for 1,200 judges by the year 1990 at the present rate. And it is foolishness because a fair, honest evaluation simply cannot sustain the need for anywhere near the 110 judgeships authorized by H.R. 7843.

But, frankly, in too many areas the courts are not as overburdened as the judges might have us believe. The docket is not as imposing as the statistics they cite may indicate. In too many instances, judges simply need to be more efficient.

And I believe the subcommittee was correct, and even courageous in their assessment of the requests of the Judicial Conference. However, the full Judiciary Committee was not.

Mr. Speaker, I urge that the Members vote down this legislation and send it back to the Judiciary Committee for further consideration. I believe the committee can reexamine this issue and report a bill which will create judgeships only where they are needed.

Mr. BAUMAN. Mr. Speaker, I yield 3 minutes to the gentleman from Illinois (Mr. RAILSBACK).

FEDERAL JUDGESHIPS

Mr. RAILSBACK. Mr. Speaker, today we are considering the bill, H.R. 7843, a bill to create additional Federal judgeships. This legislation has received very careful consideration by both the Subcommittee on Monopolies and Commercial Law and the House Judiciary Committee.

There has not been a bill to create additional Federal district judgeships since 1970. We are all certainly aware that the number of both criminal and civil cases have increased dramatically over the past 7 years. Because of the Speedy Trial Act many Federal district courts have only been able to hear criminal cases. Civil cases in some districts have been forced to wait over 24 months before being heard. These long delays are a hinderance to the judicial process.

This legislation will meet the needs of the district courts by providing additional judges so that each judge will have a fair and workable caseload and that all cases will receive a speedy trial. Another important section of the bill is the issue of merit selection. The bill recommends that the President shall promulgate guidelines and procedures for the appointments of judges to the district courts on the basis of merit. This is the first step toward the total merit selection of Federal judges and one which I feel is needed.

Certainly an important part of our judicial system is the right to a fair and speedy trial. Long delays with a hearing before an overworked judge does not provide this right. The bill, H.R. 7843, will provide the additional judges needed along with expressing the sense of Congress that Federal judges should always be chosen for their abilities. I would urge my colleagues to support this legislation.

Mr. QUAYLE. Mr. Speaker, will the gentleman yield?

Mr. RAILSBACK. I yield to the gentleman from Indiana.

Mr. QUAYLE. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I want to commend the Judiciary Committee and particularly my friend from Illinois (Mr. RAILSBACK) for its indulgence and generous consideration which resulted in the creation of a fourth judgeship for Northern Indiana.

As members of the committee well know, the first action of the committee was to delete the Judicial Conference's recommendation for an additional judge in the northern district of Indiana.

However, the committee was quite willing to listen to the facts and reasons why the additional judgeship was critical to the needs of northern Indiana. To its credit, the committee then included an additional judgeship for Indiana's northern district court in an amendment to H.R. 7843.

This is the legislative process at its best. Members of the committee earnestly and impartially reviewed all the requests and then acted accordingly. Again, I commend the committee for its deliber-

ate and judicious action in this regard.

I urge House passage of H.R. 7843, the Omnibus Judgeship bill which the House Judiciary Committee has considered at length for the past 12 months.

This is the first bill to add to the number of Federal judges since 1970. Because of the heavy caseloads and long delays both in civil and criminal cases, it is necessary that we increase the number of Federal judgeships—especially in Indiana's Northern District Court.

At the present time, just three Federal judges are working to meet the needs of northern Indiana residents, yet our district ranks third in the Nation in increased civil and criminal case filings. Of the 94 judicial districts in the country, only five have experienced longer delays than the Northern District of Indiana. Criminal filings have increased so rapidly that the three judges here will soon be trying nothing but criminal cases if another judgeship is not approved.

Civil cases have a 24-month backlog—118 percent above the national average of 11 months. Thus civil rights cases are waiting for a place on the calendar while the courts wrestle with complex, protracted cases involving narcotics, land fraud, and medicare fraud offenses.

A number of attorneys in my district have written me concerning this legislation. They tell me they will try any avenue rather than attempt to get a civil case into the Federal courts in northern Indiana.

I urge your support for equal judicial opportunity for the Northern District Court in Indiana. A fourth judge will give northern Indiana residents the same right of access to the courts available in other parts of the country.

Mr. BAUMAN. Mr. Speaker, I yield 1 minute to the distinguished gentleman from North Carolina (Mr. ROSE).

Mr. ROSE. Mr. Speaker and my colleagues, on September 30, 1977, Raymond Taylor presented to the Federal Judicial Center this foot thick document entitled, "Federal Court Library Study Report and Recommendations." He had been employed months earlier by the Center to conduct this study.

In his recommendations he noted as follows and I quote:

> It is not unrealistic to suggest that if the Federal courts had the necessary facilities and personnel to do law research efficiency, the resulting increase in overall efficiency and production on the part of the present court personnel might substantially reduce the number of new judgeships that the Congress presently is considering creating.

This report has been criticized by some within the administrative office of the Courts. However, Judge Walter Hoffman has noted that Raymond Taylor's study was so complete that "we do not know" what to do with it."

Mr. Speaker, I will vote for this present bill, but I urge the Judiciary Committee, the Judicial Conference, and the Judicial Center to give careful attention to the work of Raymond Taylor to the end that Federal judges have the finest tools possible with which to dispense justice in this country.

Mr. Taylor's candle should not be hidden under the proverbial bushel.

Mr. RODINO. Mr. Speaker, I yield 1 minute to the gentlewoman from Texas (Miss JORDAN).

Miss JORDAN. I thank the chairman. I rise in support of this legislation.

My support of it is not unqualified, and it is not enthusiastic. I am willing to admit that we on the Subcommittee on Monopolies and Commercial Law deferred to politics and certain political realities. Consequently we have a measure before us which we can justify because the additional judges are needed. The fact that we may have more than the 81 originally approved means that perhaps in the next 2 years and the next 2 years we will not have to come to the 96th and 97th Congresses seeking additional judgeships because of the increasing load.

No one will deny that we do need an infusion of judicial power, and this is the thrust of what we are trying to do. So, I support the legislation and ask the Members to do likewise.

Mrs. FENWICK. Mr. Speaker, will the gentlewoman yield?

Miss JORDAN. I yield.

Mrs. FENWICK. The candor of our colleague from Texas is refreshing, and most appreciated.

Miss JORDAN. I thank the gentlewoman.

Mr. BAUMAN. Mr. Speaker, I yield 1 minute to the gentleman from Maine (Mr. COHEN).

Mr. COHEN. Mr. Speaker, I rise in support of this measure. In following my colleague from Texas, I point out that the subcommittee did indeed try to exercise some zero-based budgeting, if I might make reference to that procedure, where the chairman of the committee said, "Let's reject the Judicial Conference recommendations and start from zero and see what the actual needs are."

We presented that recommendation to the full committee and were voted down, so as a matter of practicality we have to bring this measure to the floor in this present form. Neither I nor other Members are necessarily in favor of the additional judges added by the full committee, but are faced with the necessity of providing relief for our judicial system.

I think we do have to face the realistic needs of the judiciary and we can no longer defer action.

I would urge support of the measure.

Mr. Speaker, I yield the time I have left to the gentleman from Illinois (Mr. MCCLORY).

Mr. MCCLORY. Mr. Speaker, let me add as a footnote to this discussion that additional judges are going to help reduce crime in America. In order to reduce crime, we have to bring people to trial swiftly. That is one reason why I have urged the creation of additional judgships. In the last Congress I pressed for legislation to create 49 additional judgships but the House failed to take up the legislation before the expiration of the Congress.

The need is very acute, so it seems to me that what we should do is enact this bill and get on with the business of improving our system of justice, especially in the criminal field.

Mr. BAUMAN. Mr. Speaker, I yield 1 minute to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, the House is starting off 1978 just like it operated through 1977. In the true spirit of reform, we are continuing the "gag rule" that has become the hallmark of our majority leadership.

This bill, H.R. 7843 which creates over 145, life-termed judges, is surely of major significance. But our leaders, in their usual style of openness, bring it to the floor under another of their favorite gag rules.

Debate is limited. Amendments are forbidden. Reform in the 95th Congress marches on—but backward, as usual.

And why has the Speaker gagged and handcuffed the House? I think it is so we will not be able to review the Marston scandal, nor to suggest in stronger terms than the timid committee report that we demand merit selection of these judges.

These Federal judges will make more important decisions about our lives, and those of our families, than most Congressmen. It is critically important that they be selected on the basis of merit, rather than on the basis of some secret cabal, made behind closed doors by the Attorney-General and the Chairman of the other body's Judiciary Committee.

The gag rule of this suspension process is merely ratifying that secret closed-door agreement. The Marston affair is a particularly offensive example, but it is only the tip of the iceberg.

This suspension process makes the House a party to that closed-door, spoils system agreement, and gives at least some evidence that our leadership concurs in it.

Never mind what the President promised. Never mind what the Attorney-General said when he was confirmed. The deals have already been made, and they are now being ratified by this House.

The lesson of this particular suspension is obvious: Never let urges to reform, or campaign promises, or openness, or fairness, interfere with partisan politics as usual.

It is also of some interest to note that this House never worried about creating new judges as long as there was a Republican in the White House. We somehow were able to struggle along with the same old complement of "judges until a Democrat was elected President."

Then, and only then, the need for 145 new judges somehow became compelling. How refreshing it would be if we had a true merit selection system, because then we could add judges as needed rather than adding them only when "our friends" can pick them.

It is doubly regrettable, then, that the Speaker's "gag rule" prevents the offering of an amendment to provide merit selection, and even restricts our ability to debate the issue. This process does not reflect only on the Speaker and the majority group. It, unjustly, makes us all look bad.

The essential problem is that we do need extra judges—not 120, of course, but the logrolling in committee was inevitable. The judge list in this bill is fat, but in a couple of years the needs will grow up to match the committee's appetite. Despite the rotten procedure, I cannot ignore the need.

So I will have to vote for the bill, despite the outrageous procedures, and despite my waning confidence in the Attorney General, and despite his repugnant agreement with the Member of the other body. I will do so simply because the judges, or most of them, are badly needed.

However unsatisfactory the spoils system is, the blunt fact is that the country needs the judges. One can only vote yes, with the forlorn hope that the spoils system operators would not turn their backs completely on quality.

But, if only we had a merit system and if only we could raise judges' salaries to a level that would attract the best people, then the country could have some real confidence in its judiciary.

Mr. RODINO. Mr. Speaker, I yield 1 minute to the gentleman from Kentucky (Mr. MAZZOLI).

Mr. MAZZOLI. Mr. Speaker, it was my pleasure to serve on the committee and, no question about it, it was a hard-working effort. We did not come out exactly as I wish we had, but I believe the work product before this House is a very supportable one.

I would like to address myself to the remarks of the gentleman from Maryland and other gentlemen who have spoken to the Marston affair and the fact that merit selection is a very loose operation in this bill. It is that. I helped to author it. I wish it could have been tighter. I was one who suggested to the President he was wrong to act in the way he did on the Marston case at that time. As far as the merit selection of the U.S. attorneys, I think it is very definitely germane to that and there will be a whole discussion of the problem.

I would suggest to the gentleman, this is a faltering start but it is a start toward merit selection for the Federal bench.

Mr. Speaker, I would like to take this opportunity to express my support for H.R. 7843, a bill which would provide for the creation of 110 additional district court judgeships and 35 additional circuit judgeships.

As a member of the House Judiciary Subcommittee on Monopolies and Commercial Law, which thoroughly studied and analyzed the workload of the court system, I can attest to the fact that these proposed judgeships are sorely needed to improve the efficiency and administration of justice in our Federal judicial system.

The need for these additional judgeships has been well documented. The number of cases filed in the district courts has increased from 92,000 cases filed in 1950 to more than 172,000 cases filed in 1977.

Likewise, the number of cases filed in the circuit courts has increased from 7,903 cases filed in 1967 to more than 19,000 cases filed last year.

These statistics indicate that the judges are encouraging a growing backlog of cases pending on their dockets, and that the American citizens' access to the Federal courts is continually being delayed. The result is that the judges are overworked and the citizens are being denied prompt justice.

KENTUCKY JUDGESHIPS

H.R. 7843 provides for the creation of three additional judgeships for the Eastern District Court of Kentucky, one of which would be temporary.

The record shows that there is a compelling need for these new judges in eastern Kentucky. There are presently two full-time judges in the eastern district and one roving judge who spends the majority of his time in the eastern district due to the tremendous backlog of cases in that district. The caseload situation is severe, primarily due to the large number of black lung cases now pending before the court.

In 1975, for example, 845 black lung cases were filed, compared to 1,723 such cases in 1976. The result is that there is a weighted filing of 740 cases per judge in this district, which gives it the sixth largest backlog of cases in the entire country.

The record clearly shows that two new judges would only reduce the workload to 444 weighted filings per judge, still an extraordinarily high figure. Therefore, a third new judge seems warranted. However, since the record indicates that the number of black lung cases may subside in the future, this bill would make the third judgeship a temporary position only.

Given the urgency of the situation in eastern Kentucky, I urge my colleagues in the House to approve these three judgeships for eastern Kentucky.

MERIT SELECTION PROVISION

During the Judiciary Committee markup of this bill, I offered an amendment—which was adopted by the committee—which requires the President to promulgate regulations for the selection of district court judges on the basis of merit. This amendment established section 6 of the bill which provides that those sections of the bill authorizing the creation of the additional district court judgeships, shall take effect immediately upon the President's promulgation of such regulations.

While this provision expressly permits the President to waive these regulations, nevertheless this provision would reflect the strong desire of Congress and millions of Americans to move toward an established, affirmative system of merit selection of district court judgeships. This provision would help the President resist the inevitable political pressures, and would help improve the quality of judicial appointments.

The Library of Congress has concluded that my approach to merit selection is constitutional and would not infringe on the President's constitutional powers of nomination.

President Carter has already established procedures for the merit selection of Federal appellate court judges. It is also worthy to note that Senators in 13 States, including my home State of Kentucky, have already voluntarily established nonpartisan merit selection panels to recommend qualified individuals for Federal judgeships.

In August 1977, the American Bar Association adopted a resolution calling for the nonpartisan merit selection of all Federal judges, including district court judges.

Therefore, it is apparent that the best interest of our Federal judicial system will be served if the House retains this provision calling for the merit selection of district judges.

I urge my colleagues to vote in favor of H.R. 7843.

Mr. McCLORY. Mr. Speaker, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Speaker, I would say the merit selection is a condition upon which the creation of the 110 district judgeships becomes effective. Thus if the President does not promulgate procedures for merit selection, there are no district judgeships to fill. I do not know that this section can accurately be characterized as weak if it has that effect.

The President's constitutional right to nominate Federal judges cannot be diminished by statute. But this procedure will so order the nominating process and subject it to public scrutiny that purely political nominations will invoke political sanctions.

Mr. BAUMAN. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio (Mr. KINDNESS).

Mr. KINDNESS. Mr. Speaker, I think there is an urgent need for additional Federal judges and I think it exists in such a measure as it does because the majority has adamantly and arrogantly refused for 8 years to enact legislation and create additional judgeships while there remained in the White House a President of the opposite party.

Now, is the emergency all that great that we cannot send this bill back to the committee and get it enacted properly and not as a Christmas tree, as it has been referred to by the gentleman from Texas?

It will apparently lead the American public to think there is something being done about merit selection when nothing substantial is being done. As to the number of judges needed, in the bankruptcy reform bill recently passed by this House, we will provide for additional judgeships to provide for easing some of the load in the future.

I think we ought to quit putting more burden continually on the Federal courts by establishing new schedules of alertness and attention to the various types of cases. Provisions like that are continually placed in legislation which is passed by this Congress, adding to the need for judges.

This is not legislation of which we can be proud. We ought to defeat it and send it back to the committee with a message to the committee to cut back and clean it up. After 8 years' delay, we can certainly wait long enough for the committee to do the job right, and I would urge on the vote that we defeat this bill under suspension.

Mr. RODINO. Mr. Speaker, I yield 1 minute to the gentleman from California (Mr. EDWARDS).

Mr. EDWARDS of California. Mr. Speaker, I thank the chairman for yielding.

I say the change that will be brought about by this bill is needed, and the statistics so indicate.

I indicate an "aye" vote.

Mr. BIAGGI. Mr. Speaker, will the gentleman yield?

Mr. EDWARDS of California. I yield to the gentleman from New York.

Mr. BIAGGI. Mr. Speaker, I thank the gentleman for yielding.

I rise in support of the bill. I take special notice of section 7, page 17, which the gentleman from California amended, and it is included in this bill.

The section notes the fact that of our Federal Judges, only 1 percent are women and 4 percent are black. It recommends that the President, in selecting individuals for nomination to the 145 new Federal judgeships created under the act, give "due consideration" to qualified women, blacks, Hispanics, and other minority individuals.

It is unfortunate that the section is necessary at this time, but the fact of the matter is that the Federal judiciary is elitist in nature, and it is important that we have to take into consideration, given this fact, that blacks and women and Hispanics and other minorities should be considered. That is unfortunate but necessary.

I would like to point out that I have an Italian constituency, I have a Greek constituency, I have an Albanian, and many other constituencies, including Polish. I would ask the gentleman from California, who is the maker of the amendment: Does the term "other minorities" include these constituencies?

Mr. EDWARDS of California. Yes. There are many constituencies that are unrepresented in the Federal branch or represented to a very small extent. There are many Filipino and Polish and Italian and other minorities who are underrepresented and this legislation is suggesting to the President that qualified members of those particular minority groups be considered for appointment.

Mr. BIAGGI. I thank the gentleman and congratulate him once again for this very significant amendment.

I respect the committee's concern in rectifying past injustices as they relate to positions held in the Federal judiciary by certain groups. I am grateful for the clarification provided by the gentleman from California. I initially was concerned over the limits of the committee's scope in this matter but my fears have been somewhat allayed. I express this gratification despite the knowledge that it is only a first step. The overall record of the Italo-American community in Federal service is not good. Italo-American jurists make up less than 6 percent of all Federal judges. In our history we have only three Cabinet officers and three Senators. New York State, with one of this Nation's largest Italo-American population has never had a U.S. Senator of Italian descent. There has never been an Italo-American Supreme Court Justice.

This record is indefensible. Merit should be the one and only criteria in the selection of judges. The Italo-American community and its many fine State and local jurists, stand on their record and welcome merit as the means by which they will get the opportunity to serve as a Federal judge. I am pleased to have played a decisive role in permitting this opportunity.

Mr. BAUMAN. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. HYDE).

Mr. HYDE. Mr. Speaker, while I intend to support this bill, a few things need to be said about the legislative deception inherent in so-called merit selection language.

I refer specifically to section 6 of the judgeship bill—the section allegedly designed to aid the President in carrying out one of his campaign pledges.

Do not hold your breath.

I call my colleagues' attention to page 6 of the committee report:

> section 6 * * * further provides that no nomination or appointment may be invalidated on the basis of the President's failure to comply with either this section of the bill or with any regulation in fact promulgated.

Anyone taking the time to read this can clearly see that section 6 has about as much substance as the President's campaign promise itself.

The leadership had an opportunity to put teeth into section 6. They could have brought the judgeship bill to the floor of the House under an open rule with amendments limited to those sections not pertaining to the number of judges to be appointed—specifically section 6. Instead, we are permitted only 40 minutes of debate, under suspension of the rules and with no amendments permitted, on legislation that will allow the President to appoint 145 new judges, on top of those vacancies already existing, and in addition to the 35—10 circuit and 25 U.S. district—he has already nominated and/or appointed.

The House will undoubtedly pass this judgeship bill by an overwhelming margin; the media will applaud the legislation because of its inclusion of so-called merit selection of judges; and merit selection will mingle with the dust on the conference room floor.

I have no objection to the creation of new judgeships; I support merit selection, provided it has some teeth. But let us stop fooling the American people.

For 7 years, while Republican Presidents were in the White House, the Democratic Congress steadfastly refused to create new judgeships. Now that there is a Democrat in the White House, the Congress is rushing to create 145 new judgeships for him to select.

As a candidate, Jimmy Carter promised that "all Federal judges and prosecutors should be appointed on the basis of merit, without any consideration of political aspects or influence." The President has shown that he and the Attorney General have a different definition of "merit selection." By the end of 1977, President Carter had appointed 10 circuit court judges, all Democrats; 21 U.S. district court judges, all Democrats; U.S. district attorneys, 55 Democrats, 1 Republican. We need these new judges, but let us be honest about it—merit selection is nothing but another broken promise.

Mr. BAUMAN. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan (Mr. SAWYER).

Mr. SAWYER. Mr. Speaker, I rise in support of this bill. I think the greatest legitimate complaints against our judicial system in the United States right now are two—delay and expense.

Everyone who has worked in the courts knows that expense is the handmaiden of delay. The two go side by side.

Mr. Speaker, it has been stated that cases take 24 months to get to trial. That may be some kind of an average in certain areas, but I am acquainted with many districts where it takes 4 years to bring a civil case to trial.

You take that factor plus the imposition of the Speedy Trial Act, and the 90-day rule on top of that and it makes an impossible situation. I believe that the number of civil cases nationally is the backbreaker, because of the conditions in the courts caused by the Speedy Trial Act in criminal cases the courts never can get to them.

Mr. Speaker, the amount that is spent for the entire Federal judiciary is a very small amount compared to other amounts that we spend, such as for the B–1 bomber and other things.

This legislation will give the right and the ability to our people to receive justice.

The subcommittee in this instance I believe got enamoured with numbers and with statistics. We all know of the old saying that goes something like this: "Figures don't lie but lawyers can figure," and that is true here. The committee really did not have an analysis of the geography of all of the districts, some of which are huge, involving many metropolitan areas, where the courts are involved with a great number and a great complexity of cases they handle. The caseloads there have not only been greatly increased in the last few years, but the cases such as school desegregation cases and multitudes of other cases involving antitrust suits, product liability, and environmental suits against nuclear plants, tie up the courts for months on end in deciding a single case. I believe that our people are entitled to better than just a statistical analysis, they are entitled to an analysis of the districts which the final full committee bill did. You can statistically require a judge to decide a predetermined number of cases a year and if he is willing he can meet virtually any numerical requirement. But what about quality? Certainly our deeply respected system of justice is respected because thoughtful deliberate consideration of the merits of case is its hallmark. What good is the cherished "right to be heard" if the judge, because of numerical decision requirements, artificially imposed upon him, has no time to listen. The full committee bill corrected this drastic difficiency in the subcommitee bill.

It is now a good bill. One in which we can all take pride. I urge your support of it.

The SPEAKER pro tempore. The Chair will state that the gentleman from New Jersey (Mr. RODINO) has 4 minutes remaining.

Mr. RODINO. Mr. Speaker, I yield 1 minute to the gentleman from Virginia (Mr. HARRIS).

Mr. HARRIS. Mr. Speaker, I rise in support of the legislation. We have listened to a great deal of criticism coning the bill, about politics, and about logrolling and what have you, but I believe that here we have had an analysis made as to the caseloads involved, this has been very carefully analyzed, and also as to an analysis of the weighted caseload. Also there was a great deal of discussion with regard to the individual provisions here.

Mr. Speaker, I am sure that some Members may not consider that this is a perfect bill and, of course, they are right, but those who tell us that it is not a good bill are also wrong because it is a bill directed toward improving our Federal judiciary. It does consider the caseloads involved in the various districts and it does consider some of the geography that is involved. I believe that basically this is a step forward to bring justice to our people. That is the purpose of the bill.

Mr. McCLORY. Mr. Speaker, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Speaker, the gentleman from Virginia (Mr. HARRIS) is entirely correct in that we went into great detail with regard to the statistics involved and in great detail with regard to the weighted caseloads involved and with regard to the type of cases involved. Further, we considered the use of magistrates and also the failure to use magistrates. We went into tremendous detail which only a committee could do. We spent 7 full days in committee studying this legislation. We became thoroughly familiar with the needs of the 94 districts and the 11 circuits.

Mr. HARRIS. I thank the gentleman from Illinois.

The SPEAKER pro tempore. The Chair will state that the gentleman from Maryland (Mr. BAUMAN) has 2 minutes remaining and the gentleman from New Jersey (Mr. RODINO) has 3 minutes and 30 seconds remaining.

Mr. RODINO. Mr. Speaker, I yield 30 seconds to the gentleman from Texas (Mr. WHITE).

Mr. WHITE. Mr. Speaker, I commend the members of the Judiciary Committee for their efforts in reporting out the omnibus judgeships bill, to authorize additional judgeship positions for the district and circuit courts. This bill represents one of the most exhaustive congressional analyses of the needs of the Federal court system undertaken in the postwar era. I feel we would be remiss in our duties to delay any longer in authorizing these positions.

While I can understand the reasoning behind the decision to disallow amendments to the bill, I also feel obligated to register my view that the one additional district judge authorized for the western district of Texas is insufficient to adequately insure the proper administration of justice throughout the western district of Texas.

Hon. Adrian Spears, chief judge of the western district of Texas, has been an effective advocate for the creation of several additional judgeship positions for the district, based on his study of projected case filings through the year 1980. His testimony before the Senate Judiciary Committee last spring was an excellent and persuasive presentation of the district's caseload as shaped by the requirements of the Speedy Trial Act and the western district's unique geographic proximity to the southern border of the United States.

I respectfully request the consent of the House to insert a portion of Judge Spears' testimony into the RECORD:

The Western District of Texas is one of the largest, if not the largest, districts geographically in the United States, encompassing an area of over 91,000 square miles and 68 separate counties. It is as large as the states of New York and Pennsylvania combined.

Of the 24 congressional districts located within the state of Texas, 10 are either wholly or partially situated in this district. Presently, there are five district judges assigned to conduct the business of the federal court in this large area. At various times throughout the year, necessity dictates that each judge hold court within the district at cities other than that of his residence.

Although there are seven statutory divisions comprising this district, district judges reside in but three of the seven divisions. This leaves four divisions without the benefits of a resident judge. Of the total number of cases filed in this district, approximately 25 percent are filed in divisions without a resident judge. The problems stemming from substantial filings in the divisions without resident judges, coupled with the necessity of resident judges leaving their home bases and traveling comparatively lengthy distances throughout this extensive geographical area, create a situation somewhat unparalleled elsewhere. Of the 25 large metropolitan district courts with which this court is ordinarily compared, few, save the districts of Texas, are confronted with just this problem to such a large degree.

The geographical distances involved are too great to allow any practical joinder of divisions. Inasmuch as this is a problem not generally widespread among other districts, little consideration is apparently given to it. Without actually experiencing the difficulties involved, it is in a real sense quite difficult to get a definite grasp of the problem.

Realistically speaking, there is more to this matter of geographical size and nonresident judge divisions than is patently apparent at first glance. If there was a key word to describe the situation, it would in all likelihood be "time": precious judge-time; that entity of which there never seems to be enough. In conjunction with the aforementioned problem, the time spent due to necessary travel between divisions assumes a role of greater relative importance. When considered in light of the dictates of the Speedy Trial Act, the situation becomes increasingly more critical. The problem of travel-time between divisions is further complicated by the fact that three of the four divisions without resident judges where travel is required (Del Rio, Pecos, Waco), have no public transportation service other than buses. This results in the use of one's privately-owned vehicle rather than the luxury of a thirty-minute flight on a jet airliner. If the federal docket is to be adequately maintained and kept current in these outlying divisions, travel is both mandatory and frequent.

The time limits established by the Speedy Trial Act have likewise intensified the burden of holding court in these divisions. With respect to just the travel-time between divisions, approximately 125 travel days were consumed by the judges in this district in calendar year 1976. When one considers that there are only about 253 working days in a year, this figure becomes rather awesome. Interestingly enough, the figure for calendar year 1976 is up by about 20 days from the same figure for calendar year 1975. The net result is that it costs this district approximately one-half man year of judge-time for the sole purpose of traveling within the district to the non-resident judge divisions. A fair assumption is that this figure will continue to rise as the various time limits imposed by the Speedy Trial Act are progressively phased in, until the ultimate time limits are met in 1979. As the time limits shorten, the necessity to travel will proportionately increase. Again, this situation is quite unique and uncommon in most courts. It is also one which very definitely needs to be made known.

In addition to travel time between divisions, considerable time is consumed for the purpose of conducting the business of the Court in these divisions. In calendar year 1976, excluding the travel time to and from the non-resident judge divisions, court was held approximately a total of 170 days. One must keep in mind a fact not ordinarily raised when discussing this point. While a particular judge is away from his resident division in order to hold court in another division, the workload at home is neither stagnant nor moving along as if he was physically present there. Rather, it builds up and accumulates awaiting any action deemed appropriate upon his return. When the judge does return, after what has more often than not been a grueling, ten-hour-a-day work pace, he is immediately confronted with a massive accumulation of motions, new filings, correspondence, requests, instructional material, reports, etc., which he must begin to attack. In effect, the necessity of traveling to other divisions multiplies the actual work needed to get accomplished.

Oftentimes, inquiries are made as to how the judges of this district have been able to consistently terminate a large number of cases while at the same time retaining a low backlog of civil cases when they are confronted with the geographical and travel problems inherent in this district. The answer is simply that the judges in this district, and their supporting personnel, often find themselves working excessive hours far beyond the normal 8 hour day. Working long hours and taking work home is the norm rather than the exception for these judges.

The problem of time is further intensified by the fact that the judges of this district have a high rate of participation and attendance at the various seminars and workshops sponsored by such government agencies as the Federal Judicial Center, the Fifth Circuit Court of Appeals, etc. In calendar year 1976, approximately 84 days were devoted to the traveling to and attending of these various functions. As is true with travel time to divisions, time away from the district is a further taxation on judge-time which could otherwise be devoted to the business of the Court. While the judge is away, work in all the divisions accumulates.

All in all, with the phasing in of the Speedy Trial Act, the inherent problems of this district with respect to its size, nonresident judge divisions, and travel-time, will in no doubt increase. Without an adequate number of judgeships to cope with this situation, as the problems increase, the administration of justice will suffer. One cannot realistically expect the judges to continue to work at the accelerated and ex-

cessive pace which they have been forced to work in the past. One additional judgeship is needed to bring into balance just travel requirements alone. Two others are needed to satisfy the requirements of the Burdick Committee criteria, the Speedy Trial Act, and the other problems peculiar to this district as herein discussed.

Another aspect rather unique to this district is found in examining the seemingly drastic decline in the number of criminal filings. The reasons for this decline, to be discussed next, will in all likelihood cease, and this district will see a definite increase in the number of criminal filings in future years.

First, the actual decline in criminal filings is not so drastic as first seen upon initial observation. Inasmuch as the majority of Immigration matters for the past several years have been filed as misdemeanor offenses before the Magistrate, the greater percentage of the decline in criminal filings for this district from earlier years has in fact been this type of cases. Never before has the percentage of Immigration cases in this district been lower than in FY76. In comparison, the decline in the number of criminal filings is not as drastic as that which the total number of filings seems to indicate.

Secondly, for the past several years the United States Attorney for this district has been implementing a policy of "selective prosecution". This policy has contributed enormously to the decline in the number of criminal filings. Where before, all narcotic violations of any significance were adamantly prosecuted, since the adoption of this policy, the U.S. Attorney has been seeking "higher quantity" possession and transporting cases. In these instances where there has been concurrent jurisdiction with state authorities, the federal prosecutor has relinquished the duty of prosecuting the seemingly less serious narcotic offenses in favor of the state. Sadly, in many instances, neither the state nor the federal prosecutor has followed through with his respective prosecutorial duty. The net result has been that many of the drug traffickers who deal in relatively small quantities of narcotics are evading prosecution.

Another fact which should be mentioned in conjunction with this, is that according to the FBI, on a nationwide basis, the rate of crime has risen 33 percent since 1970.

It is indeed difficult to reconcile the "selective prosecution" policy in view of the ever increasing rate of crime. No doubt more extensive prosecution will ultimately result under the new administration which will take control of the Justice Department.

Moreover, the unilateral withdrawal from the Omnibus procedure by the U.S. Attorney Office in this district, in addition to the procedural uncertainties due to the newly implemented Speedy Trial Act, have likewise contributed to the decreasing number of criminal filings in the past three years. However, irrespective of the motives or actions of the U.S. Attorney's Office, it is respectfully submitted that there is every reason to believe that there will be a substantial increase in criminal filings when a new policy is implemented in that office. The trend toward low criminal filings has indeed "bottomed-out" and a gradual increase in the number of criminal filings is already becoming evident.

When it is remembered that about 450 miles of the border between Mexico and the United States is in this district, it is not unreasonable to assume that the criminal rate, especially with respect to the narcotics traffic, will continue to rise. It is easily seen that the criminal caseloads in the various divisions of this district will eventually increase and demonstrate that the projection made is on the conservative side.

The number of civil filings in this district has taken quite a different development than the criminal filing. For fiscal year 1976, there has been an 11.7 percent increase in civil filings over fiscal year 1975. This increase is slightly higher than the 11.3 percent increase in civil filings nationally. Since people of retirement age are moving their places of residence to such cities as San Antonio, El Paso, Kerrville, and Fredericksburg, we can further foresee a rise in Social Security cases. A large portion of the population in this district is at, or is nearing, the retirement age wherein they would be able to receive Social Security benefits. In short, civil filings for this district are as high now as ever. All indications substantiate even higher numbers of civil filings for this district in the near future.

Another consideration which should be taken into account, which may or not be unique to this district, relates to the number of pending criminal defendants presently incarcerated in jail awaiting trial. Pursuant to section 3164 of the Speedy Trial Act of 1974; "detained persons who are being held in detention solely because they are awaiting trial, and * * * released persons * * * of high risk" must go to trial within 90 days from either the date of their initial incarceration or the date of designation of high risk. As of November 30, 1976, there were a total of 574 defendants pending in criminal cases in this district. Approximately 225 of this number are fugitives. This leaves 349 triable defendants who are in jail, and in accordance with the Speedy Trial Act, must go to trial within 90 days of their initial arrest.

As of November 30, 1976: 574 pending defendants less 255 fugitives comes to 349 triable defendants. 110 defendants incarcerated in jail. 32 percent of triable defendants must go to trial within 90 days.

Hence, Speedy Trial creates additional problems to those mentioned earlier which related to judge-time and travel necessities. The resultant effect creates a very definite priority on the criminal docket, which will undoubtedly be reflected adversely on the civil docket.

A final facet of this discussion which definitely has relevance to the issues thus discussed and which, in varying degrees, is prevalent in all districts, concerns the mortgage on the time of the Chief Judge of the district by the mere fact of his position as Chief Judge. Each year, the drain on the chief judge's time due to the ever increasing number of administrative tasks becomes more burdensome. The effect of this additional responsibility on the shoulders of the chief judge has resulted in a voluminous amount of non-case related work being done by him. However, when evaluation of judge output is conducted, the weighted caseload statistics utilized to measure the "mortgage on the judge's time" do not reflect this enormous amount of time devoted to administration.

In order to calculate a percentage amount of time devoted to the accomplishment of the administrative duties of chief judge, the Chief Judge in this district embarked on a detailed "time study" of the total work-related output for him over a two-month period of time. The results indicated that during the first month, he devoted a total of 195.7 hours to work-related matters. Of this time, 95.5 hours, or approximately 49% of the total, were spent solely on administrative functions. During the second month there was an increase in the time spent on court administration. A total of 187 hours were put in by the chief judge during this month, of which 100 hours, or 59% of the total, were dedicated to the administrative duties of the Court, for which the district receives no actual credit under the current system of compiling statistics. Unfortunately, these administrative responsibilities have increased substantially in the last year, and with the Speedy Trial Act rapidly advancing to the more restrictive time periods, the situation is bound to get worse rather than better.

Mr. KAZEN. Mr. Speaker, will the gentleman yield?

Mr. WHITE. I am happy to yield to my colleague, the gentleman from Texas (Mr. KAZEN).

Mr. KAZEN. Mr. Speaker, I would like to associate myself with the remarks made by the gentleman from Texas (Mr. WHITE). I certainly hope that some time in the very near future we do get the judges that are necessary in the western district of Texas.

Mr. RODINO. Mr. Speaker, I yield 30 seconds to the gentlewoman from Maryland (Ms. MIKULSKI).

Ms. MIKULSKI. Mr. Speaker, I rise to speak in favor of this bill to create additional judgeships. I am particularly supportive of the section that recommends that the President, in selecting individuals for nomination to Federal judgeships, give due consideration to qualified women, blacks, Hispanics, and other minorities. All these groups are severely underrepresented on the Federal bench and it is time for change.

At this time, I would like to amplify and clarify the term "other minority individuals." This term must include all people who have minority status in our country. To me, minority status, includes all people who are deprived of full participation in our society because of the way they look; the sound of their last name; the language they speak; or their cultural heritage. Thus this recommendation must include Asian-Americans, Native Americans, and those Americans whose heritage is Eastern and Southern European.

Naturally I speak with special feelings for the Polish-Americans. There are over 11 million Polish-American citizens in our country, but only three are Federal judges. In fact, only 27 of the 478 Federal judges are of Eastern or Southern European ancestry. I would like to see some of them on the bench. I would like to emphasize to my colleagues that when I speak of the need to include blacks, Hispanics and other minority individuals that I mean black women, Hispanic women, and women from other minority groups.

In conclusion, I believe that the profile of our court system should reflect all of American society, all who contribute—all who make it great.

Mr. BAUMAN. Mr. Speaker, I yield 1 minute to the gentleman from Illinois (Mr. FINDLEY).

Mr. FINDLEY. Mr. Speaker, I feel this body is putting the cart before the horse. We badly need to enact a procedure through which the Federal judiciary can improve its own efficiency, and that is totally lacking today. Every Federal judge is virtually beyond discipline.

I have introduced in the last two Congresses such a procedure, and I think we ought to enact something of that sort through which we can determine the good conduct of judges, discipline those who do not do a good job and get rid of those who are beyond hope. Only then will we know how many judgeships we really need.

Mr. BAUMAN. Mr. Speaker, I have 1 minute remaining. I yield myself that time before I yield to the gentlewoman from Ohio.

I just want to say if you like gag rules, vote for this; if you like the Marston affair merit system, vote for this; if you like quota systems on a sexist and racist basis, vote for this; and if you want no chance to legislate properly, vote for this. Other than that, you might consider voting against it and we will have the bill back in due course.

I yield to the gentlewoman from Ohio (Ms. OAKAR).

Ms. OAKAR. I thank the gentleman for yielding.

Mr. Speaker, I am opposed to this bill for one reason, pure and simple. Federal judges are appointed for life. There is no real review of what they do. That is part of the frustration of the merit in people, and I think it is about time we do not perpetuate something that should be looked into.

Mr. RODINO. Mr. Speaker, I yield 30 seconds to the gentleman from Utah (Mr. McKAY).

Mr. McKAY. Mr. Speaker, I have been involved with H.R. 7843, which creates additional Federal judgeships, since this legislation was reported out as a clean bill by the Monopolies and Commercial Law Subcommittee of the Judiciary Committee, some 9 months ago. I am aware of the many hours of hard work that have gone into this legislation. I want to commend Chairman RODINO and my colleagues on the Judiciary Committee for thcir perseverence.

Last June I called to the attention of the Monopolies Subcommittee a very unique situation that exists in Utah. As a result of a provision known as "the grandfather clause," Utah is left with the only Federal judge who has retained his chief judgeship status past age 70. Under normal circumstances a chief judge must relinquish administrative control over a judicial district when he turns 70 years of age. The grandfather clause exempts two-judge districts from this requirement. Through attrition this provision now protects only Utah's chief judge. In 1975 the Senate held several days of hearings on legislation to repeal this anomaly but took no affirmative action to repeal the law.

Utah's present chief district judge is 79-year-old Willis W. Ritter. Judge Ritter has been a source of controversy in my State since he was appointed to the Federal bench in 1950. He has the highest reversal rate on appeal of any judge in the Federal system. Recently, his refusal to enforce public land laws has allowed thousands of violations to occur without penalty. He will not allow Utah's Federal magistrates to adjudicate cases within their jurisdiction.

At my request, the Department of Justice communicated to Chairman RODINO its support for a specific remedy to this situation in June. In the first closed session since Watergate, the subcommittee voted 7 to 2 to repeal the grandfather clause in this legislation. This remedy seemed sufficient until early October when the United States for the first time filed a writ of mandamus with the 10th circuit court of appeals seeking to permanently remove Judge Ritter from hearing any criminal or civil case involving the Federal Government. The mandamus charges that because of Judge Ritter's extreme bias, it is impossible for the United States to receive a fair hearing in his court.

Should this mandamus be approved, Judge Ritter will be left with only 187 cases. Utah's other judge would have an impossible 595 cases. This potential disparity signaled a need to return to the full Judiciary Committee to head off this crisis.

Working through my close friend, Representative JIM SANTINI, Democrat, of Nevada, who is on the Judiciary Committee, we were successful in obtaining an additional judgeship to sit only until Judge Ritter leaves the bench. While this remedy seemed sufficient at the time, it became readily apparent in early November that Utah deserved a permanent third judgeship on the basis of the 389 cases filed in Utah's Federal district court.

Having approved additional judgeships for districts with 350 case filings per year, the Judiciary Committee accepted an amendment offered again by Representative SANTINI which converted the prior approved temporary additional judgeship to a permanent one.

In a period of 7 months the Judiciary Committee evaluated the situation in Utah on three separate occasions and each time fashioned what was then considered the most appropriate relief. Throughout this entire process, my colleagues acted in utmost integrity and candor. They recognized Utah's problems and responded appropriately without regard to political and personal pressures that were exerted by others. I commend their work and gladly vote for final passage of H.R. 7843.

I have been in contact with other members of the Utah congressional delegation and Gov. Scott Matheson concerning a bipartisan judicial nominating commission to assure that whomever is selected to occupy this new judgeship will be qualified in every respect.

Mr. McCLORY. Mr. Speaker, will the gentleman from New Jersey yield to me?

Mr. RODINO. I yield to the gentleman from Illinois.

Mr. McCLORY. I thank the gentleman for yielding.

I just want to say that for the first time in our history we are putting into legislation provision for the merit selection of district judges. It is a condition precedent to the creation of the 110 district judgeships. Those judgeships do not become effective until after the President promulgates merit selection procedures.

With respect to the provision requiring due consideration of qualified women, blacks, and others in connection with appointments, it is merely precatory. It is merely a recommendation that consideration should be given. It does not limit appointment to women, blacks, or any group. It does not prescribe or suggest any quotas. It does not preclude the appointment of conservatives or liberals, Republicans or Democrats.

Mr. BROWN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. RODINO. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. I thank the gentleman for yielding.

I wish to take this time just to commend my colleague, the gentleman from Michigan (Mr. SAWYER) for the fine work he did on this bill on behalf of the western district of Michigan. Despite the overwhelming evidence for the need for two judges, the subcommittee initially authorized only one but as a result of his able and deligent efforts the full committee authorized two. I commend the chairman of the full committee and I commend the gentleman from Michigan (Mr. SAWYER) for recognizing the needs of the western district of Michigan.

Mr. RODINO. I yield 30 seconds to the gentleman from Massachusetts (Mr. DRINAN).

Mr. DRINAN. I thank the gentleman for yielding.

I commend the distinguished chairman of the House Committee on the Judiciary and urge prompt enactment of this long overdue H.R. 7843.

Mr. RODINO. I yield 30 seconds to the gentlewoman from New York (Ms. HOLTZMAN).

Ms. HOLTZMAN. Mr. Speaker, this legislation (H.R. 7843), which creates additional Federal district court judgeships, is extremely important. In my own State of New York, the judges this bill adds in the eastern and northern districts will greatly increase the ability of the Federal courts to deal with their heavy workload and render timely and correct decisions. Our democracy depends on the quality of justice in our courts. By relieving the congestion in the Federal system, this bill helps to assure that people will get justice in Federal courts. I urge its adoption.

Mr. DUNCAN of Oregon. Mr. Speaker, I am supporting this bill for all of the reasons enunciated here this morning. The volume of judicial business in our litigious society has increased and additional judges are needed to cope with the overflow.

On the other hand, I share the sentiments expressed by the gentleman from Texas (Mr. BROOKS). As I look ahead I do not believe that it is possible for us to continue to meet this problem by simply creating new judgeships ad infinitum. The time is long overdue when we must look to what is happening and what we are doing to our system of government, an illness, I suggest, of which the need for more judges is only symptomatic.

Part of the responsibility for this explosion of litigation can be laid at the door of some activist judges, but most of the responsibility lies with the Congress. We have vastly extended traditional concepts of standing to sue. What used to be called champerty and maintenance now flourishes under the protection of statute, indeed under constitutional guarantees.

But most of all, a natural unwillingness on the part of Members of Congress to come to grips with difficult political issues at the risk of offending substantial, vocal, and powerful constituences, has resulted, in my judgment, in an erosion of both legislative and executive authority, with a correlative rise in the power, authority, and responsibility of the judiciary. I need not delineate all of the areas in which judicial decisions are filling the legislative gaps. And all of us

are aware that the courts are increasingly running the schools, managing the national forests, acting as water masters, fish masters, deciding what highways and bridges should be built and which should not, and so forth.

I think we must look ahead to see what our system will look like down the road a few years. Will the checks and balances, conceived as a protection of individual liberty against tyrannical government be eroded, as the one unelected branch of government becomes more and more omnipotent? Will the judicial structure itself collapse under the burdens we are imposing upon it?

These, it seems to me, must be questions we must answer, not as we approve this bill for new judges, but as we daily pass bills with obscure provisions widening the areas of litigation or as we fail to pass legislation which will exercise the legislative power we have been too wont to abandon.

And, as we seek to solve this problem, we must never lose sight of the importance of maintaining (a) access to the courts for all citizens with legitimate grievances which cannot be settled elsewhere, and (b) a degree of flexibility to enable the courts to function as they did so nobly during the recent great constitutional crisis which so traumatized us all. It is this imperative that makes the solution to this problem so difficult.

Mr. DON H. CLAUSEN. Mr. Speaker, I oppose H.R. 7843—to provide for additional Federal judgeships—for a number of reasons and I urge my colleagues to do the same.

First of all, a bill as important as this should have been brought up in the regular procedural way, by obtaining a rule, to allow a full airing of its pros and cons and to permit the amendment process that is so important to perfecting such legislation.

Second, this bill increases the Federal judiciary by approximately 30 percent which would give the present administration appointive power over each of these lifetime appointments. The recent "Marston affair" clearly demonstrates that the aura of politics has invaded the Federal judiciary to such a degree that it would be inappropriate to give any one administration control over such a substantial segment of Federal judges.

The argument has been offered that our Federal judges are overworked and that there are serious problems of court congestion and delay. Perhaps one of the reasons for this is that judges are entering fields that they should not be in—fields that should be left to the legislative process. Merely increasing the number of judges does nothing to solve this problem—it will allow it to worsen. Moreover, there is no reasonable excuse that the Federal bench should be expanded this rapidly. It is too costly in terms of dollars and in terms of the potential for abuse.

For these reasons I oppose this measure and urge my colleagues to do the same.

Mr. ROGERS. Mr. Speaker, I rise in support of legislation to provide additional judges for our Nation's Federal district courts. It has always been a fundamental right of our citizens to seek redress in their courts and to have such redress heard within a reasonable period of time. In recent years this right has been eroded as court dockets have become clogged with cases.

In the southern district of Florida, the situation has become especially critical. The population of this 12-county district has increased dramatically. During the years since the last Federal judges were provided, 1 county alone—Broward County—has grown from roughly 500,000 to nearly 1 million people.

At the same time, the largest condemnation effort ever undertaken in this country—the acquisition of the Big Cypress Swamp—was begun in south Florida and will continue for an estimated 10 years. Data recently provided me by the clerk of the southern district, indicate that the filing rate for the last several months of 1977, if it continues as expected, will result in an annual filing rate of over 1,500 cases per judge each year. This is up from the 1976 filing rate of 679 cases per judge and far above the 400 per judge standard endorsed by the committee. The five additional judges allocated in this bill are an important first step toward alleviating the crisis that exists in the southern district of Florida.

The chief judge of the district, Judge Charles Fulton, deserves mention for the role he played in seeking additional judges. The distinguished chairman of the committee, Mr. RODINO, deserves commendation for the methodical and scholarly approach his committee used in carefully reviewing the needs of every district court in the country. Last, the members of the committee and especially my good friend from Alabama, Mr. FLOWERS, deserve credit for recognizing the critical situation in the southern district of Florida and amending the bill provide this district with five rather than four additional judges. In offering this amendment, the gentleman from Alabama proved that he is not only a good neighbor to Floridians, but is a good friend to all who believe in the fundamental right of access to courts.

Mr. EVANS of Delaware. Mr. Speaker, I rise in opposition to this legislation. Over the past several weeks, the fact has come to light that the President made a secret "agreement" with the chairman of the Senate Judiciary Committee. The essence of this agreement was that if the Senate agreed to appoint circuit court judges on the basis of merit alone, without regard to politics, they could continue to recommend the appointment of district court judges on the basis of politics. The President accepted this agreement, in spite of his explicit campaign statement, so often recalled in recent weeks, that "all Federal judges and prosecutors shall be appointed solely on the basis of merit."

The events surrounding the so-called "Marston affair" indicated quite clearly that the President's campaign promise was just that, a promise. Because of the "agreement" the President reached with Chairman EASTLAND, it is clear that the President never intended to carry out his promise. This legislation, while it pays lipservice to merit selection of Federal judges, will not force the President to honor his campaign commitment, and will further politicize the Federal judiciary at a time when strengthening public support for Government institutions is so imperative.

Section 6 of this bill contains language which would instruct the President to promulgate regulations establishing procedures and guidelines for the selection, on the basis of merit, of Federal court judgeships. However, as everyone in this Chamber is aware, the power of the President to appoint Federal judges is absolute. Because of the separation of powers doctrine, the Congress is powerless to impose requirements on the selection of executive appointees. The framers of our Constitution trusted the President to use sound judgment in giving him this power. But, as the committee report on H.R. 7843 noted, "the President may waive with impunity any regulations promulgated under this section." Clearly, the President may continue to appoint Federal judges on the basis of politics and not merit. Therefore, without assurances from the President that he is breaching his agreement with the Senate Judiciary Committee, and thereby renewing his pledge to the American people, I cannot support this legislation.

Mr. JONES of Oklahoma. Mr. Speaker, I want to compliment the chairman and members of the Judiciary Committee for fashioning a very sensible and workable bill. In particular, I thank the gentleman from New Jersey (Mr. RODINO) for his dedication and expertise in bringing this bill to the House for consideration.

We are all aware of the crushing caseload burdens on our Federal court system. H.R. 7843 addresses this problem by creating 145 new Federal judgeships, thus diminishing the overwhelming burdens on the existing judges.

Numbers do not tell the whole story, Mr. Speaker. The new judges are not merely scattered upon the landscape according to past practices, but are apportioned in a manner that will lead to the most efficient use of their skills. In this regard, H.R. 7843 is a vast improvement over the Senate-passed version of this bill. The Senate bill would have perpetuated the concept of "roving judges" to a much greater extent than the House bill does.

While I am not familiar with the operation of roving judges in other States, in Oklahoma it is both archaic and expensive. Improved transportation and communication have certainly decreased the need for such roving jurists. Moreover, the spiraling costs of per diem, room and board, office space, traveling law clerks and secretaries, plus the many other expenses associated with roving judges are too great to justify retention of this concept on a broad scale. The American taxpayer should no longer have to subsidize such a costly and ineffective system.

H.R. 7843 addresses these problems, Mr. Speaker. It would decrease the amount of roving judges in those jurisdictions where the cost-benefit ratio of such a system is no longer attractive. I

urge my colleagues to give their wholehearted support and endorsement to this bill, and again, I compliment the gentleman from New Jersey (Mr. RODINO) for his foresight and leadership on this bill.

Mr. CARR. Mr. Speaker, I would like to briefly explain the impact of the committee's bill on the western district of Michigan, in order to insure that the two extra judgeships which the committee proposes to add to the district will remain in the final version of this legislation. As you may know, the subcommittee bill contained provisions for only one extra judge. This decision was changed by the full committee, which determined that two extra judges were needed. A short explanation of the caseload and backlog crisis in the western district should be enough to convince the House that it is essential for the second additional judge to be maintained.

The backlog for the two current judges in the western district is now nearly 800 per judge, which is among the highest in the Federal judiciary. With only two judges, the district is second in its circuit in complex "weighted" cases, including school desegregation, nuclear powerplant cases, Indian treaties, antitrust litigation, and international trade. This growing backlog long ago reached the point where many attorneys simply stopped filing cases in the district, and others have had such interminable waiting periods that needless hardships and injustices have resulted.

The chief judge of the district, Judge Noel Fox, has for the past year made a prudent and well-documented argument that three additional judges are needed to lessen the backlog and to allow the district to operate normally. This is further evidence that the two judgeships now in the bill must be maintained if any semblance of speedy and reasonable justice is to exist in the western district.

Mr. ALEXANDER. Mr. Speaker, I rise in strong support of this legislation to create needed Federal judgeships throughout the country.

It was my privilege to work with my colleague, the Honorable LAMAR GUDGER of North Carolina, a member of the committee, in securing adoption, during full committee consideration of the bill, of an amendment to add an additional judgeship over and above the one recommended by the Subcommittee on Monopolies and Commercial Law for the eastern district of Arkansas.

Mr. Speaker, I can in all candor describe the Eastern District Court of Arkansas as a "court in crisis." Let me take a moment to outline the situation that exists in that judicial district today.

At present there are four Federal judgeships in Arkansas. While there are five judges, two of them are senior judges. One of the senior judges is 89 years of age and has in the past year had to reduce his workload to an absolute minimum. The second senior judge is 73 years of age and, while waiting for the judgeship vacancy, created by his taking senior status, to be filled, has had to increase his workload to a level higher than it was before he became a senior judge.

Two of the four judgeships in Arkansas are "roving" judges. One of the "rovers" spends 90 percent of his time in the eastern district, with the other spending 66 percent of his time there. Thus, counting the chief judge, the eastern district is receiving the services of the equivalent of 2.56 judges. Even so, the statistics clearly illustrate that the court is carrying a far heavier load than is the national average.

In fiscal year 1976 this district had a per judgeship weighted caseload of 615 compared to a national average of 432. Its civil filings per judge were 468, considerably higher than the national average of 327. The 128 criminal cases per judge initiated in the district were also above the national average of 103. The per judgeship trials averaged 74, compared with the national average of 49. While the national average pending caseload per judgeship was 401, the pending per judgeship in eastern Arkansas in fiscal year 1976 was 696.

This situation has developed despite the fact that in 1976 517 cases per judgeship were terminated in the eastern district of Arkansas. That is 146 more cases than the national average of 371.

Mr. Speaker, it has been 7 years since the Congress took action to augment our Federal judicial manpower to insure that the wheels of justice will continue to turn. The Senate has passed similar legislation. In the interest of the justice that our forefathers saw fit to guarantee in our Constitution, I urge adoption of this legislation.

Mr. CORRADA. Mr. Speaker, I rise in support of H.R. 7843, a bill providing for the appointment of additional district and circuit judges.

The Committee on the Judiciary has done a remarkable job on this legislation. I want to congratulate them for their time and effort in reporting a bill that could very well be considered a landmark in the history of this Nation. As the committee stated in its report, never before in our history have as many as 110 additional judgeships been created by a single act.

However praiseworthy as their job is, I have to say in all fairness, that in the case of the Federal District Court of Puerto Rico the committee fell short in providing the number of judgeships that are really needed. The committee approved three new judgeships, which is certainly an improvement. However, the Judicial Conference had recommended four. Furthermore, the Senate passed S. 11 on May 24, 1977 approving the creation of four new judgeships for Puerto Rico.

The committee did not fully consider the language problem of my district. The court serves a community mostly comprised of Spanish-speaking American citizens—3.2 million population. To this effect, you should be aware that a criminal trial that requires the continuous use of an interpreter extends the normal trial time by 50 percent and that a criminal or civil trial that requires partial use of interpreters takes 15 to 25-percent more time to try. Spanish-speaking defendants, both Puerto Rican and Hispanics from other countries account for approximately 80 percent of all the criminal cases that reach the court. When the delays caused by the language factor are added to the case load, the need for four additional judgeships is clearly evident and justified. Because of its importance I would like to point out that on page 4 of its report, the committee made the following remarks:

> . . . in many districts with attractive climates, notable in Puerto Rico . . . , courts are blessed with large amounts of time donated by "visiting judges" from other district courts.

I have to take exception to this comment and I am in total disagreement with the committee's views on this particular point. I believe it proper that the record be corrected and that my fellow colleagues understand that the visiting judge program was an answer to a need, judges do not go to Puerto Rico to enjoy only the blessings of the climate or to help judges with a light case load.

For the record, I want to say that on page 17 and 18 of the statement for the record submitted to the Subcommittee on Monopolies and Commercial Law, House Committee on the Judiciary, in support of the position of Puerto Rico, the Chief Judge of the U.S. District Court for the District of Puerto Rico, Hon. Jose V. Toledo, stated that—

> . . . We must say that the visiting judges have been an extraordinary help to us at all times. Without their dedicated assistance, the judges of this Court would undoubtedly be medically incapacitated today. Nevertheless, their continued assistance is not the solution to our workload problems. Their availability is very limited inasmuch as they are not available during all the months of the year and that generally they are not willing to take all types of cases.

Judge Toledo then added:

> It seems evident that this Court cannot count on the services of a substantial number of visiting judges as long as their own courts are suffering the increases in workload reflected by the national statistics. Not only is the visiting judges recruitment effort time consuming, but the financial costs and the limitations in supporting personnel make the visiting judges program an inadequate alternative to the appointment of the judge power needed by this Court.

Also on January 13, 1978, Judge Toledo wrote to me a letter and addressing again to this same issue he stated to me that:

> Before closing, it should be interesting to note that our much criticized and little understood program of visiting judges should no longer be required in the event that we get the full complement of seven judgeships. As we have been and still are an overly burdened court, visiting judges are and have been the means to an effective conrtol of our ever mounting backlog. It would have been next to impossible to keep our backlog in check had we not been given the support of additional visiting judge-power. However, we are looking forward to the time when we can take care of our own workload. This we shall do as soon as each judge in this district is operating at a case load level which is comparable to that of their brother judges in other districts. Seven judgeships should allow us to do so. Else, we will soon again be seeking relief by way of visiting judges.

We need four new Federal judgeships, instead of the three recommended by the House Committee on the Judiciary.

This position has been endorsed by the chief judge of the District Court of

Puerto Rico, Honorable José V. Toledo, the Chief Judge of the U.S. Court of Appeals for the First Circuit, Hon. Frank M. Coffin and the Puerto Rico Chapter of the Federal Bar Association as well as the Judicial Conference.

I urge the House conferees to accept the Senate version of S. 11 regarding Puerto Rico. Four new judgeships are needed in order to bring this court in parity with their counterparts in the mainland. However, I urge my colleagues to support H.R. 7843 under the suspension rule.

Mr. FASCELL. Mr. Speaker, I rise in support of H.R. 7843, legislation to authorize additional Federal judgeships.

This legislation is of great importance to the people of my congressional district. South Florida has experienced a crisis over the past several years in the shortages of judges available to try cases.

The trial of civil cases has slowed almost to a standstill in the southern district of Florida. Since "justice delayed is justice denied," the people of south Florida have, to a large degree, been denied the right to have their legal conflicts resolved in the judicial system as provided for by our Constitution.

This bill provides for five additional Federal district court judges in the southern district, the most additional judges authorized for any district. Despite this, the new judgeships will still be insufficient to meet the need.

The Judicial Conference of the United States requested six additional judges for the southern district of Florida, and this number was included in judgeship legislation passed by the Senate last year. I am hopeful that we can obtain the full six judges in conference with the Senate.

Even six additional Federal judges will barely enable the southern district to hold its head above the flood of caseload that has been engulfing the judges over the past few years. I am fearful that a backlog of civil cases that aggrieved parties have refrained from filing because of the inability to come to trial, may now be dumped on the court's calendar.

In addition, the court will be swamped by many thousands of land condemnation cases in connection with the Big Cypress National Preserve project—the largest land acquisition project ever undertaken by our Government.

Beyond this, projected case data indicate that there will be a pressing need for even more judges in the southern district of Florida in a very short time. I am aware that in some areas of the Nation, projections of future needs have sometimes failed to materialize, but the southern district of Florida serves the fastest-growing part of the fastest-growing State in the country. It is certain that the large-scale population increases will be translated into expanded litigation.

Already, the people of south Florida have suffered far too long because of the number of judges is inadequate to meet the demand. I will do all I can to obtain final adoption of this legislation as soon as possible.

I urge my colleagues to support H.R. 7843, to provide for additional Federal judgeships.

Mr. BENJAMIN. Mr. Speaker, I join with Chairman RODINO, whom I personally commend for his unmatched ability and understanding, and my other distinguished colleagues in support of H.R. 7843. I ask the Members of the House to support the omnibus judgeship bill of 1978.

This bill creates, among others, an additional Federal judgeship for the northern district of Indiana. It fills a need that was recognized before 1970, and it is of critical importance not only to my constituents, but to those of Representatives BRADEMAS, FITHIAN, and QUAYLE. To the extent that it will enhance the administration of justice in northern Indiana, it is of import to all Members of this body.

The need for an additional judge in our district is meritorious and is not based on a parochial interest or that of party. Rather, it has consistently had the bipartisan support of the Members of both Houses of Congress.

The northern district of Indiana contains three major urban centers which are heavily industrialized and where population density is high. Such demographic factors lead to the filing of complex legal matters involving substantial sums of money and technical issues of law.

The Judicial Conference's Court Administration Committee spoke of the issue of case complexity in the northern district when it reported that:

> In recent years, the combination of an ever more complex spectrum of criminal cases—in 1976, 35 percent of the criminal cases in this district were weighted heavier than average, and that if that trend continues, the three judges on this district bench may soon try only criminal cases and the trial of those cases—which more and more frequently are complex, protracted, multidefendant cases, involving narcotic, land fraud, and medicare fraud offenses—may very well require so much trial time that a criminal backlog will develop making compliance with the Speedy Trial Act impossible in many cases. In addition, many of the civil cases being filed are themselves complex in nature. Between July 1, 1975, and June 30, 1976, 13 percent of the civil cases filed were civil rights cases."

As the Court Administration Committee summarized:

> Raw numbers alone do not tell the whole story. The nature of the caseload determines the difficulty of the judicial workload, and the nature of this district's caseload is growing ever more complex.

Trial settings are now four and five deep. Alternate settings are numerous and the physical separation of the courts does not allow for the efficient solution of these secondary problems. As a result, clients are discouraged, witnesses frustrated, the bar inconvenienced and additional administrative burdens are imposed on the courts.

With jury trials being held nearly 80 percent of the time, arraignments and dispositions are being heard at 8:30 a.m. with trials starting thereafter.

Since December 1, 1976, Judge Phil M. McNaNagny, Jr., has held hearings during 135 of his lunch hours.

This pressure to "perform" was mentioned by Attorney James Wieser, one of many attorneys who have corresponded with the membership of the Judiciary Committee. Attorney Wieser said:

> No man should be expected to continuously work twelve to fourteen hours per day in a judicial capacity. The strain and fatigue will become too much. . . . We have found ourselves before the presiding judge during the lunch breaks of an ongoing trial.

Joseph S. Van Bokkelen, assistant U.S. attorney for the northern district of Indiana from 1972 to 1975 went further and explained that, there were, on numerous occasions, 2-day trials which commenced at 9 a.m. in the morning with the first day ending at 5 p.m. in the afternoon, and the second day beginning at 5 p.m. that same afternoon and going until the jury returned its verdict sometimes as late as 3 and 4 in the morning, and thereafter, the new trial starting that very next morning.

This growning burden has led to substantial delays within the district and since 1971, the median time, in months, to have a civil matter brought to trial has never been less than 14 months. In 1974, it was 26 months, in 1975, it was 31 months and last year, it was 24 months or 118 percent above the national average of 11 months. For the 10 years prior to my election to Congress, I practiced law in the district and am familiar—by harsh personal experience—with the import of these figures and the catastrophic effect of such delays.

Of 94 judicial districts, only five have experienced longer delays than the northern district of Indiana.

While substantial disincentives exist with regards to filing actions in the northern district of Indiana, recent filings have increased substantially. A recent report issued by the Court Administration Committee of the Judicial Conference said:

> While the pattern of consistent caseload growth cited by the Judicial Conference was broken during the period between July 1, 1975, and June 30, 1976, statistics which have now been compiled for the period between July 1 1976, and December 31 1976, very strongly suggest that the break in the pattern was indeed aberrational. Between July and December of 1976, civil filings in the district increased by 30 percent; among all 94 districts nationally, the district ranked 12th in increased civil filings and 3rd in increased civil and criminal filings combined. While the growth in the workload may have been interrupted, it quite obviously has been resumed. . . . At current rates, the civil backlog is increasing at 10 percent per year.

Additionally, with the creation of the Dunes National Lakeshore, the U.S. attorney's office for the northern district anticipates that an additional 500 land condemnation actions will be filed in the district during the next 5 years.

Finally, it should be noted that the courthouse located in Hammond, Ind., is currently equipped with two complete courtrooms, judges chambers, jury rooms, and so forth. Thus, the physical plant is already available for an additional judge reducing the costs necessary to provide for an additional judge.

The additional judgeship for the northern district of Indiana was approved by the U.S. Senate and recommended by the U.S. Judicial Conference. It has the support of the Hammond, East

Chicago, Whiting, Lake County, and South Lake County Bar Associations and the Indiana State Bar Association of Gary, local members of the State judiciary and other local and State public officials. The news media has voiced its support for an additional judge.

For a moment now, however, I would like to set aside those considerations directly affecting the people I represent and express my support for H.R. 7843 in its entirety.

As a legislator and former practicing attorney, I well understand the significance of H.R. 7843 and the voluminous and exhaustive facts and details that were weighed before the committee's arrived at its final decision.

During the consideration of the provision for Indiana's northern district, the members of the committee were accessible, fair, and unfailing in their willingness to consider any information which had a bearing on their deliberations.

Repeated memoranda were prepared for and read by committee members. They gave freely of their personal time to discuss the merits of our delegations arguments.

This sacrifice of time, the examination of endless statistics, details and correspondence and the measured consideration of all proposals were repeated many times over before the omnibus judgeship bill of 1978 was passed on by the committee.

The passage of it will be one of the significant acts of this Congress.

Having witnessed, at first hand, the meticulous and sincere effort that went into its preparation, I close by voicing my strong support for it.

Thank you.

Mr. RODINO. Mr. Speaker, I would like in conclusion to state that the Committee on the Judiciary and its subcommittee have considered this measure very carefully, and while the subcommittee was unanimous in reporting the bill with a lower number of district court judges, nonetheless, the full committee recognized that there were additional statistics and up-to-date data which support the bill that we now have. Therefore, the full Committee on the Judiciary by a vote of 31 to 2 reported this measure to the floor. Nine of the ten subcommittee members supported the full committee's action.

Finally, we have heard in debate that perhaps the merit selection provisions do not go far enough—that they leave the President with too much leeway. Mr. Speaker, I believe we have gone almost to the limit the Constitution permits. The nomination and appointment power under article II belong to the Executive, by and with the advice and consent of the Senate. We have adopted very strong language consistent with our fundamental incapacity to circumvent or limit that constitutional authority. The committee's merit selection language is a major, significant step forward and it deserves the full support of this House.

Mr. Speaker, again I urge adoption of H.R. 7843.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. RODINO) that the House suspend the rules and pass the bill H.R. 7843, as amended.

The question was taken.

Mr. BAUMAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 319, nays 80, answered "present" 1, not voting 32, as follows:

Frey	Mahon	Zeferetti
Goodling	Meeds	

The Clerk announced the following pairs:

Mr. Dent with Mr. Shipley.
Mr. Rostenkowski with Mr. Mahon.
Mr. Cotter with Mr. Whitten.
Mr. Teague with Mr. Udall.
Mr. Flood with Mr. Madigan.
Mr. Jones of Tennessee with Mr. Wydler.
Mr. Foley with Mr. Goodling.
Mr. Nix with Mr. Edwards of Alabama.
Mr. Diggs with Mr. Holland.
Mr. Le Fante with Frey.
Mr. Zeferetti with Mr. Crane.
Mr. Ford of Michigan with Mr. Ruppe.
Mr. Meeds with Mr. Treen.
Mr. LaFalce with Mrs. Holt.
Mr. McDonald with Mr. Brown of Ohio.
Mr. Krueger with Mr. Hagedorn.

Mr. ARMSTRONG and Mr. TAYLOR changed their vote from "yea" to "nay."

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

REQUEST FOR IMMEDIATE CONSIDERATION IN HOUSE OF S. 11, PROVIDING ADDITIONAL FEDERAL JUDGESHIPS

Mr. RODINO. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the Senate bill (S. 11) to provide for the appointment of additional district and circuit judges, for the creation of a new 5th judicial circuit and a new 11th judicial circuit, and for other purposes, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. BAUMAN. I object, Mr. Speaker.

The SPEAKER pro tempore. Objection is heard.

GENERAL LEAVE

Mr. RODINO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

PERMISSION FOR SUBCOMMITTEE ON SCIENCE, RESEARCH AND TECHNOLOGY OF COMMITTEE ON SCIENCE AND TECHNOLOGY TO MEET TODAY TO HEAR TESTIMONY WHILE HOUSE IS IN SESSION

Mr. FLIPPO. Mr. Speaker, I ask unanimous consent that the Subcommittee on Science, Research and Technology of the Committee on Science and Technology may be permitted to meet today to hear testimony while the House is in session.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

Mr. ROUSSELOT. Reserving the right to object, Mr. Speaker, we have all this important consumer protection legislation or whatever it is called to consider today.

Why would we want to have a committee meeting while this important legislation is being considered?

Mr. FLIPPO. If the gentleman will yield, Mr. Speaker, simply for the purpose of hearing testimony.

Mr. ROUSSELOT. The subcommittee is only taking testimony? No markup of any bill is involved; is that correct?

Mr. FLIPPO. That is correct.

Mr. ROUSSELOT. In other words, the gentleman does not care about this other wonderful legislation; is that correct?

Mr. FLIPPO. I think it is wonderful legislation, and I know the gentleman from California (Mr. ROUSSELOT) will watch it very closely for us and then we can come back and follow the gentleman's lead.

Mr. ROUSSELOT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

PERMISSION FOR SUBCOMMITTEE ON THE ENVIRONMENT AND THE ATMOSPHERE OF COMMITTEE ON SCIENCE AND TECHNOLOGY TO MEET TODAY WHILE HOUSE IS IN SESSION

Mr. BROWN of California. Mr. Speaker, I ask unanimous consent that the Subcommittee on Environment and the Atmosphere of the Committee on Science and Technology may be permitted to meet today while the House is in session.

The Speaker pro tempore. Is there objection to the request of the gentleman from California?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, what is the gentleman going to do?

Mr. BROWN of California. It is just for the purpose of hearing departmental witnesses. There is no markup or any action.

Mr. ROUSSELOT. I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 3813, EXPANDING REDWOOD NATIONAL PARK IN STATE OF CALIFORNIA

Mr. MEEDS, from the Committee on Rules, submitted a privileged report (Rept. 95–866) on the resolution (H. Res. 1006) providing for the consideration of the bill (H.R. 3813) to amend the act of October 2, 1968, an act to establish a Redwood National Park in the State of California, and for other purposes, which was referred to the House Calendar and ordered printed.

CONSUMER PROTECTION ACT OF 1977

Mr. MEEDS. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 872 and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES 872

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6805) to establish an Agency for Consumer Protection in order to secure within the Federal Government effective protection and representation of the interests of consumers, and for other purposes. After general debate, which shall be confined to the bill and continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Government Operations, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the text of the bill H.R. 9718 if offered as an amendment in the nature of a substitute for the bill H.R. 6805, said substitute shall be read for amendment under the five-minute rule as an original bill, and all points of order against said substitute for failure to comply with the provisions of clause 5, rule XXI are hereby waived. At the conclusion of the consideration of H.R. 6805 for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the amendment in the nature of a substitute made in order by this resolution. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Washington (Mr. MEEDS) is recognized for 1 hour.

Mr. MEEDS. Mr. Speaker, I yield the usual 30 minutes for the minority to the distinguished gentleman from Tennessee (Mr. QUILLEN), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 872 provides for the consideration of H.R. 6805, the Consumer Protection Act of 1977. This is an open rule providing for 1 hour of general debate to be divided and controlled in the customary manner by the Committee on Government Operations. At the conclusion of general debate the bill shall be read for amendment under the 5-minute rule.

The rule provides that it shall be in order to consider the text of H.R. 9718, if offered, as an amendment in the nature of a substitute for H.R. 6805. If offered, H.R. 9718 shall be read for amendment under the 5-minute rule as an original bill. This will allow for the substitute to be amended in the second degree.

All points of order against said substitute for failure to comply with clause 5 of rule 21 are waived. This waiver is required to permit the amendment to actually achieve the transfer of 20 consumer-related programs and $11.6 million in funds already appropriated. Such a transfer would be in technical violation of clause 5 of rule 21 which prohibits the consideration of appropriations in a legislative measure.

Finally, the rule provides for one motion to recommit with or without instructions.

Mr. Speaker, this legislation establishes a small effective office whose purpose it will be to plead the consumer's case within the Government. It will not require major additions to the Government size or operations; in fact it will be established by drawing together resources now scattered throughout the Government. It will not be another regulatory agency. Its purpose is to improve the way rules, regulations, and decisions are made and carried out, rather than issuing new rules itself.

This legislation is the product of extensive consideration by both the Congress and the President. Indeed the Congress passed similar legislation in the 94th Congress only to be frustrated in that effort by a Presidential veto. President Carter has made his support for this legislation well known to members of Congress and has worked with them to provide for the passage of an efficient and effective consumer representation office.

Mr. Speaker, it is this cooperative approach which the President and the Committee on Government Operations have followed which has produced the substitute which the Committee on Rules has made in order under this rule. Both the President and the committee have been sensitive to the concern which many Members have had about certain provisions of H.R. 6805. Specifically, many Members of Congress were concerned that the authority to issue interrogatories to business entities and the authority to seek judicial review from a Federal agency decision during a formal proceeding were unnecessary powers that might be used to harass business. Let me emphasize that the substitute made in order is a response to these concerns in that it eliminates these provisions and in no way adds provisions which were not a part of H.R. 6805.

In short, this rule gives Members a chance to vote not only on H.R. 6805 which has been before the House since May of this year, but also makes in order H.R. 9718 which is a lesser included version of H.R. 6805 about which many Members have expressed reservations. H.R. 9718 addresses all of these reservations without adding any new provisions which have not received the full scrutiny of the congressional hearings process. Finally, the rule provides for open amendments of either of these measures. Thus, the House will be completely free to work its will.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, a turkey is a turkey is a turkey. A turkey by any other name is still a turkey. And that is the way it is with this bill. This bill which was introduced as a substitute was never considered in the committee. No hearings were held on this substitute and yet today it is here before this body after having run the gamut last year and after having been withdrawn. After many attempts to break the barrier for consideration in this House, we find this substitute now on the floor.

The Washington Post this morning in an editorial against this measure concluded by saying that there is "much more reason for Congress to set this idea aside and concentrate on helping improve the regulatory agencies themselves."

This bill if enacted creates a new bureaucratic dictatorship, a bureaucratic monster. If you do not have the facts then let me tell you the facts.

In 1975 alone, 11 cabinet departments, 44 agencies and roughly 1,200 advisory groups issued 10,245 new regulations. This continues to grow. Regulatory agencies proclaim their commands in the Federal Register.

In 1937, in its first full year of publication the Federal Register printed 3,450 pages of administrative monologue. By 1973 the figure had increased more than 10 fold to 35,591 pages.

In 1974 it increased to 45,422 pages and in 1975 to over 57,000 pages.

It continues to grow.

In contrast, the elected Members of Congress, we in this body and those in the other body, have been able to produce only half as many pages in the CONGRESSIONAL RECORD as have been produced in the Federal Register.

Those pages in the Federal Register are laws that the people of this country have to operate under.

Those bureaucratic dictators downtown will take this bill, if it is enacted into law, and publish page after page and page after page in the Federal Register, so as to make it hard for business to operate and also to make it hard for the consumers. This bill is supposed to protect the consumers when, in fact, it is a rope around the neck of the consumers. It should be defeated. Let us not create another agency, another bureaucratic monster to issue in the Federal Register more pages of rules and regulations for the American people to bear.

This is a guise, this is a turkey. This should be defeated. I plead with the Members here on the floor today to defeat this rule. Many forays have been made to bring this measure to the floor. Let us end it once and for all. Let us cut this bureaucratic monster's throat and let him bleed to death here on the floor.

Mr. Speaker, I urge the defeat of the rule.

Mr. MEEDS. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Missouri (Mr. BOLLING).

Mr. BOLLING. Mr. Speaker, this bill has been around for a long time, 8 years, if I remember correctly. When it started out it was not a very good bill. It was the result of a very quick compromise by a very few people in the appropriate committee. Gradually as time has passed, it has changed. It is now not a turkey. It is a perfectly good, rather small bill that will do something quite useful.

Mr. Speaker, I have never seen but one or two examples of the kind of lobbying that has gone into this. More people have tried to persuade us that this bill was a movement or an attack on business when that simply is not the case. There is more reason for the bill today than there was 8 years ago. The problems that the consumers face are growing.

What horrible things does this bill do? It is very, very simple. It will actually put the consumer on the same level that business already is in dealing with the commissions and in appearing before the regulatory bodies that have so much to say about the fate of the consumers. I do not see anything even beginning to be unreasonable about this, and I urge the Members' vote for the rule and for the bill.

Mr. QUILLEN. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. ANDERSON).

Mr. ANDERSON of Illinois. Mr. Speaker, I hope the House will defeat this rule so we would not have to waste further time on a bill the people do not want, the administration keeps changing, and the committee has not bothered to issue a report on. I think it is pretty obvious from the changing mood of the country and the erosion of support for this type of agency in this House, that this is an idea whose time has passed, no matter what name you decide to call it. And this agency has already had more names than the Great Impostor: Consumer Protection Agency, Agency for Consumer Protection, Agency for Consumer Advocacy, and now, the Office of Consumer Representation. The proposed agency has already had enough acronyms to fill a bowl of alphabet soup—CPA, ACP, ACA, and OCR. And the bill itself has undergone so many changes in recent weeks that the bowl of soup is beginning to turn into a bowl of mush.

Mr. Speaker, I speak as one who used to support the concept of a consumer protection agency to represent consumer interests in Federal regulatory proceedings. In fact, I voted for similar bills on several occasions. But I have spent a lot of time back in my district in this 95th Congress and not only is there no groundswell of public support for such an agency, what I hear most from the small businessman and the average blue collar worker and consumer is: Government's already too big, too intrusive, and too bureaucratic. The people are not crying out for more bureaucracies to presumably protect them from other bureaucracies; they want us to strip away some of the layers of bureaucracy and redtape and make more commonsense out of what we have already got.

I happen to be one of the principal sponsors in this body, along with the gentlewoman from Texas (Ms. JORDAN), of a bill that would do just that—force us to reexamine and overhaul our entire regulatory bureaucracy according to a fixed 8-year timetable. Our Regulatory Reform Act, which has over 70 House cosponsors and has been introduced in the other body by the distinguished majority leader and the senior Senator from Illinois, is aimed at making more sense out of Federal regulatory agencies and activities and at the same time make them more responsive to the public interest. We do not have to create a new agency just to make existing agencies function better. As the Washington Post editorial put it today, in opposing this bill,

> Experience suggests that the most productive course is to change the character of the regulatory agencies themselves . . . Since President Carter took office, some excellent appointments and a real shift is governmental attitudes have greatly improved the propsects for real regulatory reform.

And the editorial concludes:

> Thus, there is much less need for any separate intervenor with limited powers—and much more reason for Congress to set this idea aside and concentrate on helping improve the regulatory agencies themselves.

The fact is, Mr. Speaker, this bill is going to make it more difficult for those

existing agencies to respond to consumer interests. By stripping those agencies of their own consumer offices, we leave them helpless to handle complaints referred to them by the new consumer agency. It is a Catch-22 situation and a bureaucratic paper-shufflers' delight. But it really does not do a thing for consumers that cannot already be done, and be done better, using existing resources and agencies. Let us spare the American the false promise that a new layer of bureaucracy is the answer to all their consuming woes. I urge defeat of this rule.

Mr. MEEDS. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. ROSENTHAL).

Mr. ROSENTHAL. Mr. Speaker, I just want to respond very, very briefly to two points that my distinguished colleague made so articulately and eloquently that spoke to the fact we should be responsive to our constituents and the signals that the gentleman receives from the gentleman's grassroots are that the bill should be defeated, or presumably that the rule should be defeated.

Let me state what the facts are, exactly to the contrary, as far as the grassroots are concerned.

In a poll released on May 17, 1977, conducted for the Sentry Insurance Co. by the Marketing Sciences Institute and Lewis Harris Associates, the public supported a Federal consumer advocacy agency 52 percent to 34 percent.

Another Harris poll taken in January of 1977 showed that 63 percent of the public favored an agency for consumer advocacy, while only 17 percent opposed it.

In a Yankelovich survey taken in 1976, 79 percent of the respondents supported a Federal consumer protection agency.

A Roper poll conducted sometime ago in May 1974, found that 55 percent supported a Federal consumer protection agency and 29 percent opposed it.

In a 1973 poll taken by the University of Georgia Marketing Survey, 77 percent of the respondents supported a Federal Department of Consumer Protection.

In this week's issue of U.S. News & World Report, the American public is registered as voting 48 percent to 36 percent in favor of the creation to a consumer protection agency.

Every single poll taken by a national polling agency has found support for this bill.

The SPEAKER pro tempore. The time of the gentleman from New York has expired.

Mr. MEEDS. Mr. Speaker, I yield 1 additional minute to the gentleman from New York.

Mr. ROSENTHAL. Mr. Speaker, one other point that the distinguished gentleman from Illinois gives for opposing the bill and the gentleman from Tennessee gives for opposing the rule is that the substitute came up out of the dark in the middle of the night by a small elitest group of people who never considered it previously. Time and time again, as late as last week on the Outer Continental Shelf bill, we considered both the Fish substitute and the Breaux substitute neither one of which had been considered by the committee. On numerous other occasions we have considered substitutes that have not been considered or reported on by the committee.

The fact of the matter is that this substitute was agreed to by a distinguished bipartisan group of members of the committee 3 months ago and has been available for review and perusal since then and there have been, albeit, many comments in the CONGRESSIONAL RECORD as to the substance.

Mr. Speaker, I would urge a vote for the rule.

Mr. QUILLEN. Mr. Speaker, I yield 5 minutes to the gentleman from New York (Mr. HORTON).

Mr. HORTON. Mr. Speaker, I rise in support of the bill.

There has been a lot of heat generated about the substitute. I would point out this is an open rule, that there will be adequate opportunity to offer amendments and, as the gentleman from New York (Mr. ROSENTHAL) stated just previously, there is nothing that is improper or out of order with offering substitutes that have not gone through the committee. This bill and all the issues that are involved in the substitute have been the subject of much discussion and debate, not only in the Congress, but also in the general public.

As the gentleman from New York (Mr. ROSENTHAL) pointed out, the substitute has been made available publicly, so that the Members of the Congress are well informed as to what is proposed insofar as the substitute is concerned. So I submit that there is nothing undue; there is nothing unusual with respect to the rule itself.

The fact of the matter is that the House of Representatives for the past 9 years has had before it a proposal for an Office of Consumer Representative or a Consumer Protection Agency. On several occasions we passed the bill in this House and it has gone over to the Senate and it has not been passed in the Senate; so we have to come back and try to do it again.

Someone said earlier that the time for the bill has passed, that its time has come and is passed. I submit that the time is now. It should have been passed 8 or 9 years ago. The consumer has not been represented before the regulatory agencies. This is the goal of H.R. 9718. It is not a monster that we are creating. It is an agency to represent the consumer interest before the consumer interest is fixed in place. In other words, give the consumer an opportunity to be heard before the action is taken to his detriment.

Mr. Speaker, I too, have been back to my district, and I have talked to many people. There is no one in this Congress that is more for regulatory reform than the gentleman in the well. I am for regulatory reform. It is a very important thing that should be done. The American people are being strangled by regulation. You cannot go back to your district without finding people who are fed up with the regulations and rules that have been enacted by the administration carrying out the legislative precepts that we have passed.

But that is not what we are doing here now. We are not creating a regulatory agency. We are going to create an office to represent consumers before various Federal agencies. And if that had been done earlier, if that consumer interest had been represented earlier before many of these agencies, some of the bad regulations and some of the bad laws and some of the imposition on the American people would not have transpired and the American people would not have the regulatory reform need that they have now.

I submit that this bill is regulatory reform. It is a means of reforming the regulatory system, because the consumer will have a voice. And when the Members go back to their districts, in my judgment, if they have indicated that they voted against this rule or against this bill, I think they are going to have difficulty explaining to their constituents why they voted against consumers having simple representation before the regulatory agencies that are enacting the regulations that are strangling them.

So I urge that the Members vote for the rule and for the bill.

Mr. MEEDS. Mr. Speaker, I yield 4 minutes to the gentleman from Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. Mr. Speaker, I come before the House asking the Members to vote for the rule, not because I favor the bill—because I probably do not—but because the rule is open and, as I understand the situation, from my brief tenure in the House, we vote for an open rule because we have an opportunity to express all of our views.

Mr. Speaker, this rule gives me and my colleague, the gentleman from Iowa (Mr. LEACH), an opportunity to offer a substitute bill. It would have been nice to have offered this before the committee. I did not have that opportunity. It would have been nice to have, perhaps, a greater record before us, but we do not have that opportunity. To a certain extent, I feel like the lonely long-distance runner. I am offering a substitute bill, which is opposed by business, is opposed by labor, and is opposed by consumer groups. And for that reason I think there may be some real merit in our position. My substitute creates better consumer representation by beefing up and enhancing existing consumer units in Goverment but does not create a centralized Consumer Protection Agency. My substitute helps to improve the regulatory agencies by providing an ombudsman within each of those agencies—and, by the way, the consumer units already exist in those agencies—by giving that ombudsman an opportunity and a duty to intervene in his own agency's actions.

This can be done by improving consumer representation before the agency without the necessity of creating a central, elitist, consumer agency which I believe may not be consistent with our democratic institutions. I believe consumers need better representation before this Government, but not at any cost. Our function is to provide the tools of Government and improve upon them and

make them better, not to just wear blinders, because this bill has been before us for 8 years, and that is the only approach to take.

We will have before us 3 choices: One is to vote down the main bill, one is to vote up the main bill, and the third is to accept the Glickman-Leach substitute, thus providing better consumer protection without the negative implication inherent in the bill. This provides us an opportunity to vote for consumer representation without creating a separate agency.

Mr. Speaker, to conclude, I suggest that whatever the Members do, they vote in favor of the rule.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as I said in the beginning, a turkey is a turkey is a turkey.

The cook may roast and disinfect it as much as he will,

But the stench of the skunk remains with it still.

Let us defeat this turkey.

Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. ERLENBORN).

Mr. ERLENBORN. Mr. Speaker, when President Carter was a candidate 2 years ago, he campaigned on the promise that he was going to reduce the size of Government. I recall that he promised that he would reduce the number of Government departments and agencies to no more than 200.

He campaigned against the Washington bureaucrats and suggested the solution to our problems were not going to be fashioned here in Washington.

I was absolutely amazed when I saw in one of the Sunday supplement magazines a story saying that the President was producing on that promise, and that he had abolished 750 units of Government. So I wrote to the author of the story and I asked, "Where did you get this information?"

She said:

Well, it was a handout from the White House.

So I wrote to the Office of the President, and I asked OMB, "What are the 750 units of Government that have been abolished?"

It turned out they are advisory committees, almost all of which have no staff, no appropriation, and never meet.

On the other hand, we have a new Department of Energy, which is, as I recall, the third largest in terms of appropriation in the entire Government, created at the suggestion of President Carter. He is now suggesting that we have a new Department of Education, which will be another large unit of Government.

Here today we are considering his recommendation to create a totally new unit of Government for consumer representation.

I am speaking to my colleagues on the other side of the aisle when I say that we can do the President a favor. I guess the President got committed to Ralph Nader during his campaign on these issues, so now he goes against his promise to the people. Jimmy Carter may have forgotten his campaign promises, but the voters have not. They do not want any more Government agencies; they do not want more bureaucrats. They consider Washington the source of their problems rather than the place where solutions to problems will be fashioned.

Mr. Speaker, let us do the President a favor. Let us vote down the rule.

Mr. MEEDS. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. SISK).

Mr. SISK. Mr. Speaker, I appreciate my colleague's yielding me this time.

Mr. Speaker, I do not feel strongly about the rule. It may very well be that we should go ahead and adopt the rule and once and for all put this baby to bed permanently.

I strongly oppose, of course, the so-called consumer bill that has been here before us. I suppose we all hear different things, depending on what we want to hear when we go back to our districts. I speak from experience, because that is the kind of thing I have been following for the last 24 years in order to try to survive around here, at least the best I can. In any event, the things my people are saying, whether it is at a farm meeting, at a veterans' meeting, a business meeting, or a church meeting—you name it—are concerns about regulation.

We have become an overregulated society. That is what is being said, if I understand what people are saying. So what we are confronted with again today is more and more regulation.

I would hope that through the sunset provisions of the amendment offered by the gentleman from Georgia (Mr. LEVITAS) and others we will begin to put to rest some of these regulations which have created, as I say, an overregulated society.

Mr. Speaker, I would hope that this bill, as I say, may once and for all be put to bed and forgotten, and let us move on to more important matters.

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio (Mr. DEVINE).

Mr. DEVINE. Mr. Speaker, I have no great concern about whether we vote the rule up or down. However, I do have great concern about what we might do with the legislation.

Mr. Speaker, Esther Peterson, bless her heart, has been puttering around this Hill for as long as I can remember. That is a long time. She is carrying the torch of Ralph Nader and his crew to try to inflict on the American people yet another bureaucracy, another way to restrict and regulate the American public.

Mr. Speaker, if we pass this bill, I think we are admitting that we are not doing our job. Why do I say that? I think the term "consumer" and the term "constituent" are interchangeable. I do not have a constituent who is not a consumer, and I do not know a consumer who is not a constituent of one of us here.

Therefore, if we are putting in a consumer-advocate agency in order to represent the consumer, what we are saying is that we, the Members of Congress, are not representing our constituencies.

Mr. Speaker, it is just that simple. We do not need another bureaucracy. We do not want President Carter to break another campaign promise by creating another bureaucracy.

Let us vote down the bill, Mr. Speaker.

Mr. MEEDS. Mr. Speaker, I yield 3 minutes to the gentleman from Connecticut (Mr. MOFFETT).

Mr. MOFFETT. Mr. Speaker and colleagues, with regard to the gentleman's comments about the President's campaign promises, the President also talked about an imbalance of power in the Nation's Capital between consumers and industry.

I think the real issue here today is whether the Government is going to be fair and whether we are going to be fair.

Mr. Speaker, my friend, the gentleman from Illinois (Mr. ANDERSON), who used to support this bill, mentioned that people do not want the bill. We all have to judge that as we see it in our districts; but I think we must look at the way the question is presented. Obviously, if we ask people if they want section 7 of the Federal Trade Commission Act Amendments, they are probably going to say no. If we ask them if they want another agency, they are probably going to say no.

In fact, Mr. Speaker, I am sure the people realize that there are hundreds of administrative proceedings going on every week in the Nation's capital that have to do with things which influence their lives, whether it is natural gas pricing, home heating oil, unfair advertising, airline prices, prescription drugs, warranties, hearing aids, things which affect their lives every day. If we present the entire picture to them of how these agencies work—and we all know how they work; they sit as quasi-judicial bodies, as judges, for the most part—the public will support this legislation. We know, on the one hand, that there is tremendous representation by industry. They have no problem in getting their point across.

Mr. Speaker, I do not want to do anything to change that; but let us not pretend that that happens and that there is still a balance on the other side because we all know that that is not true.

The committee of which I am a member sponsored this bill, led by the gentleman from Texas (Mr. BROOKS), and it has studied the issue of the imbalance in legal counsel, in technical assistance, a great imbalance between consumers and industry in appearing before these commissions.

There is no doubt that the imbalance is often something like 50-to-1 for industry or 100-to-1 for industry.

Mr. Speaker, this is a fairness issue. It does not have anything to do, with all due respect to my colleague from California and some of the other speakers, with regulations or with strangling people with redtape.

Mr. Speaker, I think this Congress is recognizing more and more that we should not make a lot of new laws. What we are trying to do is to make many of the old laws work.

Again, it is a fairness issue. Are we going to be fair or are we not? That is all this bill does, and I urge its support.

Mr. QUILLEN. Mr. Speaker, I yield 4 minutes to the gentleman from Indiana (Mr. QUAYLE).

Mr. QUAYLE. Mr. Speaker, I would just like to say, in answer to my friend and colleague, the gentleman from Connecticut (Mr. MOFFETT), that perhaps the fatal flaw with this Consumer Protection Agency we are trying to create is the fact that we are creating a new agency. We are creating a new bureaucracy.

Mr. Speaker, as my colleague, the gentleman from Illinois, pointed out, the alternative should be a close reexamination of the present Federal bureaucracy that we have right now. If we want to talk about fairness, if we want to talk about giving the consumer equal representation with business interests, with labor interests, let us not do it by creating another bureaucracy.

However, we are talking about the rule right now, and I really feel the rule in this particular case is much different, at least in my short tenure in Congress, than in the past.

We are going to be discusing H.R. 6805. Then we are going to be dicussing H.R. 9718.

It was mentioned, I believe, by the gentleman from New York that we will have several substitutes. Mention was made of the Fish substitute and of the Broyhill substitute.

This substitute is being offered by the distinguished chairman of the committee.

If we look at the facts, H.R. 6805 was introduced back in April 1977. We had subcommitee hearings.

We had the markup on May 10. We reported the bill out May 16 by one vote. It was after that one vote margin that all the complaints came together and then the elite Members go together and came up with this substitute. It is very substantially changed. We can go through the items; there are 11 sections that are going to be changed by this.

So why not defeat this rule and send it back to the committee where it belongs? We can then refer to the bill as a new and improved bill. If that is the case, our distinguished chairman of the committee who operates in a very expeditious manner, could have hearings and bring the substitute back on the floor in rather quick fashion.

In conclusion I would think the logical thing to do would be to defeat the rule, send it back to the committee for proper hearings. Then and only then can we talk about what the chairman and the rest of the cosponsors want on H.R. 9718.

Again, I urge defeat of this rule.

Mr. MEEDS. Mr. Speaker, I yield 4 minutes to the gentleman from Georgia (Mr. LEVITAS).

Mr. LEVITAS. Mr. Speaker, I think we probably should adopt the rule even though it is a bad rule; it is a bad precedent, but I think the time has come to grab the bull by the horns and deal with this issue on its merits.

Now, the reason it is a bad rule and a bad precedent is that by adopting this rule—which I expect the House to do—we are vitiating the entire process of our committee system. Here is a bill that came out of the committee by one vote, surrounded by controversy, born in a sense of great turmoil, and it came out of committee by one vote.

The advocates of the bill have proposed a substitute, a substitute bill which they say is different. Now, they have not exactly leveled with us because it is not as different as what they say it is, but they brought out what they say is a new bill. It seems to me it is perfectly appropriate for a substitute bill to be proposed. That is part of our legislative process, but when the sponsors of the original legislation bypass committee consideration of legislation, then the question arises, why do we have committees?

If the sponsors of the original legislation say, "We want to offer a substitute for that bill that came out," why not let the committee that has jurisdiction say something about that legislation? Some people have suggested that if we put it back into committee, it will be defeated. This is the way to pigeonhole it. But, I have testified before the Rules Committee, and I said, having voted against the bill in committee, that I would give my proxy to the distinguished gentleman from New York, who is supportive of this legislation, to report it out of committee.

It seems to me that it is not asking too much, out of respect for the committee process, out of respect for the House of Representatives, to let the committee say, "Is this an improvement or is it not?"

I think the answer is going to be, later this afternoon, that it is not an improvement. It is the same bill. You know, when you see an animal that has feathers and webbed feet and quacks, you may say it is not a duck, but if it has webbed feet and it has feathers and it quacks, it is likely to be a duck.

I say to the Members that this so-called substitute is a duck, and I suggest to them it is no different; it has the interrogatories; it has the space; it has the judicial review; it has the leads between agencies. And the least we could have done was to have this legislation come back to the committee.

I think it is interesting that even the prestigious Washington Post, which year after year has supported this legislation, has editorialized today that this is legislation that should not pass, that Congress should get rid of this bill and put it aside, and get on to the important matters that are needed for consumer protection.

This bill is an idea whose time has come and whose time has passed. We ought to vote on the rule and support the rule and give the Members of this House the opportunity to defeat a bad bill.

At this point I insert a copy of the Washington Post editorial:

REPRESENTING CONSUMERS

After much maneuvering and many delays, the latest version of the consumer-agency legislation is scheduled to come before the House today. During earlier congressional go-rounds on the issue, we endorsed the creation of a new federal agency to represent consumers' viewpoints before regulatory bodies and in judicial reviews of regulatory decisions. But both the legislation and conditions have changed. In our view, the advocates of the current measure, H.R. 9718, have failed to make a persuasive case for enacting, now, what is left of the idea.

We are not primarily concerned about the powers or costs of the Office of Consumer Representation now proposed. The agency's authority has been substantially cut back, so that it would not have a general license to quiz companies or appeal any regulatory decision it didn't like. On the question of cost, the bill's sponsors maintain that the $15-million budget of the new agency would be more than offset by the transfer or elimination of existing consumer programs in over 20 agencies. We find the net-savings claim a bit hard to swallow. If the new office did turn out to be as aggressive as its sponsors plan, its budget would surely grow. Still, it could be worth much more than $15 million—*if* it were the best way to make federal regulatory bodies more sensitive to considerations such as cost, public health, safety and the other factors often cited as "consumers'" concerns.

That gets to the real problems with this bill. One is the assumption that consumers' interests are so clear, so consistent—and somehow so distinct from the general public interest. Consumer advocates argue, of course, that they do represent the general public. Yet the public interest, in the modern regulatory world, is usually more complex; it may involve balancing a given degree of safety against a certain increment of cost, or keeping down tomorrow's price increases without jeopardizing next year's supplies, or making a much more complicated type of accommodation among a hundred forces and factors bearing on the marketplace. Those who emphasize health or safety or retail cost should certainly be heard, along with those who have other priorities. But to enshrine any particular "consumer" viewpoint in a government advocacy office raises philosophical problems that trouble us.

Beyond that, what is the real purpose here? Surely it's not just to add another voice at agencies' hearings or another pile of briefs on commissioners' desks. One's aim may be "consumer justice," as Mark Green puts it on the opposite page today, or a better grasp of the public interest in all its complexities. In either case, experience suggests that the most productive course is to change the character of the regulatory agencies themselves.

This may sound like a hopeless task. But the Federal Trade Commission, for one, made notable progress even during the Nixon-Ford years when most presidential appointments and executive-branch attitudes were inclined to favor corporate views. Since President Carter took office, some excellent appointments and a real shift in governmental attitudes have greatly improved the prospects for real regulatory reform. Thus there is much less need for any separate intervenor with limited powers—and much more reason for Congress to set this idea aside and concentrate on helping improve the regulatory agencies themselves.

Mr. QUILLEN. Mr. Speaker, back in east Tennessee they say the way to get rid of a rattlesnake is to cut off its head. I would say the way to get rid of this bill is to defeat the rule.

I yield 2 minutes to the gentlewoman from New Jersey (Mrs. FENWICK).

Mrs. FENWICK. Mr. Speaker, I expect to vote for the rule because I think we have to consider this legislation, and I still do not know exactly how I am going to vote. A great deal depends on the nature and the drift of the debate and what is revealed as to intent and purpose.

I was Consumer Director for the Division of Consumer Affairs in my State, in the Attorney General's office, and I have been deeply concerned with consumer affairs for many years.

There is something that we desperately need and I do not think anybody in this House ought to dodge it. We need a group, a repesentative, somebody, who is going to be able to come before the agencies of Government—and I could give the Members chapter and verse—because as our colleague, the gentleman from Connecticut, has said, perforce the agencies that were set up in the public interest have become judges and they must hear what the consumer interest is.

There is a difference, and this is something I have learned too. The public interest is sometimes contrary to the consumer interest. As a consumer I fought for everything including what was called the Fair Trade Act, which meant one could buy a radio in New York for $7.45 less than one could buy it in New Jersey. As a consumer advocate I was fighting to get rid of those Fair Trade Acts because it is in the interest of the consumer to be able to buy good merchandise at the least expense. But the public good sometimes overrides that. We might have a situation where the consumer interest would suggest that we should be able to buy shoes at the least expense, but the public good, the questions of the employment involved, and other considerations must be taken into account.

The SPEAKER. The time of the gentlewoman from New Jersey has expired.

Mr. MEEDS. Mr. Speaker, I yield the gentlewoman from New Jersey 1 additional minute.

Mrs. FENWICK. Mr. Speaker, I thank my colleagues most warmly.

There is another purpose, however; we have all argued the necessity of appearing before the agencies before action is taken on some of these issues. I have an amendment I trust this House will consider.

Ask the Paper Work Commission where the problems of small business come from. The answer is out of this Congress of the United States. This agency must be empowered to come, uninvited or invited, before the committees and the subcommittees of Congress and describe the consumer interest in any particular piece of legislation.

Look: If we are going to really mean it, if for once we are going to show the people of this country we mean it, we have got to stick up for something when it is convenient and when it is not convenient. And that is what I hope this bill will turn into: something that people really can defend and say they really mean it. Are we prepared to subject the committees and subcommittees of the Congress to the kind of scrutiny that a consumer agent who really cares about consumers may be about to propose? OK. Let us see if we do.

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from Kentucky (Mr. HUBBARD).

Mr. HUBBARD. Mr. Speaker, I did not intend to speak on the rule although I do intend to vote against the rule. I was waiting for my prepared remarks to be made during the general debate, assuming the rule passes, but my conscience will not allow me to sit there any longer realizing that the overwhelming majority of my constituents in Kentucky, who are Democrats, strongly oppose the creation of another agency, another unit of the bureaucracy here in Washington.

They overwhelmingly supported President Carter in November of 1976, believing what he said, that he meant to streamline the Government and to reorganize the Government.

But they sure did not have in mind that he was going to yield to the wishes of Ralph Nader and come up with an Office of Consumer Representation.

I was warned that if I made remarks like this as a Democrat that I would make Ralph Nader mad. Well, I was rated 28 percent by the Nader organization a few months ago and I got a lot of criticism and every letter of criticism wondered why I was that high.

I would urge my Democratic colleagues to think twice before they vote for the rule and especially for this bill. If you think the people in your districts are going to believe that what we are doing by creating an Office of Consumer Representation is lessening the bureaucracy and merging several units into one, I urge you to realize the people will not believe it. Also if you think that the people out there in your districts will believe that the agency will operate from now on at $15 million per year, surely you know that is not accurate and you know they will be in here asking for more and more money shortly after the office is created.

I would urge my colleagues to vote against the rule and against the bill.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, we have heard many arguments pro and con on this measure. I want to repeat that since 1937 when the Federal Register began its publication, it has overcome and outdistanced the CONGRESSIONAL RECORD in pages by more than 100 percent. And I would hasten to add that the Members of this Congress are very loquacious. We all like to talk. But the bureaucrats downtown issue these regulations and print them in the Federal Register and they become the law. It is time that we cut out some of these bureaucratic dictators and cut out some of the agencies rather than creating another one.

Mr. Speaker, I reserve the balance of my time.

Mr. MEEDS. Mr. Speaker, I only have one more request for time, and I would prefer that the gentleman from Tennessee (Mr. QUILLEN) conclude with his requests now.

Mr. QUILLEN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. MEEDS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. MEEDS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 271, nays 138, not voting 23, as follows:

NOT VOTING—23

Armstrong	Jones, Tenn.	Shipley
Bonker	Krueger	Teague
Brown, Ohio	LaFalce	Treen
Cotter	Le Fante	Whitten
Dent	McDonald	Wiggins
Flood	Nix	Wydler
Goodling	Rostenkowski	Zeferetti
Holt	Ruppe	

The Clerk announced the following pairs:

On this vote:

Mr. Cotter for, with Mr. McDonald against.
Mr. Flood for, with Mr. Brown, Ohio, against.
Mr. Le Fante for, with Mr. Jones, Tenn., against.
Mr. Nix for, with Mr. Wiggins against.
Mr. Rostenkowski for, with Mr. Goodling against.
Mr. Zeferetti for, with Mrs. Holt against.

Until further notice:

Mr. Bonker with Mr. LaFalce.
Mr. Dent with Mr. Shipley.
Mr. Krueger with Mr. Teague.
Mr. Whitten with Mr. Ruppe.
Mr. Treen with Mr. Wydler.

Mr. BUTLER and Mr. WINN changed their vote from "yea" to "nay."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. BROOKS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6805) to establish an Agency for Consumer Protection in order to secure within the Federal Government effective protection and representation of the interests of consumers, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. BROOKS).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 6805, with Mr. EVANS of Colorado in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Texas (Mr. BROOKS) and the gentleman from New York (Mr. HORTON) will be recognized for 30 minutes each.

The Chair recognizes the gentleman from Texas (Mr. BROOKS).

Mr. BROOKS. Mr. Chairman, I yield myself 6 minutes.

Mr. Chairman, this legislation has had a long and stormy history. Few bills coming before the Congress in recent years have been supported with more enthusiasm or opposed with more enthusiasm than this bill.

I hope that today we can put aside the emotional rhetoric that has whirled around this bill and that here on the House floor we can dispassionately debate the issues in this legislation.

Mr. Chairman, as was made clear during debate on the rule, the bill we are bringing before the House today is not precisely the bill that was reported by the Committee on Government Operations. At the time the committee approved H.R. 6805, its chances on the House floor were not very bright. So, we held it up and did what I think responsible legislators should do. We have attempted to identify those provisions in the bill which numerous members found objectionable that could be adjusted without damaging the principal concept embodied in the legislation.

There have been many meetings and discussions, particularly with members who had reservations about the original bill. We have finally put together a modified version that will be offered as a substitute when the bill is read for amendment. The substitute represents a fair and reasonable compromise which should remove many of the concerns that some of the members have legitimately had.

The substitute bill has been printed in the RECORD. Explanations have been sent to every Member. There can be no question that Members have had an opportunity to read and analyze it.

The main purpose of this legislation is to improve the way government decisions are made—to make them more responsive to the needs and concerns of the people of this Nation; to make them fairer. Business has vast resources to make its views known to Federal decisionmakers. That is fine. That is their right, and it is entirely proper that they try to protect their interests. But the consumer interest needs to be heard, too, and at present it rarely is. It is too fragmented, too disorganized. It is usually underfinanced. This inequality often has resulted in inadequate consideration by agencies of consumer problems.

The consumer office created by the substitute bill would have no power to regulate business activity. It will be basically a factfinding office that can use its resources to plead the case for consumers in the halls of government.

The main purpose of the changes made by the substitute is to make sure the consumer agency will have no greater power than any private party in its dealings with the Government. We want to be certain that when it participates in the Government's decisionmaking process it does so in the same manner, to the same extent, and under the same rules as the advocates of business or any other interest.

The first thing we do is change the name of the proposed agency from Agency for Consumer Protection to Office of Consumer Representation. That name is a better description of the role the agency will play.

Then we have eliminated a provision in H.R. 6805 that would have authorized the agency to issue interrogatories on its own or request reports from businesses. This was one of the major objections to the bill raised by business representatives, and we have taken it out.

We have provided that the Office of Consumer Representation will have no greater rights than any business entity to use a Federal agency's subpena power or other discovery powers during a proceeding. And we have placed the Office on the same footing with business advocates in seeking judicial review of a Federal agency decision.

In addition, we have authorized the consumer agency to represent the interests of small business as a consumer of regulated goods and services. This provision was not in H.R. 6805.

We have also dealt with another of the major objections to the original bill—the idea that it would create another layer of bureaucracy. The substitute bill is, in effect, a government reorganization bill. It provides—by statute—for the transfer to the new office of 20 existing consumer programs now scattered throughout the government.

So, far from adding another layer of bureaucracy, we are streamlining the Government, and we will wind up with a more efficient, less costly, operation on behalf of consumers.

I would just like to say a final word about the concept behind this legislation. We are dealing here with an idea that is very simple, and very basic, and very much in the tradition of the American way of life. It is the idea of fair play.

There is a great imbalance now in Government councils when decisions affecting the lives and pocketbooks of millions of people are being made. Well-organized, well-heeled special interests are represented in those rooms. Their voices are heard and their influence is

felt. But rarely is anyone speaking for the consumer. The 217,000,000 people in the United States are all consumers. Each of our districts has roughly 464,000 consumers. It is not fair that they be denied a voice. It is not right. I hope the substitute bill can be approved to make it right.

Mr. HORTON. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, I rise in support and urge the adoption of H.R. 9718, the Consumer Representation and Reorganization Act of 1977. Today's debate marks the fourth time that I have come to the floor of the House in support of legislation to create an office in the executive branch to represent the consumer viewpoint. A great deal has changed since the first consumer legislation was defeated by a tie vote in the Rules Committee of this House December 3, 1970. On three previous occasions we have debated this bill. Today, we are clearly at the decisive point. If this legislation does not clear the House today, there is little likelihood that it will be successful at any time in the near future.

We need an Office of Consumer Representation. No piece of legislation can ever be justified as the absolute savior of the American people. However the bill before us today seeks to provide an objective voice in the regulatory decisionmaking process.

H.R. 9718. is a constructive rational compromise, reflecting the viewpoint of both supporters and opponents. In each of the provisions which were modified, a consistent goal was sought. The Office of Consumer Representation created by this bill will be an agency with no greater power than those of any other party to an agency proceeding. We are not proposing with this legislation the creation of another regulatory agency. Some people who are opposed to this legislation would make it appear that this is another bureaucracy or another regulatory agency. It is not.

There is no authority provided in this legislation to regulate anything. The legislation establishes an office which can represent the consumer viewpoint in an agency proceeding: no more and no less. Nothing in that representation activity is regulatory or of a regulatory nature.

The chairman of the Government Operations Committee has already outlined the major provisions of this legislation and the changes that were made in the proposed substitute. There is another feature of the proposed legislation that is of concern for the Members of this House at this particular time in our Nation's history. Whenever a new Government agency is created, a legitimate concern is expressed that we are adding to the bureaucracy. One of the major roles of the Government Operations Committee is to review each executive reorganization plan which is proposed by the President. In H.R. 9718 we have a proposal which will set up the new agency, but unlike many other proposals it will save money and reduce the size of other executive agencies. H.R. 9718 contains a statutory reorganization plan which transfers the resources of 20 existing consumer programs to the new agency. The Office of Management and Budget is also required to cut an additional $10 million in related consumer program expenditures for fiscal year 1979. The result will be a needed savings in the Federal budget of $7 million.

In addition to the savings that will result, H.R. 9718 also contains a sunset provision which will terminate the agency 5 years after the effective date of the act. This is no gimmick. There are no hidden provisions in this section. If there is no congressional initiative to reestablish the agency, then it will terminate, period. That is what the sunset provisions provides.

What makes the savings and the sunset provisions even more significant is that they represent attempts by the original sponsors of the legislation to accommodate the legitimate concerns of the Members of this House on both sides of the aisle. They are strengthening provisions and in my judgment provide a basis for broader support of the legislation.

Mr. Chairman, the final issue I wish to discuss concerns the future of this bill if it passes the House. Some of my colleagues are concerned about the form this legislation may take when the Senate has completed its action and when we go to conference. I wish to assure the Members that as far as this Member is concerned, and I expect to be a member of the conference committee, I would fight for the contents of the House bill and particularly for the provisions that I have just noted.

Mr. Chairman, our choice today is really quite simple. Does the House of Representatives have the will to vote for legislation that has no special interest stamp on it? Are we willing to provide a voice for the consumer which is not tainted by a narrow parochial concern?

I urge a resounding answer in the affirmative. Again I reiterate: This is not a regulatory agency. And as I said during the debate on the rule, this in my judgment is a step in the right direction toward regulatory reform. The editorial in the Washington Post this morning made the point that what we should do is to move forward with regulatory reform. I can tell the Members that this is not going to happen overnight.

It is important to have regulatory reform but this is not, and, I repeat, this is not a step away from regulatory reform. The creation of this office is a step toward regulatory reform. The individual who has a concern about strangulation by regulation will have his voice heard.

Mr. BROOKS. Mr. Chairman, I yield 3 minutes to the gentleman from Connecticut (Mr. MOFFETT).

Mr. MOFFETT. Mr. Chairman, I spoke during the debate on the rule about this being a basic fairness issue and I will not repeat those remarks, mainly because I spoke about that before but because both the gentleman from New York (Mr. HORTON), and the chairman of our committee, the gentleman from Texas (Mr. BROOKS), have done, in my opinion, a most brilliant job in explaining the issue. This is not an issue of regulation, not about strangling people with all kinds of regulations. It is an issue of basic fairness.

The Members who complained so much about the substitute that will be coming up should recognize that it came up because of their objections to the bill.

The bill has been whittled down, too much for me, but I think it is good enough to get it passed and good enough to support.

So what I would like to do is to give a perspective of it that might not be given by others, and that is that I was one of those who organized a little consumers group in Connecticut, a group supported with small contributions, averaging under a dollar. And all we tried to do was to make our presence known in the various agencies and to intervene in administrative proceedings as they came up regarding such things as prescription drugs, clean air, hearing aids, and a whole host of other issues. But while we were successful in many areas, we simply could not cover nearly all the important proceedings. No number of consumer groups could do it. We should not pretend that just because the door is open for a group to come in and intervene, that this will happen. The statistics that have been developed by the gentleman from Texas (Mr. BROOKS) and through the able leadership of the gentleman from New York (Mr. ROSENTHAL) have shown the imbalance of participation before the FTC, the FCC, and all the other agencies and regulatory groups. The statistics really bear out the fact that we will never be able to catch up by having consumer groups come in and maybe we will never be able to catch up at all and address the imbalance so far as these agencies are concerned. But, for heaven's sakes, let us make it a little more balanced.

In Connecticut, what happened there, at least in the area of utilities and utility rates, we had the development by the legislature of a consumers council, which is really the same kind of thing that we are developing here today, and there it has worked out magnificently and, in fact, in other States where it has been created, it has worked out very, very well. It has worked out cheaply. It has worked out efficiently. It has made industry more responsible and better prepared.

In fact, in our State, Mr. Chairman, you do not hear complaints any more about the consumers counsel by those who originally quarreled with it, and many industry people who opposed it in the first place think it is now a good idea because it makes industry come in better prepared. That is one of the benefits that we hope we will be able to create through the creation of this office. And we will also give people the idea that there is fairness in the system.

Mr. HORTON. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois (Mr. ERLENBORN).

Mr. ERLENBORN. Mr. Chairman, in recent days some of my colleagues have asked me, "Now that we have one proposed substitute to remove some of the powers that otherwise would have been

given to this proposed new agency, do you think you will vote for the bill?"

My answer is no.

They say, "If you have this promise that it will not cost more than $15 million per year after the agency is created, will you support the bill?"

My answer is no.

My answer is no because the basic concept on which this bill is based is wrong. That concept is that we are going to create a government agency headed by a bureaucrat, who is going to decide, in the words of the proponents of this legislation, the consumer interest and represent that consumer interest before the other agencies of Government. There is no singular consumer interest. We ought not put the full authority of the Federal Government behind one man's concept of what the consumer interest is.

There are more than 215 million different consumers in the United States, each and every one of us being consumers. Some like it red; some like it green; some like it thin; some like it fat. Just think of one of those consumer-related issues now before the Congress, natural gas price deregulation, and I ask you, Who is going to determine what is the consumer interest in that case? We, the Representatives of our constituents, we, the elected consumer representatives, if you will, are having a great deal of difficulty in deciding what is in the public interest and the consumer interest in that case.

But at least when we get through having made that decision, we under the Constitution as elected officials, and as a matter of our collective judgment, 535 of us will have made that determination. But the concept of this agency is that one person heading this agency is going to make such decisions and go before other agencies of Government and try to impose his will upon them. If he does not like their decision, he will appeal, and then we will have the spectacle of one Government agency in the judicial system suing another Government agency.

If there is a disagreement in the executive branch, that should be resolved in the executive branch, and those decisions that were designed to have been made in the executive branch should be made there. Instead, the concept of this bill is to push more and more of those decisions out of the executive branch, and have a judicial determination. I think it is constitutionally flawed in that respect.

Mr. Chairman, this is a concept that has been around for a long time. Its time, if it ever was—and I do not think it ever was—has long since passed.

Attention has been called to the Members of the House and of this committee of the editorial in the Washington Post this morning. I call the Members' attention to a similar editorial in the Washington Star this evening, and many such editorials in newspapers across the country. As I said in the debate on the rule, President Carter came into office on a promise that he was going to reduce the size of Government and have no more than 200 agencies and departments of Government. Instead, he is recommending the creation of such a new bureaucracy as this and one whose concept is basically flawed, is incorrect, and is unsupportable.

I would hope that we would see the fallacy of this. I would hope that we would hold President Carter to his campaign promises and not let his promise to Ralph Nader override his promise to the people of the United States, and that we would vote down this bill and not create this agency.

One last thought: There are those who would like to change the bill substantially, take away what powers there are in the bill, and make it something less than the President proposed. They say, Why not do that, and then you can cast a cheap vote supposedly for the consumer?

Do not kid yourselves. That is not politically the smart thing to do. Do not kid yourselves. It can be changed in the Senate into something we do not like.

Mr. BROOKS. Mr. Chairman, I yield 5 minutes to the gentleman from Tennessee (Mr. ALLEN).

Mr. ALLEN. Mr. Chairman, I have spent the greater part of my life in public service fighting for the consumers, for we are all consumers. And I am proud to be among those distinguished Members of this body who will vote today for the administration's bill, in the form of a substitute, establishing a Federal Office of Consumer Representation.

We all know the great difficulty, the prohibitive expense, and the long delays which face any individual consumer or retail merchant, who tries alone to take on one of the giant corporations, or utility, or some agency of the Federal Government, in seeking to prevent an injustice or ripoff by giant public utilities, Government agencies, and large corporations, which have available to them the very best of attorneys, sophisticated data-gathering procedures, platoons of accountants, and high-paid lawyers to represent them, while the individual consumer or merchant can afford none of these things to assist him in his fight.

I have long wanted to balance the scales; but in doing so, my concern has been that we not further clog-up the bureaucracy or increase Federal spending by creating still another agency in the Federal bureaucracy at further expense to the taxpayers, and at greater expense of both time and money to businesses, by imposing on them still more paperwork to comply with still more regulations promulgated by still another agency of the Federal Government.

Last summer, I discussed this problem with Esther Peterson, that dedicated champion of the consumer, and suggested that the original administration bill be redrafted in accordance with the President's pledge to streamline the Federal Government by eliminating duplicating agencies, and to redraft this bill so that we could do away with all of the ineffectual consumer offices which have been operating in separate departments, agencies and bureaus of the Federal bureaucracy, and to combine them all into one single, effective agency, so as not only to reduce, but to eliminate the mountain of paperwork and filling in of forms and questionnaires now being sent out to almost every business firm across the Nation.

I am happy to report that in the substitute bill now offered by the administration, all of the objections I had to the original bill have been met. This substitute consolidates the on-line resources of 26 different programs which have been costing the taxpayers $11.6 million and bringing little real results. It replaces them with one new agency, and directs the Office of Management and Budget to cut an additional $10 million in consumer-related spending out of the budget request for fiscal year 1979, so there can actually be a savings of $7 million above the $15 million for the first year of this new agency's operation, after these scattered consumer-related offices are eliminated.

Mr. Chairman, I think President Carter and Esther Peterson have responsibly met—and met well—the objection of "more bureaucracy" by the reorganization that is proposed in this substitute, today. There have been other "strawman" arguments against the idea of a consumer agency. Most of them have been designed, it seems to me, to prevent the creation of a truly effective consumer protection agency. I think this new, substitute bill, meets these arguments too.

For example, it prevents product-testing by the agency. It limits the agency to the same discovery procedures as any other party. It prohibits the agency absolutely from using or sending out interrogatories, to be filled in at great expense of both time and money by business firms. It does not confer on the new agency any power to make rules, to set standards, to punish lawbreakers, or to compel businesses to change any of their practices.

All the bill does is to give consumers an advocate, and, the consumers need an advocate—and an effective advocate, if they are to be properly protected.

To take just one example, as important to a consumer's welfare as information on consumer interest rates clearly is, it took a lawsuit—a long, protracted and costly lawsuit—to get that disclosure. The substitute bill before us today specifically directs the Office of Consumer Representation to make interest-rate reports to the public.

I have been assured by the Small Business Administration, that after this legislation has been changed in accordance with the substitute bill now before us, small businessmen have dropped their earlier objections, and they now support the new bill.

Mr. Chairman, as a long-time consumer advocate, I am happy and shall be proud to cast my vote today for the Consumer Representation and Reorganization Act of 1978.

Mr. HORTON. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan (Mr. BROWN).

Mr. BROWN of Michigan. Mr. Chairman, the gentleman from New York (Mr. ROSENTHAL) and the gentleman from Massachusetts (Mr. DRINAN) have supported an exemption in the consumer agency bill that would exclude Labor and Agriculture Department proceedings.

This is inconsistent with their positions in the past on the importance of Agriculture Department proceedings affecting consumers and should be inconsistent with the concept of fairness mentioned by the gentleman from Connecticut (Mr. MOFFETT).

The Labor Department exemption is politically motivated and does not deserve comment, but let me talk with the Members for a moment about the agriculture exemption.

Mr. Chairman, as ranking minority member of the Commerce, Consumer, and Monetary Affairs Subcommittee, which is chaired by the gentleman from New York (Mr. ROSENTHAL) I wish to inform the Members of the House of subcommittee hearings which touched on the consumer impact of Agriculture Department decisions such as the Russian wheat sale of 1972. The hearings were held in February and March 1976, as part of the oversight of the consumer representation plans proposed by President Ford.

At that time, Ms. Carol Foreman, then Executive Director of the Consumer Federation of America and who is now Assistant Secretary of Agriculture for Food and Consumer Services spoke out on what she believed to be a serious consumer issue. She said:

(F)or example, the 1972 wheat deal had a very substantial impact on consumer prices. It's the factor most responsible for the increase. (p. 33)

Apparently, Representative ROSENTHAL and Representative DRINAN agreed with Ms. Foreman on this issue because they each closely questioned administration witnesses on this point.

Father DRINAN wanted to know how the two women in the consumer representative position at Agriculture and State were going to act in the face of possible future grain sales. He inquired as follows—

Suppose you make an investigation . . . and all groups come to the conclusion that x amount of grain should be sold to Russia and no more.

What happens now if you recommend, and let's assume this is factually correct, that only so much wheat be sold and that the State Department does not follow that?

Why should the consumers of America think they have adequate representation if that could and might happen? (p. 140)

And he asked again:

I want to know what process you have and what process the State Department has to take this broad knowledge that we have about the fantastic impact on the consumer of this sale of wheat to Russia. What right do we have to think that this information will get through you two women to the top officials and that they will understand it and maybe follow it? (p. 141)

Chairman ROSENTHAL apparently felt the question was so important that he pursued the same line of questioning with the same witnesses only a few minutes later. He asked:

If you feel that the wheat deal would cause bread prices to go up 4 cents, as it did last time, and you hear that Ms. Foreman, Mr. Nader, and everybody else is opposed to it and you are intellectually persuaded that the wheat deal, at least in terms of consumer interest, will have a negative impact, do you think you can convince Dr. Kissinger to switch signals or something like that? (p. 158)

However, these two gentlemen seem to have forgotten those hearings. Now these two supporters of consumer protection have changed their positions and concluded that Agriculture Department decisions on wheat sales are so unimportant that they should be exempted from the bill. This proposed exemption illustrates the fallacious concept on which the Consumer Protection Agency bill is based. If Mr. ROSENTHAL and Mr. DRINAN believe the Agriculture Department can be brought around to act in the public interest without the watchdog Consumer Protection Agency or Office of Consumer Representation going after it, then why cannot the other departments and executive agencies also be made to act responsibly without the unnecessary new layer of Government.

Mr. Chairman, the question is rhetorical—the answer obvious.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Michigan. I will be glad to yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I thank my colleague, the gentleman from Michigan (Mr. BROWN), for yielding.

Mr. Chairman, I have an amendment I have handed in to strike the labor exemption clause. Perhaps that would still be wise for cosmetic purposes, but I have looked carefully into the Judicial Code, which is referred to on pages 32 and 33 of the bill, and I have looked into the Labor Management Relations Act, which is also referred to. I find there is no exemption granted that the consumer agency would need to examine.

What we have not noticed and what we should be noticing—and I hope it will be incorporated in our conversation about the bill—is title I of the Labor Management Relations Act of 1947, as amended.

I have examined four sections of this labor management relations bill, and the act, in section 1 specifically, refers to the duty of the National Labor Relations Board to consider what affects commerce. The language winds up as follows:

* * * to define and proscribe practices on the part of labor and management which affect commerce and are inimical to the general welfare, and to protect the rights of the public in connection with labor disputes affecting commerce.

This section 1 remains without exemption, and the consumer agency would then be able to go before the National Labor Relations Board and urge that it consider the public welfare and issue a regulation in so doing. In 1977 this Board did issue a regulation.

It is not beyond the competence, and the consumer agency should be heard before this Board, and could be.

Mr. BROWN of Michigan. I appreciate the gentlewoman's comments. However, I trust the gentlewoman is not so politically naive as to think that the exemption that is in this legislation is not intended to be all comprehensive. And if it is not presently written as being all comprehensive, it will be made all comprehensive, and you can bet your life on that.

Mr. BROOKS. Mr. Chairman, I yield 3 minutes to the gentleman from Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. Mr. Chairman, I appreciate the courtesy of the gentleman from Texas in dealing with me on this issue. As I indicated before, I intend to offer a substitute bill. I will explain that substitute in greater detail as soon as we get into that particular issue. But I think the fundamental philosophical difference between the main bill and my bill and the bill cosponsored by the gentleman from Iowa (Mr. LEACH) is the question of centralization. First of all, the gentleman from Iowa (Mr. LEACH) and I come to the conclusion that consumers need better representation before government. But do we do it by centralizing the function or do we do it by beefing up and strengthening the decentralized function? And we opt for the latter. I believe the decentralization is much better, where expertise is there; but more than that, avoiding the concept of elitism, which is repugnant but part of the idea of a central agency. In my judgment, what will happen with a central agency is that they will take only the sexy issues, the saccharin, the seat belts, and what happens to the abundance of mundane day-to-day consumer issues, the CAB regulations affecting small-town America? All sorts of things get lost in the shuffle because you pull all of these things out and put them in a set place with a small budget and they are going to attack the biggies. I submit that is not a positive thing to do in American life.

I would like to quote from a letter from "Public Citizen," which that organization sent out in January of this year. This is justifying their position.

In the late 1960's the National Commission Product Safety reported that each year 20 million Americans were injured and 30 million died in product-related accidents. As a result, the Consumer Product Safety Commission was created. In its first four years of existence, however, it has issued only 3 formal product safety standards.

Ergo, set up a new agency to push them on issuing more Federal product safety standards.

I say that the answer is to go in the agency itself, with the effective consumer representation within, give those people some independence, and do what the gentleman from Connecticut (Mr. MOFFETT) has said and what has been done in the States of Missouri and Georgia: Set up units within Federal agencies, the public counsels that we have seen, and see some real effective consumer action at all levels take place, as opposed to the necessity of setting up a centralized unit to do this kind of thing.

Mr. Chairman, again I point out that the bill that the gentleman from Iowa (Mr. LEACH) and I are introducing, no special-interest groups are sponsoring it. By saying that no special-interest groups are sponsoring it, I mean not only special-interest business groups, but labor groups and consumer groups. I would hope that the Members of this body

would find it within their good judgment to improve consumer representation by beefing up, by improving all government as it exists, without the necessity of centralizing and formalizing this new agency.

Mr. HORTON. Mr. Chairman, I yield 3 minutes to the gentleman from Indiana (Mr. QUAYLE).

Mr. QUAYLE. Mr. Chairman, I think I have heard a number of times people in the well say that this is a controversial and very important bill, and we have received a lot of letters. I might add that I am rather unimpressed by the number of people who are participating in the debate on this very important bill that is going to be offered. In my opinion, there are many things wrong with the bill. I think it is very difficult to define points of consumer interest. I think, really, there is a tacit admission by the sponsors of this bill that the present Federal Government simply has not worked and so the answer, due to the lack of work initiative by the present Government, is to create a new agency. I think the creation of a new agency and a new bureaucracy is the fatal flaw of this particular piece of legislation. As the President, and I am sure, many Members of Congress, campaigned against big business, big labor, and against big government, we all talked about reforming the Federal Government. In reform of the Government, I feel our constituents and consumers had in mind less government and not more government.

I think that the Washington Post editorial this morning was very accurate in talking about the fact that this is not really the proper way to go about it. The fatal flaw that I talk about, in the creation of the Consumer Protection Agency, I think has been discerned by the consumers themselves.

Mr. Chairman, if we go back and look at the vote on this Consumer Protection Agency, in the 92d Congress the vote was 334 to 44. In the 93d Congress it was 293 to 94. In the 94th Congress it was 208 to 199.

I would say, Mr. Chairman, that there is a definite message that the Members of Congress have received on this particular legislation.

In defining consumer interests, it has been mentioned before that there is a question as to whether the consumer advocates represent and talk about the real interests of the consumers. I think that this is a basic philosophical disagreement.

The CHAIRMAN. The time of the gentleman from Indiana (Mr. QUAYLE) has expired.

Mr. HORTON. Mr. Chairman, I yield an additional 30 seconds to the gentleman from Indiana.

Mr. QUAYLE. As I was saying, Mr. Chairman, I think there is a basic disagreement because consumer advocates would favor the ban on saccharin, and consumer advocates would favor airbags in cars. However, the majority of the consumers, our constituents, would not favor these things.

Consequently, Mr. Chairman, I just wish that perhaps the consumers, by some referendum, could vote on this particular bill. I think it would be overwhelmingly defeated; and I hope that both the substitute and the final bill are defeated.

Mr. BROOKS. Mr. Chairman, I yield 4 minutes to the distinguished gentleman from Georgia (Mr. LEVITAS).

Mr. LEVITAS. Mr. Chairman, I would like to thank the distinguished gentleman from Texas (Mr. BROOKS), the chairman of our committee, for yielding me this time.

I want to say that in the handling of this legislation he has been extremely fair and has permitted all of us who have had differing views to express our positions on this bill.

Mr. Chairman, in many ways I agree with the gentleman from Texas (Mr. BROOKS) and with my colleague, the gentleman from New York (Mr. ROSENTHAL). The American consumer does need better and more effective consumer representation, both at the Federal and at the State level; and the American consumer does need a better and a louder voice in the legislative process.

As a consumer, and as the representative of nearly half a million consumers, I strongly favor consumer protection. Also as a consumer and the representative of those half million other consumers, I do not favor more government. I do not believe that these two statements are contradictory. To the contrary, experience has shown us that more government does not provide better protection; in fact, it is just the opposite.

The proponents of this bill and the substitute offered by the gentleman from Texas (Mr. BROOKS) have made their basic point in explaining the need for this agency, that other Government agencies, originally designed to protect the "public interest," a term as nebulous and as difficult to define as "consumer interest," have been "captured" by the very industries they are supposed to regulate. They have given us histories of agency after agency which has become cozy with those they are supposed to regulate. What makes them believe that this brand new executive agency would be any different? Why will these new bureaucrats be any different from the others? And, my friends, if there's anything this country does not need, it is more bureaucrats.

Both the bill and the substitute do not achieve any of the lofty goals of better consumer representation so loudly proclaimed by the proponents. These measures do more and they do less. They do more because they create a new agency complete with new bureaucrats. They do less because they create not one iota more of protection for the consumers of this country.

Why do we need a new agency in Government to get the existing agencies to do what they are already supposed to be doing? If they are not, fire the laggards. Or let the President and Congress make the agencies do their appointed jobs.

We now have a President who has openly stated his support for strong consumer protection. He has recommended sweeping changes in the ways in which executive branch employees conduct themselves. He has promised reorganization and better performance of the regulatory agencies. This is the way to improve consumer protection and not by passing a bill which sets up a new agency within the executive branch. Such a structure is bizarre and would create a circuslike atmosphere in Government.

Can we expect the public to understand why one agency of the President's administration is suing another agency in the same administration to get it to do what the President wanted it to do in the first place?

This bill condemns both the President and the Congress. It says that the President is incapable of directing the executive branch to represent the consuming public, and it says that Congress cannot succeed in effective oversight of the bureaucracy—but that a new bureaucracy can succeed. Is that credible?

If the Food and Drug Administration, the National Highway Traffic Safety Agency, the Environmental Protection Agency, the Consumer Product Safety Commission, and others are not already consumer agencies, what are they?

If new funds and programs for existing agencies, such as the FTC Improvements Act of 1974, the Hart-Scott-Rodino Antitrust Improvements of 1977, the Toxic Substances Control Act of 1976, and the FDA Medical Devices Amendments of 1976 are not better consumer protection, what are they? What does this brandnew agency add? Nothing.

There are far more effective, direct, simple and inexpensive ways to insure that existing agencies do their jobs than the creation of a new agency. In these circumstances, creating a brandnew executive agency is an abdication of the responsibility of the President, Congress, and the many consumer protection agencies to discharge taxpayer trust.

I agree that there is a problem, but I disagree with this proposed solution. There are other means of accomplishing the legitimate purposes of consumer representation. For example, strengthen present laws affording remedies to aggrieved consumers. I supported the class action remedy in the recent Federal Trade Commission improvement amendments. Furthermore, Congress could do a better job of oversight—prodding agencies to do what they are supposed to be doing in behalf of the consumer in the first place.

This brandnew agency has not yet been established and it has already raised more questions than it will ever answer. Primarily, how will this agency of lawyer-bureaucrats determine the "real" consumer interest when there are conflicts? Some self-styled consumer advocates want saccharin taken off the market immediately, but consumers with concerns ranging from those as serious as heart trouble and diabetes to people who just worry about their weight firmly believe that it is in their best interests to be able to continue to use saccharin. How does the consumer advocate decide where the consumers' interests lie? Which prevails?

All consumers believe that it is in their best interests to pay a reasonable price for essentials; it is a major concern. Yet,

this bill exempts the agricultural sector of our economy from intervention of this new, so-called Office of Consumer Representation. What about the consumer's interest in milk, bread, and other prices?

Additional tariffs on imported goods will raise the prices of such goods substantially, putting the burden on the consumer who has to pay for them. This new agency will not be able to intervene on behalf of its self-proclaimed constituency, the consumers.

Are we developing an agency here with built-in biases? Are the interests of the agri-business or certain domestic industries more in line with the Office of Consumer Representation's definition of "consumer interests" than the pocketbooks of the consumers they are purporting to protect?

Why would anyone think that a brandnew executive agency is better able to determine the "public interest" than the 535 people elected to represent these consumers? And when there are conflicting opinions on "consumer interests," is not Congress the national forum for working out these differences? Who can seriously believe that a brandnew, $15 million budgeted agency of sheltered bureaucrats is better able to take the pulse of the Nation?

Let us look at this legislation for a moment. You have been told that the legislation does not give the Office of Consumer Representation the power to serve interrogatories and issue subpenas. You have been told that, and if you believe that, then you still believe in the tooth fairy; because let me tell you what this bill does. The Administrator of the office may not be able to sign his own name to that subpena, but as a matter of right he can go to the Government agency in question and use the power of that agency to issue the subpena or interrogatory; and the agency—in the words of the bill—shall issue such paper.

There is a very real need for consumer protection, and I have consistently voted for and supported consumer interests as vigorously as possible. The people across America want and need—and deserve—effective, meaningful consumer protection, but they are equally clear about not wanting another brandnew executive agency. We need less Government—not more Government. At a time when we have a President who wants to make Government smaller and restrict the number of agencies, it is inconsistent to advocate this establishment of a brandnew executive branch agency.

At a time when we have a President who wants to eliminate the overlap and duplication of functions in various agencies, it seems absurd to advocate a new executive agency whose real function is not to provide one iota of new consumer protection but whose purpose is to get existing agencies to do what they are already supposed to do.

This new agency and this bill, by their very names, are deceiving the American public into believing that this agency will handle their consumer complaints. But this agency will not really deal with the individual consumer's complaint about broken toasters or cars that turn out to be lemons. It will not intercede with the company selling defective vacuum sweepers and it will not get your picture tube replaced. And this is precisely the kind of help and protection the consumer wants; he does not want another brandnew agency to duplicate the efforts of countless other consumer programs in countless other agencies at the State and Federal levels. Strong, vigorous enforcement of the statutes we have to protect consumers by strong, forceful and well-directed regulatory agencies, doing the job they were designed to do, is what is needed and desirable.

To do less is to break faith with the electorate. To add more Government on top of an already precariously overburdened structure is to create another problem, not find a solution.

The American public is hungry for new approaches, new solutions, and new directions in solving our Nation's problems. We must find innovative ways of handling the problems of the current times, including the inadequate representation of the consumer interest in the Federal Establishment. We need not be afraid to lead—to strike out on a new course of action—and we must begin by turning down this ill-conceived piece of legislation which is before us today. While being committed to the goal of consumer representation, we must break away from the old idea that we must create a new agency to solve a problem. Creating new agencies will not in and of itself solve problems. Let the defeat of this legislation be the symbolic end of an era in which we created agencies to solve problems. Do not abandon the goals, do not forsake basic beliefs and ideals, but do find new approaches and methods to achieve goals and implement solutions. This Office of Consumer Representation is nothing more than a monument to man's ego. It is an idea whose time has come and passed and is now gone.

Mr. HORTON. Mr. Chairman, I yield 3 minutes to the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Chairman, I rise in support of H.R. 9718, the substitute for H.R. 6805.

When the original committee bill, H.R. 6805, was reported, I was one of the many Members who voiced objections to it. My objections were sincerely rooted enough to lead me to cosponsor and support the substitute bill, authored by my good friend and distinguished colleague from California (Mr. MCCLOSKEY).

Yes, I was a target of the misguided "nickel brigade." I received over 800 nickels. I want to make it very clear that those nickels had anything but their intended effect on my thinking. The postcards they were attached to in no way addressed my objections to the original bill. As a matter of fact, I began to suspect that there was more wrong with the bill than I first thought, because certain proponents were resorting to such a cheap gimmick to push it through.

I returned all of the nickels and I explained to the senders why I could not endorse H.R. 6805 and why I preferred the McCloskey substitute. I also stated that I was hopeful that the committee bill could be reworked to satisfy the objections of supporters of the McCloskey substitute, as well as other objections that had been voiced in committee, on this floor, and in the press.

I am pleased, Mr. Chairman, that key people on the committee and in the administration saw the futility of trying to overcome legitimate objectives with a gimmick like the nickel brigade. Eventually they came to realize that we were not being obstructionists, that we shared their desire for a body to represent consumer interests within the Federal establishment, but that we could not support the establishment of a token agency that would have sown into it the seeds of is own destruction.

Eventually, people come to realize that a bill purporting to establish an effective consumer representative must address the problems of Government reorganization, avoidance of duplication, the possibility of arbitrary and capricious action resulting from unequal access to remedies, and the fear of the unknown shared by the business sector—especially the small business community.

I will not take the time to repeat what others have said in explaining this new version. But I do want to say that I have given careful consideration to the substitute bill before us. I believe it can provide effective consumer representation without placing an unduly heavy burden on the business sector.

There is still, in my opinion, a glaring defect in the bill. I refer to the exemption for agricultural issues. For reasons I will explain later, during the reading for amendments, I will support the effort to remove this exemption. But, with a few exceptions, I think H.R. 9718 is a good bill, one that deserves our support.

In closing, Mr. Chairman, I would like to commend the members of the Committee on Government Operations, the chairman from Texas (Mr. HIGHTOWER), ranking member who worked hard to put this substitute together and bring it to the floor. I would also like to commend Esther Peterson and her staff for the work they did in forging this substitute. I think these people made a very sincere and honest effort to admit the defects in the bill they first endorsed and they certainly made a good faith effort to work with us in correcting those defects. The result is a greatly improved bill—one that deserves enactment.

Mr. BROOKS. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Pennsylvania (Mr. KOSTMAYER).

Mr. KOSTMAYER. Mr. Chairman, I would like to say first, in replying to something which the gentleman from Indiana (Mr. QUAYLE) said, that indeed the people of this country do favor this legislation. In fact, every public opinion poll indicates that they do strongly favor the legislation. Mr. Chairman, in mid-1976 the Federal Energy Administration removed price and allocation controls from home heating oil, assuring the public the cost would rise only by 2 to 3 cents per gallon, but in fact it rose more than twice that and cost consumers over $800 million extra a year.

Mr. Chairman, every year leukemia and other forms of cancer and serious genetic disorders are developed by 22,000 Americans, due to various forms of radia-

tion, and yet the EPA's radiation program has failed to issue a single standard that is currently being enforced.

These examples clarify the need for this legislation. I think we have compromised and compromised and compromised. And I say this to the Members of the majority, the Members of my own party: This legislation was promised by the Democratic platform to the people of this country. And it is to our party that the people look for protection of the public interest. Those who are will be turning our backs on those who are not represented, who do not have the money to pay for the lobbyist or for the lawyers or for the special interest groups to represent their interest in Washington they look to this party and to this legislation to speak for them.

I think if we reject this legislation we will be turning our backs on those who look to us for help. I hope we will pass the bill and ignore the lobbying efforts of the special interests who have tried so hard to destroy this legislation.

Mr. BAUMAN. Mr. Chairman, will the gentleman yield?

Mr. KOSTMAYER. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Chairman, I listened carefully, and the gentleman is not saying, that if we do not pass this legislation, people are going to die of cancer; is he? And that is the implication of one of the gentleman's remarks.

Mr. KOSTMAYER. I think if we do not pass this legislation, the people of this country will continue to be unknowingly subjected to the dangers of cancer.

Mr. HORTON. I yield such time as he may consume to the gentleman from Virginia (Mr. ROBINSON).

Mr. ROBINSON. Mr. Chairman, John Dos Passos once observed that—

> Today's vested interest is government. Where in my day we used to wisecrack that the colleges were geared to turn out football players and bond salesmen, today you could say that they turn out football players and bureaucrats.

Certainly, nothing seems more illustrative of Dos Passos' observation than the so-called consumer protection legislation under consideration today, H.R. 9718. This much renamed bill would do little to aid consumers. It would only aid out-of-work lawyers and appease bureaucratic zealots in the Ralph Nader mold.

We have been told that the latest version is a meek, modest shadow of its earlier, fire-eating model. The Office of Consumer Representation would merely consolidate and reorganize the 20-odd agencies and bureaus concerned with consumer affairs, its proponents claim.

However, a careful review of this proposal indicates that it would still give the OCR inordinate powers, would increase governmental costs, and would provide a foot-in-the door to those whose chief delight is frustrating governmental decisionmaking as well as crippling private enterprise.

In some respects, the OCR's power to seek judicial review of Federal agency actions seem even broader than in the earlier version, H.R. 6805. The OCR retains the same unique powers previously granted to the Agency for Consumer Protection to intervene as a matter of right, as a dual prosecutor, in any nonpenalty agency enforcement action.

Many organizations that have examined H.R. 9718 sharply dispute its proponents' contention that the OCR would have no greater rights than any business entity to use a host agency's subpena powers to obtain various kinds of information. It would, indeed, be able to do so, and its authority to demand information from other Government agencies remains intact, with few exceptions.

It would still authorize the OCR to intervene in any Federal agency and court proceedings which substantially affect consumer interests, or to request such proceedings. It would still duplicate existing product testing and research activities. It would still exempt organized labor from coverage.

H.R. 9718 would authorize $15 million for fiscal year 1978 to create this new independent agency. As the Washington Star pointed out last October—

> Once in operation, it probably would just grow and grow, in size and authority and budget, as most other government agencies have.

I share the Star's belief about this controversial proposed new entity:

> Foisting a costly new agency off on the taxpayers is not likely to win friends, even if it is done in the name of consumerism.

Mr. HORTON. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Chairman, the Consumer Protection Agency idea has returned. It has undergone some cosmetic changes since the last time we saw it, but beneath the putty nose, fright-wig, and dark glasses there lurks the same old protection idea. It might be said that it is masquerading under a false name, but that is nothing new around here. Most bills that come before us have names that have little or nothing to do with their substance.

The American people are once again being told they need protection and they are going to get protection whether they want it or not. Those of us in Congress who serve the American people are told that we must buy this protection in the form of something called the Consumer Representation and Reorganization Act of 1977 (OCR).

This is one of those ideas which, if it were not so serious, would be hilarious. Consider the history of the consumer protection idea as it has been outlined by Mr. Ralph Bennett in Reader's Digest—

> OCR backers like Nader and Presidential consumer-affairs adviser Esther Peterson nevertheless continue to press for the agency's creation. Back in 1971, the 92nd Congress was just seizing consumerism as a solid voter issue when the House of Representatives passed a consumer-agency bill by an overwhelming vote of 344 to 44. In the 93rd Congress, the vote for an OCR was 293 to 94. When the 94th Congress voted on the measure in 1975, opposition in the House had grown to the point that it was barely approved, 208 to 199. Although the Senate had also passed the bill, certainty of a Presidential veto torpedoed it.

In the first session of this Congress, Mr. Chairman, the idea was so discredited, that despite the firm support of the President and Ralph Nader—it is becoming difficult to tell them apart in terms of unswerving conviction in their own righteousness—the bill cleared committee by one vote and failed to reach the floor of either chamber for a showdown vote. So much for popular support.

Mr. Chairman. I have read or heard all of the arguments in favor of OCR. Despite what its supporters say, this organization would be most powerful. It would have indirect power to subpena records from businesses. We are told it would have the power to represent the interests of small business as consumers of regulated goods and services. This sounds great.

I can see it now—big brother as pal of the small businessman—tears come to ones eyes as we imagine the touching scene of a Federal bureaucrat with his friendly arm around the shoulder of a small businessman. Well, when it comes to small business, OCR would represent the interests of small business only when the latter's interests are "consistent with those of consumers." In short, if some bureaucrat decides that small business is somehow not worthy of OCR support there is not a thing in the world small business can do about it, except to get ready to take it on the chin.

OCR would have the authority to require that all other Federal agencies allow OCR to use their budgets to conduct product testing. That is like allowing Dr. Frankenstein the right to putter around in your laboratory.

We have here simply another case of bureaucratic empire building. It is said that one of the victims of the French Revolution's reign of terror went to the guillotine saying: "Oh liberty, what crimes are committed in thy name."

Looking at the OCR, we might paraphrase it this way: "Oh, consumer protection, what bureaucratic follies will be committed in thy name."

All of this convinces me that I have to vote against this bill. But there is another good reason and that is—arrogance.

I just cannot fathom the incredible arrogance of the self-styled consumerists who say they alone know what consumers want and need. By what right do they claim such omnipotence.

It sounds good to tell people that this new OCR will represent the consumer. But will the consumer be able to tell OCR how to represent his best interests as he sees them? Will OCR take surveys of consumer desires before starting the bureaucratic machinery going?

At present we have 20 Federal agencies with consumer offices. We are told they are not working well. If that is true, what makes anyone think a new superagency like OCR will work any better?

Mr. Chairman, may I remind you that over 10 years ago, during the glory days of the Great Society, we played this act, with a slightly different script? In those days it was the war on poverty that was being pushed. One had to accept the majority's programs or be labeled as being against the poor. Well, we now know

the results of that multibillion dollar program.

The New York Times, February 3, 1978 said:

> This program is marred by waste, feuding . . . political empire building, patronage abuse and corruption. The Mayor of New York City, a certified liberal Democrat refers to "poverty pimps" who take the federal money and leave none for the poor. The article tells of "hundreds of millions of dollars" of anti-poverty funds that have been spent with almost no control over whether the money was properly used.

That is what you gave the people with your big war on poverty. Big words, great rhetoric about how much the majority cared. And what did the poor get?

The poor got it in the neck.

Yet the same people who brought us that program which even Ed Koch and Herman Badillo now admit is a disgrace, ask us to enact yet another turkey that will supposedly help all consumers.

Mr. Chairman, if the OCR does for consumers what the war on poverty did to the poor we will have a Nation of overregulated citizens yearning for the good old days when they didn't have all this high-priced "protection."

This bill will not save any one of us a dime, despite the claims put forth by its adherents. It is the son of the Great Society. Like father, like son.

Let us vote down this bill and do so in the name of the consumer. He and she deserve something more than yet another layer of governmental bureaucracy.

Mr. BROOKS. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. WAXMAN).

Mr. WAXMAN. Mr. Chairman, I am pleased to add my voice to those in support of H.R. 9718, the Consumer Representation and Reorganization Act of 1977.

I want to commend the distinguished committee chairman, Mr. BROOKS, as well as the gentleman from New York (Mr. ROSENTHAL) for their steadfast efforts to see this much needed legislation enacted into law.

The Consumer Representation and Reorganization Act of 1977 creates a small, nonregulatory agency within the executive branch to represent consumers before Federal agencies. The Office of Consumer Representation (OCR) would be empowered to participate in formal and informal regulatory proceedings as well as seek judicial review of agency decisions which substantially affect consumer interests. Further, the OCR would be authorized to provide information to the public about consumer products and to serve as a clearinghouse for consumer complaints. By increasing the extent of knowledge available to Federal regulators, the OCR would restore balance and perspective to a regulatory process long dominated by special interests.

The need for greater consumer representation in Government has been recognized for many years. As early as 1959, the late Senator Estes Kefauver sponsored legislation to secure within the Federal Government effective representation for the economic interests of consumers. Senator Kefauver referred to the American consumer as the "forgotten man in our Government structure."

Eighteen years have passed since Senator Kefauver introduced legislation creating a Department of Consumers. While the consumer movement has grown substantially during this period, the representation of consumer interests before the numerous Federal agencies and departments has remained inadequate.

Since my election to Congress, over 3 years ago, I have been increasingly troubled by the frustration of individual citizens in their efforts to obtain access to the decisionmaking processes of Government. It is all too often the case that decisions which affect the health, safety, and pocketbook of individual Americans are dictated by the wealthy and powerful interests of the business community. One cannot but conclude that the average homeowner, consumer, or small businessman is not represented in Washington. Recent opinion polls confirm the public's concern about the influence of big business on Government. A national poll, conducted by the Louis Harris organization at the request of the Sentry Insurance Co., found that there is pervasive public unrest at the insensitivity to consumer needs. They believe that the consumer is the forgotton man of Government.

President Carter recognizes the need for a greater consumer voice in Government. The President has made the creation of the Office of Consumer Representation one of his highest legislative priorities. In a statement delivered at the 10th annual convention of the Consumer Federation of America, the President wrote:

> The creation of an Office of Consumer Representation is long overdue. The establishment of this office will help assure the fair treatment of the individuals you represent—the consumers—the buyers and users of goods and services. The OCR will help us bring the voice, the needs and the wants of the consumer into the decision-making processes of our federal government. This voice has been silent too long.

Indeed, Mr. Chairman, the consumer voice has been silent too long. It is rarely heard in the regulatory chambers and proceedings of Government.

CONSUMER REPRESENTATION INADEQUATE

Each week Federal agencies issue hundreds of pages of regulations which substantially influence the price of food, the quality of drugs and the competitiveness of the marketplace. According to a July 1977 report by the Senate Government Operations Committee, the consumer interest is represented in less than half of all regulatory proceedings. It is all too often the case that regulatory decisions are developed in an environment where only those with the money and power participate. Regulated industries overwhelmingly dominate participation in Federal regulatory proceedings.

During 1976, trunk airlines spent over $2.8 million on outside counsel to represent them in proceedings before the Civil Aeronautics Board (CAB). In the same year, the Aviation Consumer Action Group, the principal public interest group working on CAB matters, was limited by a budget of $40,000.

Participation in just one regulatory proceeding can cost as much as $20,000. Such costs make participation by individual consumers or public interest groups prohibitive in most cases. Industry, however, is not under such price constraints. Their efforts to influence Federal regulators are tax deductible. The higher costs are merely passed on to consumers in the form of higher prices. Given the predominance of industry representation in regulatory proceedings, it is not surprising that agencies become captives of the industry they are charged by law to regulate.

Such relationships encourage agency decisions which favor special interests and often ignore a competing public interest. Since regulatory agencies act in a quasi-judicial capacity, it is essential that both sides to an issue be represented. Clearly the interests of the airline passenger are sufficiently different from the airline carrier to justify their equal representation before the regulatory bodies responsible for the fairness of ticket prices and the safety of aircraft design. The OCR will not guarantee that the consumer point of view will always win. It would, however, insure that a consumer viewpoint would be heard when decisions are made.

Were the OCR already in operation, there are several notable instances where it would have protected the consumer health and safety. The failure of agencies to give the consumer viewpoint adequate representation has resulted in the loss of thousands of lives and countless numbers of injuries.

In 1972, a DC–10 passenger plane was involved in a near fatal crash. Federal Aviation Administration (FAA) inspectors discovered that the plane's cargo door was at fault. In deliberations not subject to public scrutiny, the manufacturer urged the FAA to make the correction permissive rather than mandatory. FAA agreed, and as a result, modifications were not made on all DC–10's. In March 1974, a DC–10 crashed near Paris killing 344 people. The plane's cargo door had not been modified. The FAA believed that the faulty door caused the crash.

A great number of airplane crashes worldwide are caused by what is referred to as "controlled flight into terrain." In 1972 and 1975, 20 aircraft and 1,200 lives were lost due to such crashes. A warning device can prevent such accidents. Yet it was not until a December 1974 crash of a TWA 727 just outside Washington's Dulles Airport that the FAA decided to take action to require use of this device. As of December 1976, all planes are required to have this warning device.

The OCR might have worked for installation of an adequate device several years earlier, and perhaps hundreds of lives would have been saved.

About 7,000 skilled nursing homes receive HEW medicare and medicaid funds. A recent GAO audit of 32 of these homes found that 23, or 72 percent, had one or more deficiencies with respect to fire safety regulations. HEW has failed to enforce the fire safety standards of these homes and has unnecessarily jeopardized

the safety of residents. The Office of Consumer Representation could have prodded that agency to move more swiftly to end these abuses.

CLEARINGHOUSE FOR CONSUMER COMPLAINTS

In addition to representing consumer interests in regulatory proceedings, the OCR would play a direct and personal role in helping consumers who have complaints about consumer products, elicit assistance from Government agencies, and serve as a clearinghouse for consumer complaints.

Studies conducted by both the Ford and Carter administrations concluded that the consumer complaint offices within Federal agencies currently do more to delay, refer, and bury consumer complaints than they do to encourage greater agency attention to the real problems faced by individual citizens. The OCR would insure that consumer complaints were answered and that agencies gave higher priority to the concerns of individual consumers.

FEARS ABOUT OCR UNWARRANTED

A great deal of misinformation has been generated about this legislation by those who are jealously guarding their present dominance over the regulatory agencies. Their claims are groundless. The legislation currently before the House is the culmination of years of congressional scrutiny and debate. This bill has been meticulously drafted to provide safeguards sufficient to represent the interests of consumers and small business while fairly protecting the legitimate rights of big business.

Unlike any agency previously created by Congress, the Office of Consumer Representation is nonregulatory. It cannot issue regulations, require permits, overrule an agency decision, or otherwise alter existing business practices. Its only authority and responsibility is to participate in a limited number of agency proceedings representing the public in their role as consumers.

The OCR's sole function is to serve as an advocate for consumers before Federal regulatory agencies. The participation in agency proceedings and the seeking of judicial review is not a special privilege being accorded one group at the expense of another. Participating in regulatory proceedings and seeking judicial review of agency decisions is already a right guaranteed and fully exercised by the business community. The Office of Consumer Representation would simply insure that representations of consumers were placed on an equal footing with that of business.

Some critics have persisted in characterizing the OCR as a super agency which will add another layer of bureaucracy to the already red tape burdened small businessman. As a matter of fact, it is in the interest of the small businessman that such an office of consumer representation be established. Small businessmen are concerned about regulatory actions which grant inflationary price increases or place further restrictions on their ability to compete with the larger, more influential companies. One of OCR's highest priorities will be the elimination of unnecessary regulations and the opening up of the marketplace to free and vigorous competition.

Mr. Chairman, one of the more unusual objections to the creation of the OCR is the contention by some that the consumer interest cannot be distinguished from the corporate interest. I find this argument curious and self-serving. The interest of the homeowner in New England, faced with a cold winter and rising heating bills, is significantly different from the major oil company whose interest is in higher prices and higher profits. The small businessman interested in starting an independent bus line has an interest significantly different from that of the major national bus line, which is concerned about preserving its monopoly on passenger service and pricing. In most cases dealing with economic regulation, health, safety, and false advertising, the consumer interest is both apparent and uniform.

In those few instances, such as the recent saccharine controversy, when there may be more than one major consumer interest, the OCR would be responsible for determining whether all those interests were adequately represented. If so, the OCR need not advocate any specific viewpoint. Rather, the OCR could simply make sure the decisionmaker was aware of the other consumer interests.

As the budget of the OCR is limited, it will be necessary for the Administrator to use discretion and good judgment in selecting those cases in which the consumer viewpoint is most in need of representation.

THE OCR WILL REDUCE GOVERNMENT SPENDING

Mr. Chairman, one of the most promising aspects of this legislation is that, in addition to making Government regulations more effective, I believe it will actually reduce Government spending. Creation of the OCR will result in the elimination of 26 existing, but wholly ineffective, consumer offices. By transferring the resources of these 26 consumer programs to the new OCR and requiring the OMB to cut an additional $10 million in consumer-related spending from the fiscal 1979 budget request, total Federal spending will be reduced by $6.6 million. The new agency's entire $15 million budget would cost each taxpayer a mere nickel.

The OCR would not be another costly new agency. The OCR will actually save taxpayers money.

STATE CONSUMER ADVOCACY OFFICES

The potential success of the OCR is best demonstrated by a brief review of the successful State experience. Currently, 25 States have consumer advocacy offices similar in concept and purpose to the proposed Office of Consumer Representation. These offices have the power to intervene before the State regulatory commissions and seek judicial review of decisions harmful to consumers. In each case, their powers have been exercised without disrupting the State's administrative or judicial system.

In Florida, the Office of Public Counsel's intervention before the Florida Public Service Commission resulted in utility rate increases almost $21 million less than requested. In Georgia, the consumers' utility counsel achieved rate reductions of almost $95 million. The Public Advocate's Office in New Jersey has achieved savings of almost $1 billion.

In each case, the consumer advocate offices achieved consumer savings dramatically greater than their annual operating budgets. The potential savings at the Federal level are enormous. Over the last 4 years, the Federal Energy Regulatory Commission (formerly the FPC) has awarded natural gas and electric rate increases totaling $10 billion. During the same period, the Federal Communications Commission granted rate increases to A.T. & T. and Western Union which totaled almost $100 million. General freight rate increases granted by the Interstate Commerce Commission between 1974 and 1976 totaled $9.5 billion. Consumers were rarely represented in any of these proceedings. Obviously, there is an important, unfulfilled role for the OCR to play. The potential consumer savings far exceeds the initial $15 million budget of the advocacy agency.

CONCLUSION

The need for the OCR is twofold. Most importantly, the OCR will restore objectivity to the regulatory process. Federal agencies were originally created to act as impartial forums in which competing claims could be heard and balanced. By insuring that the views of consumers are heard in regulatory proceedings, the OCR would strengthen the agency's role as a mediator in the regulatory process.

Consumers do not need bigger Government or more regulations to protect their interests. What they need is a Government responsive to their needs. Government regulations which reflect the concerns of both consumers, small businessmen as well as corporations would go far to restore public faith in our regulatory process.

Second, the OCR will restore consumer confidence in the business community. Consumer confidence is essential to encourage a healthy and prosperous business environment. Over 100 corporations and businesses have worked arduously to achieve passage of this advocacy legislation. These businessmen recognize that the OCR will represent not only the interests of consumers but the interests of business to operate in a competitive marketplace devoid of unscrupulous business practices.

OCR intervention in regulatory proceedings would encourage free competition and eliminate unfair business practices. By restoring public confidence in the business community and by streamlining Government regulations, both consumers and business will benefit. No businessman should be unhappy about an improvement in consumer attitudes toward the market, and the role of Government in insuring its fair operation.

The time has come for Congress to choose between support of a one-sided and expensive system, which encourages regulations tailored to special interests, and a regulatory system conducive to equity and fairness. Given the assurance

that consumer interests will be consistently and duly considered, consumers will have additional grounds for confidence in the fairness and soundness of Government decisions which affect not only our pocketbook but our health and safety as well.

I am not satisfied with the way consumers are treated by regulatory agencies and I urge my colleagues to support passage of this much deserved legislation.

Mr. HORTON. Mr. Chairman, I yield 2 minutes to the gentleman from Maryland (Mr. STEERS).

Mr. STEERS. Mr. Chairman, I rise in support of this legislation, but I want to concentrate my time on the editorial in The Washington Post. The thrust of that editorial was that we should depend on the regulatory agencies to reform themselves. Leaving aside the somewhat visionary hope implicit in that assumption, I would point out that even if the regulatory agencies did their job totally, there would, nevertheless, be the need for consumer advocacy. That is because the regulatory agencies do not purport to be advocates; they purport to be quasi-judicial. And, frankly, so do we Members of Congress. Like regulatory bodies, we have to compose differing interests and conflicting objectives.

We have in Maryland an example. We have the Public Service Commission playing the regulatory role. In addition, we have a body called the People's Counsel, and that is the consumer's advocate. Those who are now referring approvingly to the Post usually refer to the Post in unprintable terms. I think the Post is prestigious. I read it regularly. I was endorsed by it. But I certainly oppose its point of view, and I think that my position during my campaign is the correct one.

We do not need somebody who can listen to the arguments on both sides; we need somebody who can support the point of view of the consumer, an advocate before the regulatory tribunal.

Mr. BAUMAN. Mr. Chairman, will my colleague, the gentleman from Maryland, yield?

Mr. STEERS. I yield to the gentleman from Maryland.

Mr. BAUMAN. I thank the gentleman for yielding.

I was just wondering which time the gentleman from Maryland thought the Post was editorially mistaken. Which of the two times the gentleman mentioned regarding its editorial stand did he think was mistaken?

Mr. STEERS. I think this morning's editorial was in error. The editorial endorsing me was a model of perspicacity and discernment.

Mr. BAUMAN. I just want the record to be very clear on that point.

Mr. STEERS. I thank my colleague.

Mr. BROOKS. Mr. Chairman, I yield such time as he may consume to the gentleman from Iowa (Mr. BLOUIN).

Mr. BLOUIN. Mr. Chairman, it is difficult to argue that the American consumer does not need a more effective voice in Federal Government decisionmaking or assistance in dealing with a bloated Federal bureaucracy.

However, as a member of the House Government Operations Committee, I was deeply concerned that the originally introduced bill (H.R. 6805) to create an agency for consumer protection overlooked a number of important considerations. I am pleased that most of my reservations have been addressed in the substitute bill (H.R. 9718).

The original bill had overlooked the plight of the American farmer and the small businessperson and sought to impose additional hardships on them in the form of an increase in burdensome paperwork. H.R. 6805 would have allowed the new "Administrator to issue written interrogatories or requests for reports and other related information to any person engaged in trade, business, or industry which substantially affects interstate commerce." Even though the originally drafted bill did exempt small businesses that did not have assets exceeding $1 million or that had an equivalent of 25 fulltime empoyees, it did not include "family farming operations" in its definition. I, therefore, introduced an amendment in full committee which corrected this inequity and which raised the total asset figure to $5 million.

The committee sided with my position that the small businessman and small farmer should not have additional bureaucratic hardships placed upon them and adopted this amendment.

Another concern of mine was answered in the adoption of my amendment that placed a 5-year "sunset" provision on this proposed new agency, limiting it's life unless it could justify to the Congress its effectiveness as an efficient agency. Opponents of this type of legislation consistently argue that if you want to abolish a Federal agency all you have to do is vote not to fund it when it is considered during the legislative appropriation process. Critics, however, have rightly stated that once you create a new governmental body it is almost impossible to dismantle it. It is for this reason that I insisted that if, in fact, this agency came into being that the people of this country would have more than "assurances" that any new agency would truly carry out in a prudent and economical fashion the public's interest.

The supporters of the new version have had the wisdom to completely eliminate the Administrator's authority to issue written interrogatives, as well as to mandate that the existing 26 Federal consumer agencies be transferred to the Office of Consumer Representation. Moreover, H.R. 9718 still contains the mandatory "sunset" provision that I authored in the Government Operations Committee.

Unfortunately, my greatest disappointment during the committee's consideration of H.R. 6805—and continues to be with H.R. 9718—was the fact that my amendment to exempt USDA import/export policy from the purview of this new agency was narrowly defeated.

Domestic producers—American farmers—are quite naturally dependent on stable and constant markets. The economics of farming are such that once an individual farmer has made crop decisions for a year he cannot suddenly change. He cannot decide one month after planting soybeans that corn would have been a better crop, and then suddenly shift priorities.

The original H.R. 6805, as well as the substitute (H.R. 9718) the House will consider, does not exempt agricultural import/export policies or the associated functions performed by the Department of Commerce under the Export Administration Act of 1969 as it relates to agricultural commodities from the jurisdiction of the proposed Office of Consumer Representation. Therefore, as the bill stands, this agency could intervene in agricultural import/export policy decisions of this country. That possibility obviously adds to the uncertainty and instability of agricultural trade, both for farmers and for foreign consumers, and creates very serious problems for those of us who are otherwise more kindly disposed toward the concept that consumers need to have a stronger and more effective voice in the affairs of their Government.

I reject the argument that such an agency needs the power to intervene in agricultural import/export trade in order to protect American consumers from American farmers. It presumes, first of all, that American farmers are not primarily interested in producing for the domestic market, and it presumes that foreign sales will produce scarcities—or unnaturally high prices—at home. Neither presumption is accurate.

In fact, the possibility that the proposed Office of Consumer Representation might actually intervene in agricultural import/export trade will only discourage American farmers from producing surplus commodities for foreign sales, but at the same time will encourage foreign buyers to find alternative suppliers in other countries. In my opinion, neither development is conducive to good economic policy at home or constructive international trade policies abroad.

It is for these aforementioned reasons, therefore, that I am offering this amendment to exempt USDA import/export policy to include those functions performed by the Department of Commerce vis-a-vis the Export Administration Act of 1969 as it relates to agricultural commodities from the purview of the Office of Consumer Representation.

Mr. Chairman, as I have consistently stated since this bill passed out of committee, I cannot support either H.R. 6805 or H.R. 9718 unless my amendment to exempt USDA import/export policy (to include any agency proceeding under the Export Administration Act of 1969 relating to any agricultural commodity) from the purview of this proposed agency.

If this is adopted, together with the other changes mentioned earlier I will support this 5-year experiment.

Mr. BROOKS. Mr. Chairman, I yield the remaining time to the gentleman from New York (Mr. ROSENTHAL).

Mr. ROSENTHAL. Mr. Chairman, I, first of all, want to pay great tribute to the chairman of our committee, the gentleman from Texas (Mr. BROOKS) and the ranking minority member, the

gentleman from New York (Mr. HORTON) for the very important, significant, understanding job they have done.

Without all the rhetoric on both sides—and one could engage in rhetoric either way—this is really quite a simple bill which creates an Office with an extraordinarily important responsibility and job. What we are doing is reorganizing the consumer apparatus in the Federal Government, No. 1. No. 2, we are correcting a defective governmental mechanism. We are establishing an agency that has no regulatory authority whatsoever. One of the reasons that design developed was that as a result of the many regulatory commissions, bureaus, and agencies that the Congress established in the last 40 to 50 years, many people suggested that the industries that they regulated had taken over and had gained unfair advantages in these agencies, whether it be the ICC, the CAB, or any of the other agencies. So the first thing that those who began the responsibility for eveloping this legislation said was, Let us design an agency that had no regulatory authority and that filled the gaping hole in the Federal decisionmaking process. What is that hole? Every regulatory commission in Washington that is at the national level acts as a quasi-judicial agency. Their heads sit in a courtroom setting. The dais is not dissimilar to what we see here in this Chamber. The five commissioners, the seven commissioners, the nine commissioners walk in. They sit down in what we have expected to be an Anglo-Saxon judicial atmosphere. On one side, either in support or opposition to any piece of legislation, any rule, any judicial matter, are the business interests. I do not suggest in any way at all that there is anything nefarious in what they do or what they have done.

I suggest that they have been offered the opportunity to adequately represent, and quite appropriately so, their own interests. They have been able to engage sophisticated, competent lawyers, economists, and investigators. The gaping hole in the whole concept is the empty chair of one of the advocates. The business advocate chair, the commercial advocate chair, the corporation advocate chair, was filled with competent counsel. The point of view that was to be represented by the consumer advocate for 40 years has not been heard.

What develops when one side of the case is presented and not the other is a decision that is not in the interest of the public. It is inherently an unsound decision and it is a decision that ought to run contrary to everything all of us believe in. That is why I cannot understand any of the opposition to this bill, because all we are doing is transferring the 20 consumer representatives into one agency and cut down the total cost; in other words, transfer $11.6 million worth of present expenditures into the $15 million agency. The bill also mandates another $10 million savings in net cost to the taxpayer, an enormous increase in the validity of our governmental and judicial system.

Has this worked? Is it a good idea?

Let me tell you what the States have done. Connecticut has an office of consumer council that estimates that between 1975 and 1977 they saved their consumers $1.1 million.

Florida has an office of public council that estimates their savings at $21 million.

In the State of the gentleman from Georgia (Mr. LEVITAS), their consumer utility council has saved $95 million.

The Indiana Council of Public Office has saved $13 million.

I would like to include, at this point, a list of savings by State consumer advocacy offices:

EXAMPLES OF SAVINGS FROM ACTIVITIES OF STATE CONSUMER ADVOCATE OFFICES

STATE, OFFICE, AND SAVINGS

Connecticut, Office of Consumer Counsel, $1.1 million to consumers.

Florida, Office of the Public Counsel, utility rate increases $21 million less than requested.

Georgia, Consumers Utility Counsel, utility rate increases $95 million less than requested.

Indiana, Office of the Public Counselor, several million dollars to consumers. In one case alone utility rate increase was reduced by $13 million.

Massachusetts, Utilities Section of the Attorney General's Office, utility rate increases $190 million less than requested.

Missouri, Office of the Public Counsel, $140 million to consumers.

Montana, Consumer Counsel, $70 million to consumers.

New Hampshire, Legislative Utility Consumers Council, utility rate increases $1.2 million less than requested.

New Jersey, Department of the Public Advocate, $1 billion to consumers.

New Mexico, Economic Crimes Division of the Attorney Generals Office, $13½ million to consumers.

New York, Consumer Protection Board, $60 million to consumers.

North Carolina, Public Staff, $50–$100 million to consumers.

Ohio, Public Utilities Commission Counsel, utility rate increases $40 million less than requested.

Pennsylvania, Office of Consumer Advocate, utility rate increases $12 million less than requested.

Mr. Chairman, the potential for savings at the Federal level of government exceeds by far the combined savings generated in the 26 States.

Mr. HORTON. Mr. Chairman, I yield 1 minute to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Chairman, I suppose the House ought to treat this bill like an old friend. It has been around here longer than most of us have been.

My first experience with it was in 1972 when I, along with three-quarters of the House, voted for the Consumer Protection Agency in a far stronger form than it comes to us today. In those days, I, and my constituency really believed a new agency of Government was the right way to give consumers a better voice in Federal decisionmaking.

Fortunately, that bill ultimately failed. So did a successor bill in 1974, even though it passed the House by a huge majority. And again in 1975, a similar bill failed.

Today we face, in the Brooks substitute, a watered down version now called the Office of Consumer Representation. There are a number of reasons I now oppose this bill, but none is as important as the fact that my constituency and I no longer believe that if a Government agency does not work well, we should then create another agency to do the same thing.

My total communications on this bill total only about 200. Only about a dozen were in favor of it. The most aggressive opposition comes from small business people who want no part of it. Proponents cite polls in its favor, but my own local experience is contradictory.

As a matter of fact, in my Third District questionnaire of 1976, 68 percent of the 15,000 respondents seem to understand this matter. They said we should retain but streamline existing Federal regulatory agencies. Only 4 percent wanted to add any new agencies. Twenty-two percent, incidentally, wanted to dismantle existing agencies.

The OCR, in other words, is a good example of that old congressional practice of never terminating a program or agency, but rather of laying new programs and agencies over existing ones. The result is almost always confusion, inefficiency, extra redtape, and delay.

I think that the answer to consumer inputs into Federal decisionmaking should not be to create a new regulatory agency to regulate existing regulatory agencies that are thought to be regulating poorly. I hope the House is beginning to understand the situation. Judging by this bill's difficulties in getting to the floor, perhaps the light is beginning to dawn even here.

Another new agency laid over the existing structure can only inhibit, delay, and confuse existing processes. Federal decisionmaking is almost an endless process now. It seems foolish to mess it up some more.

Those who support the new agency tell us that it does not have much power. If so, it will not work very well. However, to me, it has plenty of power to gum up, and delay, decisions that are too long in the making under current procedures.

The cost of the new super agency ought to be considered, too. The promoters of OCR have told us it will save money. They also say no one will be fired. Obviously, we are being subjected to the old shell game. No hocus-pocus can hide the fact that the new OCR agency will cost a bundle. No rhetoric can dispel the fact that it is a redundant, overlaid agency serving a function that belongs in existing agencies. No one can doubt that its cost and personnel will grow.

But, there are many other questions about this bill. One which bothers me is: Which consumers does the OCR represent? On every issue, there are myriads of consumer viewpoints. The OCR, it seems certain, will represent only one, even if we are told that all consumer points of view will be handled. If that is true, we would need an agency as big as the whole executive department.

I believe that effective consumer divisions inside the existing agencies are

a better means for promoting consumer interests than a separate, free-standing OCR. The separate agency is bound to promote a single point of view, or issue. The division of an existing agency would be bound to hear all the disparate consumer interests.

I shall support, therefore, the alternative called the Leach-Glickman substitute because I believe that it would be far more effective to improve the consumer input mechanisms of existing agencies than to create a new, giant, busybody agency.

I see the following advantages in the Leach-Glickman approach:

First. It is likely to be more effective to work from within the agency than from outside. Cooperation beats confrontation.

Second. Existing agencies will be open to all consumer points of view. The OCR will promote a single point of view.

Third. Any agency can move more promptly under its own processes and timetables.

An outside OCR will only prolong the process by information seeking and appeal.

My decision to vote against the Brooks bill is based not only on my lack of confidence in a redunant superagency. It also stands on the positive basis that existing agencies can function effectively, and can, if properly structured, make rational decisions which afford appropriate weight to various consumer interests.

For all these reasons, I urge my colleagues to vote down the Brooks substitute and the original bill, H.R. 6805. Instead, I believe we ought to pass the Leach-Glickman substitute.

Mr. MARLENEE. Mr. Chairman, I rise in opposition to the proposed Office of Consumer Representation. The new agency would just add another layer of bureaucracy and redtape in the Federal Government, and despite the claims of the agency's proponents that the bill would decrease costs, I have not seen any Federal agencies that have not grown and found ways to increase their budgets once they have been in operation a few years.

Consumer interests should be taken into account by all Government agencies. The reason why the agencies were created in the first place was to protect and assist the consumer and public. If the existing agencies do not fairly take into account consumer interests and needs, then the answer is to reform them and not create a new agency to oversee the old ones.

We have antitrust laws which should be vigorously enforced. A sunshine law has recently been enacted which gives the public much greater access to the decisionmaking process. These are the types of measures that can really benefit consumers and the public.

Mr. MURTHA. Mr. Chairman, I strongly oppose creation of a Consumer Protection Agency, or the renamed Office of Consumer Representation.

First, the people do not want this agency. In Pennsylvania's 12th Congressional District in 1975 I polled the 7,000 people in my "Instant Poll" project. I asked, "Should a new Federal Consumer Advocacy Agency be established?" The results were 32 percent yes, 64 percent no, 4 percent undecided. The comments at that time indicated people were tired of inefficient big government, and that Congress should cut back on spending and bureaucracy. From my weekly workshops and mail, I can tell you those feelings have intensified and increased over recent years.

Against the background of several negative polls, supporters of the CPA called a news conference last year to prove how badly the public wants this agency. The meeting unveiled a Harris poll. In the poll, a bare 52 percent favored establishment of such an agency, and according to Mr. Harris "fewer than one American in every three sees a solution to consumer problems coming from more Government regulation, or for that matter, any regulation."

In June 1977 a Roper survey showed 50 percent supported the agency. This was a decline from 55 percent in a 1974 Roper poll. While 66 percent in the overall Northeast found the CPA a good idea, less than a majority favored it in every other region of the country—the low being 40 percent in the West.

This hardly represents overwhelming public support for such a consumer agency. The people do not see this as an answer to their problems.

Second, the machinery exists to represent the consumer. It can be done in any Administration with sufficient commitment. A study of OMB identified 26 major consumer functions scattered throughout the Federal Government. Those agencies spend $11.6 billion and include over 200 employees. In addition to these units, 17 Federal agencies developed "consumer representation plans" that were required in the Ford administration. These plans add 290 more employees to do the job. After totaling all this, Congressional Research Service reported to me these figures "do not cover all the consumer activities of the Federal Government—it is extremely difficult to ascertain the budget figures for these functions because they are small offices within various agencies and do not appear broken out in the U.S. budget."

The revised CPA bill requires consolidating the 26 functions and cutting $10 million in consumer spending. Let us not consolidate and cut them. Let us simply use them to do their jobs. Their personnel are already available to represent the consumer.

Finally, the bill before us is not a compromise. As Hilton Davis, vice president of the Chamber of Commerce notes,

> In summary, most of the new OCR bill is merely a reprint of the earlier ACP bill. Contrary to the claim that it has "met every major concern" of the business community, this bill remains a highly complex piece of legislation which expands the role of government in the everyday affairs of business. At the same time, it does nothing to help consumers.

Mr. Chairman, this bill deserves to be defeated. It will help neither business or the individual consumer. I urge my colleagues to vote against it.

Mr. ANNUNZIO. Mr. Chairman, I rise in strong support of H.R. 9718, to provide for an Office of Consumer Representation. For too long the frustrated consumer has lacked the representation before Federal agencies and courts that business interests have pursued to the fullest. This bill will put the consumer and the producer on an equal footing.

Let me stress "equal footing." Just as business groups have every right to see their interests protected—and spend millions of dollars every year in doing so—the consumer has a right to the same voice and protection. Until now consumers have had little input into decisions which may affect their health and safety. H.R. 9718 will correct this imbalance by allowing the OCR to take part in administrative proceedings before Federal agencies and courts. This office will have no greater right than any other entity and it will merely insure that millions of consumers are represented fairly.

Opponents contend that by passing this bill we will be adding another layer to an already bloated bureaucracy. They say that the OCR's function can be handled from existing programs within the agencies. It is unfortunate that there has been so much misunderstanding. The fact is, the Office of Consumer Representation will be a small agency with a small budget. And Federal agencies do not now have the power to advocate consumer interests. This bill will allow representation that consumers do not have now. The alternative—the expression of only a limited viewpoint—is intolerable in a society based on full expression of ideas and equal representation.

Most consumers do not have the time or funds to represent themselves before the Federal Government. The administrative process is complex; it requires expertise and background that most consumers do not have. And yet, the decisions agencies make here in Washington often have a dramatic impact on the lives of Americans all across the country. A ruling by the Department of Health, Education, and Welfare may affect the quality of education. Action by the Department of Energy could determine the price of gasoline or heating fuel. The Environmental Protection Agency can act on the quality of air we breathe and water we drink. Is it fair that only those business interests involved may have a voice in these decisions? What recourse does the consumer have when faced with action that controls nearly every aspect of his life and community? Not much, not much at all. Until now.

H.R. 9718 is hardly a radical step designed to undermine the free enterprise system we all believe in. Rather, it would help insure that our great Nation remain free and that all interests have access to Federal rulings. As chairman of the Subcommittee on Consumer Affairs, I am well aware of the problems many consumers face in trying to get complaints resolved by Federal departments. With this bill, the consumer will get proper representation and he can be sure that someone is watching the thousands of rules, regulations, and decisions which

are issued every year by Federal agencies. And because the OCR can represent consumers in Federal court, its work will result in extensive benefits and cost savings.

I congratulate Mr. BROOKS, the distinguished chairman of the Committee on Government Operations, for his diligent efforts exerted on behalf of this measure. It is no easy matter to find the compromise that will work for an issue such as this. But I am confident that a solution has been arrived at that is both fair and workable. Once again, I urge my colleagues to support H.R. 9718 and pass this bill as quickly as possible.

Mr. CORCORAN of Illinois. Mr. Chairman, I rise in opposition to H.R. 6805—a bill which would establish an Agency for Consumer Protection and to H.R. 9718, a substitute of a similar nature which would create an Office of Consumer Representation. I oppose these bills for several reasons, not the least of which is that they would create yet another level of bureaucracy in the Federal Government. One of the reasons I sought public office is because I believe that governmental power and influence over our lives have increased to an unhealthy level; that trend should be stopped, not increased.

The proposed consumer agency is based on three invalid premises: First, that the consumer is gullible; second, that the businessman is always the culprit; and third, that the Government is infallible.

Regulatory agencies were created to serve the public interest. If these agencies are not doing their job, then the proper remedy is more diligent oversight by Congress, and specifically the House Government Operations Committee, on which I serve. The creation of another "super agency" to oversee the existing agencies is not the solution. The sponsors of the legislation characterize this as a "small agency with a modest budget." How many times during the last two decades have we seen any new Federal agency remain small and not increase its budget greatly?

The most disturbing aspect of this legislation, however, is that it may work to serve the purpose of aggressive special interest groups instead of individual consumers. The proposed Agency for Consumer Protection (ACP) would be the first agency designed by law to promote a special interest, not the public interest. The ACP or OCR purportedly would advocate the interests of a particular constituency—consumers—before other Federal bodies. The rest of the Federal Government is required to promote the public interest, even those agencies and departments that primarily work with narrowly defined constituencies. For example, the Environmental Protection Agency is officially chartered to protect the environment for the public, not lobby for environmental groups.

The proposed agency cannot function properly because it would be unable to define a single, well-defined consumer interest on most issues. Asking the administrator of an agency to define the consumer interest is like asking a person to name the color of a rainbow. The sponsors apparently do not understand that taxpayers are consumers, too, and that Government waste and inefficiency are costing American consumers literally billions of dollars. Richard O. Simpson, former Chairman of the Consumer Product Safety Commission, raised an interesting question recently:

> If we accept the premise that federal agencies are not responsive to the interests of consumers, by what logic should we create another federal agency and expect thereby to correct the deficiency?

I think that this hits the nail squarely on the head. What will this new $15 million Federal agency do to represent the views of the American people? Senator JAMES ALLEN of Alabama recently noted that those advocating further Federal involvement want an official Government position at any price. "They are prepared to trade scope so they can get power," said the Senator.

Mr. Chairman, I have received correspondence from several hundred of my constituents regarding this extremely controversial issue, an issue whose time has come and passed. Their response has been almost unanimous in opposition to the bill. As the Washington Post noted in an editorial today,

> * * * there is much less need for any separate intervenor with limited powers—and much more reason for Congress to set this idea aside and concentrate on helping improve the regulatory agencies themselves.

This should be the primary function of the Congress and its committees. As a member of the Government Operations Committee, I opposed the bill in committee and will continue to oppose any proposal which puts special interests before that of the public interest.

Mr. HILLIS. Mr. Chairman, I rise in opposition to the bill. Although the Consumer and Reorganization Act of 1977 has been offered as a substitute for the Consumer Protection Act of 1977, I see very few significant differentiating factors between the two.

Although the title has been changed three times, the bill itself is markedly similar to the unpopular previous consumer protection legislation. Efforts to appeal to previous opponents are apparent in the new language of H.R. 9718. However, this adapted language is still merely a soft-sell of the Consumer Protection Act of 1977. I have grave doubts that the name change from "agency" to "office" will limit the bureaucracy or power created by this measure. Once the power is delegated to this protection firm—regardless of whether it is referred to as an "office" or "agency"—it will have the authority to expand in spite of how small it is originally.

This would only become another branch of the already unwieldy bureaucracy. There are numerous existing consumer offices which should be able to handle the work-load without establishing new agencies. Why should the Federal Government create agencies to represent consumers before the Government when agencies have already been established for this reason? Increasing the bureaucracy can by no means create a more efficient program. If this system of consumer protection is unable to function effectively it should be reworked, but certainly not encumbered by an adtional layer of bureaucracy.

Not only would the OCR add another bureaucratic agency, it would also raise costs both directly and indirectly. Proponents of this legislation argue that this consolidation of the 23 existing consumer programs will decrease expenditures. This is just not true. This consolidation appears to save $11.6 million. However past history has proven that agencies have a tendency to grow well beyond their original financial allocations and expectations.

H.R. 9718 states that the OCR will not have interrogatory powers and will not issue questionnaires. However this merely leaves the discovery procedures to nonexempt Federal agencies to use their virtually unlimited subpena power to obtain depositions and documents as well as interrogatories. The OCR bill would eliminate the independent interrogatory power, but would leave the subpena power virtually intact. Although they must go through an extra step or two, the power is still there. Consequently the OCR's powers are not stricken, but merely delegated to subsidiaries thereof.

The creation of OCR would necessarily raise product prices. Although OCR does not have the power of interrogation it may induce other agencies to distribute questionnaires to business establishments and demand responses. This additional paperwork would burden the companies, possibly necessitating the creation of new positions, which would in turn cause an increase in prices. In this example it is dubious that the consumer is being protected since he must pay higher prices for the desired product.

I am opposed to the creation of any additional Consumer Protection agencies. In trying to mitigate the negative ramifications and opposition to H.R. 6805, this bill has merely camouflaged the controversial issues by introducing 9718 as a substitute. As a result, the bill has been left relatively unchanged.

This particular issue has been broached countless times in its 8-year history. Although H.R. 9718 was scheduled for consideration last November, the probability of defeat forced its rescheduling until today. The bill has not been changed since then. H.R. 9718 is a monumental deception to the American people. Furthermore, the integrity of this body of legislators will suffer should this deception be enacted.

The ambiguities of H.R. 9718 fail to check the power of the OCR, and I therefore urge my colleagues to defeat the creation of this new agency.

Mr. SIKES. Mr. Chairman, whether we are discussing the establishment of an Agency for Consumer Protection (H.R. 6805) or an Office of Consumer Representation (H.R. 9718) is a question which is essentially moot. Either bill has the goal of a unit of government who would serve as a spokesman for the consumer before Federal agencies and the courts. The nuances of such a group having the right to issue interrogatories or its use as

a clearinghouse for consumer information is less an issue. The fact is that we must today decide whether the expenditure of an additional several million dollars on top of the $12 million already paid for various existing consumer programs is necessary to provide the American public with a viable system of representation before various Federal agencies. I do not feel that it is needed or justifiable.

At present there are in existence some 20 major consumer programs functioning in the Fedral Government. In addition to the Federal Trade Commission, the largest Federal agency interested in consumer protection, recent studies have indicated some 400 units of the Federal Government are administering over 900 consumer-related activities. It would seem to me that what our citizens need is not another agency or office for consumer protection, nor another layer of officialdom but more a redefinition and reorganization of those functions already in place.

There should be another caution prior to the establishment of another consumer protection group; namely, that described by noted economics authority Dr. Milton Friedman:

> What reformers so often fail to recognize is that social, political and economic pressures determine the behavior of the men supposedly in charge of a governmental agency to a far greater extent than they determine its behavior. No doubt there are exceptions, but they are exceedingly rare—about as rare as barking cats.
>
> Ralph Nader is the most prominent current example of such a reformer. In a series of valuable reports he and his associates have confirmed dramatically what earlier studies had demonstrated less dramatically—that governmental agencies established to regulate an industry in order to protect consumers typically end up as instruments of the industry they are supposed to regulate, enabling the industry to protect monopoly positions and to exploit the consumer more effectively * * *

While some would probably choose to draw a fine line between the "nonregulatory" agencies proposed in this legislation before us today, and what Dr. Friedman talks about with reference to "regulating" industry, we are all aware of the propensity of both the authority and sheer size of any agency to grow with time. It would very likely be the case with this group we are asked to establish today.

Finally, I would share one more thought on the need, or more realistically the lack of it, for such an agency. That is that in far too many instances in the past decade Washington, the Federal Government, is being looked at as a great panacea, the protector of each and every segment of our daily life. It is as if this Nation were filled with individuals without the commonsense or thought processes which would fill a thimble. And I simply do not believe that is the case. Perhaps the minority report on a recent consumer protection bill, S707, says it better than I:

> We are asked to believe that all consumers are mental midgets who must look to Washington to find out how to manage their personal lives from some bureaucratic consumer representative who will have neither the time nor the knowledge to shop for and cook a decent supper.

In summary, I cannot recommend that my colleagues support this bill. Bigger government is not necessarily better government. I see no additional help for our citizens occurring through the passage of this bill.

Mr. DON H. CLAUSEN. Mr. Chairman, over 2 years ago I addressed the issue of creating an Agency for Consumer Protection. As I mentioned then, there had been a time in the past when it appeared that the creation of such an agency was the direction that Government should take. Many people believed this—and so did I.

However, having evaluated the kinds of trends that had developed in regulatory agencies created by previous legislative acts and the subsequent deluge of rules and regulations that inevitably evolve, I was sure then and today am more sure than ever before that our constituents have had enough of the Federal Government. The Federal bureaucracy has made a practice of becoming further involved in people's lives and the creation of this agency will only worsen an already intolerable trend towards more and more government.

I oppose H.R. 6805, the bill to create the Consumer Protection Agency; I oppose the substitute, H.R. 9718, which will be offered to create an Office of Consumer Representation; and I oppose the rule which makes this substitute in order. The changes in H.R. 9718 are merely those of form, not substance as many of my colleagues have reviewed. In fact, this bill has never even been before the committee of jurisdiction, there were no hearings, no mark-up and there is no report to accompany the bill. This is a blatant abuse of the legislative process and it insults our constituents by denying them the right to laws that have had the benefit of full legislative review.

In 1975 I stated that this type of agency would not be a knight in shining armor, fighting the battles for all consumers. And today I still maintain that it will be another nightmare of excessive Government control, burdensome redtape, increased inefficiency, more inflation, and more taxes.

One of the main premises on which this bill is based is that the Government is infallible, that the Government is the only guiding light which can effectively protect our gullible and uninformed consumers. I submit that our consumers are neither gullible nor uninformed. They are more discriminating than ever before. They spend their hard-earned dollars wisely and they have formed consumer groups to represent their many and varied interests.

Without Government intervention, businesses have formed consumer complaint and action departments. Consumers have inspired our media to concentrate on consumer problems, and they have been behind the creation of local and State consumer action offices. This is not the work of gullible, uninformed consumers—it is the solid record of accomplishment of thousands of informed, concerned and highly active citizens and by responsive men and women in business.

Cambridge Reports, Inc., recently did a survey on "Citizens' Attitudes Toward Consumer Protection." What they found is that 38 percent of the consumers interviewed nationwide said they have never had any problem with stores or products and 69 percent said that a store manager or owner had solved most of their problems as soon as they were told about them.

This says to me that consumers have clearly had an impact and, that this impact has been effective. It shows that consumer's problems are not as rampant as we are led to believe, that they are being solved at the local level and, that most consumers prefer to solve them at that level.

This brings us to the question of just who is the consumer? What makes this legislation particularly dangerous is its inability to define "consumer." Under this legislation there are no assurances that all consumers will be represented in agency proceedings. A case in point is the passive restraint issue—more notoriously known as the air bag issue. Had the Office for Consumer Representation been in existence during the Department of Transportation's consideration of this question last summer it would have had to decide between two basic consumer interests; to protect health and safety or to prevent price increases. Who is the consumer in this case? Clearly, both groups are made up of consumers but, only one would be represented by the new consumer agency in any agency proceedings. An important contingent of consumers would lose out.

The Office for Consumer Representation simply could not function properly because it would be unable to identify a single, well-defined consumer interest in most issues. Consumer interests are often in opposition to each other as this example points out.

Furthermore, rather than help consumers this new super-agency would abuse them by increasing the cost and diminishing the effectiveness of government and business. It will attach an expenive overtime period to the Federal application game, which is already wearing out local government officials and taxpayers. A decision which once took a week to be made could now take a month or maybe 3 months while this new agency decides if it likes another agency's rules. This will increase the uncertainty in the marketplace and will add to the price a consumer must pay for the products and services he purchases.

As I see it, it is this kind of inhibiting influence that is stifling economic growth, causing job losses and high unemployment, and preventing the real consumer protection of the marketplace—the lowest price, highest quality goods and services consistent with long-term availability—from working. The stated purpose of this legislation is to protect the consumer, but in my judgment we have a "consumer rip-off" before us today.

What we are considering today is another example of legislation that seeks the fast, easy answers. If Congress really wants to help the consumer then we should abandon this bill and begin to do away with some of the laws and regula-

tions which impose so great a burden on us all. It is time to make the machinery already in place more responsible and responsive and it is time to be honest to the public and tell them this new agency is not a pie in the sky but rather another method for the Federal Government to force its way into their lives and their pocketbooks.

I opposed this measure in 1975, I oppose it today and I'll oppose it tomorrow because it is not in the "consumer's interest." By all the polls Americans are clamoring for relief from Government intervention. They want the Federal Government off their backs and out of their pocketbooks. Time has come to put together a coalition of responsible Democrats and Republicans to bury this "turkey" once and for all. It is not a Democratic or Republican issue. It is an issue that affects all Americans.

Mrs. HECKLER. Mr. Chairman, I rise to object to House Resolution 872 to provide the rule for consideration of H.R. 6805, the Consumer Protection Act of 1977.

The substitute H.R. 9718 offers many important amendments that are not in the basic bill, H.R. 6805, yet these changes have not been considered by the full committee, and as a result the opponents and proponents have not been heard. The changes in H.R. 9718 have not been discussed in the final report of the committee—a major flaw in the procedure.

I consider the process under which we consider legislation to be almost as important as the legislation itself, and seek to provide a full and fair hearing for all interested citizens through the committee system.

Mr. STOKES. Mr. Chairman, I rise in support of H.R. 9718, a bill which would create an Office of Consumer Representation (OCR).

Mr. Chairman, the idea of office to represent consumers is not a new idea. Congress has debated it for years. I feel that the Office of Consumer Representation is an idea "whose time has come."

For too many years, the very regulatory bodies designed to protect the consumer now operate most effectively to protect business and industry. For too long, Federal agencies and courts have made decisions that significantly affect the health, safety, and economic well-being of American consumers without adequate consumer representation. This office will rectify the situation that now exists by making sure the consumer's side of the argument is heard along with the arguments of business, industry, and other organizations. It will give consumers a voice in the decisionmaking processes of Government.

Mr. Chairman, opponents of this bill base their opposition on arguments with which I disagree.

First of all, many argue that this bill will not help small business. This is not true. The bill includes the concerns of small business when consistent with those consumers. In other words, the bill authorizes the OCR to represent the views of business as consumers of federally regulated goods and services.

Others argue that the OCR will be a large, powerful, regulatory agency that will cost a lot. This also is not true. The OCR will have no regulatory power and will, in fact, reorganize and streamline government bureaucracy by consolidating 20 existing consumer units which will amount to a net savings of $5 million in the first year of operation. The office also is mandated to eliminate conflicting or duplicative regulations that burden consumers and therefore will cut down costs.

Additionally, the OCR will benefit family farmers, the elderly, and low-income families, all of whom represent a segment of our society which must spend a large portion of their salaries for the basic necessities of life. These people are affected the most when there is a change in prices. The OCR could intervene where certain elements are adding unduly to the cost of food, it could provide consumer-oriented data on energy price levels and allocation controls, and it could assure that the needs of senior citizens and minorities are considered as the Government moves to reform public assistance and provide basic services. This office will assist these people in reaping the benefits of the programs that Congress enacts for their assistance. And because of the sunset provision in this bill, the office will automatically terminate in 5 years, if in Congress' judgment, it fails to do its primary job of representing consumer interest.

Mr. Chairman, we are all consumers and there is a pressing need for having an office to represent us. This bill will save consumers millions of dollars by reducing fraud and stopping unwarranted price increases. I believe that the consumer segment of the American public deserves vigorous accredited advocacy in the various agencies of government which deeply affect their lives.

Mr. Chairman, I urge my colleagues to join me in support of H.R. 9718, the Office of Consumer Representation. The bill will structurally correct the imbalance that now weighs heavily against consumers. I feel that failure to pass this bill—failure to accord consumers the same rights of representation, could erode the confidence of our institutions of government and enterprise.

The CHAIRMAN. All time has expired.

Pursuant to the rule, it shall be in order to consider as an amendment in the nature of a substitute the text of the bill H.R. 9718, which shall be read for amendment under the 5-minute rule as an original bill, if offered.

The Clerk will read.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled—

The CHAIRMAN. The Chair recognizes the gentleman from Texas (Mr. BROOKS).

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. BROOKS

Mr. BROOKS. Mr. Chairman, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. BROOKS: Strike out everything after the enacting clause and insert in lieu thereof the following: "That this Act may be cited as the "Consumer Representation and Reorganization Act of 1977".".

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. GLICKMAN FOR THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. BROOKS

Mr. GLICKMAN. Mr. Chairman, I offer an amendment in the nature of a substitute for the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. GLICKMAN for the amendment in the nature of a substitute offered by Mr. BROOKS: Strike out all after the enacting clause and insert:

That this Act may be cited as the "Consumer Protection Act of 1977".

SEC. 2. DECLARATION OF POLICY.

(a) FINDINGS.—The Congress finds and declares the following:

(1) In the execution of its constitutional and statutory responsibilities, the Federal Government and the agencies thereof—

(A) should consistently, completely, and adequately represent the interests of consumers;

(B) should not promulgate regulations or adopt policies without first developing and considering information as to their impact on consumers; and

(C) should act in such manner as to protect and serve the interests of consumers.

(2) The most effective and cost-efficient way to assure such representation and protection of consumers is to establish—

(A) an independent Office of Consumer Counsel within each significant operating unit of the executive branch of the Federal Government; and

(B) a Division of Consumer Protection and Advocacy in the Department of Justice to assist and support such Offices and to serve as the coordinating agency for consumer advocacy.

(b) PURPOSES.—

(1) It is the purpose of the Congress in this Act to reorganize each significant operating unit of the executive branch to the extent necessary to assure that each such unit, through an independent Office of Consumer Counsel, maintains internal processes and procedures for adequately representing, protecting, and serving the interests of consumers at all stages in, and in all phases of, the formulation, implementation, and review of policies, programs, regulations, and legislative recommendations.

(2) It shall be the specific purposes of each Office to represent the interests of consumers before and within the Federal agency of which it is a part; to receive, transmit, evaluate, and report on consumer complaints; to develop and disseminate information of interest to consumers; and to perform other functions to protect and promote the interests of consumers. In the exercise of its functions, powers, and duties, each such Office shall be independent of all other offices and officers of the agency of which it is a part.

(3) It shall be the specific purpose of the Division of Consumer Protection and Advocacy of the Department of Justice, in addition to such other functions as may be assigned to such Division by law or by the Attorney General, to—

(A) provide data, information, advocacy-training, and other appropriate services to each Office and to provide a forum for coordinating the activities and assuring the independence and effectiveness of the Offices;

(B) assist any Consumer Counsel in representing the interests of consumers before the relevant Federal agency;

(C) promote, through appropriate litigation, legislative recommendation, and recommendations to any Office the protection of consumers with respect to—

(i) the safety, quality, purity, potency, healthfulness, durability, performance repairability, effectiveness dependability, availability, truthful representation, and cost of any goods, services, credit or other property;

(ii) assuring consumer choice and competitive markets;

(iii) preventing unfair or deceptive trade practices and restraints on trade; and

(iv) the legal rights and access of consumers to speedy, effective, and inexpensive mechanisms for the resolution of consumer controversies.

SEC. 3. DEFINITIONS.

As used in this Act, unless the context otherwise requires—

(1) The term "agency action" include the whole or any part of an agency "rule", "order", "license", "sanction", or "relief' (as defined in section 551 of title 5, United States Code), or the equivalent thereof, the denial thereof, or the failure to act.

(2) The term "agency activity" means any agency process, or phase, thereof, conducted pursuant to any authority, or responsibility under law.

(3) The term "agency proceeding" means agency "rulemaking", "adjudication", or "licensing" (as defined in section 551 of title 5, United States Code).

(4) The term "commerce" means trade, traffic, commerce, or transportation, (A) between a place in a State and any place outside of such State, or (B) which affects trade, traffic, commerce, or transportation described in clause (A).

(5) The term "consumer" means any individual who uses, purchases, acquires, attempts to purchase or acquire, or is offered or furnished any goods, services, credit, or other property for personal, family, agricultural, or household purposes.

(6) The term "Consumer Counsel" means, with respect to a Federal agency, the officer who is appointed pursuant to this Act to represent the interest of consumers in accordance with this Act.

(7) The term "Federal agency" or "agency" means the Departments of Agriculture, Defense, Commerce, Energy, Health, Education, and Welfare (other than the Food and Drug Administration), Housing and Urban Development. Interior, Labor, Transportation, and Treasury; the Civil Aeronautics Board; the Consumer Product Safety Commission; the Environmental Protection Agency; the Federal Communications Commission; the Federal Maritime Commission; the Federal Trade Commission; the Interstate Commerce Commission; the Food and Drug Administration; the National Transportation Safety Board; the Securities and Exchange Commission; the General Services Administration; the Small Business Administration; the Postal Rate Commission; and any successors thereto.

(8) The term "Federal court" means any court of the United States.

(9) Thc term "interest of consumers" means any substantial health, safety, or economic concern of consumers involving goods, services, credit, or other property, or the advertising or other representation thereof, which is or may become the subject of any commercial offer or any transaction affecting commerce or which may be related to any term or condition of such offer or transaction. Such offer or transaction need not involve the payment or promise of a consideration.

(10) The term "Office" means any Office of Consumer Counsel established pursuant to section 4 of this Act.

(11) The term "participation" includes any form of submission.

(12) The term "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, the Canal Zone, Guam, American Samoa, and the Trust Territory of the Pacific Islands.

(13) The term "submission" means participation through the presentation or communication of relevant evidence, documents, arguments, or other information.

SEC. 4. ESTABLISHMENT.

(a) OFFICE OF CONSUMER COUNSEL.—

(1)(A) There shall be established within each Federal agency, within 60 days after the date of enactment of this Act and pursuant to a plan of reorganization prepared by the head of each such agency to provide for adequate representation of the interests of consumers, an independent Office of Consumer Counsel. Such reorganization shall provide that all existing consumer offices and staff within such agency shall be combined into that agency's Office of Consumer Counsel.

(B)(1) Except to the extent prohibited by law, the Director of the Office of Management and Budget is authorized and directed to review all other Federal programs and activities which have a consumer information advocacy, or related function and identify those which would overlap, duplicate, or conflict with the functions performed by these Offices. This review shall be carried out as a part of the President's first budget review process following establishment of the Office.

(ii) The Director of the Office of Management and Budget shall, one week after the submission of the President's budget to the Congress, report to the Committee on Appropriations and Government Operations of the House of Representatives and Appropriations and Governmental Affairs of the Senate the results of the review required by paragraph (1) of this subsection. Such report shall include (A) all activities identified as a part of the Office of Management and Budget's review; (B) a description of those activities including their costs during the fiscal year and how those activities overlap, duplicate, or conflict with the responsibilities of these Offices; and (C) the budgetary recommendations to the Congress to eliminate such activities.

(iii) Nothing in this subsection shall be construed to prohibit the Director of the Office of Management and Budget from including in the report required by paragraph (2) of this subsection, comments on the consumer related activities of independent regulatory agencies that overlap, duplicate, or conflict with the functions performed by these Offices.

(2) Each such Office shall be directed and administered by a Consumer Counsel. Each Consumer Counsel shall be appointed by the President, by and with the advice and consent of the Senate, for a fixed term of office not to exceed 3 years. The terms of office of the Consumer Counsel appointed initially shall be staggered, in a manner compatible with the oversight responsibilities of the Congress, to assure that all such terms do not expire simultaneously. Each Consumer Counsel shall be compensated at a rate not in excess of the maximum rate for GS–18 of the General Schedule under section 5332 of title 5, United States Code, Each Consumer Counsel shall be an individual who, by reason of training or experience, and attainments, is qualified to represent effectively and independently the interests of consumers. Upon the expiration of his term of office, each Consumer Counsel shall continue in office until reappointment or until the appointment and qualification of his successor.

(b) DIVISION OF CONSUMER PROTECTION AND ADVOCACY IN THE DEPARTMENT OF JUSTICE.—

(1) There is established, within the Department of Justice, a Division of Consumer Protection and Advocacy, which shall be directed by the Assistant Attorney General for Consumer Protection and Advocacy.

(2) Chapter 31 of title 28, United States Code, is amended by adding immediately after section 507 thereof, the following new section 507a:

"§ 507a. Assistant Attorney General for Consumer Protection and Advocacy

"The President shall appoint, by and with the advice and consent of the Senate, an Assistant Attorney General for Consumer Protection and Advocacy, pursuant to the Consumer Protection Act of 1977.".

(3) The analysis of chapter 1 of title 28, United States Code, is amended by adding at the appropriate place the following new item:

"§ 507a. Assistant Attorney General for Consumer Protection and Advocacy

(4) Paragraph (19) of section 5315 of title 5, United States Code, is amended by striking out "(9)" and inserting in lieu thereof "(10)".

SEC. 5. POWERS AND DUTIES OF EACH CONSUMER COUNSEL.

(a) IN GENERAL.—Each Consumer Counsel shall be responsible for exercising the powers, duties, and functions provided for in this Act.

(b) SPECIFIC POWERS AND DUTIES.—Each Consumer Counsel may, in carrying out his functions under this Act and to the extent funds are appropriated—

(1) select, appoint, employ, and fix the compensation (subject to the civil service and classification laws) of such officers and employees as are necessary to carry out the provisions of this Act, and shall prescribe the authority and duties of officers and employees;

(2) employ and pay the expenses of experts and consultants, in accordance with section 3109 of title 5, United States Code, at daily rates (including traveltime) not in excess of the maximum rate of pay for grade GS–18, as provided in section 5332 of such title 5;

(3) promulgate, in accordance with the applicable provisions of chapter 5 of title 5, United States Code, such rules, regulations, and procedures as may be necessary to carry out the provisions of this Act and to assure fairness to all affected persons;

(4) delegate authority for the performance of any function to any officer or employee under his direction and supervision;

(5) utilize, with their consent, the services, personnel, and facilities of State, regional, local, and private agencies and instrumentalities;

(6) accept voluntary uncompensated services, notwithstanding the provisions of section 3679(b) of the Revised Statutes (31 U.S.C. 665(b));

(7) conduct conferences and hearings and otherwise secure data and expression of opinion;

(8) accept unconditional gifts or donations of services, money, or property (real, personal, or mixed, tangible or intangible);

(9) designate representatives to maintain effective liaison with (A) the Assistant Attorney General for Consumer Protection and Advocacy, (B) other Offices, and (C) State and local agencies carrying out programs and activities related to the interests of consumers; and

(10) perform such other administrative activities as may be necessary for the effective fulfillment of his duties and functions.

(c) REPORTS.—Each Consumer Counsel shall prepare and submit a quarterly report, on the activities of his Office to the head of the Federal agency of which such Office is a part and to the Assistant Attorney General for Consumer Protection and Advocacy. The annual report of each Federal agency shall include a separate section, which shall be prepared independently by the Consumer Counsel for such agency, on the consumer protection activities of such agency and on such agency's effectiveness in representing, protecting, and serving the interests of consumers. Each such separate section of each such annual report shall include, but not be limited to, a description and analysis of—

(1) the activities of the Office including its representation of the interests of consumers;

(2) the relevant Federal agency actions and Federal court decisions affecting the interests of consumers;

(3) the appropriation by Congress for the Office, the distribution of appropriated funds for current fiscal year, and a general estimate of the resource requirements of the Office for each of the next 3 fiscal years; and

(4) the extent of participation by consumers in the activities of the Office, and the effectiveness of the representation of consumers before the agency of which the Office is a part.

(d) DUTIES OF EACH FEDERAL AGENCY.—Each office and officer of the agency of which an Office is a part shall provide such Office with such information and data as the Consumer Counsel requests, except as provided in section 11 of this Act. The budget requests and budget estimates of each Office shall be submitted by the agency of which it is a part directly to the Congress, and moneys appropriated for the use of such Office shall not be used by the agency of which it is a part for any other purpose.

SEC. 6. FUNCTIONS OF EACH CONSUMER COUNSEL.

Each Consumer Counsel shall—

(1) represent the interests of consumers within and before the agency of which his Office is a part to the extent authorized by section 7 of this Act;

(2) conduct and support research, and studies, to the extent authorized by section 10 of this Act;

(3) submit recommendations annually to the Assistant Attorney General for Consumer Protection and Advocacy, the appropriate committees of the Congress, and the head of the agency of which his Office is a part, on measures to improve the operation of such agency and of the Federal Government in general in the protection and promotion of the interests of consumers, including, but not limited to, any reorganization recommendations, and recommendations relative to the elimination of duplicative or unnecessary rules and regulations promulgated by such agency which it considers not to be in the consumers' interests;

(4) receive, transmit to appropriate officials, and make publicly available consumer complaints, to the extent authorized in section 8 of this Act;

(5) conduct conferences, surveys, and investigations, including—economic surveys, concerning the needs, interests, and problems of consumers: *Provided*, That such conferences, surveys, or investigations are not duplicative in significant degree of similar activities conducted by other Federal officials or agencies;

(6) cooperate with State and local governments and encourage private enterprise in the promotion and protection of the interests of consumers;

(7) keep the appropriate committees of Congress fully and currently informed of all the activities of his Office;

(8) encourage the adoption and expansion of effective consumer education programs;

(9) encourage the application and use of new technology, including patents and inventions, for the promotion and protection of the interests of consumers;

(10) encourage the development of informal dispute settlement procedures involving consumers;

(11) encourage meaningful participation by consumers in the activities of his Office;

(12) publish information and material obtained and developed in carrying out his responsibilities under this Act, including, but not limited to, a consumer register of matters that may be useful to consumers; and

(13) perform other activities which are recommended by the Assistant Attorney General for Consumer Protection and Advocacy or which he deems necessary for the effective fulfillment of his duties and functions.

SEC. 7. REPRESENTATION OF CONSUMERS.

(a) ADMINISTRATIVE REPRESENTATION.—

(1) If a Consumer Counsel finds that the result of a relevant proceeding or activity of the Federal agency of which his Office is a part may substantially affect an interest of consumers, such Consumer Counsel may, as of right, intervene as a party or otherwise participate in such proceeding or activity, for the purpose of representing an interest of consumers. If a Consumer Counsel finds, with respect to the Federal agency of which his Office is a part, that the result of any relevant agency proceeding, which—

(A) is subject to the provisions of section 553, 554, 556, or 557 of title 5, United States Code;

(B) involves a hearing that is required by any statute, regulation, or practice;

(C) is conducted on the record after opportunity for an agency hearing; or

(D) is subject to a requirement of public notice and opportunity for comment,

may substantially affect an interest of consumers, such Consumer Counsel may, as of right, intervene as a party or otherwise participate in such proceeding, for the purpose of representing an interest of consumers. A Consumer Counsel shall refrain from intervening as a party in any proceeding unless such intervention is necessary to represent adequately an interest of consumers. Each Consumer Counsel shall comply with the relevant statutes and procedural rules of general applicability governing the timing of intervention or participation in such Federal agency proceeding or activity. Upon intervening or participating in a Federal agency proceeding or activity, a Consumer Counsel shall comply with any relevant statutes and procedural rules of general applicability. The intervention or other participation of a Consumer Counsel, pursuant to this subsection, shall not affect the obligation of the Federal agency involved to assure procedural fairness to all participants.

(2) The Assistant Attorney General for Consumer Protection and Advocacy may, upon the request of a Consumer Counsel, assist such Consumer Counsel in any such Counsel's intervention or other participation in that Counsel's Federal agency proceeding or activity, pursuant to this subsection, and may, in an appropriate circumstance, recommend such intervention or other participation to any applicable Consumer Counsel.

(3) Whenever a Consumer Counsel determines to intervene or otherwise participate in his agency's proceeding pursuant to this subsection, such Consumer Counsel shall publish in the Federal Register a statement setting forth his findings under paragraph (1) and the specific interest of consumers sought to be protected. Upon intervening or participating, such Consumer Counsel shall file a copy of such statement in the proceeding.

(b) JUDICIAL REPRESENTATION.—

(1) The Assistant Attorney General for Consumer Protection and Advocacy may, as of right, and in the manner prescribed by law for an aggrieved person, initiate, intervene, or otherwise participate in a civil action in a Federal court for the review of an agency action of any Federal agency if such Assistant Attorney General determines that such action may substantially affect an interest of consumers. If the applicable Consumer Counsel did not intervene or otherwise participate in the relevant Federal agency proceeding or activity out of which such agency action arose, the court shall determine whether the initiation of a judicial proceeding pursuant to this subsection would impede or would be necessary to preserve the interests of justice.

(2) If the Consumer Counsel believes that the initation of a Federal civil action by the Assistant Attorney General, or the intervention in such Federal civil action, is warranted, it shall recommend such action to the Assistant Attorney General, who shall take such action if the conditions outlined in subparagraph (1) of this section are met. The Consumer Counsel shall have no power and authority to initiate or intervene in any Federal court proceeding.

(3) The initiation of a judicial proceeding, or any other participation, by the Assistant Attorney General for Consumer Protection and Advocacy, in a judicial proceeding pursuant to this subsection shall not alter or affect the scope of review otherwise applicable to the agency action involved.

(c) REQUEST FOR JUDICIAL REVIEW.—Whenever a Consumer Counsel, or the Assistant Attorney General for Consumer Protection and Advocacy, determines it to be in the interest of consumers, he may request the relevant Federal agency to initiate a judicial proceeding for review, or to take such other action, as may be authorized by law with respect to such agency. If such Federal agency fails to take the action requested, it shall promptly notify such Consumer Counsel or Assistant Attorney General of its reasons therefor, and such notification shall be a matter of public record.

(d) TITLE OF APPEARANCES.—Appearances before a Federal agency by a Consumer Counsel under this Act shall be in the name of his Office and shall be made by qualified representatives designated by the Consumer Counsel involved. Appearances by the Assistant Attorney General for Consumer Protection and Advocacy shall be in the name of the United States unless the Attorney General otherwise provides, in which case such an appearance shall be in the name of such Assistant Attorney General, and shall be made by qualified representatives of the Department of Justice designated by such Assistant Attorney General and in appearance before Federal agencies by qualified representatives designated by the Consumer Counsel involved.

(e) POWERS.—A Consumer Counsel is authorized, with respect to any Federal agency proceeding in which such Consumer Counsel is intervening or otherwise participating, to request such Federal agency to issue such orders as it is authorized to issue pursuant to its statutory powers, for the copying of documents, papers, and records; for the summoning of witnesses and the production of books and papers; and for the submission of information in writing. Such Federal agency shall issue any such orders upon a statement or showing by such Consumer Counsel as to the general relevance or reasonableness thereof.

(f) PROHIBITION.—No Consumer Counsel is authorized to initiate or intervene in any proceedings or activity before any State or local agency or court.

(g) RULES CHANGES.—Each Federal agency shall review its rules of procedure of general applicability, and, after consultation with its Consumer Counsel, shall issue any additional rules or modifications of existing rules which may be necessary to provide for such Consumer Counsel's orderly intervention and other participation, in accordance with this section, in its proceedings and activities which may substantially affect the interests of consumers.

SEC. 8. CONSUMER COMPLAINTS.

(a) IN GENERAL.—Whenever a Consumer Counsel receives from any person any complaint or other information which discloses—

(1) an apparent violation of law, agency rule or order, or a judgment, decree, or order of a Federal court relating to an interest of consumers; or

(2) a commercial, trade, or other practice which is detrimental to an interest of consumers;

such Consumer Counsel shall, unless he determines that such complaint or information

is frivolous or outside the jurisdiction of the agency of which his office is a part, promptly transmit such complaint or information to the Federal official which has the authority to enforce any relevant law or to take appropriate remedial action. Each Federal agency shall keep the appropriate Consumer Counsel informed to the greatest extent practicable of any action which it is taking on complaints transmitted by him.

(b) NOTIFICATION.—Each Consumer Counsel shall, to the greatest extent practicable, notify producers, distributors, retailers, lenders, or suppliers of goods, services, and credit of all complaints of any significance concerning them received or developed under this section, unless such Consumer Counsel determines that to do so is likely to prejudice or impede an action, investigation, or prosecution concerning an alleged violation of law.

(c) PUBLIC AVAILABILITY.—Each Consumer Counsel shall maintain a public document room for public inspection and copying (at a reasonable charge, not to exceed cost), containing an up-to-date listing of all consumer complaints of any significance which such Consumer Counsel has received, arranged in meaningful and useful categories, together with annotations of actions taken in response thereto. Unless a Consumer Counsel, for good cause, determines not to make any specific complaint available, complaints listed shall be made available for public inspection and copying: *Provided*, That—

(1) the party complained against has had a reasonable time to comment on such complaint and such comment, when received, is displayed together with the complaint;

(2) the Federal official to whom the complaint has been referred has had a reasonable time to notify the Consumer Counsel what action, if any, he intends to take with respect to the complaint; and

(3) no unsigned complaints shall be placed in the public document room.

(d) EVALUATION OF AND REPORTING ON COMPLAINT HANDLING PROCESSES.—Each Consumer Counsel shall evaluate the complaints received and transmitted and the effectiveness and efficiency with which such complaints are acted upon by the Federal agency of which his Office is a part. A summary of such evaluations, and recommendations for improvement, shall be included in the reports prepared by each such Consumer Counsel pursuant to section 5(c).

SEC. 9. CONSUMER INFORMATION.

(a) IN GENERAL.—In order to carry out the purposes of this Act, each Consumer Counsel shall—

(1) develop on his own initiative and shall, subject to the other provisions of this Act, gather from the other offices and officers of the Federal agency of which his Office is a part and from any other source; and

(2) disseminate to the public (in such manner, at such times, and in such form as he determines to be most effective) information, statistics, and other data, including, but not limited to, any matter over which such Federal agency has jurisdiction concerning—

(A) the functions and duties of the Office;

(B) consumer products and services;

(C) problems encountered by consumers generally or conditions, situations, developments, or practices which may adversely affect consumers; and

(D) an index of notices of hearings, proposed and final rules and orders, and other pertinent activities of such Federal agency that may affect consumers.

(b) DUTY OF COOPERATION.—All Federal agencies which possess information which possess information which would be useful to consumers shall cooperate with the appropriate Consumer Counsel in making information developed and gathered under subsection (a) available to the public in understandable form.

SEC. 10. STUDIES.

Each Consumer Counsel may conduct, support, or assist research, studies, plans, investigations, conferences, and surveys concerning the interests of consumers: *Provided*, That such activities are not unnecessarily duplicative of similar efforts by other Consumer Counsels for any Federal agency, or by similar efforts otherwise conducted by any Federal agency, and that such activities shall in no way constitute the creation of product-testing laboratories.

SEC. 11. ACCESS TO INFORMATION BY CONGRESS COUNSELS.

(a) IN GENERAL.—Upon written request by a Consumer Counsel, the Federal agency of which his Office is a part, shall furnish or allow access to all documents, papers, and records in its possession which such Consumer Counsel deems necessary for the performance of his functions and shall furnish, at cost, copies of specified documents, papers, and records. Notwithstanding this subsection, a Federal agency may deny a Consumer Counsel access to and copies of—

(1) information classified in the interest of national defense or national security by an individual authorized to classify such information under applicable Executive order or statutes, and restricted data whose dissemination is controlled pursuant to the Atomic Energy Act (42 U.S.C. 2011 et seq.):

(2) personnel and medical files and similar files, the disclosure of which would constitute an unwarranted invasion of personal privacy;

(3) information which such Federal agency is expressly prohibited by law from disclosing to another Federal agency, including, but not limited to, such expressly prohibited information contained in or related to examination, operating, or condition reports concerning any individual financial institution prepared by, on behalf of, or for the use of an agency responsible for regulation or supervision of financial institutions;

(4) information which would disclose the financial condition of individuals who are customers of financial institutions; and

(5) trade secrets and commercial or financial information described in section 552(b)(4) of title 5, United States Code—

(A) obtained prior to the effective date of this Act by such Federal agency, if the agency had agreed to treat and has treated such information as privileged or confidential and states in writing to the appropriate Consumer Counsel that, taking into account the nature of the assurances given, the character of the information requested, and the purpose, as stated by the Consumer Counsel, for which access sought, to permit such access would constitute a breach of faith by such agency; or

(B) obtained subsequent to the effective date of this Act by such Federal agency, if the agency has agreed in writing as a condition of receipt to treat such information as privileged or confidential, on the basis of its reasonable determination set forth in writing that such information was not obtainable without such an agreement and that failure to obtain such information would seriously impair performance of such agency's function.

(b) ACCESS TO TRADE SECRET INFORMATION.—Before granting a Consumer Counsel access to trade secrets or commercial or financial information described in section 552(b)(4) of title 5, United States Code, the Federal agency of which such Counsel's Office is a part shall notify the person who provided such information of its intention to provide such access, and shall afford such person a reasonable opportunity, not to exceed 10 days, to comment thereon or seek injunctive relief prohibiting such access. If a Federal agency denies access to any information to a Consumer Counsel, pursuant to this subsection, the head of such agency and the appropriate Consumer Counsel (and the Assistant Attorney General for Consumer Protection and Advocacy, if requested by such Counsel) shall seek to find a means of providing the information in such other form, or under such conditions, as will meet such agency's objections.

SEC. 12. DISCLOSURES OF INFORMATION BY CONSUMER COUNSEL.

(a) IN GENERAL.—Except as provided in this section, section 552 of title 5, United States Code, shall govern the release of information by any Consumer Counsel, by any employee or agent of any Office, or by the Assistant Attorney General for Consumer Protection and Advocacy.

(b) PROHIBITION.—No Consumer Counsel, or officer or employee or any Office shall disclose to the public any information which was received solely from its Federal agency when such agency has notified the Consumer Counsel that—

(1) such information is within any exception set forth in section 552(b) of title 5, United States Code; and

(2) such agency has determined that such information should not be made available to the public.

If such Federal agency specifies that any such information may be disclosed to the public in a particular form or manner, such information may be disclosed by such Consumer Counsel in the form or manner specified.

SEC. 13. AUTHORIZATION OF APPROPRIATIONS.

For purposes of this Act, existing appropriated funds should be utilized to the greatest extent possible. However, there are authorized to be appropriated such sums as are necessary, not to exceed for each office $500,000 for the fiscal year ending September 30, 1978.

SEC. 14. EFFECTIVE DATE.

(a) This Act shall take 60 calendar days following the date on which this Act is approved, or on such earlier date as the President shall prescribe and publish in the Federal Register.

(b) Any of the officers provided for in this Act may (notwithstanding subsection (a)) be appointed in the manner provided for in this Act at any time after the date of the enactment of this Act. Such officers shall be compensated from the day they first take office at the rates provided for in this Act.

SEC. 15. SEPARABILITY.

If any provision of this Act is declared unconstitutional or the applicability thereof to any person or circumstance is held invalid, the constitutionality and effectiveness of the remainder of this Act and the applicability thereof to any persons and circumstances shall not be affected thereby.

SEC. 16. TERMINATION.

(a) This Act shall terminate 5 years after the effective date of this Act, and the several Offices of Consumer Counsel and the Division of Consumer Protection and Advocacy of the Department of Justice shall be abolished as the date of such termination.

(b) The President shall—

(2) commencing 2 years prior to the date of termination specified in subsection (a), conduct a review of these Offices' overall performance including, but not limited to, a study of the Offices' effectiveness in accomplishing their general purposes and promoting the general welfare; and

(2) not later than 12 months prior to the termination date specified in subsection (a), make public and submit to each House of Congress a report on the finding of the investigation conducted pursuant to paragraph (1), such report to include a recommendation that the authority of this Act be ex-

tended, that these offices be reorganized, or that the authority of this Act be allowed to lapse.

(e) The committees of the House and of the Senate having primary oversight responsibility with respect to the Offices shall, not later than 6 months prior to the termination date specified in subsection (a), conduct an inquiry into the performance and effectiveness of the Offices and make public a report of their findings, conclusions, and recommendations, including proposed legislation for such extension or reorganization of these Offices as they deem appropriate.

Mr. GLICKMAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment in the nature of a substitute offered for the amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. GLICKMAN. Mr. Chairman, there is no question that American consumers deserve a stronger, more effective voice in the Federal Government. What the House needs to decide is what structural approach will provide the needed consumer representation with a minimum of new bureaucracy and the redtape and delay which has become all too typical of our Federal Government—not to mention at a minimum of cost.

My constituents are tired of being told that our Government is inadequate, that it cannot fulfill its responsibilities. As I said in a "Dear Colleague" letter last week, it is time we fix our present system—just like we do our cars—before we give up on it. That is precisely what our substitute is designed to do.

The proposal I am offering with the support of my colleagues from Iowa, Mr. LEACH, Missouri, Mr. GEPHARDT, and Maryland, Mr. BYRON, will reorganize present consumer activities at the agency and departmental level into Offices of Consumer Counsel and strengthen them so they can effectively fulfill their mandates.

Those consumer counsels will have the responsibility and authority to independently participate or intervene in actions of their agencies on behalf of consumers. They will have the responsibility and authority to make recommendations to their own agencies, to the Department of Justice and directly to the Congress on actions needed to protect consumer interests. They will have the responsibility and authority to make public consumer complaints comments of parties complained against and corrective actions taken. There is one fundamental and critical difference between our proposal and the approach adopted by former President Ford. Under our substitute the Consumer Counsels will have the authority needed to fulfill their duty of consumer representation.

To supplement the functions of the Consumer Counsels within their agencies, our substitute would create an Assistant Attorney General for Consumer Protection and Advocacy to assist the Consumer Counsels in their activities, to recommend instances where the Consumer Counsels should consider intervening in agency proceedings and to, independently or upon request, initiate or participate in Federal court reviews of agency decisions on behalf of consumers.

I am convinced, for several reasons, that independent consumer counsels within appropriate substantive departments and agencies, with the support of the new Assistant Attorney General, will provide the most effective consumer voice in the Federal executive branch.

First, this decentralized approach will mean that consumer complaints will be acted upon with a minimum of redtape and delay.

Second, day to day responsibility for reviewing the actions of a particular Federal agency or department will permit individual Offices of Consumer Counsel to develop the kind of expertise needed to assess the impact of proposed agency actions on consumers.

And, third, vesting responsibility for protecting consumer interests with 23 district offices, rather than one central organization will assure that no single consumer interest is given priority over all others. It concerns me greatly to think that the Federal Government might, in the name of progress, develop a central agency which would, by its very nature, emphasize a few major, well-publicized consumer issues, as advocates have suggested, at the expense of numerous less obvious, but equally important issues. It is not at all unrealistic to expect a new Office of Consumer Representation to concentrate on the major issues on which its supporters have focused their attentions in recent years:

Auto safety, carcinogenic in foods and utility regulation, for example.

Those are all worthy of careful attention, I will not quarrel with that. But we cannot forget that, depending on our point of view, there are an almost limitless number of consumer issues which are similarly worthy of attention. Right now, I am trying to see that Kansas consumers have access to air service to Denver, Little Rock, Memphis, and Atlanta. I am sure each of you are involved in similar efforts on behalf of residents of your districts which fall within the purview of any number of Federal agencies. Those are not "big" issues when viewed from a national point of view, but those "consumer" issues, and they are precisely that—directly effecting our constituents—are of great concern to them. I do not want to see them overlooked in the rush to resolve more sensational issues, as I like to refer to saccharin or I doubt that any of you do either. Congress, I am sure that a consumer counsel in the CAB would consider those issues more important than would an Office of Consumer Representation trying to deal with major controversies like one over saccharin and innumerable less controversial issues simultaneously.

On another point, I am convinced our alternative is the most economical one available. This amendment would authorize $11.5 million to fund the operation of the 23 proposed Offices of Consumer Counsel. Though a specific authorization is not included in the bill, I estimate funding in the $1 million range will be necessary to support the functions of the new Assistant Attorney General for Consumer Protection and Advocacy. That total of $ 12.5 million is considerably below the present expenditure of $21 million or the $15 million proposed for the new Office of Consumer Representation. More importantly, looking at the long term, the fact that the committee proposal would direct the Office of Consumer Representation to refer consumer complaints to the appropriate agency means only one thing to me. The offices reorganized and consolidated now under the committee bill would have to be reconstituted at the agency level before long to handle those referrals. As a result, we will have new expense, and what will consumers get in return? More delays and redtape, another layer of bureaucracy. Not a great bargain, I must say.

This amendment includes a considerable number of safeguards to preserve the independence of the proposed Consumer Counsels and hence to assure their effectiveness. They would be Presidential, not departmental appointees, subject to Senate confirmation. Their budgets would be independently submitted, considered, and administered. And they would have independent, direct access to relevant congressional committees. With those protections and the support and supplementation of the new Assistant Attorney General, those Consumer Counsels through their authorities to intervene in agency proceedings and so forth, will be able to provide an effective consumer voice within the Federal Government.

In short, we do not need to give up on the present structure and create a new agency. We can improve and reorganize present functions—20 of the 23 agencies included under our amendment already have consumer offices. We do need to reorganize them, and more importantly, we need to strengthen them, to give them the authority they need to be able to respond to their mandate to serve the consuming public.

Our amendment addresses that need. "No one agency can arrogate itself to the power of God"—yet consumers need to be represented.

Mr. LEACH. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to my colleague, the gentleman from Iowa.

Mr. LEACH. Mr. Chairman, I rise in support of the substitute offered by my colleague from Kansas and myself. I believe it is the most responsible alternative before the House this afternoon.

Along with a number of Members of this body, I am troubled by the creation of a centralized Consumer Protection Agency. Public opinion, as we all know, is in favor of less Government, not more. It is in favor of less redtape, not more. It is in favor of decentralized decisionmaking, not aggrandized Federal power And most importantly, the people of America today clearly wish to bind the divisive feelings that have dominated recent national politics. Stark consumer-producer antagonisms are neither in the Nation's best interest nor in that of the consumer.

On the other side of the coin, it is clear consumers have been inadequately represented in public decisionmaking. The objective therefore of legislation

should be to establish the most effective approach in providing for consumer input which does not carry the attendant disadvantages of redtape, devisive rhetoric and unneeded costs. The objective should also be to insure that too much power and authority is not posited in one set of hands. As John Locke once said, nothing is more dangerous than a good prince, for inevitally he will be followed by a bad one.

It is for these reasons, that I support the substitute before us. Briefly, our proposal would establish in each of 23 major Federal departments and agencies an independent Office of Consumer Counsel with the power and duty to intervene in their own agency's actions. Second, the substitute calls for a Division of Consumer Protection and Advocacy to be established in the Justice Department with authority to initiate or participate in Federal court proceedings for review of Federal agency actions where significant consumer interests are at stake.

This is not a weak substitute. Unlike the committee compromise, we have not been forced to water down the merits of our proposal. In fact we offer this substitute as a more attractive alternative to the committee substitute and hope that our colleagues who are disappointed with the committee's approach will join us in supporting this alternative.

In closing, I would like to comment on the most significant strengths of the substitute. First the consumer counsel in each individual agency will be able to develop a real, working expertise in a particular field of regulation or public policy, unlike the staff of a central agency with limited resources who will have to constantly discriminate between competing interests and demands from consumers in all areas.

Second, the counsels have a firmly estalished degree of independence, both in terms of being appointed by the President, with Senate confirmation, and in having a separately identified budget. The rights of business and producers will be protected by limiting the right of consumer counsel to go to court on behalf of consumers. Any potential legal action will be deferred to the Justice Department where such power is more appropriately posited. The ultimate right to go to court should not be denied to any aggrieved party, but where that right and authority is vested is crucial in maintaining a balance between consumer and producer rights.

Mr. Chairman, I believe our approach minimizes the potential of unproductive confrontation between the business sector and consumers while at the same time assuring the people of this country that there will be adequate attention to their interests at the very roots of public policy decisionmaking. I would urge my colleagues to join us in supporting this constructive substitute.

The CHAIRMAN. The time of the gentleman from Kansas (Mr. GLICKMAN) has expired.

(By unanimous consent, Mr. GLICKMAN was allowed to proceed for 3 additional minutes.)

Mr. JACOBS. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from Indiana.

Mr. JACOBS. Mr. Chairman, since I came to the Congress, I have constantly experienced the new breed of representatives and have noted that in most cases the more things change, the more they remain the same.

Therefore, Mr. Chairman, I rise to take this opportunity to commend the gentleman from Kansas (Mr. GLICKMAN), the gentleman in the well, for being a genuine example of a new breed who thinks for himself and does not bow to political pressure.

Mr. Chairman, I think that this substitute represents the product of that kind of political courage, and I commend the gentleman from Kansas (Mr. GLICKMAN) for it.

Mr. GLICKMAN. Mr. Chairman, I thank the gentleman.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from New York.

Mr. HORTON. Mr. Chairman, I would like to get some information.

How many Offices of Consumer Counsel is it proposed that this substitute would set up?

Mr. GLICKMAN. There would be 23.

Mr. HORTON. How many people would be involved? How many new people would have to be added to the payroll in order to staff these offices, in the aggregate?

Mr. GLICKMAN. It is the intention of the author that there would be a reorganization and there is an authorized amount of $500,000 per office, which aggregates an amount of about $11.5 million.

It is my intention and it is the intention of the bill that that reorganization occur so that there be no additional expenditure whatsoever and no additional people whatsoever.

Mr. HORTON. Does the gentleman mean reorganization within each of the departments or wherever the offices would be set up?

Mr. GLICKMAN. What I basically have in mind is this: These consumer units exist all over the Government. Most of the time they are worthless.

I have talked to many of the people who staff these particular consumer units. I propose keeping the basic consumer unit, giving them statutory independence, making the head of that unit Presidentially appointed so that he or she is not subject to the Secretary of the Department. I would assume that that staffing would occur by reason of whoever was appointed to head the unit.

Mr. HORTON. That is the way the gentleman sets it up in this substitute; is that correct?

Mr. GLICKMAN. It provides for general reorganization, and that general reorganization is comparable to the reorganization contained in the committee bill, H.R. 9718.

Mr. HORTON. But does the substitute provide for the head of the Office of Consumer Counsel to be appointed by the President, with the advice of the Senate?

Mr. GLICKMAN. It does.

Mr. HORTON. The gentleman mentioned $500,000?

Mr. GLICKMAN. That is correct.

Mr. HORTON. Is that what the gentleman estimates to be the total cost of this proposal?

Mr. GLICKMAN. It would be $500,000 per agency.

Mr. HORTON. Per agency?

Mr. GLICKMAN. That is what I put in the authorizing legislation because, in my review of the various agencies, I think that it is a responsible figure.

Mr. HORTON. Is the gentleman talking about an overall figure of $11 million?

Mr. GLICKMAN. $11.5 million in the Offices of Consumer Counsel themselves.

Mr. GEPHARDT. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from Missouri.

Mr. GEPHARDT. Mr. Chairman, I rise in support of the Glickman-Leach substitute amendment which would create Offices of Consumer Counsel in each of 23 agencies rather than create one centralized office designated to represent consumer interests in agency proceedings.

I believe the decentralized approach of the Glickman-Leach substitute offers better representation of consumer's interests with greater efficiency at a lower cost.

A single agency will be limited in its ability to act in all administrative proceedings affecting consumers—it will have to select several major cases and concentrate on them. Decentralization, on the other hand, assures that the consumer interest will be argued and explained before administrative agencies on more issues, large and small, than with a centralized approach. A consumer agency will be an illusion if it handles a few cases of broad impact a year but neglects the thousands of decisionmaking hearings where most consumers are affected in their daily lives.

By creating consumer counsels in each agency, furthermore, consumer interests can be presented with greater expertise and intensity in specific areas. By functioning within each agency, the consumer counsels will undoubtedly develop greater familiarity with the activities and issues handled by their respective agencies and thereby better evaluate their impact on consumers.

An article which appeared in the Washington Post this past Sunday February 5 well explained the advantages of a decentralized approach. The author, Arthur E. Rowse, wrote:

> Proponents of such centralization claim there would be better coordination. But would airlift passengers, for example, really be able to get better service than they now get with their problems at the Civil Aeronautics Board, whose consumer-advocate office would be transferred? Would the other offices operate better in a bigger organizational structure with a broader focus? It seems doubtful.

Not only would the Glickman-Leach substitute provide for better consumer representation, it also offers greater efficiency. By avoiding the extra layer of bureaucracy that would result from creation of a separate office, it should minimize delays and redtape. In addition, I

question the efficiency arguments of supporters of a single independent office. While existing consumer affairs offices spread throughout the executive branch would be eliminated initially, inevitably Federal departments, in trying to comply with requests and directives of the Office of Consumer Representation, will find it necessary to establish their own bureaus to accommodate the demands of the OCR. Thus, the reorganization advantages would soon be eliminated.

A final advantage of the Glickman-Leach substitute is that it offers consumer representation with a smaller price tag than an independent office. Each Consumer Counsel Office would have a separate authorization of $500,000. The new division within the Justice Department, which would have authority to litigate consumer interests, would be funded at an estimated level of $1 million. Thus, the Glickman-Leach substitute would cost about $12.5 million as compared with the initial authorization for the OCR of $15 million.

For some time I have been concerned about the implications of an independent Federal agency to represent consumer interests. Rather than dwell on them now, I call to my colleagues attention two articles from the Washington Post: The Arthur Rowse column I mentioned earlier and an editorial which appeared in today's paper. They both provide articulate explanations of the many disadvantages of the proposed Office of Consumer Representation.

But they also, appropriatedly, point out the need for a stronger consumer voice before Government agencies. The Glickman-Leach substitute offers that representation in an effective and efficient manner without the problems of an independent agency. I urge you to support this substitute amendment. I commend the gentleman from Kansas (Mr. GLICKMAN) for offering it, and I intend to vote for this substitute.

Mr. Chairman, at this point I include the following two items from the Washington Post:

[From the Washington Post, Feb. 7, 1978]

REPRESENTING CONSUMERS

After much maneuvering and many delays, the latest version of the consumer-agency legislation is scheduled to come before the House today. During earlier congressional go-rounds on this issue, we endorsed the creation of a new federal agency to represent consumers' viewpoints before regulatory bodies and in judicial reviews of regulatory decisions. But both the legislation and conditions have changed. In our view, the advocates of the current measure, H.R. 9718, have failed to make a persuasive case for enacting, now, what is left of the idea.

We are not primarily concerned about the powers or costs of the Office of Consumer Representation now proposed. The agency's authority has been substantially cut back, so that it would not have a general license to quiz companies or appeal any regulatory decision it didn't like. On the question of cost, the bill's sponsors maintain that the $15-million budget of the new agency would be more than offset by the transfer or elimination of existing consumer programs in over 20 agencies. We find the net-savings claim a bit hard to swallow. If the new office did turn out to be as aggressive as its sponsors plan, its budget would surely grow. Still, it could be worth much more than $15 million—*if* it were the best way to make federal regulatory bodies more sensitive to considerations such as cost, public health, safety and the other factors often cited as "consumers' " concerns.

That gets to the real problems with this bill. One is the assumption that consumers' interests are so clear, so consistent—and somehow so distinct from the general public interest. Consumer advocates argue, of course, that they do represent the general public. Yet the public interest, in the modern regulatory world, is usually more complex; it may involve balancing a given degree of safety against a certain increment of cost, or keeping down tomorrow's price increases without jeopardizing next year's price increases without jeopardizing next year's supplies, or making a much more complicated type of accommodation among a hundred forces and factors bearing on the marketplace. Those who emphasize health or safety or retail cost should certainly be heard, along with those who have other priorities. But to enshrine any particular "consumer" viewpoint in a government advocacy office raises philosophical problems that trouble us.

Beyond that, what is the real purpose here? Surely it's not just to add another voice at agencies' hearings or another pile of briefs on commissioners' desks. One's aim may be "consumer justice," as Mark Green puts it on the opposite page today, or a better grasp of the public interest in all its complexities. In either case, experience suggests that the most productive course is to change the character of the regulatory agencies themselves.

This may sound like a hopeless task. But the Federal Trade Commission, for one, made notable progress even during the Nixon-Ford years when most presidential appointments and executive-branch attitudes were inclined to favor corporate views. Since President Carter took office, some excellent appointments and a real shift in governmental attitudes have greatly improved the prospects for real regulatory reform. Thus there is much less need for any separate intervenor with limited powers—and much more reason for Congress to set this idea aside and concentrate on helping improve the regulatory agencies themselves.

[From the Washington Post, Feb. 5, 1978]

THE CONSUMER AGENCY BILL: TIME FOR A RECALL?

(By Arthur E. Rowse)

Once a proposition captures the fancy of the ruling clique of the so-called consumer movement, it seems to attain a sanctity that transcends any doubts or questions from followers until the final judgment of Congress has been rendered. During the traditional watering down of legislation to gain votes, a good consumer leader is never supposed to decide that the product is no longer a bargain. Such blind devotion to ideas despite changing conditions has helped fashion defective laws of packaging, lending, product safety, billing errors, settlement costs, warrants, to name only a few.

A current example of this lemming-like process at work is the plan to set up a government-wide consumer agency to monitor other federal agencies.

When it was first proposed by Ralph Nader eight years ago, President Nixon had managed to put regulated industries in charge of nearly every regulatory agency, thus effectively thwarting the concept that government should serve all the people, not just the chosen few.

But the Carter administration has begun to reverse that process. Many former consumer crusaders hold influential positions in the bureaucracy. And for the first time in eight years, a chief executive communicates with Ralph Nader. Regulatory agencies are slowly being returned to the people. They are even paying expenses of citizen witnesses.

Government is also becoming more responsive to the public through laws requiring open meetings, fewer secrets and closer scrutiny of budgets and administrative actions. Leaner, if not less, government also is in fashion.

In other words, there is less need for a broad consumer agency and less public desire for any new agency.

The current agency proposal is also less—far less—than what it used to be. Nader's idea was to set up a watchdog to ride herd on regulators who fail to perform properly. The agency was to have strong powers to intervene forcefully in other agency actions, to subpoena business records and to seek judicial review of such actions.

But during the interim, these ideas have been whittled down to virtually nothing. The bill pending in the House (H.R. 9718) would give the agency no more power than a private citizen to participate in other agency proceedings and seek court review. The subpoena power is also gone.

The original proposal also has been narrowed by giving exemptions to large economic factors, including food, energy, labor and the military.

Still another concession by the bill's sponsors is a section allowing the transfer of 20 separate consumer offices and affiliated services in the government to the proposed agency.

The Office of Management and Budget estimates that these changes will cut $21.5 million from current budgets, leaving a net saving of $6.5 million, since the proposed agency would cost $15 million.

But how can $21.5 million in government activities be purchased for $15 million? "Much present waste will be avoided," assures a White House consumer official. Yet OMB says people in present consumer activities will not lose their jobs.

Proponents of such centralization claim there would be better coordination. But would airline passengers, for example, really be able to get better service than they now get with their problems at the Civil Aeronautics Board, whose consumer-advocate office would be transferred? Would the other offices operate better in a bigger organizational structure with a broader focus? It seems doubtful.

The major concessions made to build support for the bill have brought no noticeable benefits. In fact, while the plan has been steadily weakened, the opposition—as measured by congressional votes—has become stronger. In previous years, a stronger bill passed the House by votes of 344 to 44 and 293 to 94. The business community has proven it will fight even a piece of paper with the words "consumer agency" on it.

Why then does the consumer establishment continue to work so hard for so little?

One reason may be to save face with a paper victory. Another may be a pursuit of jobs left vacant by transfers from present consumer offices. Still another may be an inability to review priorities and consider new approaches in changed circumstances.

Continuing to push for a concept that has been almost entirely traded away for less and less support in Congress drains precious energy from issues that are far larger and more urgent for consumers. Examples are inflation, unsafe diet, defective cars, unfair auto insurance, life insurance deceptions and oil and gas monopolies.

A plan that gives up $6.5 million more in present consumer services than it provides and has no more legal power than an ordinary citizen seems to be a move backward instead of forward.

A victory like that would really be a defeat. It would show that consumer leaders will settle for anything rather than fight for

something significant. It would also risk putting a lot of consumer hopes into a mini-agency with no power to regulate anything.

Furthermore, it would give representatives a beautiful opportunity to get credit for backing consumer interests while voting for an empty bill. Defeat would be still worse. It not only might kill the idea for good but could make passage of other consumer legislation more difficult by showing the consumer movement to be weaker than it really is.

American consumers might be better off without a House vote on the agency bill as it now stands. In the final analysis, consumer leaders might serve the public best by either strengthening the measure significantly or switching to something more productive.

The CHAIRMAN. The time of the gentleman from Kansas (Mr. GLICKMAN) has again expired.

(On request of Mr. FRENZEL and by unanimous consent, Mr. GLICKMAN was allowed to proceed for 5 additional minutes.)

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Chairman, I would like to second the remarks of the gentleman from Indiana (Mr. JACOBS) and of the gentleman from Missouri (Mr. GEPHARDT) about the fine work that the authors of this amendments have done.

I personally am very tired of old rhetoric and tired symbolism in this body, and I think the two gentlemen who have presented this amendment have done some original thinking. In my judgment, the proposal which they are now putting before us gives the consumer a real chance to profit under our system, to have a voice, and to have some input in the decisionmaking of our Federal Government.

I see some real advantages in having the insiders meet the people rather than to have an outside confrontation by agencies. I see some other advantages in being able to maintain the time schedule of the agency which has to make the decision, and not worry about the second guessing of outsiders, or about information seeking. I particularly like the point about the elitism of the central institution, the new agency which is going to tell everybody how to operate.

I congratulate the gentleman. I think he has given the House an excellent opportunity.

Mrs. KEYS. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentlewoman from Kansas.

Mrs. KEYS. Mr. Chairman, I commend the gentleman for his excellent work in pressing the substitute. I support the substitute, and I would like to say to my other colleagues that my long, soul searching working on the effort of effective consumer representation with many people from universities who have worked on this issue have convinced me that strengthening and making more independent the consumer offices within the agencies will be much more beneficial toward seeing real consumer representation in each proceeding.

I support the concept. I think the gentleman should be commended for his excellent work in bringing this to the floor of the House over considerable opposition.

Mr. GLICKMAN. I thank the gentlewoman.

Mr. BROOKS. Mr. Chairman, I rise in opposition to the amendment.

I want to say, very briefly, that the primary reason we need an independent consumer office is because the existing consumer offices in these agencies have utterly failed to effectively advocate any consumers' views. It is unrealistic to expect an office to operate independently from the department within which it is located. Even if it is separately funded, it is only human for the in-house "consumer offices" to feel somewhat restrained from criticizing activities of their own agencies.

Nothing in the substitute offered by our friend, Mr. GLICKMAN assures the independence of those consumer offices. H.R. 9718, by consolidating various consumer offices now spread throughout the Federal Government, will provide an effective and independent and cost-efficient voice for consumers.

I would ask for defeat of this amendment.

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield.

Mr. GLICKMAN. The gentleman raises a good point, and that is the question of independence. That is one which we have all been wrestling with, and it is a serious problem. I do not deny that I have been concerned about the fact that these consumer units do need to be independent.

In the bill, we have tried to remedy the law that exists right now to strengthen the structural framework by which we have this independence. It may not be perfect, but I think it is about as close as we could have come in the type of legislation we are dealing with. I do believe offices will have greater independence than they have now.

Mr. BROOKS. I appreciate the gentleman's views, but feel that as long as they work for an agency, they will be somewhat limited and hindered by that agency.

Mr. McCLOSKEY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, this amendment leaves me in a quandary, and I would like to ask some questions of the sponsors. If I understand it correctly, it is the intention of the sponsors by this amendment to create even a stronger agency than is created in the basic bill that is before us. Is it correct that what you have done is to give precisely the same powers to the individuals who will occupy the positions of consumer counsel in the 23 offices as are given to the consumer advocate permitted in the bill?

Mr. GLICKMAN. No. We give the consumer counsel basically the power to intervene. We do not give that consumer counsel the power to sue and we do not give that consumer counsel the power to request interrogatories.

Mr. McCLOSKEY. The power to require interrogatories has been taken out of the original bill and the power to sue on the part of the consumer representative in the original bill has been limited to extraordinary circumstances. But if the consumer advocate, say, at Agriculture, does not have the power to test in litigation a decision by the Department of Agriculture, then how does he have the power to really advocate the consumer's interest?

Mr. GLICKMAN. In the first place, as stated in the Brooks-Rosenthal substitute, the main court of law occurs at the agency level itself where, I understand, by principles of administrative law, at that level 90 percent of the problem is solved right there. However, we do create within the Justice Department an Assistant Attorney General for Consumer Protection and that person is given the power under certain limited circumstances but under statutory circumstances to sue. And he can sue other agencies and can sue the Secretary of the agency. And we have an opinion from the Library of Congress stating that is an appropriate method for them to do.

Mr. McCLOSKEY. I want to say to the gentleman, I commend him for a thought that I think makes a real contribution in this field, but I do not think we can legislate on the floor of this House a change of this magnitude without careful consideration by the committee. I felt, for example, that H.R. 9718 substitute should have gone back to the committee for careful consideration. That was a decision made by others, not me. We have come to the floor with a completely new bill as a substitute which we have examined for many months, but not through committee debate. But here is a completely new concept which we have not had the opportunity to examine at all.

I would like to say to the gentleman, that the reason I offered the amendment I did 3 years ago to abolish the various existing consumer offices, if we were to create a new one, was because as we went through these 23 agencies one by one we found, in every instance the consumer advocate was responsible to the Secretary and he was so far down the line in the chain of command that to expect him to exercise independent judgment and possibly a challenge to the Secretary was beyond credible belief.

The gentleman has tried to solve this problem by appointing the counsels with the advice and consent of the Senate. We would then have 23 new assistants who would be submerged in this respective Cabinet offices without the power to test their boss' decision by lawsuit. It seems to me it is fallacious to expect allegedly-independent consumer advocates buried in 23 agencies to take real action.

I have yet to find in any Cabinet office an individual willing to delegate his decisionmaking authority to somebody underneath him. In the Food and Drug Administration the Administrator appoints his general counsel and relies on his advice. We cannot expect the General Counsel to override his boss.

Mr. LEACH. Mr. Chairman, will the gentleman yield?

Mr. McCLOSKEY. I yield to the gentleman from Iowa.

Mr. LEACH. Mr. Chairman, on that point it is fair to point out that if we

have a single consumer protector at the top of the Consumer Protection Agency, that person is subject to Presidential authority within limits, and we are better off with 23 separate people who might have a degree of independence. Certainly the analogy of independence is weaker at the top than at the bottom.

It is true we are legislating on the floor, but there is no more important legislation than that which is before us today.

Mr. McCLOSKEY. I recognize that defect of our procedure today, but I still do not get the point how a person acting underneath a Secretary has independence. Granted that he has been appointed with the advice and consent of the Senate, I cannot imagine that a subordinate of the Secretary of Agriculture is going to feel much independence in dealing with the Secretary. The real independence must come from an agency that feels no responsibility to the Department of Agriculture.

Mr. TUCKER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like also to engage in a colloquy with my friend, the distinguished gentleman from Kansas, with regard to his proposal.

I served as Attorney General of my State of Arkansas for two terms, and it was that experience that convinced me of the need for some type of Consumer Protection Agency that could ask questions of the bureaucracy that we have in this country.

I think all of us agree that our current method of proposing regulations is unsatisfactory. I think everybody agrees on that. We all get correspondence on it. The question is: Are we going to do anything to change it? The idea of the gentleman from Kansas (Mr. GLICKMAN) may be the proper approach.

I have been inclined to support strongly the approach of the chairman of our committee, the gentleman from Texas (Mr. BROOKS). But, let me give an example of a problem that severely harmed the people of my State. I would like to know how your agencies would have been able to respond if this same situation occurred again.

In 1973, just prior to, and following in the wake of, the Arab oil embargo, the Cost of Living Council, acting under the second stage of the price control regulations then in effect adjusted the method of allocating prices between special fuels and other types of fuels. Those regulations were subsequently adopted by the Federal Energy Agency. As a result of this innocuous change in regulations, a very unhappy change occurred in the price of propane. Prices went up 300 to 400 percent in a very short period of time. This had an incredible impact. For each nickel of increase in the price of propane the people in my state paid $25 million more—and it did not go up just one nickel; it went up about 5 nickels.

In order to try and help, I filed a petition, as the State Attorney General.

Mr. GLICKMAN. Who did the gentleman sue?

Mr. TUCKER. The Federal Energy Office, initially as an administrative action—but, finally, I went to court and we won our point. The law suit pressured them into changing the regulations. But our people suffered a severe and unfair hardship first.

So, what I want to see is an agency that asks some questions early, one that agrees with Finley Peter Dunn's character, Uncle Abner, who always said, "Trust everybody, but always cut the cards."

I want to see an agency that can cut the cards effectively.

Could it have gone to court and stopped the agency from issuing that ridiculous and damaging regulation? If not, then I cannot support it, if it does not have that authority then I do not want it.

Mr. GLICKMAN. First, it cannot go to court. It would have to make the intervention in its own action and put that intervention into the Federal Register. They cannot intervene if there is not a request for intervention that comes from a third party asking the council to intervene.

Mr. TUCKER. Must it be allowed to intervene at that point?

Mr. GLICKMAN. It can intervene if there is justification. However, if you get an incompetent, and everybody has been talking about a turkey around here, if you have a turkey in charge of the office it may not intervene. It says in section 6(b)(a) that whenever a Consumer Council believes—that whenever any civil action by the Assistant Attorney General—that intervention in such civil action is warranted, it shall recommend to the Assistant Attorney General for Consumer Protection, who shall take such action if the conditions outlined in subparagraph (1) are met. Those conditions are that judicial proceedings must be necessary to preserve the interests of justice.

Mr. TUCKER. Who defends the agency?

Mr. GLICKMAN. The Justice Department may.

Mr. TUCKER. So it will represent itself?

Mr. GLICKMAN. I have a memorandum that was requested, I believe, by the committee itself to that specific issue because it was raised back in May by the American Law Institute. They said that in many, many cases the Justice Department represents both parties to the suit. It may not if it is dealing with an independent agency, but otherwise obviously it represents both parties.

Mr. TUCKER. Mr. Chairman, I do appreciate the responses of the gentleman from Kansas (Mr. GLICKMAN) and the gentleman's interest in the bill but I must say that I feel if we are going to tell the American people that we are going to have an agency that will protect them from regulation-happy bureaucrats, that we should have one that is willing and able to ask hard questions, make the facts known, and have the capacity to put some reins on the bureaucracy. But if we are going to create this office, let's be sure it has some possibility of succeeding. I believe my colleagues recognize that it is important that we succeed. But we won't, if this office does not have the power to go to court with its own counsel and sue and say, "Listen, the bureaucrats are wrong on this and we want it checked."

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. WAXMAN and by unanimous consent, Mr. TUCKER was allowed to proceed for 2 additional minutes.)

Mr. WAXMAN. Mr. Chairman, if the gentleman will yield, I think the proponents of this amendment are quite sincere in wanting an independent consumer representation, that is what we are talking about in this legislation, but there are some major problems to this proposal in leading to an independent consumer representation even if we have presidential appointees or a consumer council in the 23 departments. It does not follow that we will have independence just because it is a Presidential appointment.

Experience proves that Under Secretaries, Deputy Secretaries, and other top officials of existing agencies are supportive in every meaningful way to the head of their agencies, even though they are appointed by the President. The counsel itself and all those who would be working for him are going to be organized under the department head. So I think we have a real problem about calling this an independent consumer representative.

Another reality is that the creation of 23 separate offices and an Assistant Attorney General will create a bureaucratic nightmare of the worst kind. There will be a duplication of effort, overlap, and general confusion, in addition to the fact, as the gentleman pointed out, that the Attorney General will then be called upon to sue himself in effect, because the only way the matter will get to court will be for that Attorney General, set up under the Glickman amendment to represent the consumer point of view, to sue the Attorney General's Office that is representing the agency itself. There is a potential for conflict of interest.

I think we can have true independent consumer representation by this one agency, and I would urge that we defeat the amendment.

Mr. TUCKER. I concur, and I appreciate the gentleman from California's remark.

Mr. ROSENTHAL. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, there is very little that can be added. The gentleman from Arkansas, in dialog with the gentleman from California, made it quite clear. The whole defect in the consumer representation mechanism was the inability of someone to, No. 1, present a case and a point of view, and, No. 2, the inability to challenge the decision if the decision was defective because the point of view was not presented. The 23 consumer counsels, all of whom would be presumably appointed by the President with the advice and consent of the Senate, would present an extraordinarily cumbersome procedure. But the fact is that the Consumer Counsels in each of the agencies would be subordinates to their agency heads.

Let us look in real life at what would happen. The consumer counsel makes a representation or a presentation to a quasi-judicial hearing or a board or agency within a department. That person thinks twice, if not 10 times, before he or she wants to challenge the decisions his boss who recommended his appointment. There is no mechanism psychologically, emotionally, politically, or otherwise, to stand up to one's boss and say, I am going to take this decision to the Attorney General of the United States to appeal your decision, because that person will have very, very modest tenure in his or her position after he does that once or twice.

We want to cement into statutory language independence, the ability to challenge a decision and to take it to court.

Second, in the Department of Justice, under the Glickman-Leach substitute, the Attorney General is the lawyer representative of both the department that defends the lawsuit and the person or plaintiff who represents the challenging party. How anyone can separate that conflict of interest is beyond me. So it does violence to the ability to be an independent person. It does violence to the ability to challenge it efficaciously. And it does not provide for independent counsel.

The whole trouble, the thing that we have tried to speak of so frequently here today, is the ability to have independent persons and the ability to go to court to challenge a defective decision. While the Glickman-Leach substitute is a thoughtful, responsible desire to create an independent counsel, it does exactly the opposite. It creates a subordinate, subservient-type person who cannot challenge a decision that that person feels is adverse to the consumer interests. Then if by some miracle they do challenge it, they go to the same lawyer that is going to defend it.

How many lawyers represent both sides of the case? How many lawyers represent the husband and wife? How many lawyers represent the plaintiff and defendant? It is just an unworkable solution—totally, massively unworkable, and I urge its defeat.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield?

Mr. ROSENTHAL. I yield to the gentleman from California.

Mr. WAXMAN. I thank the gentleman for yielding.

One of the points that has concerned me about this amendment is that it provides that each of the 24 agencies that would be created would get the same amount of money.

Mr. ROSENTHAL. Right, exactly. Each one gets $500,000 without any concern for the volume of litigation, the needs and desires of the constituency of that agency. It simply does not make any sense.

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield?

Mr. ROSENTHAL. I yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Chairman, first of all, each gets the maximum of $500,000. That is the best good faith estimate I could determine of total cost. I assume they are all good, the issue will be dealt with again.

Mr. ROSENTHAL. If the matter is taken to court, are both parties represented by the Attorney General?

Mr. GLICKMAN. Of course, and that happens all the time in government. It happens with agencies such as the FCC and the ICC.

Mr. ROSENTHAL. In the gentleman's lifetime, has the gentleman ever found where one lawyer represents both parties?

Mr. GLICKMAN. If I may point out, the same memorandum the gentleman is referring to——

Mr. ROSENTHAL. No; the memorandum of the Library of Congress said it was constitutional for one agency to sue another agency, but they certainly do not want the same lawyer representing both sides of the case.

Mr. GLICKMAN. It does not say anything like that. The memo says the Justice Department may sue on behalf of one agency against the Justice Department representing another agency.

Mr. ROSENTHAL. How will they settle the suit? How will they get together?

Mr. GLICKMAN. They do it all the time.

Mr. ROSENTHAL. They do not do it all the time. What the courts have held, it is constitutional for one agency to sue another agency. They have never held that the same lawyer can decide to represent both parties. If a lawyer loses in the district court, how does he decide to take the case up on appeal?

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. HORTON. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the Glickman substitute.

First of all, I would like to ask the sponsor of the substitute if there is a listing of the 23 agencies that are involved; does the gentleman have such a list?

Mr. GLICKMAN. Mr. Chairman, there are some agencies listed on pages 5 and 6 of the bill. Does the gentleman want me to list them off?

Mr. HORTON. Do they include all the regulatory agencies and the agencies that have regulatory authority?

Mr. GLICKMAN. It was the intention at the time the memo was drafted that it be all-encompassing. The gentleman would have to refer to it to determine whether they did so.

Mr. HORTON. The difficulty I have is that there might be some regulatory agencies that are left out of the listing, that might not be covered. I am sure the sponsors of the bill would not want that to happen; but I do want to commend the sponsors of the resolution, the gentleman from Kansas (Mr. GLICKMAN) and the gentleman from Iowa (Mr. LEACH) for providing this debate with an alternative.

Now, 20 consumer-related programs will be transferred to the OCR under the substitute offered by the gentleman from Texas (Mr. BROOKS). The Glickman substitute creates 23 Offices of Consumer Counsel appropriating $500,000 for each, totaling $11.5 million.

The question that I have with regard to the Glickman substitute is that I think it is very difficult to create an independent Office of Consumer Counsel. When we created the Department of Energy, we established within the Department a new agency, which was the Federal Energy Regulatory Commission, and we had a great deal of discussion on how to insure that this agency would be completely independent.

Some questions came up with regard to the budget: Who would prepare the budget and who would have final say-so with regard to the budget, who would select the personnel and all the other questions that are involved.

Even then there was some question as to whether or not there would be total independence. I seriously question that even if we solve all the problems, whether or not we can have complete independence in an Office of Consumer Counsel.

We may also find that we would have more independence in one office than we would have in another office.

This substitute is not something, it seems to me, that we can write here on the floor. We cannot write a bill which can resolve these problems and give us that type of independence. Personally, I do not opt for this approach. I would suggest that those who are opposed to the creation of the Office of Consumer Representation would be even more opposed to this approach because it is going to be much more costly, since we are dealing with 23 agencies. They are going to say, "We are not going to be able to do the job with the personnel now authorized. We need more personnel."

So when we talk about building up a bureaucracy, we should remember we are not going to build up just one bureaucracy but 23 bureaucracies in order to resolve this question.

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield?

Mr. HORTON. Yes, I yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Chairman, if I get time later on, I will try to deal with the specifics of the independence issue, because I think they are covered in the bill.

What is going to happen to the issue in the main bill under which the consumer agency, OCR, must refer back to the agencies consumer complaints? Who is going to handle those kinds of complaints?

Mr. HORTON. That is going to be done by the Office of Consumer Representation.

Mr. GLICKMAN. The bill has a requirement, as I understand it, with regard to consumer complaints.

The CHAIRMAN. The time of the gentleman from New York (Mr. HORTON) has expired.

(By unanimous consent, Mr. HORTON was allowed to proceed for 2 additional minutes.)

Mr. HORTON. Mr. Chairman, the point I would like to make is that as far as I am personally concerned, I feel that there is a need for a centralized Office of Consumer Representation. I think if we proceed in that way, we can have a better handle on the budget and on the num-

ber of persons involved, and we will be better able to see what can be achieved.

When we have 23 consumer offices we are going to have 23 reports back to the Congress. We are going to have to have some type of oversight over those 23 offices. I believe our purposes can be better accomplished under the OCR instead of creating 23 offices of Consumer Council.

The CHAIRMAN. The time of the gentleman from New York (Mr. HORTON) has again expired.

(On request of Mr. KOSTMAYER and by unanimous consent, Mr. HORTON was allowed to proceed for 1 addiitonal minute.)

Mr. KOSTMAYER. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from Pennsylvania.

Mr. KOSTMAYER. Mr. Chairman, I would like to ask the gentleman from Kansas (Mr. GLICKMAN) a question, if I may.

It seems to me that this proposal decentralizes the agency and creates a need for 23 supergrade agencies. My concern is this, and I direct it to my friend, the gentleman from Kansas (Mr. GLICKMAN).

If the consumer violations do not occur within the 23 agencies in which we have established a consumer representation, how are those questions to be resolved? I refer, for example, to the Home Loan Bank Board, the Federal Reserve Board, and the Federal Deposit Insurance Corporation.

I think the value of the OCR is that it has the ability to represent consumers throughout the entire Government, and the weakness of the proposal of the gentleman from Kansas (Mr. GLICKMAN) is that only those complaints falling in these particular 23 agencies are covered.

What if they fall in some of these other agencies which I have mentioned?

Mr. GLICKMAN. Mr. Chairman, let me say to the gentleman that we have tried to fill the cracks. There may be a few places where something was left out unintentionally. If the gentleman would like to offer an amendment to fill those cracks, I would be glad to accept it.

Mr. KOSTMAYER. Mr. Chairman, I have offered that in a separate bill. It is known as the establishment of the Office of Consumer Representation.

Mrs. SCHROEDER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment in the nature of a substitute offered by the gentleman from Kansas (Mr. GLICKMAN).

Mr. Chairman, I have been listening to Members who first stand up and compliment the gentleman from Iowa (Mr. LEACH) and the gentleman from Kansas (Mr. GLICKMAN), and then turn around and say that it is too bad they are tilting at this windmill. I want to get up and not only compliment the gentlemen but say that they are hitting the right windmill. I would like to point out why I am supporting the Glickman-Leach "windmill," as it might be designated by some of the Members here.

First of all, I chair the Subcommittee on Employee Ethics and Utilization of the Committee on Post Office and Civil Service, and in that position I have had a lot of opportunities to look at these issues. I think that what these two gentlemen have come up with here is a very brilliant idea, and let me give the Members some of the reasons why I think that.

First, if we create a new agency, how many more positions would we have to create that have nothing to do with representing the consumer? We would have to create departments of personnel; we would have to create affirmative action offices; we would have to create a budget office; and we know we would have to create a congressional liaison office that would come over here and explain to us what the agency is doing.

I do not know how many positions there would be in the consumer agency or the consumer relations group, but I do know that for a Department of Education, it has been estimated there would be about 800 slots created that have nothing to do with education. It is a case of creating an agency and fueling the furnace. This amendment is a way to avoid having to create all of those additional slots which do not directly serve the consumer. Instead, the people they are putting on board will be in-house, in the agencies, and acting.

Second, the one thing we have found in dealing with ethics legislation—and we did have extensive hearings on ethics legislation—is that you can have an ethics counsel in every agency, but if the agency is not interested in ethics, obviously the counsel is not going to push it. This amendment has found a way around that by having Presidential appointees. People are saying they will not be independent. The answer is, I think, that you have 23 shots at them being independent, whereas with the Consumer Protection Agency there is only one shot, and if the man or woman in that agency turns out to want to cool it, he or she can certainly do it.

This way, we have at least 23 different shots that someone will be independent. All we have to do is to look at the Marston case and find out that getting rid of appointees is not the easiest thing to do. They are going to make noise; they are going to contact the press, and so forth. The other things I found, in dealing with the bureaucracy around here, is that he who has the information has the power. I have found that different agencies do not share information with each other and they do not share information with Congress. We all know that game, when they come up before us. We ask them a question, and they sit there with canary feathers in their mouths, giggling, and as long as you do not ask the right question in the right way, they can always escape, and they always look for a wonderful, wonderful out. "We don't volunteer anything. Thank you very much." It is almost like the Army. "You didn't ask the right question. It is all your fault."

If you have 23 in-house people who know where the files are, and who knows what is going on, you have a much greater chance that they are going to have the right information. And I find more and more and more that information is nine-tenths of the game.

The argument about the Justice Department representing both sides, let me answer that, because I happen to have been lucky enough to have been in the Senate one day when this issue came up in front of Appropriations. I will tell you what they do. They hire counsel for the other side. They weigh each case. If it looks overly difficult, they hire outside counsel. And we fund it year after year after year. It happens quite routinely. They come up with a big list. The other thing is that there is more than one lawyer in the Department of Justice. Either that, or they have phonied up the sheet they are turning in. So there are two different groups over there, and there are two different agencies, and they might have different bosses. It is not like a three-man law firm. Where they are, they have an awful lot of space over there, and we ought to consider taking some of it over for congressional office space. We have to look at where we are really coming down to. We have to look at what it is we are talking about.

The CHAIRMAN. The time of the gentlewoman from Colorado (Mrs. SCHROEDER) has expired.

(By unanimous consent, Mrs. SCHROEDER was allowed to proceed for 2 additional minutes.)

Mrs. SCHROEDER. We are talking about finding a way to have people in-house who really know what is going on. They may decide to cop out. On the other hand, they may decide that their career is more important and they are going to be more aggressive and feel a real responsibility to the President who appointed them. I assume they are not the normal civil servant coming up through the testing process or they would not be Presidential appointees, anyway. So I really think the gentlemen have made an excellent, excellent presentation. I think from the hearings we had in my Subcommittee on Ethics Legislation we determined the same outcome, that there should be ethics counselors in each agency, because if they are not in the agency they do not know the right questions to ask.

They do not even know what the potential conflicts of interest might be. It will take them 5 years to even find that much out.

We wanted them in there, but we wanted a force outside so that the head of each agency could not obviate what we wanted.

We had a great fight going on that, but the gentlemen have taken the model that we had, including the extensive hearings makes an incredible amount of sense. It to the consumer agency; and I think that makes an incredible amount of sense. It is not the old formula which we know around here, but I think the day has come when we have to look at the old formula and change it around.

Therefore, Mr. Chairman, I say, congratulations to the authors of the amendment. I do not think it is a windmill. I think it is a breakthrough, and I think it is a way for us to look for other things.

Mr. Chairman, I urge the Members to vote in favor of the Glickman-Leach amendment.

Mr. QUAYLE. Mr. Chairman, I move to strike the requisite number of words.

I, too, like the gentlewoman from Colorado (Mrs. SCHROEDER), who preceded me, am a bit perplexed about everybody talking about what a new and imaginative idea this is, the Glickman-Leach substitute, but then saying, "We cannot go along with it."

Mr. Chairman, I would say the reason a number of people are reluctant to go along with it is precisely because it is a new idea.

The old-fashioned politics and legislative maneuvering call for creating a new agency and a new bureaucracy, which is precisely what the Brooks substitute does.

Mr. Chairman, I would like to join my colleagues in complimenting the gentleman from Kansas (Mr. GLICKMAN) and the gentleman from Iowa (Mr. LEACH) for the innovative and imaginative plan which has been described as totally unworkable by some individuals. I do not think it is. I think it is totally workable, and it would probably be much more independent than this new consumer agency would be.

Mr. MOFFETT. Mr. Chairman, will the gentleman yield?

Mr. QUAYLE. I yield to the gentleman from Connecticut.

Mr. MOFFETT. Mr. Chairman, if the gentleman really believes that this is a new idea, the gentleman has never heard of Virginia Knauer. This should be called the Virginia Knauer bill because it is for doing nothing. Consumer units would become glorified under it.

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield?

Mr. QUAYLE. I yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Chairman, I am not arguing with the gentleman that the previous units were set up as a vehicle for consumers.

I am trying to take that structure, which I think has some merit to it, and give it some statutory authority.

Virginia Knauer consumer agencies are not involved in this bill.

Mr. MOFFETT. If the gentleman will yield further, Mr. Chairman, the same thing that made Virginia Knauer more independent is exactly what makes these units more independent, because, as the gentleman from New York (Mr. ROSENTHAL) and others have said, "You are not going to go against your boss." There is no question about that.

Mr. GLICKMAN. But your boss is Presidentially appointed.

Mr. QUAYLE. Mr. Chairman, if I can reclaim my time, we now have two bills—a Virginia Knauer bill and a Ralph Nader bill. I would like to engage the gentleman from Texas (Mr. BROOKS) in a colloquy, if I could, because I have a couple of questions.

On page 26, section 14(a), where we talk about transferring these agencies, it says in this section that we are going to transfer "all funds, records, and property utilized in connection therewith * * *".

Are we also going to transfer the personnel as we did in the Department of Energy? I notice that the word "personnel" is missing.

Mr. BROOKS. If the gentleman will yield, Mr. Chairman, it is anticipated that the personnel would have the same option to transfer.

Mr. QUAYLE. And that would total about $11.6 million?

Mr. BROOKS. The administration assured us during the hearings, with some prodding on the second time around, that they would eliminate those offices, eliminate those people, eliminate those expenses within those agencies, and transfer those funds or appropriations therefor to the new agency.

Mr. QUAYLE. Are we going to transfer the people or the personnel as we did in the Department of Energy?

Mr. BROOKS. They will have that option to transfer. They may think that they are not appropriate. They may have other jobs for them. They may quit. They may do all sorts of things.

This is not to say that we are telling them where they have to go.

Mr. QUAYLE. The gentleman does not think that we should include personnel. All right.

One other thing: We are talking about $11.6 million that we are going to transfer to the consumer agency; is that correct?

Mr. BROOKS. That is correct.

Mr. QUAYLE. And then we are going to fund it at $15 million. Is that on top of the $11.6 million?

Mr. BROOKS. No, no.

Mr. QUAYLE. That is not correct?

Mr. BROOKS. There will be $3.4 million and $11.6 million, for a total of $15 million.

The administration has also said that they hope to, and we are going to make every effort to, cut an additional $10 million out of other agency areas so that we can actually have a net saving in this procedure.

Mr. QUAYLE. This is the thing that is perplexing, net savings, because it does not look like we are really going to be saving. That is because, if we are going to transfer that $11 million on top of $15 million, it adds up to $26 million. If they are going to cut $10 million, it is $16 million.

Mr. BROOKS. Not on top; not on top. Let me straighten the gentleman out. There is an appropriation of $15 million.

Mr. QUAYLE. An appropriation of $15 million for fiscal year ending September 30, 1978?

Mr. BROOKS. Right.

Mr. QUAYLE. An appropriation of $17 million for fiscal year ending September 30, 1979?

Mr. BROOKS. We just go one year at a time. Take the first year, $15 million. That year, of that $15 million they will transfer $11.6 million from other agencies to that counsel. Those agencies will not have that money. They will not have that appropriation to hire people. Those appropriations will be finis for those agencies. That money will be assigned to the new counsel, $11.6 million.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

(By unanimous consent Mr. QUAYLE was allowed to proceed for one additional minute.)

Mr. QUAYLE. But the appropriation for fiscal year ending September 30, 1978, is $15 million. Where is this $11.6 million? Is that just for this year?

Mr. BROOKS. That is right. It is in this right now.

Mr. QUAYLE. It will not go over $15 million, right?

Mr. BROOKS. That is right.

Mr. QUAYLE. I thank the gentleman.

Mr. ERTEL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to address a question to the proponent of the substitute measure. On page 15 of the bill which is proposed as now, I guess, the primary bill, the OCR provides at lines 5 and 6:

> It shall take such action within its authority as may be desirable, including the proposal of legislation . . .

Now, does the gentleman have such a thing in his bill? Second, is he now setting up another lobbying organization in Washington which is going to lobby me like they have lobbied me on this bill? If so, I am going to vote against both bills.

Mr. GLICKMAN. If the gentleman will yield, to make it perfectly clear, the gentleman was referring to H.R. 9718, the Brooks substitute, when he read. My bill and Mr. LEACH's bill contains no such specific language.

Let me tell the gentleman what it does provide. It does provide, on the Assistant Attorney General to be set up as one of that officer's duties, that he can promote only appropriate litigation, legislative recommendation, and recommendations to any office—that means consumer office—the protection of consumers.

That means that gentleman or gentlewoman, whoever it is, can recommend to the consumer offices that they pursue this, X, Y, and Z, but at the same time nowhere do we provide in this bill that the consumer offices have the power to make legislative recommendations to Congress.

Mr. ERTEL. I thank the gentleman. I would like to address my question now to the chairman of the committee (Mr. BROOKS). Does that set up a lobbying organization in the OCR which then can lobby Congress to pass particular legislation?

Mr. BROOKS. I say to my distinguished friend that this is essentially boilerplate language which any agency would have. If they want to make a recommendation on legislation, basically that is what that language is. That is what it means. It does not mean that it is going to be a lobbying organization like the U.S. Chamber of Commerce or the National Association of Manufacturers, which have worked very diligently in opposition to this legislation.

Mr. ERTEL. Mr. Chairman, if I might address a follow-up on that, boilerplate sometimes has the ability to have contents spilled into it. Is the gentleman saying that the interpretation of this, since we have no committee report, would be that there cannot be a lobbying operation by this office in the Congress to pass particular legislation, and

they will not be authorized to come down to Capitol Hill and to lobby?

Mr. BROOKS. I do not believe they have additional authority than any other agency in the Federal Government.

Mr. ERTEL. Well, we seem to have a lot of them coming down here lobbying every piece of legislation.

Mr. BROOKS. I find people like the gentleman and people like myself pretty resistant to undue lobbying pressure. I think we generally vote our consciences without much trouble.

Mr. ERTEL. I thank the gentleman for his compliment, but I am just questioning whether or not we are just setting up another lobbying agency to come down here.

Mr. SEBELIUS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am not on this committee, and I have listened here with great intent because of the fact that my fellow Kansan from Wichita (Mr. GLICKMAN) and our colleague from Iowa (Mr. LEACH) have coauthored a very unique idea. I am impressed with it.

I do have 450,000 consumers in my district, and I feel that they have a far different interpretation of their consumer interest than the 450,000 constituents that the gentleman from New York (Mr. ROSENTHAL) might have as to what the consumer interest is.

I am concerned over this bill. However, when I look at the Glickman-Leach amendment, I see it has economy in it, it has simplicity in it, and it has a sunset provision in it. And those three provisions are very, very persuasive.

Likewise, I would like to associate myself with the remarks of the gentlewoman from Colorado who added some fresh conversation to this discussion on the Glickman-Leach amendment.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. SEBELIUS. I yield to the gentleman from New York.

Mr. HORTON. Mr. Chairman, I just want to make a point, that the Brooks substitute also has a sunset provision in for 5 years.

Mr. SEBELIUS. I thank the gentleman. That is the best argument I have heard for it today.

With these thoughts in mind, Mr. Chairman, I think this substitute contains points that are very selling to me.

I do not intend to go into specifics because I have asked permission to revise and extend, but I ask my colleagues to give this substitute full and fair consideration.

Mr. WAXMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I want to point out a couple of rebuttals to what I thought was a very eloquent plea made by the gentlewoman from Colorado (Mrs. SCHROEDER) in support of the Glickman proposal.

She articulated the position that this is a new, innovative idea. First of all, it is not new. I do not know how innovative it is. It is the proposal the Ford administration had before us in providing that in all the different departments and agencies there would be a consumer representation. The gentleman from Kansas (Mr. GLICKMAN) in responding to a question stated that he realized when that was originally proposed it was to do away with the effective consumer representation in the varying agencies. The Congresswoman from Colorado said even if they are not all independent, some of them may be.

I would like to examine the situation when all of these agencies come back for funding, and if we find that five are pretty effective, are we going to end up funding all of them, keeping in place all of these bureaucratic agencies set up within the bureaucratic agencies supposedly to represent the consumer point of view?

If we have an Office of Consumer Representation under the Brooks substitute, it has a lifespan of 5 years. After that there will be a sunset provision. We will have an opportunity to evaluate how effective it has been, whether it has really been independent, whether it serves the purposes for which Congress hopefully established it.

I think it would be far more effective to evaluate 1 Office of Consumer Representation than to evaluate 23 separate offices, some of which may be independent and effective and some of which may not be.

Mrs. SCHROEDER. Mr. Chairman, if the gentleman will yield, I want to make several points.

One is the gentleman mentioned they will not be independent and we will not be able to tell what the different agencies are doing. I think we will have a much better chance to tell which ones are and which are not, and as Presidential appointees we will have a chance to get rid of them.

One of the difficult problems of my subcommittee is to find which agencies are good and efficient and deserve pats on the back and which ones just have a good press and make good headlines. When we have 23 different ones, we can find which ones are good and which are not. When we have one gigantic one, they predict they will be able to handle 1 case out of 10 but there will be some political decisions to be made and there will be Presidential appointees and we will have all sorts of things.

The point that this is not new and came up under the prior administration can be answered by saying that, well, the whole Government is not new and was in existence under a prior administration.

We cannot appoint a better institution, one that is going to be better than the people who man it, the people who run the institution. The institution, be it a church, a Congress, or an agency, is not going to be better than the people who run it.

If the President can appoint those people, then it will be easier for him to determine which ones are good and efficient.

Mr. WAXMAN. Mr. Chairman, I recall my time.

I appreciate the comments of the gentlewoman.

Even if we can spot those who are doing adequate jobs and are independent and efficient, they will end up being permanent parts of the bureaucracy.

It will become vested and become a permanent thing by itself.

Just to say in effect that the President appoints them makes no difference, either. They are Presidential appointments, and there have been and they are still there. If we have one office discharging the purpose that the proponents of this amendment say they want then certainly we ought to invest in this one office and provide for 5 years, as a preliminary period of time so that we can evaluate it and then change it if necessary or kill it. I do not think you can kill 23 of them. What about those consumers who are not protected in those agencies where they are ineffective, where they do things that affect the lives of so many people? We ought to have one effective agency to be the advocate and propose changes independently on the basis of consumer regulations and through enforcement of those regulations.

That is why I think whether it is a new idea or not, we ought to go along with the proposal that the gentleman from Texas (Mr. BROOKS) and the committee have recommended.

Mrs. SCHROEDER. But the one committee that is not going to be funded adequately, and will not be big enough to consume 2 hours of the Pentagon's budget, is not going to adequately represent the consumers.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mrs. SCHROEDER and by unanimous consent, Mr. WAXMAN was allowed to proceed for 1 additional minute.)

Mrs. SCHROEDER. Mr. Chairman, if the gentleman will yield still further, I think if we see that happen we have still got a much better chance with it split through the different agencies. My experience has been through dealing with these different bureaucracies that they seem to exercise the same kind of thing that they call in the west "rumps together, horns out." If they have a burr under their saddle, an agency that is making noise enough to the President, you may have a much greater chance at getting it done.

Mr. WAXMAN. You would have a better chance if you put a burr under the saddle of the agencies who will be found independent, they become less independent and melt into the growing bureaucracy.

The regulatory agency ought to protect the public against special interests and they will not if they become captives of the public interests, they will be a consumer department that will be captive.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ROSENTHAL. Mr. Chairman, I was going to ask unanimous consent, if I may, that all debate on this amendment end right now, and I do so ask.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. QUAYLE. I object.

The CHAIRMAN. Objection is heard.

The question is on the amendment in the nature of a substitute offered by the gentleman from Kansas (Mr. GLICKMAN) for the amendment in the nature of a

substitute offered by the gentleman from Texas (Mr. BROOKS).

The question was taken; and the Chairman being in doubt, the Committee divided, and there were—ayes 27, noes 26.

RECORDED VOTE

Mr. BROOKS. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 93, noes 313, not voting 26, as follows:

[Roll No. 44]

Messrs. DAVIS, LEVITAS, KASTENMEIER, FORSYTHE, PRESSLER, McCLORY, and BROYHILL changed their vote from "aye" to "no."

Mr. APPLEGATE changed his vote from "no" to "aye."

So the amendment in the nature of a substitute offered for the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

Mr. BROOKS. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. EVANS of Colorado, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6805) to establish an Agency for Consumer Protection in order to secure within the Federal Government effective protection and representation of the interests of consumers, and for other purposes, had come to no resolution thereon.

GENERAL LEAVE

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill now under consideration, H.R. 6805.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

HOUR OF MEETING TOMORROW

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 1 o'clock p.m. tomorrow.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. MICHEL. Reserving the right to object, Mr. Speaker, I do so only to inquire of the distinguished majority leader whether his request would suggest that the measure which is currently before us and unresolved would be the first order of business tomorrow.

Mr. WRIGHT. If the gentleman will yield, Mr. Speaker, it is the hope of the leadership that we could come back onto this bill immediately as the first order of business; and that, tomorrow being Wednesday, hopefully we could go to its conclusion tomorrow.

Mr. MICHEL. Then would it be the intention of the leadership to bring up the four scheduled bills in the same chronological order as listed on the whip notice?

Mr. WRIGHT. There is no present plan to change the order. It could conceivably be altered by the remaining time available during this week. That, of course, depends upon how long it takes the House to dispose of the bill presently before us.

Mr. MICHEL. Would the distinguished majority leader venture a guess as to how long we would be in session, knowing full well that under the old rules, if we came in at 3 o'clock there was no time limit; and we could go until midnight?

Mr. WRIGHT. It is impossible to prognosticate. It is our hope that we will be able to conclude the bill tomorrow. That may be a forlorn hope. As the gentleman knows, one never can predict with accuracy how many amendments will be offered and how many Members will want to talk on any amendment.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Speaker, I was just wondering why we could not continue this legislation and finish it or, at least, a good portion of it tonight.

I had originally heard that the Democratic Study Group was having a roast of the Speaker of the House of Representatives. I assume that it was canceled because I have not been invited, and certainly I would be one of the most qualified persons to engage in that roast.

The SPEAKER. The Chair is in agreement with that statement by the gentleman from Maryland.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair would like to make an announcement.

The Chair understands that the gentleman from Kentucky (Mr. PERKINS) has the black lung conference report that he would like to bring up.

Also, by Thursday, if possible, in view of the fact that we have made an agreement with the gentleman from the area in which the Chattahoochee River National Park is located, we would be able to finish that bill on that day. Therefore, it could possibly be that we would take some matters out of order.

With respect to the Redwood National Park bill, we are aware of the fact that it is an important piece of legislation. We have no idea how long it will take.

We hope to conclude the consumer protection bill tomorrow, and on Thursday we will meet at 11 a.m. and finish by 5:30 p.m.

Mr. MICHEL. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERSONAL EXPLANATION

(Mr. GILMAN asked and was given permission to address the House for 1 minute and revise and extend his remarks.)

Mr. GILMAN. Mr. Speaker, due to the transportation delays caused by a severe winter storm, I unavoidably missed part of the legislative session on Monday, February 6, 1978. Had I been present, I would have voted in the following fashion: H.R. 9434, medicaid increases to Puerto Rico, Guam, and the Virgin Islands, "yes"; the rule making it in order to consider H.R. 8336, the Chattahoochee River National Park bill, "yes."

MR. PRESIDENT, WHY NOT A DISASTER DECLARATION FOR OHIO NOW?

(Mr. LATTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. LATTA. Mr. Speaker, it has now been 12 days since Ohio was hit by the most damaging snowstorm in its history. Many deaths and personal injuries occurred. The damages to property was in the millions of dollars. Yet, the President has not declared Ohio a disaster area to make all Federal disaster programs available. The Governor has requested such a declaration and I have sent two such requests to the President. In addition, I have taken the well of this House on two previous occasions to call this disaster to the attention of the House and to request the President to act. I now repeat this request and ask, "Why not a disaster declaration now, Mr. President?"

SUPPORT FOR 100 PERCENT OF PARITY FOR FARMERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. SIKES) is recognized for 30 minutes.

Mr. SIKES. Mr. Speaker, on today it was my opportunity to appear before the members of the distinguished House Committee on Agriculture in support of my bill, H.R. 10528, which would provide 100-percent parity to farmers for all agricultural commodities.

On that occasion, I congratulated the chairman, and the members of the committee for recognizing the plight of the farmers and for scheduling early hearings to look into possible solutions to their problems. That committee has consistently reported sound legislation providing valuable assistance to the farmers of this Nation. This is true of the farm bill which was reported and the Congress passed last year. That bill is a step in the right direction. It does not go far enough and I know it is not easy to go as far as many of us would like in order to help the farmer. I am convinced this is the time we in Government must do more.

Many bills have been introduced by concerned Members who recognize a requirement to help alleviate farm problems. There is merit in many of them. There are a number of approaches which could be helpful. A greatly expanded crop insurance program would help to alleviate the problem of crop failure due to weather. Definitely there is room for expansion of our activity to sell farm products abroad. There remains a major untapped market for American farm products in foreign nations. American agriculture exports have been the major export commodity that has held down the deficit in the balance of payments. This, also, is one of the keys to increased farm income and improved standards of living for farm families. An increase in farm exports will help offset the costs of the oil we are importing and will continue to import for a long time.

One proposal that has considerable appeal has been advanced by our good friend and highly respected colleague, JAMIE WHITTEN. His skill in getting difficult bills through the Congress is well known. He has recommended indexing of the target prices or loan rates for wheat, wheat grains, cotton, rice, peanuts, soybeans, and sugar and that they be tied to the cost-of-living increases granted to wage earners in the public or private sectors. If labor gets a 5-percent cost-of-living raise, the farmer would get the same. Another possibility would be to increase Government loan rates or target prices to reflect any boosts the Government grants in minimum wage. This would place agriculture on a parity with labor and industry.

Mr. Speaker, I fully realize the problem we have in attempting to find a solution that will be satisfactory to everyone, therefore, I believe all possible alternatives should be explored.

I hope that bills having at least some of the specific objectives I have outlined will speedily be enacted into law. The farmers are looking to Congress for help. My major purpose here today is to express my support for 100 percent of parity to farmers for all agricultural products. That one step will provide an immediate and permanent solution.

I recognize the reluctance of the administration to embark such a major change in agricultural programs. Our Government seems to feel that the farmers are rich, fat, and should be happy. All that says to me is that not enough of the Government experts have spent time on a working farm. Gross income for the farmer, on which the Government seems to rely, does not tell the true story. It is like saying every business firm that has an increase in sales volume should be making plenty of money. Few businesses are required to make capital investments as great as the farmer must make. None of them are required to buy at retail and sell at wholesale as the farmer does.

I would not undertake to tell you what this program would cost. This appears to be the principal area of concern. I question that the cost would be of greater magnitude than administration-endorsed proposals such as the Humphrey-Hawkins bill. Undoubtedly 100 percent of parity would result in additional costs to the consumer. One figure that is used is 22 percent additional. I am sure that means 22 percent increase to the farmer only for his work, and I do not consider this a frightening increase. Many of the labor unions get increases of that magnitude each time they go out on strike. The farmer is asking for a one-time increase only. If the farmer gets the benefit without having transportation, processing, packaging, etc., etc., add ons for a big unnecessary boost in final cost to the consumer it would not be ruinous in any sense to the economy. It should fuel the economy by giving the farmer for the first time a positive income for his products.

The actual cost figures are largely guesswork. I have heard the figure of $50 billion annually used. That does not frighten me in comparison with the cost of many of the Government agencies now. The minimum national health insurance program which has been proposed would cost about $50 billion a year. The maximum for the health program could be $250 billion. We are paying more than $50 billion a year for interest on the national debt. The actual figure is $58 billion for fiscal year 1978.

There is now a nationwide threat of a strike by farmers who seek to focus attention upon their problems. There may be no other way they can get the attention of the consumer public and the lawmakers and they must have attention now. Since the makeup of the Congress is predominately urban, few Members have basic knowledge of the difficulties which beset the American farmer. These difficulties have grown worse each year. During that time, Washington has appropriated billions upon billions of tax dollars for urban areas. That is where the votes are. Significantly, heavy Federal spending with no serious attempt to balance the budget has promoted the inflation which now hits the farmer harder than anyone else.

The urban Congressman listens to the complaints of the consumers about high prices of food and textiles. Automatically they assume the farmer is getting rich. It is not the farmer who gets the prices charged to the consumer. As this committee well knows, his percentage is only a small portion of that cost. The far great-

er portion goes to transportation and to merchandising costs.

Meanwhile, the farmer looks across the spectrum and he sees the Federal Government trying to guarantee almost everybody else an increased income. Federal employees receive an automatic salary increase. The increased minimum wage will further increase the farmer's operating costs. Social security taxes are increased. Federal spending and the Federal debt are soaring into the stratosphere.

Many of the commodities produced on the farm today are selling at less than the cost of production. Yet, costs to the farmer continue to grow by leaps and bounds. Farm operations and equipment require substantial financing. His products generally have little protection by way of subsidies or loan guarantees from the Government. Consequently, he is going deeper in debt year by year. Few understand that the farmer sells at the mercy of the buyer. It is time for the Congress and the American people to listen to the farmers. They produce the food and fabric which America requires and the world wants and needs. They cannot continue indefinitely to produce without a meaningful measure of the protection which is already provided to labor and most segments of the industrial world.

Now, let us get down to specifics.

The farmer is asking 100 percent parity for his crops' and I think he should receive it. Prices received by farmers for farm products are at historically low levels compared to prices paid by farmers. The parity ratio was at 64 in September. This is the lowest the parity ratio has been since 1933, when it also reached 64. Not since 1932 has the purchasing power of farm products been as weak as it is now.

Parity, as defined by Webster, is the state of being equal or equivalent. A simple definition of parity is essentially a ratio that compares the prices farmers receive for their commodities with the prices they must pay for production and living expenses.

The farmer feels that the middleman should absorb the increase in costs for parity. If the farmer receives 100 percent parity for his commodities and no other costs are tacked on by the middleman, the increase in price to the retail market would only be 3.1 percent. This is a modest amount which the farmers fully deserve; 100 percent parity could be accomplished without seriously affecting anyone, provided there is no price pyramiding.

For years the farmer has received parity based on 70 to 85 percent of the cost of past production. No one seems to be concerned about the fact this is a "sugar tit" which gives him the incentive to continue producing but in its operation pushes him further in debt year after year. The farmer is bedeviled by form filling and regulations just like any other segment of American business. He has few options. He can continue to produce or he can go out of business. Corporate farms have taken over where many individual farm families have been forced to the wall. More Americans need to realize that our American farm efficiency is one of the few advantages that we have left. The American consumer is the direct beneficiary.

The worker who is protected by the minimum wage does not receive 70 to 85 percent of what is considered a proper national wage base. He gets 100 percent. Why should not the farmer's labor receive the same guarantee?

The total net income from farming is estimated at $19.8 billion for 1977. This is lower than the previous year and continues a decline that has taken place every year since 1973. In fact, the 1977 net income level was only 59 percent of what it was in 1973. Total net income was equal to $33.3 billion in 1973.

Net income appears even worse when calculated in constant 1967 dollars. Using 1967 as the base year, total net income from farming will be about $10.5 billion for 1977. This is lower than any year since 1935. It was in the early 1930's when the purchasing power of net farm income previously reached such a low level.

Even though the number of farms has been declining, the drop in total net farm income has been even greater since 1973. In 1973 there were 2.844 million farms with net income per farm equal to $11,727. By 1976 the number of farms was down to 2.778 million but net income per farm was down to $7,203.

Another important factor to be considered is—in 1976 the personal income of the farm population derived from farm sources was equal to $17.786 billion. This was exceeded by personal income derived from nonfarm sources, which equaled $24.166 billion. Continued low earning from agricultural sales could force even more farm household members to seek off-farm employment as a means of boosting the otherwise inadequate household income.

In 1976 the per capita personal disposable income of the farm population was $4,518. This was only 81.4 percent of that accruing to the nonfarm population. The per capita personal disposable income of the nonfarm population was $5,552.

The farmers who are presently protesting the low prices for their products are only asking the Federal Government to furnish what has been repeatedly confirmed in legislation since 1933—full parity.

At the present time, the parity concept and policy of Congress with respect to the purchasing power of farm commodity prices and of farmers' incomes rests upon three major acts:

First. The Agricultural Adjustment Act of 1933 as amended by the Agricultural Act of 1935, the Agricultural Marketing Agreement Act of 1937, and the Agricultural Act of 1948.

This legislation states:

It is declared to be the policy of Congress—(1) Through the exercise of the powers conferred upon the Secretary of Agriculture under this chapter, to establish and maintain such orderly marketing conditions for agricultural commodities in interstate commerce as will establish, as the prices to farmers, parity prices. . . .

Second. The Soil Conservation and Domestic Allotment Act of 1936.

This legislation specifies as policy—

The reestablishment, at as rapid a rate as the Secretary of Agriculture determines to be practicable and in the general public interest, of the ratio between the purchasing power of the net income per person on farms and that of the income per person not on farms that prevailed during the five-year period August 1909–July 1914, inclusive, as determined from statistics available in the United States Department of Agriculture, and the maintenance of such a ratio. . . .

Third. The Agricultural Adjustment Act of 1938 as amended by the Agricultural Act of 1948 and the Agricultural Act of 1949.

This legislation declares it to be the policy of Congress—

To regulate interstate and foreign commerce in cotton, wheat, corn, tobacco, and rice to the extent necessary to provide an orderly, adequate, and balanced flow of such commodities in interstate and foreign commerce through storage of reserve supplies, loans, marketing quotas, assisting farmers to obtain, insofar as practicable, parity of income . . .

This legislation also specifies the method by which parity prices are to be calculated.

These laws are already on the statute books and could be implemented now administratively to bring immediate relief to the farmers. Unfortunately, there is little prospect that this will be done.

Mr. Chairman, the Congress and the administration should accept its responsibility toward the farmer before the proposed nationwide strike becomes a reality. His complaints are real and they are legitimate. The farmer needs our help now. I am hopeful this committee will favorably report a bill to the House at an early date. If the average farmer should stop working and go on welfare, he would probably be better off than he is today. This is not what we want for America. It is not what America wants.

THE HOUSE BROADCAST DECISION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANDERSON) is recognized for 30 minutes.

Mr. ANDERSON of Illinois. Mr. Speaker, it is curious that two different subcommittees of the Committee on Rules have recommended two different ways of providing television and radio coverage of House proceedings within 2 years of each other. On February 23, 1976, the Ad Hoc Subcommittee on Broadcasting recommended that:

The broadcast media should provide such broadcast coverage because this approach is the last expensive and burdensome for the House, will best protect the House from charges of censoring or otherwise attempting to control the media, and will ensure the most technically professional coverage of House proceedings.

Now, the Subcommittee on the Rules and Organization of the House has recommended that—

The House should operate its own broadcast coverage system following the example and building upon the experience of the Canadian Parliament.

Ironically, a special adviser to the Canadian House of Commons Broadcast Committee has likened the proposed, un-

manned, three-camera House of Representatives operation to "a department store surveillance system."

POLITICAL SWITCH

The ostensible reason for the switch in recommendations from a professional broadcast pool to a House system is the latest subcommittee's finding that the news media's quest for news and drama is incompatible with the House's desire for a complete record of its proceedings—"a kind of visual and audio parallel to the CONGRESSIONAL RECORD." If the House-produced broadcast is as accurate and interesting an account of our proceedings as the House-produced CONGRESSIONAL RECORD, we should brace ourselves for a real crisis of credibility and boredom.

Since the subcommittee has come up with no new information to refute the earlier finding that a professional broadcast pool would be less expensive and burdensome to the House, and more competent and credible, the real reason for the switch is more likely attributable to the old adage: "If at first you don't succeed, do it the Speaker's way." The subcommittee's recommendations are obviously more tailored to the Speaker's wishes than the merits of the issue.

POLITICAL DELAYS

This may also help to explain why the subcommittee's recommendations include enough frivolous delays to postpone the public airing of our proceedings until well after the next election. Not only has the subcommittee recommended that the House not go public until the Speaker determines that a broadcast quality picture has been attained—and it should not take more than 4 months to purchase and install the new equipment and make any necessary technical improvements and adjustments—but it has also recommended against going public "until appropriate legal and administrative arrangements connected with the use of broadcast coverage are completed or close to completion." There follows a whole laundry list of preliminary arrangements that seems formidable if not interminable. But most of these could either be completed in the same 4-month time frame in which the equipment is being purchased, installed and tested, and the rest would not have to be completed prior to going public.

In short, the subcommittee's prescription for diversion, distraction, and delay will give the Speaker a convenient excuse for keeping the American people electronically in the dark until well after they have emerged from the voting booths next November. This alone is a sad commentary on the confidence the House leadership has in a House-operated broadcast system, let alone in its own performance.

ANALYZING THE ALTERNATIVES

Putting aside the politics of House broadcasting, the arguments for and against the two live options—in-House and professional broadcast pool—should be examined closely.

The subcommittee has claimed to have divorced itself from the "emotionality" surrounding the issue and examined the alternative approaches "in light of reasonable criteria concerning the needs and the best interests of the American people, the House, and the broadcasting media." The report proceeds to list eight criteria and to measure each alternative against these. Following this lengthy discussion the report concludes that:

> . . . no single alternative would appear to have a decided advantage over any other . . . It should be obvious that none of the alternatives presents a perfect solution.

A more careful, objective, and informed review of these criteria, however, leads to a different conclusion, and that is that a professional broadcast pool is clearly the superior alternative. The report obscures this by digging up old red herrings to drag across the path of the pool, while engaging in supposition and fantasy over the advantages of a House-controlled broadcast system.

Consider each of the criteria which follow:

First. Technical and professional competency.—The report concedes that the professional broadcast pool already has "the experience and competence for this purpose," but claims the House could also obtain comparable professional services given sufficient funds and commitment.

Second. Availability to all broadcasters.—The report concedes that the networks have given assurance that the "pool would deal equitably and fairly with all"—and, indeed, equal access to coverage by all broadcasters would be written into the House contract with the pool—but the old bugaboo about independents being given short shrift by the pool, and the "appearance of monopoly control by one part of the industry" is again raised.

Third. Willingness to provide coverage.—The report indicates that the networks would prefer to cover only those portions of a debate they considered newsworthy, but reluctantly agreed to provide complete coverage in order to gain access for their purposes. The fact is, the pool came to the House with its proposal and is perfectly willing to provide gavel-to-gavel coverage.

Fourth. Continuing commitments to provide coverage.—It is argued that withdrawal of any or all of the members of the pool could result in its collapse, leaving the House with no equipment or personnel to provide continued coverage. While this is a possibility, the concern more expressed by some Members, at least in private, is that once the pool is in, it will be in for good and impossible to replace with another system.

Fifth. Full public accountability of operation.—The report indicates there is no reason to believe this would pose a problem for the networks, "although it would require them to disclose in considerable detail the costs they incur and the activities they perform in providing the service." The fact is that any contract with the pool would likely include a full financial disclosure requirement, and no concern about this has been expressed by any member of the pool.

Sixth. Comparative costs.—The report concedes that, "clearly the network pool approach would be the least expensive for the House in the short run." Moreover, the report hints that the House would have to spend considerably more than the original estimates in order to establish a quality system. The initial outlay for the Canadian Parliament's broadcast system, for instance, was more than $5 million, and the subcommittee's report recommends a House system "following the example and building on the experience of the Canadian Parliament."

Seventh. Administrative consequences and burdens.—The report concedes that, "House operation of the system clearly will entail an additional administrative burden for the House and for the Speaker that no other alternative would require."

Eighth. Union problems.—The report concedes that broadcast union agreements with two of the networks prohibit using more than 3 minutes of coverage produced by a nonlegitimate broadcast source (such as a House-controlled broadcast system), and, while this would not inhibit use on most news programs which use only short clips anyway, "It might pose serious problems for the networks in broadcasting lengthy live coverage or producing news documentaries."

Thus, an objective analysis of these criteria, established by the Subcommittee for Judging the Various Broadcast Alternatives, reveals that both the House and the pool measure up equally on three of the criteria (Nos. 2, 3, and 5), the House has the edge on one (No. 4), and the pool has the edge on four (Nos. 1, 6, 7, and 8). In summary, the House system meets only four of the criteria while the professional broadcast pool meets seven of the eight. This would hardly confirm the subcommittee's conclusion that "no single alternative would appear to have a decided advantage over any other." The professional broadcast pool clearly has a decided advantage over the House-controlled system.

THE REAL PROBLEM

There is a ninth criterion which apparently outweighs all the others and that is at the heart of the political determination which has been made against a professional broadcast pool and in favor of a House-controlled system. That criterion involves some politicians' traditional fear and mistrust of professional journalists, and particularly of the broadcast media. Put more diplomatically, it is the fear of the unknown and reluctance to give up any control over one's situation.

The report attempts to divorce itself from emotionality on both sides of the issue, which it claims range from misplaced first amendment concerns to "allegations that network pool control may produce coverage that is unbalanced, biased, deliberately or accidentally unfair to individual Members, and damaging to the dignity of the House"; and moreover, that "broadcast journalism is prone to judge what is newsworthy on the basis of conflict, drama and humor rather than on the substantive significance of a matter."

Nevertheless, it is this latter emotional charge on which the report finally comes to rely in its last ditch stand against a professional broadcast pool. While many

of these charges have a certain validity in terms of the abbreviated and often dramatic treatment given to certain events on the nightly news, they are more applicable to the actual use of the coverage than of the coverage itself. For if these were truly a major concern in the issue of who should provide the coverage, we would have to assume that the pool directors would be more intent on searching out humorous and dramatic scenes in the House with their cameras than on providing the most complete, accurate and interesting picture of the debate in progress. On the basis of the pool's past performance at such important events as the Senate Watergate hearings and the House impeachment proceedings, this demonic, conspiratorial theory is unfounded and unwarranted. The pool has demonstrated a sensitivity to maintaining the dignity and decorum of the House as well as to servicing all users with a complete record of what is being covered.

CROSS PURPOSES?

The report rejects network pool control of coverage on the grounds that the "deeply imbedded news and drama oriented predeliction (sic) of the broadcast media" is "inappropriate for what we see as the fundamental purpose of the coverage" which is "a complete, uninterrupted, undistracted, unbiased, and completely accurate record of the official actions of the House."

All this is longhand for the simple fear that any panning or reaction shots might catch some Members in an embarrassing pose or reveal a near-empty Chamber at times. It is also based on the assumption that the most accurate picture of the House at work is an exclusive focus on the person talking at the time and that reactions of others to what is being said, in the form of applause, laughter, heckling or booing, are not part of the total proceedings of the House.

The report even goes so far as to suggest that because the pool director will be calling the camera shots, other broadcast coverage users would be outraged at being subjected to "the unchangeable judgment of only one of their colleagues" and that, therefore, only the House can provide the type of unbiased coverage that would be preferred by and acceptable to all broadcast journalists. This contention flies in the face of the strong and widespread support throughout the journalistic community for coverage by professional broadcasters as opposed to by the House.

SUPPORT FOR PROFESSIONAL COVERAGE

On December 22, 1977, the coalition for Professional Broadcast Coverage of the House Floor issued a statement arguing that:

> It is clearly inappropriate that the persons who are making the news (in this case the members of the House) should also be in essence the persons *covering* the news. and that such a course will be distinctly against the public interest and will negate the major benefits which might be gained from the House decision to make its daily debates open to coverage by the media on which most Americans rely for their news coverage.

The coalition consists not only of the three major broadcast networks, but 16 other national journalistic organizations as well, from the National Association of Broadcasters to the Society of Professional Journalists/Sigma Delta Chi; from the two major broadcast unions to the National Press Club. It is obvious from this broad-based statement of support for professional broadcast coverage of House proceedings that the journalistic community does not share the report's conclusion that House coverage would be preferred by most broadcast journalists. (The full text of the coalition's statement and list of Members is appended to these views.)

THE CANADIAN EXAMPLE

While the report attempts to ride the wave of success of the Canadian Parliament's broadcast system as an example of what a House-controlled system could achieve, there are important differences which understandably have not been noted. The House of Commons broadcast system was planned, installed and operated by professional broadcast personnel from the Canadian Broadcasting Corporation (CBC) and not by existing House of Commons personnel. While the House of Commons has paid for and has ultimate control over the operation, it has purposely avoided placing restrictions on camera movements. As one CBC official put it, without flexibility, "you're going to have a dessicated product that nobody would watch."

Instead of the $500,000, 3-camera, remote-control system proposed for the U.S. House, the Canadian House has installed a $5 million, 8-camera operation, which includes 4 manned cameras, and another 30 professional broadcast personnel from the CBC.

THE ULTIMATE TEST

There seems to be a consensus in the House on two points; first, if we are going to broadcast our proceedings we should demand the best possible coverage; and secondly, the primary purpose of broadcasting our proceedings should be to serve the needs of the American people. The controversy arises over who can provide the best coverage, and at what cost, and how best to serve the needs of the American people which include learning more about how the House operates and about the public policy issues being debated here. This will come primarily through media use of the coverage.

Professional broadcasters are the most technically competent and professionally experienced providers of the type of quality broadcast coverage that will be most used by the media and most viewed by the public. The dual goals of providing a record of our proceedings and making it both usable and interesting are not mutually exclusive; they are complementary.

The House is confronted with a most important decision and should be permitted to debate and vote on it (as the Speaker has said). The central question is, Should we become the first Federal Government entity ever to establish our own domestic broadcast network for the purpose of covering our activities? The danger lies not in some imagined media "monopoly" over the media, but rather in a very real Government monopoly over its own media coverage.

The controversy over who should control the cameras is not an emotional one, but a very fundamental first amendment issue. I hope the House and Speaker will set aside whatever biases and fears they may have about the media and put some trust in the broadcasters' doing what is best for the Nation, the House, and their own profession. If we do not have confidence that the broadcasters will do their job to the credit of all, how can we ever expect the American people to have confidence in us attempting to do the broadcasters' job, even to our own credit?

STATEMENT BY COALITION FOR PROFESSIONAL BROADCAST COVERAGE OF THE HOUSE FLOOR

We respectfully urge the Subcommittee on the Rules and Organization of the House to reject any proposal for control of an audio-video feed from the House floor by the House, itself, or any of its agents.

We feel that such a course will be distinctly against the public interest and will negate the major benefits which might be gained from the House decision to make its daily debates open to coverage by the media on which most Americans rely for their news coverage.

It is clearly inappropriate that the persons who are making the news (in this case the members of the House) should also be in essence the persons covering the news. Public officials traditionally make policy and laws. Reporters traditionally cover the news. Each has its proper role in a free American society. The press, whether print or electronic, serves as the eyes and ears of the electorate in reporting on the activities of the House. It is important that all reporting by cameras and microphones be totally free and objective. It is also important the public understand this to be so. We do not believe it can appear so if the public knows that broadcast coverage is originating with the House itself, not with the broadcasters who are outside observers of events in the House and not participants in them.

Broadcasters ask only that the job of reporting the House (and cameras and microphones are only newer tools of an old trade) be left strictly to the reporter. There is no real need for the intrusion of a House system as a middle man who has no parallel in coverage by other reporters who happen to work for newspapers, wire services or magazines.

The mere fact that the viewing audience will see pictures of House floor action with captions superimposed (and these are legal necessities for broadcasters) indicating that these pictures were supplied, not by journalists, but by the House of Representatives, must raise a question of objectivity. Credibility will be sacrificed in the process and what the House gains by the new openness of its broadcast coverage will be lost by the suspicion that somehow the news from the House is being managed or censored

The precedent for direct coverage by broadcasters is all over Capitol Hill. Broadcast crews have been on hand for Congressional coverage going all the way back to the Roosevelt State of the Union message in 1934. Broadcasters make direct pickups on all State of the Union messages, all Presidential news conferences and speeches, on all major public events in Washington—state funerals, inaugurals, state visits, etc.

44 of the nation's fifty state legislatures now permit broadcast coverage of their floor debates. Forty of these legislative bodies allow broadcasters, themselves, to handle the audio/video pickups.

Apart from the element of credibility and the principles of the First Amendment there are other basic reasons why coverage should be in the hands of professional journalists.

(1) From long experience broadcast news crews have developed an expertise in live coverage which would assure the public quality

coverage both technically and editorially. An in-House camera system, while adequate for closed circuit operation, would not be adequate to service the needs of millions in the radio-television audience. The better the quality of picture and sound the more acceptable the material will be to professional journalists everywhere and the more frequent their use of the House debate in daily shows. The dividends of such an approach were never more apparent than in the public reaction to the daily, unrestricted coverage of the impeachment hearings by the House Judiciary Committee under Chairman Rodino.

(2) An in-House broadcast system will present at least two commercial networks (ABC and NBC) with serious union problems. Their contracts with NABET do not permit them to use more than three minutes from a House-provided feed. This limitation would be an obvious hardship for ABC, NBC, and the 2200 TV, AM and FM stations around the country which they serve. They would all be stymied on a major story which, by normal journalistic judgment, demanded extended coverage from the House floor, especially live coverage. CBS and public broadcasting stations operate under a different union contract but here, too, there may be some question of strong union objection to extensive use of material originating from non-broadcast sources.

(3) To the taxpayer, too, the concept of a broadcast industry pool is far superior to any in-House system. The House is better served by a broadcast system that is financed, set up and operated by outside broadcasters and it can save a very substantial sum of public money by subscribing to an industry pool. An in-House system would seem an unnecessary expense.

(4) The fears of some House members about cameras and audio systems run by broadcast organizations are not justified. For decades now broadcasters have covered a wide variety of public activities, some of them extremely sensitive, and the complaints about visual "cheap shots" have been virtually unknown. But we recognize that a certain number of Representatives do have real concern about the nature of coverage by outside broadcasters and we are always willing to consider such concerns in operating an industry pool.

NEW ENGLAND'S ENERGY SITUATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Hampshire (Mr. CLEVELAND) is recognized for 5 minutes.

Mr. CLEVELAND. Mr. Speaker, last week the House passed amendments to the Outer Continental Shelf Lands Act. This bill was extremely lengthy and complicated and during the course of debate numerous amendments were offered. Many of the amendments which were adopted substantially changed the nature of the bill. I would like at this time to explain my reasons for voting for final passage of the legislation and to offer my positions on some of the major issues considered.

As a Member of the House from New England, I have even more than usual interest in this legislation which affects the development and utilization of domestic energy resources. My colleagues from that region know too well that New England's energy situation remains the worst in the country. We are now importing over 63 percent of our total energy supplies and this figure has increased since the Arab oil embargo. In addition, our energy prices are 30 percent higher than those in other regions of the country. Clearly, there are environmental concerns over the impact of energy resource development but we can ill afford to overemphasize these concerns at the expense of our efforts to encourage and stimulate domestic supplies of energy. In my opinion, a balance can be struck and, indeed, I find it regrettable that the conflict appears to be of an adversary nature rather than a compatible merging of environmental and energy resource needs.

BREAUX AMENDMENT

Because of my concern that H.R. 1614 in its original form would lead to unnecessary delays in the leasing and production of offshore oil reserves, I voted for the Breaux substitute which was intended to streamline the process of developing our OCS resources.

DUAL LEASING

Among other provisions, the Breaux substitute eliminated the dual leasing provisions in the bill whereby two leases would be granted for a particular tract: one for the exploration phase and a second one for the development and production phase. Although the Breaux amendment failed to pass, sufficient concern about this provision's delaying effects led to subsequent passage of a separate amendment to eliminate dual leasing.

BIDDING

The committee, reacting to criticism that the prevalent "cash bonus" bidding system now used for the vast majority of offshore oil leases was limiting competition, required the use of new bidding systems in at least 50 percent of all lease sales. The Breaux amendment authorized the same alternative bidding systems but required instead that cash bonus bids be used in at least 50 percent of lease sales in frontier areas. A subsequent compromise amendment which I supported limits the mandatory use of alternative bidding systems to not more than 50 percent but not less than 20 percent of the total area offered for lease.

Other provisions of the Breaux amendment intended to prohibit the Federal Government from doing exploratory drilling in the absence of a specific appropriation. My colleagues will recall that this issue was central to the House defeat in the last Congress of the conference report to accompany OCS amendments. Again, a separate amendment adopted by the full House eliminated the Federal Government's authority to undertake exploratory drilling.

OSHA ON THE OUTER CONTINENTAL SHELF

Another major provision of the Breaux amendment later adopted separately by the full House was language retaining the Coast Guard's primary jurisdiction with regard to regulation of working conditions on the OCS based on the Coast Guard's history of expertise in this area.

In conclusion, Mr. Speaker, I cast my vote finally in favor of H.R. 1614 because the bill had been improved to an extent that I felt was worthy of support. However, remembering my vote in the last Congress for OCS legislation which was subsequently modified in a House-Senate conference in such a manner that I could not support the conference report, I await with great interest the final outcome of a similar conference on this bill and hope that the House's wisdom on many of these provisions will prevail.

CONSUMER PROTECTION AGENCY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Delaware (Mr. EVANS) is recognized for 5 minutes.

Mr. EVANS of Delaware. Mr. Speaker, I rise in opposition to legislation before the House today which would create a new Federal bureaucracy supposedly designed to represent consumer interests.

This legislation used to be called the Consumer Protection Agency bill. But, because the Carter administration could not find enough votes to pass the bill under that heading, the name was changed to the Office of Consumer Representation. But even though the label on the can has changed, what is inside remains the same—a very bad bill.

There are many things that are fundamentally wrong with trying to set up some Federal superagency to speak for consumer interests. First, and foremost in my mind, is who decides what the consumer interest is on a particular issue. Nowhere in this bill will you find any definition of consumer interest. No Washington bureaucrat—or even Ralph Nader, for that matter—can or should serve as the sole spokesman for all consumers. Yet we are in fact setting up an arbitrary consumer spokesman with this bill today.

Second, this legislation will create massive amounts of new paperwork and redtape, as businesses and even Federal departments try to keep up with its activities. I foresee the Office of Consumer Representation as an agency of Government answerable to no one, and one which will fire bureaucratic arrows in all directions. Businesses throughout this country would then have to spend

tremendous amounts of time, energy, and money responding to these suits, charges, and interrogatories which will flow out of the new Federal agency.

The Federal Government already has plenty of agencies and bureaus administering consumer-related programs. If they are not doing the job, then we should improve them, not create another agency. The Leach-Glickman substitute to this bill would strengthen existing agencies without setting up this new and unneeded bureaucracy, and I urge my colleagues to support it as an alternative to the OCR.

Government overregulation costs each of us every day in the form of higher taxes and higher prices. We need less, not more, Government in Washington. The people of Delaware, I can tell my colleagues, already have more Government protection than we can stand or afford.

I have sat on this floor and listened as Congressman after Congressman, Democrat and Republican, complained about rising Federal regulation, and how their constituents have simply had too much Government redtape. Now is the time to stop talking about Federal redtape, and start doing something about it—by voting against this bill.

Third, consumers are also taxpayers, and this Agency will spend more and more tax dollars. I am well aware of the argument that this office will start out small—if $15 million can be considered small by anybody. But I have yet to see a single Federal bureaucracy fail to grow like Topsy, and I do not think this one will start a new trend.

Fourth, the new Agency, through litigation or even the threat of litigation, will exercise tremendous influence over normal business operations, particularly as it affects small business. Most business firms could not match the resources or power that this Agency could put into one proceeding, and thus there will be a strong requirement to comply with the Agency's wishes—right or wrong—just to avoid the harassment of court battles, paperwork, and delay.

The sponsors of this so-called compromise have really not changed much in this bill beyond its name. It still fails to define consumer interests. It still sets a new Federal bureaucracy with tremendous power. It still promises massive amounts of Government redtape and harassment.

For these reasons, this legislation should be defeated.

LEGISLATION TO AUTHORIZE THE MUSEUM OF AFRICAN ART, THE SMITHSONIAN INSTITUTION

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Louisiana (Mrs. BOGGS) is recognized for 10 minutes.

Mrs. BOGGS. Mr. Speaker, today our colleagues, GEORGE MAHON and ELFORD CEDERBERG, and I, who are congressional Regents of the Smithsonian are introducing legislation to authorize the Smithsonian Institution to acquire the Musuem of African Art, located at 318 A Street NE., in Washington, D.C. In this endeavor, we are joined in sponsorship by our colleagues JOHN BRADEMAS, JOHN CONYERS, and FRANK HORTON, who serve as members of the Board of Trustees of the museum.

Mr. Speaker, one of the few serious gaps in the coverage of art in the national museums of the Smithsonian is that of the continent of Africa. Elsewhere within the Institution the visitor and scholar alike can find worthy presentations of the art of Europe, of the Americas, of the Near and Far East—but not of Africa. During the last few years it has been belatedly recognized that African art is indeed one of the major art traditions of the world, one whose rediscovery in the West can be traced in some of the works of many of this century's greatest artists.

As a consequence of this rediscovery, other museums around the country have moved decisively to fill similar gaps in their own collections. For its own part, unless the Smithsonian acts to seize the unique opportunity afforded by the interest of the Museum of African Art in joining the Institution we will likely lose our one best chance to involve the Smithsonian in any major way in this important area of art scholarship.

To facilitate this acquisition, the legislation we are introducing today will do the following:

First. Authorize the Board of Regents to accept a deed or other instrument donating and transferring to the Smithsonian all the assets of the Museum of African Art;

Second. Establish in the Smithsonian a bureau to be known as the Frederick Douglass Museum of African Art;

Third. Authorize the Board of Regents to perform all the functions common to the operation of a museum including explicit authority "to sell, exchange, or otherwise dispose of any property of whatsoever nature * * *";

Fourth. Establish a Commission "which shall provide advice and assistance to the Board concerning the operation and development of the Museum * * *"

Fifth. Provide that the Commission shall originally consist of the present Trustees of the Museum, and shall thereafter be appointed by the Board of Regents;

Sitxh. Provide for the appointment by the Board of Regents of a director and staff, and provides that present employees of the museum shall be transferred to Federal employment;

Seventh. Pledge the faith of the United States will provide such sums as may be necessary for the continuing operation of the Museum under the Smithsonian; and

Eighth. Authorize the appropriation of $1,000,000 for the first fiscal year of operation under the Smithsonian, and "such amounts as may be necessary for succeeding fiscal years * * *"

Except for the authority to accept the transfer, and the authorization of appropriations, the provisions of the act are to take effect upon the date of the transfer to the Smithsonian.

Mr. Speaker, at their meeting of January 16 the Regents of the Smithsonian voted to support this acquisition and to seek appropriate congressional approval of this action. This legislation will provide authority to the regents to proceed with the acquisition.

As some of my colleagues may know, from almost the inception of the museum, our late friend, Senator Hubert H. Humphrey was one of its major supporters. He served as a member of its national council and as chairman of its board of trustees. He, more than anyone else, has been the moving force behind this proposed acquisition. Just prior to his death, Senator Humphrey requested that I sponsor this legislation in the House. In the other body, this legislation has been jointly sponsored by Senator WENDELL ANDERSON and Senator MURIEL HUMPHREY.

Mr. Speaker, I ask unanimous consent to include at this point additional information on the museum:

MUSEUM OF AFRICAN ART

During the almost fourteen years of its existence, the Museum of African Art has won international acclaim as the outstanding educational cultural institution in the United States devoted exclusively to fostering public understanding of Africa's traditional art and its creative contributions to mankind.

Occupying a block of nine Capitol Hill townhouses including the first Washington residence of the great 19th century black abolitionist orator, publisher and government official, Frederick Douglass, the Museum was founded in 1964 by former USIA Public Affairs Officer and Cultural Attache, Warren Robbins, its present Director.

Its collection of traditional African sculpture, numbering 7,000 objects is already among the three most important museum collections in the United States; even more important, several private collections of African sculpture conservatively valued at several million dollars would be bequeathed to the Museum if its institutional stability were assured. These collections, if received, would make Washington unquestionably the principal center in the world for the display and study of African art, an important fact in view of the city's large diplomatic community, the high proportion of African students in its colleges, and its black citizens.

The Museum has already received a bequest from the world renowned LIFE photographer and Africanist, Eliot Elisofon, of a photo archives numbering 150,000 slides, films, and photos on Africa, in addition to 600 objects of art. Together with a specialized library of 5,000 titles, the photo archives and the collection comprise a unique educational resource which will be made accessible to universities throughout the nation.

All told, the Museum's assets in art, educational material and real estate exceed $7,000,000. Some $4,000,000 has been raised or pledged thus far to launch and operate the Museum, including a $1,000,000 five-year development grant awarded by the National Endowment for the Humanities in 1970.

Best known for its far reaching and imaginative educational program, the Museum serves as a national prototype to foster mutual respect and social harmony among black and white citizens. Some 12,000 groups

from schools, colleges, church and civic organizations, etc., have already visited the Museum or participated in its extension programs emanating from the Museum.

The Board of Trustees of the Museum is prepared to donate to the United States, via the Smithsonian Institution, the entire Museum complex, its collections and its physical plant. The appropriations needed would be only about $750,000 per year, since the Museum, like other branches of the Smithsonian would continue to raise funds from private sources.

I think we all recognize the tremendous support and enthusiasm that exists for this museum in academia, the art world, in the community at large and here in Congress. I hope my colleagues in this House will share my feelings about the desirability of proceeding with the mechanics of the acquisition and will act upon this legislation as soon as possible. The Museum of African Art is a fine and important institution and deserves to be made a part of our National Museum.

GEN. THADDEUS KOSCIUSZKO—VALIANT SOLDIER, COURAGEOUS PATRIOT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, on February 12 this Nation will observe the 232d anniversary of the birth of Gen. Thaddeus Kosciuszko, a valiant Polish patriot whose contributions were decisive in this country's revolutionary struggle for independence. Aloysius A. Mazewski, the outstanding and resourceful president of the Polish National Alliance and the Polish American Congress, spoke on "Kosciuszko's American Roots" during a previous Kosciuszko Day Observance, and excerpts from his address follow:

KOSCIUSZKO'S AMERICAN ROOTS

(By Aloysius A. Mazewski)

Today, on this solemn occasion of paying tribute to Kosciuszko's greatness, I would like to present to you an observation rarely, if ever, considered by his biographers.

The singular fact is that Kosciuszko's military genius found its first expression on the American soil.

And it was on American soil that Kosciuszko came to know the valor, heroism, and sacrifices of the underprivileged, undernourished, and underclothed soldiers of liberty, who, under George Washington, challenged the then most powerful colonial empire.

Briefly stating, Kosciuszko was born in February, 1746 in Mereczowczyzna, Poland.

During the reign of the last, ill-fated king of Poland, Stanislaw August Poniatowski, Kosciuszko studied in the elite Corps of Cadets in Warsaw for four years and in 1769 he entered the French Higher Military School Ecole Militaire in Paris where for four years he studied military strategy and engineering. After the first partition of Poland, in 1772, Kosciuszko left Paris for Switzerland and Italy, where he spent his next three and a half years.

In 1776 he landed in Philadelphia Harbor and offered his services to the Continental Congress.

Before the Congress acted, the Pennsylvania Committee of Defense asked Kosciuszko to draw plans for fortifying the Delaware River. Military skill and foresight with which he executed this commission, earned him the rank of Colonel of Engineers in the Continental Army.

His recommendation for Ticonderoga defenses were ignored due to a mix up in which General Gates was temporarily relieved of command and Ticonderoga was lost to the enemy.

When General Gates resumed his command of the Northern Army, he entrusted Kosciuszko with planning of the Saratoga fortification and defenses.

After the Saratoga battle, General Gates congratulated Kosciuszko whose strategy of defenses saved the day for Americans and changed history.

After an effective service in the Southern Theater of Operations, and after the war's end, Congress awarded Kosciuszko with the rank of Brigadier General, a pension and land estates in Franklin County, Ohio.

He was also elected to the Society of Cincinnati, of which Washington was the first president. Its motto read:

"Omnia reliquit servare Republicam"—he relinquished all to serve the Republic.

It was, indeed, a fitting tribute to Kosciuszko's contributions to the American Revolution.

In July, 1784, Kosciuszko returned to Poland, nurturing in his heart the most valuable lesson he learned in America.

It was the concept of the Citizens Army—the first truly Citizens Army in the world that won the American Revolution against overwhelming odds.

That concept will, in later years be brought into fruition with Kosciuszko's call to Polish peasants to fight for their country.

Given more time, Kosciuszko would have created a Citizens Army for defense and restoration of the Polish Republic.

Unfortunately, time was denied him.

On October 9, 1795, Kosciuszko was severely wounded at the Battle of Maciejowice and taken prisoner of war by the Russians.

He spent three years in St. Petersburg's prison until he was freed by Czar Paul I, in December, 1796.

By then Poland was already wiped off the map of Europe after the third partition in 1795.

After his release from Petersburg, he was greeted with enthusiasm and acclaim in London and in Sweden.

When he arrived in Philadelphia on May 18, 1797, his welcome by the population was truly enthusiastic and warm hearted.

President John Adams sent him a congratulatory message.

George Washington wrote from his retirement at Mt. Vernon:—"Having been just informed of your safe arrival in America, I was on the point of writing to you a congratulatory letter on the occasion, welcoming you to the land whose liberties you have been so instrumental in establishing."

In 1800 Kosciuszko wrote a textbook on Maneuvers of Horse Artillery, at the request of General William R. Davis, which was translated 8 years later into English and became the official handbook for American Armed Forces.

Of course, I had to confine my address to a few most important points in Kosciuszko's biography, to emphasize the first sentence of my speech to you, that Kosciuszko is one of the great soldiers of American history, and one of the greatest heroes in the annals of Poland.

Yet Kosciuszko, in addition to American and Polish reverence, has a universal appeal as well.

He was one of our great humanitarians of all time and one of the great statesmen of the Western world.

Kosciuszko's military genius, civic wisdom and compassion are part of our great American legacy and tradition that gave us victory in the War of Independence and made this Republic the greatest institution of individual freedom and dignity the world has ever known.

Mr. Speaker, in recognition of the enormous contributions made by Kosciuszko to the winning of America's War for Independence, I have cosponsored H.R. 7706, a bill to designate the Thaddeus Kosciuszko Historic Route. This legislation would make possible the identification, by historic markers or tablets, of the points of interest in the United States where Kosciuszko made his most important contributions, and I urge the support of my colleagues for this Senate-passed legislation which will be considered as part of the omnibus national parks bill now before the House Interior and Insular Affairs Committee.

Mr. Speaker, as Congressman from the 11th Congressional District of Illinois, where many Polish-Americans reside, I am privileged to join them and Americans of Polish descent all over the Nation in this commemoration of the birth of General Kosciuszko and his devotion to democracy and human freedom.

AIRLINE NOISE ABATEMENT SURCHARGE: WHAT MORE WILL THE AIRLINES ASK FOR?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. VANIK) is recognized for 5 minutes.

Mr. VANIK. Mr. Speaker, yesterday the Ways and Means Committee heard testimony on H.R. 8729, the Airport and Aircraft Noise Reduction Act, and the administration's proposal for reduction in certain airport and airway trust fund taxes. The airlines and aircraft industry are asking for a 2-percent reduction in their trust fund taxes and a corresponding 2-percent surcharge levied by each airline. Funds from the surcharge are to be placed in escrow accounts to help airlines finance noise abatement investments.

I share the concern of all Members of Congress, the administration, the airline industry, and many citizens that we work toward quieter and more efficient aircraft. However, I question the need for this indirect subsidy to the industry. Airlines pay one of the lowest effective Federal income tax rates of all sectors of American industry. According to my sixth annual corporate tax study, three airlines effectively paid no Federal income taxes in tax year 1976. Three more paid less than one-quarter the mandated 48-percent Federal tax rate, another paid less than half, and only one paid the mandated rate. The following table show this data in more detail:

	1975 (approximate)—thousands			1976 thousands										
				Thousands						Percent				
	Adjusted net income before Federal income tax	Federal income tax	U.S. effective tax rate on wor'd-wide income	U.S. income before tax [2]	Foreign income before tax [2]	Worldwide income before tax [1]	Current U.S. tax expense [4]	Current foreign tax expense [4]	Current worldwide tax expense [3]	Effective U.S. tax rate on U.S. income [5]	Effective rate on foreign income [5]	Effective world-wide tax rate on worldwide income [2]	Effective U.S. tax rate on worldwide income [5]
Airlines [6]													
Trans World Airlines				(*)	(*)	60.415	1,659	10,540	12,199	(*)	(*)	20.2	2.7
United Airlines				(*)	(*)	26,391	12,725	984	13,709	(*)	(*)	51.9	48.2
American Airlines				78,133	----------	78,133	0	----------	0	0	----------	0	0

* Unavailable.

[1] Worldwide income before tax is comprised of income before Federal and foreign income taxes, adjusted to eliminate the equity in earnings or losses of unconsolidated subsidiaries and to restore the minority interest in earnings or losses of consolidated subsidiaries. In several instances the adjustment for equity in earnings of an unconsolidated subsidiary is not made because the parent has at least 80 percent ownership of the subsidiary and the subsidiary's income taxes are separately disclosed. In these circumstances it is likely that the subsidiary is consolidated with the parent for tax purposes, even though it is not for financial statement purposes.

[2] The allocation of income between U.S. and foreign sources is based on information voluntarily disclosed in the companies' financial statements. For the year under study there was no SEC or financial reporting requirement and such information be provided. Effective for fiscal years beginning after December 15, 1976, Financial Accounting Standards Board Statement No. 14 requires increased disclosure of foreign operations. The SEC is presently considering the adoption of a rule similar to FASB Statement No. 14.

Uniform methods of allocating income between U.S. and foreign sources have not been developed; and corporate administrative, capital and product development costs are subject to arbitrary allocation methods. However, the information provided, subject to the accuracy of the allocations, provides information useful in analyzing the effective income tax burden of multinational corporations.

Most companies allocate unrealized foreign currency exchange gains and losses recognized under FASB Statement No. 8 to foreign source income. Net exchange gains decrease the current effective tax rate and net exchange losses increase the effective tax rate. Some companies report high effective foreign tax rates (perhaps in excess of 100 percent) because of the recognition of such losses for financial reporting purposes.

[3] Current worldwide tax expense is comprised of the current portion of the Federal and foreign income taxes reported for financial accounting purposes. Generally, financial accounting rules require that the income taxes currently payable be stated separately from those payable in the future. The taxes payable in the future, called "deferred taxes", are attributable mostly to "timing differences" in recognizing income and deductions for financial accounting and tax purposes. The taxes payable currently in most cases represent the tax estimated to be shown on the return to be filed. However, the current provision for each year is adjusted by the over- and under-estimation of the prior year's current provision. To the extent of the current and prior year errors in estimation the current income tax provision does not represent actual current tax expense.

[4] The allocation of current income taxes between U.S. and foreign expense is required by the SEC. In some instances, where the amount involved is not material, State or foreign income taxes may be included with U.S. income taxes. Thus, companies that do not separately state U.S. and foreign earnings must at least separately state U.S. and foreign income taxes allocated between current and deferred, when they are material.

[5] The effective tax rates are computed by dividing the worldwide, foreign and U.S. current tax expenses by worldwide, foreign and U.S. income before tax, respectively. In addition, an effective rate of U.S. tax on worldwide income is computed by dividing the current U.S. tax expense by worldwide income before tax.

For those companies which chose to disclose foreign earnings, the computation of the effective U.S. tax rate on U.S. income and foreign tax rate on foreign income is possible. For those companies which chose not to disclose foreign earnings, only the effective rate of the U.S. tax on worldwide income and worldwide tax on worldwide income is determinable.

[6] Under the provisions of U.S. tax accounting rules and treaties with foreign countries, international air carriers are taxed on transportation income in their home country, regardless of where the revenues were generated. The foreign income and taxes reported for the airlines are attributable to non-transportation activities, such as hotels and resort facilities.

Aside from these abysmally low tax rates, the Senate Finance Committee voted on Friday to extend by 1 year the time in which airlines may offset 100 percent of their tax liability with the investment tax credit. Normally, industries can use the investment tax credit to offset only up to 50 percent of their tax liability. This measure could save airlines up to $50 million.

I understand that the reduction in airline trust fund taxes and the 2-percent surcharge will help airlines comply with Federal regulations that have a retroactive impact.

However, I doubt that the airlines make a proper case for further subsidy. The general taxpayer—including millions who use the airlines only occasionally—should not carry any new burdens for this pampered industry. The runways, the terminals, the monitoring of the airways, have been developed and carried on with general taxpayer funds. Aircraft technology is substantially paid for through defense expenditures. Frankly, we are at the end of the line in public subsidies.

Mr. Speaker, it is my hope that the Ways and Means Committee will think long and hard about the need and propriety of the tax aspects of this legislation.

THE STATE OF THE ECONOMY—AND WHAT TO DO ABOUT IT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. REUSS) is recognized for 30 minutes.

Mr. REUSS. Mr. Speaker, on Monday, February 6, I addressed the College of Commerce of DePaul University, at the Lewis Center Theater in Chicago, on the state of the economy and some proposals for maintaining economic expansion and dealing with basic problems of unemployment. The remarks follow:

THE STATE OF THE ECONOMY—AND WHAT TO DO ABOUT IT

Three weeks ago President Carter told us that "the State of the Union is sound." I am not going to dispute that judgment. We have a competent Administration in Washington, committed to sustained economic expansion, to good government management, and willing to undertake small, useful, carefully-thought-out initiatives on the social front—the "we-take-all-comers" youth jobs program in a few selected cities, the new HEW initiatives to help pregnant teenagers, for example. There is much here to admire and be thankful for.

This, I know, sounds like faint praise. And it is. For while the Administration has been getting the mechanics of government organization and economic stabilization under control, the President's broader, ennobling ambitions seem to have slipped beyond his grasp. Full employment, welfare reform, tax reform, national health care: all seem more distant now than ever. Cities and the poor who live in them have yet to benefit from this Administration. We are approaching another New York financial crisis, less serious perhaps than the one two years ago, but with every indication that the roles of the players—supplicant city, concerned but impecunious State, skinflint Federal government—have not changed in any fundamental way since 1975. Carter's people are giving us management, not leadership; and it is leadership that we need.

What has gone wrong here? Were the promises of the election campaign overblown, disingenuous, dishonest? Did Carter really not mean all those things he said? I don't think so. Rather, I think that the Administration has made two strategic mistakes, which have had the effect of forcing the

broader social objectives onto the back burner.

The first was a misplaced emphasis on the priority of the energy program. On this, I side with the medal-bedecked general of a recent New Yorker cartoon, who says to a Georgetown grande dame at a cocktail party: "Madam, in my opinion there is no moral equivalent of war." By weighing in with a complicated energy program of debatable urgency, equity and effectiveness, Carter opened himself to a protracted war of attrition with the oil, auto, and other special interests, sapping his political energies and dissipating his moral authority. At a time when the world is awash in oil, when the real price has been declining (because of inflation) for over 4 years, and when political relations between the U.S. and the major oil-producing states are better than ever, many legislators find it difficult to see the benefit in a crash commitment to energy independence.

I continue to hope and pray that the resulting legislative stalemate can be resolved.

The second mistake came in the autumn of 1977. The Administration's top economists, alarmed by a run of soft statistics, the stock slump, rising interest rates, and what seemed at the time to have been a stubborn 7 percent unemployment rate, succumbed to a general atmosphere of business nervousness and opted for a $25 billion tax cut. In so doing, they got themselves into a budgetary straitjacket from which they cannot easily escape. Again, cutbacks in proposed endeavors to deal with unemployment and urban ills have been the result.

How will the tax cut affect us? It will stimulate the economy some, reduce unemployment to perhaps 6.0 percent by 1979, and give minor boosts to inflation and the trade deficit. If the Federal Reserve responds as usual, the budget deficit will climb, from $50 billion in calendar 1977 to at least $60 billion through 1979, further from the once-promised balance than ever. Loud cries will be heard throughout the land that federal expenditures must be brought under control—despite the fact that federal spending as a share of GNP has not materially increased in 20 years. Then the unemployed, the poor, the declining cities and depressed rural regions will find the Washington cupboards bare. Their problems cannot be solved by tax cuts alone.

To be sure, those who have argued in favor of a tax cut have history on their side. We had a tax cut in 1964, and again in 1975, and again in the first months of the Carter Administration. There are people, not all of them outside the Administration, for whom cutting taxes is the remedy for all conceivable economic ills—unemployment, inflation, under-investment, you name it. Now the Republicans are joining the fray, seeking to outdo even the President in giving away federal revenues before they are received.

What this country really needs is a massive attack on unemployment, not a massive tax cut. Structural unemployment—half or more of the current 6.3 million unemployed—is the towering fact of our economic and social life. To cite the most depressingly familiar fact, half of black teenagers living in central cities are looking for jobs but cannot find them. Many others have given up. In the meantime, urban manufacturing concerns—steel is the most spectacular example—are shrinking, closing down, relocating to the suburbs, the Sunbelt, or to South Korea. The jobs that remain are low-paid, low-productivity service occupations that provide little work satisfaction and few prospects of advancement. The "welfare culture" that emerges is not, as many people imagine, one in which many people subsist indefinitely on the dole, never looking for or accepting employment. Rather, it is one in which millions of desperate, job-hungry men and women drift from one menial occupation to another, relying on welfare in between-times, but always looking and seldom finding the opportunity to gain a foothold in a career ladder.

This is not a destiny we would accept for ourselves, and not one we should expect our fellow-citizens to accept. We can break the cycle of pointless, stagnating lives, but only if we decide to put our back into it and keep it there.

There is so much to do.

In the private sector, closed-down factories ought to be manufacturing solar energy devices, pollution control machinery, mass transit vehicles, medical equipment. American corporations, great and small, have to be brought into the effort. The government ought to say to them: "Tell us what you think you can do to make jobs for the unemployed in your neighborhood—and reasonable profits for yourselves—and we'll help you to do it."

In the public sector, useful tasks likewise abound. Take just one example. In all our great cities, we've got public schools which are sitting empty because the school-age population has moved out. They are being heated at public cost. Or else they are simply abandoned, prime targets for vandals and arsonists. At the same time, there is tremendous need for day-care centers, and for lunch programs and recreational centers for senior citizens—the kind of functions that firehouses often serve in small towns. Why not use some of the ghetto unemployed for modernizing and reorganizing these buildings to serve a day-care or elderly care function? Why not use some of the young people who have studied to be teachers in this country, but can't get jobs, as straw bosses in the construction effort and as counselors when the centers open? And as paraprofessionals, why not use the hundreds of thousands of young people, mostly minorities, in our central cities who want and need useful work? Surely this is better than the degrading downward spiral of crime and drugs and mean streets and welfare and dependency that faces so many of them now.

Of course there are other things as well: sewerage and anti-pollution works, housing rehabilitation, civic maintenance, conservation work in the image of the old CCC, new roadbeds for our railroads, even such traditional public works as road maintenance and library construction. In Vienna, there are shopping centers in malls underneath the intersections of grand old city boulevards; in Paris, there is a fabulous new center for the arts; in London, a new national theatre complex. In Baltimore, federal financing is helping people buy and renovate structurally sound but run-down townhouses in an attractive 19th century neighborhood; in Boston, the waterfront is again thriving, thanks to the inspired rehabilitation of the historic Quincy markets. We can learn much from such endeavors. They provide jobs in the course of enriching the physical and cultural environments of all the people who come into contact with and use them.

At the moment, money to more than double the present 700,000-plus public service employment jobs is tucked away in the welfare reform bill, where it may easily languish for years. There is no reason for this. These jobs should be separated out and sent to Congress for immediate action. Additional measures—such as a differential minimum wage for labor-market entrants, and wage subsidies to encourage private industry to hire additional workers, should be tried experimentally in selected labor markets.

For the nation and in every major job market, we need a live-wire top-level extra-bureaucratic straw boss to ride herd on the total jobs-now effort in the area, both public and private. A dollar-a-year man, he or she could be appointed jointly by the President, and state governor, and the chief executives of local government. The task?—to tally up the structurally unemployed, and then to forward solutions by every thought, word, and deed. For starters, how about a Felix Rohatyn for New York, a Ben Heinemann for Chicago, a Bert Lance for Atlanta?

The Expediter's powers would derive not from any formal legal arrangement but out of the Expediter's public stature and the high-level source of his or her appointment. Deficiencies in public-sector jobs, and opportunities in private-sector jobs, should be pointed out and remedies suggested—by spoken and printed word, by press, radio and television, by any and all means of communication.

Can such a maximum jobs program sustain the economic recovery? Of course it can. Government spending, direct and indirect, has as much or more stimulative effect on the private economy as a tax cut. Incomes flow to the poor, who do not save, rather than to the relatively better-off who may be tempted to stock up their savings accounts, rather than plow their tax refunds back into consumption where it is needed. The effect on inflation of the two choices is probably about the same. And the effect on employment of direct job creation is much greater: each dollar spent on job creation does in fact create jobs, while only a fraction of tax-refund dollars do the same.

To be realistic, I don't expect to win this battle; at least not this time around. Having bolloxed up the Social Security bill by agreeing to a raised payroll tax rather than contributions from the general tax fund, the Administration needs an immediate offsetting tax reduction. Substantial energy tax increases are also in the works, and these too will have to be offset. Also it is a Congressional election year—and tax cuts at such times have a certain attraction for incumbents. So I think on October 1 those of you with incomes will see your taxes go down.

On the other hand, there is an increasing recognition of the futility of this approach. The problem of the American economy is not an insufficiency of cars, Japanese television sets, electric blow-dryers and inflatable swimming pools. Rather it is the existence of a substantial class of chronically unemployed and underemployed. It is the deterioration of our physical environment—our rail network, our public services, our city streets, our housing stock, the amenities of urban life.

We can, as many have done, simply leave the cities behind, and go forth to build a new life in sprawling suburbs or new towns. But suburbs in this age of expensive energy are becoming increasingly expensive to build and maintain. They too grow old and decay. And as we abandon the cities, we abandon the people who cannot afford to leave them—and for whom they have represented a remarkable haven from an even more destitute and oppressive existence on the sharecropping plantations of the rural South or the barrios of Puerto Rico—to an increasingly dangerous and miserable life.

So I am hopeful. My allies are increasing. Vernon Jordan of the Urban League sees the danger an addiction to tax cuts poses to the needs of his people. J. K. Galbraith and a group of distinguished economists have complained to the President about it. And the influence is spreading. G. William Miller, the new chairman of the Federal Reserve Board, has demonstrated his interest in an attack on structural unemployment. Members of the Business Council—200 top executives of United States industrial corporations—are with us. So is the business-sponsored Committee for Economic Development, which recently produced a valuable report on the subject. We may not win this time, but watch out. President Carter has already hinted that he may seek still another tax reduction in 1980. I predict he will find the support for

such an action very much reduced by that time.

What of inflation? If you haven't heard much lately about the Administration's anti-inflation program, it's because there isn't one. The proposed elimination of excise taxes on airline tickets and long-distance telephone conversations, while worthy measures in themselves, are all but irrelevant to the Consumer Price Index. Voluntary measures to bring wage settlements under the 8 percent level that seems endemic will work only so long as (a) unionized labor markets are loose, and (b) the Administration carries either great moral authority or a credible threat to sterner measures. None of the above, alas, is the case. If the inflation rate continues to decline, we will have good weather, good crops, and benevolent Arabs to thank, not the Council of Economic Advisers.

Ever since the Nixon wage and price controls of 1971–2, incomes policies have been around. It hasn't mattered all that much: the massive inflation of recent years, coinciding as it did with high unemployment and loose labor markets, must be blamed on supply factors such as the OPEC oil price rise, the food price increases of 1972–3, and on the devaluation of the dollar, far more than on the rapacity of particular corporations or labor unions. But this situation will not last. As the economy expands, bottlenecks appear in both the product and labor markets; certain key raw materials and certain specialized skills become scarce. Their price rises, and the dangerous phase of cost-push inflation is upon us again. As the evil day approaches, I predict you will hear more about the dangers of "overheating", and less about the supposed "market distortions" of controls. Already a plethora of new proposals have been tabled, many of whom would use tax penalties and incentives to encourage wage and price restraint. Such innovations are long overdue, and should be encouraged: perhaps a way of putting an incomes policy into effect with far lower administrative costs and less new bureaucracy is only around the corner. But an incomes policy we will have.

We will never, I hope, return to the bad old days of deliberately engineered recessions as the cure for inflation—with all the human and social consequences that such a strategy has produced in the past. But we cannot expect the high employment economy we desire to be inflation-free: the world simply is not so nice. I think you will see increasing recognition of this basic, unpleasant truth as time goes on.

What is the role of monetary policy in a continued economic recovery, capped with a structural employment program on a massive scale? Clearly, as William Miller himself has put it, it is best for the FRB to decide "independently" to cooperate rather than obstruct the Administration's goals. This means that the monetary hand should not retrieve, via tight money and higher interest rates, that which the fiscal hand provides. At the same time, the Fed should keep a close eye on the private credit markets, prepared to step in if a new wave of go-go lending—for corporate take-overs, real-estate swindles, bankrupt Third-World dictatorships—threatens to divert a significant amount of credit from economic development at home. We need, in short, a responsible, moderate monetary policy, neither inflationary nor restrictive.

The Fed, indeed, is the central element in that elusive compound, "business confidence". It is higher interest rates, not Administration policies, that have destroyed "confidence" in the stock market, and with it stock prices. It is signs of conflict between the FRB and the CEA—a pointless "so are you" and "you're another" contest—which led the financial community to doubt whether Carter has any economic policy at all.

There is an opportunity here for a change. The Fed can and should become more open, more forthright, more direct in setting and announcing its monetary growth and interest rate goals. It should revise the old goals—such as the M1 target now in effect for the year ending with this quarter—which have been exceeded, and hence cannot be met except by unthinkable monetary and economic contraction. It should drop the silly pretense that its short-run targets for the federal funds rate are secret for more than a day or two: sharp analysts invariably figure them out within that time and publish them in the Wall Street Journal. It should make clear just exactly what its medium-run targets are, not simply for such statistical artifacts as the monetary growth aggregates, but for such policy objectives as economic growth, employment and price stability.

A new era of openness at the FRB would greatly increase the ability of business to plan long-run investment and financing projects. It would, I venture to say, go far toward solving the "confidence" problem, and enable us to get on with our national goals.

I am hopeful that under William Miller we will get the kind of monetary policy we need. There is, however, a cloud on the horizon. This is the spectre, raised in early January of this year, of massive Federal Reserve intervention in the foreign exchange markets to prop up the declining international value of the dollar. The limited moves in January had a considerable but extremely temporary success: a few days after the intervention stopped the dollar's decline resumed.

I am not happy about the decline of the dollar. But the potential consequences of FRB involvement in the exchange markets bode far worse for business confidence, domestic interest rates, and the survival of the recovery itself than anything that is likely to happen in the foreign exchange markets left to themselves.

By well-justified tradition, the Federal Reserve has based its monetary policy in recent years on domestic and not principally on international economic conditions. The ostensible goals of that policy have been steady economic expansion and reasonably stable prices. This bedrock, and not the shifting sands of international currency markets, should remain the foundation of monetary decisions.

On July 29, 1977, Chairman Arthur Burns of the FRB testified as follows on the FRB's international role:

"The Federal Reserve has a certain responsibility for the position of the dollar in the exchange markets. Our broad policy is . . . to intervene only in the event of disorderly markets."

This is sound policy and good sense. While the definition of "disorderly markets" is a matter of professional judgment, and may vary, the principle is clear: the Federal Reserve should intervene in the exchange markets only to prevent wide, temporary fluctuations in exchange rates, of the kind that feed speculative profits, unsettle commercial transactions, and undermine confidence in the stability of the world order. The Federal Reserve should not attempt to peg the value of the dollar to that of any other particular currency or to SDRs. Such efforts are bound to fail, returning us to the era of unstable reserve balances, gold flight, and international monetary crises which the institution of flexible exchange rates was designed to end.

Intervention cannot be viewed as a significant long-term policy weapon. We have almost no ammunition for it. In a world where private international financial markets exceed $500 billion on a gross basis, the U.S. conducts foreign currency operations with a paltry $20 billion obtained on credit from foreign central banks. Such sums can effect day-to-day "blips" in the exchange rate, but that is about all. Interventions twice or three times as large (on a quarterly basis) have been attempted by foreign central banks recently without altering trends determined by underlying economic factors.

To the extent that short-term intervention to dampen fluctuations may be required, swap agreements of the sort employed by the Treasury and Federal Reserve on January 4 should be a satisfactory and sufficient tool. Domestic interest rates should not be changed for this purpose. On January 6, the FRB announced a ½ percent rise in the discount rate, from 6 to 6.5 percent, and cited "recent disorder in foreign exchange markets" as the reason. Even more disturbing are press reports linking the increase in the federal funds rate from 6½ to 6 9/16 percent on January 9 to the same cause. Such moves merely transfer "disorder" from the foreign exchange to the domestic credit markets. While the short-term impact on the dollar may be drastic, it soon may be offset by corresponding rises of interest rates in foreign credit markets, rather than yielding a permanent exchange rate adjustment. And the domestic impact of higher interest rates may be devastating: on the stock market, already slumping (partly in response to tightened monetary conditions), on business and investor confidence, on the level of investment and even on the health of the economy itself.

The recent decline of the dollar is not due to credit market conditions. Therefore, a stable dollar cannot be achieved by short-run credit tightening. The true cause of the recent decline of the dollar is apparent enough: our trade deficit, estimated at over $27 billion in 1977. This means, quite simply, that the U.S. has recently emitted $27 billion in paper obligations to foreign creditors, in exchange for which we have received real goods, chief among them oil. Much of that $27 billion is in the hands of the Arabs, who are unable to absorb a quantity of imports sufficient to digest their paper gains. Theirs is a cash management problem, to the tune of $130 billion dollars.

What happens? Naturally, Arabs and others with large dollar holdings diversify into other currencies, placing large upward price pressures on currencies like the Deutschmark and Swiss franc, which are in relatively scarce supply, and corresponding downward pressure on the value of the abundant dollar. This pressure is exacerbated by the now-rosy prospects of the pound sterling, which apparently is again competing with the dollar for a growing share of international money portfolio holdings.

The causes of our trade deficit are themselves also straightforward: (1) our increasing reliance on imported oil; and (2) the failure of other industrialized nations to expand their economies and share in absorbing the massive, unavoidable trade surplus of the OPEC nations.

Solutions are less easy to come by. We must try harder to diminish our reliance on foreign oil, and thus lessen our trade deficit with OPEC. We could control imports, at great cost to consumers, and to the efficiency of our import-dependent industries, to say nothing of the cost to our friends abroad. We could raise interest rates and collapse the economy until our import demand shrinks to the miserable level of the rest of the world. But who wants to return to the Depression?

Instead, the sensible course lies in keeping our own economic recovery firmly on track, paying special attention to structural unemployment and to developing a strategy against inflation. If we peg our currency to the mark, we lose control of domestic monetary policy to the Bundesbank. This represents a far graver threat to the "independence" of the Federal Reserve than any amount of rhetoric by the President. We can't afford it: we must maintain the mone-

tary flexibility to pursue continued domestic expansion.

Hope for the dollar also requires that we apply serious, steady, and inexorable pressure on our friends and allies. Only if the economies of Germany, Japan, France, Britain and Canada can be induced to expand more rapidly, can we hope for relief from the burden of financing world trade with an ever-unsteadier dollar. Partly, expanded Western economies will mean increased direct imports from us. Partly, too, they will mean increased exports from the Third World to our trading partners, with the U.S. benefiting on the rebound by increased capital equipment exports to the Third World. Only an increased level of world-wide demand, not any tinkering with the exchange rate or domestic interest rates, can contribute to the solution of the dollar problem.

We must address ourselves to the real malady of our patient, not merely fool around with his thermometer.

In applying such pressure on our allies, we are doing them no favor. We are asking a real sacrifice—namely that they risk the inflation and political instability that often accompany a rising economic trend. Inflation-minimizing growth policies, directed at structural unemployment, regional development, and selective management of incomes and prices, are possible but politically difficult. Many of our allies, especially those with weak or threatened governments, do not feel sufficiently secure in their seats to take risks for our sake. We should urge on them that unless they do, the long-term consequences for all of us—continued world-wide stagflation—could be very serious indeed.

The moral is: no easy solutions. This being so, easy solutions like rigging foreign exchange markets and raising domestic interest rates should not be tried. We must keep our own recovery under steam. We must work on the diplomatic front to help our allies participate in a world-wide recovery—without inflation.

So there you have it. In a nutshell, we need a jobs program; an incomes policy, a Brannan-type farm program, and a liberal import policy—all to combat inflation; and cooperation from the Federal Reserve Board and from our allies and to leave the foreign exchange markets alone. A tall order, you say, and I agree. If this proposal is a liberal one, because it places its emphasis on the human need for jobs for a living and for dignity, it is also a conservative one, because it accomplishes what needs to be done in the most direct and least costly manner possible, and with the utmost participation of the private sector.

Like anything worthwhile, this program would mean some sacrifices. Mostly these are sacrifices of belief: belief in the universal efficacy of tax cuts, in the sanctity of unimpeded wage and price determination in "free" markets, in the now-fashionable shibboleth that governments are good for nothing.

Those of us who are white, male, educated, experienced, and employable must be prepared to share our opportunities more than we have had to in the past. But this, I believe, is the way to progress. And a shift of strategy along these lines would demonstrate, as a tax cut never will, that President Carter's Washington has the guts and the integrity to face and master America's most compelling social problem.

CRIME SUBCOMMITTEE TO HOLD HEARINGS ON CIGARETTE BOOTLEGGING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CONYERS) is recognized for 5 minutes.

Mr. CONYERS. Mr. Speaker, the Subcommittee on Crime of the House Committee on the Judiciary has scheduled an initial set of hearings on H.R. 8853 and H.R. 10066, which address the problem of racketeering in the sale and distribution of cigarettes.

The first 2 days of hearings will be February 15, 1978, and February 28, 1978, beginning each day at 10 a.m. in room 2237, Rayburn House Office Building.

At the hearings on February 15, the subcommittee will take testimony from Members of Congress who have sponsored the major legislative proposals in this area. The subcommittee currently has pending before it 21 bills on the subject.

Those wishing to testify or to submit a statement for the record should address their requests to the House Committee on the Judiciary, Subcommittee on Crime, 207–E Cannon House Office Building, Washington, D.C. 20515 (Telephone: 202–225–1695).

VETERANS' PENSIONS AND SOCIAL SECURITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Tennessee (Mr. FORD) is recognized for 5 minutes.

Mr. FORD of Tennessee. Mr. Speaker, the Committee on Veterans' Affairs is holding hearings today, tomorrow, and Thursday on the veterans' pension program. The focal point of these hearings is the Veterans and Survivors Pension Improvement Act of 1978, a bill which was introduced by Mr. MONTGOMERY, chairman of the Veterans' Affairs Subcommittee on Compensation, Pension, and Insurance.

This bill would raise pension levels to make sure that all veterans' pension recipients will not be forced to live below the poverty level. In addition, it would cure the inequitable situation which occurs when a pensioner who also draws social security receives an increase in social security. Currently, that person suffers a reduction in his veterans' pension as a result of the social security increase.

Mr. Speaker, last year I introduced H.R. 904, a bill which would eliminate this inequity by passing through the social security increase to the pensioner. This morning I testified before the subcommittee on this problem, and at this point I would like to share with you my testimony:

TESTIMONY BY HAROLD FORD ON THE SUBJECT OF VETERANS' PENSION LEGISLATION

Mr. Chairman and members of this distinguished subcommittee, I appreciate very much the opportunity to testify before you on the subject of veterans' pension legislation. One of the first problems I encountered when I served on the Veterans' Affairs Committee was the current procedure which mandates reductions in veterans' pensions in certain cases when social security benefits are increased.

Today, veteran pensioners who also receive social security benefits are deprived of the full cost-of-living increase which is granted social security recipients annually. Social security cost-of-living increases often push recipients into a higher income bracket. As a result, many individuals who also receive a veteran's pension suffer a reduction in that pension. In many cases, the pension has been terminated. In the 94th Congress and again in the 95th I introduced the Veterans' Benefits Pass-Through bill, which would eliminate this inequity by making certain that increases in social security would be "passed through" to those who receive a veteran's pension as well.

The amount of income used to determine benefit levels is called countable income. This figure excludes such forms of assistance as welfare and food stamps, but it includes 90 percent of a person's social security payments. Thus, as the general price level rises, and social security recipients are given a cost-of-living increase, the Federal government quickly recovers part of the increase by reducing that person's veteran's pension.

This form of giving with one hand but taking away with the other is especially important because of the number of pensioners it affects. Of the nearly 5,470 persons receiving a veteran's pension about 80 percent receive social security payments also. Many of these pensioners rely on these two benefits as their sole source of income. It is said that this procedure never leaves the pensioner with less overall monthly income—that the decrease never more than offsets the increase, but often leaves the recipient with a slight increase in monthly income. Such thinking fails to realize that when we speak in terms of real income—that is, buying power—the beneficiary is often worse off.

The social security cost-of-living increase is granted to offset the cruel bite of inflation. When the Government takes it away, the recipient is increasingly pressed for ways to make ends meet, since his monthly cost of living rises even though his income remains about the same. This is especially crucial in this case, where so many of those affected are surviving on the fixed income of veterans' pension benefits and social security.

Mr. Chairman, the purpose behind the veteran's pension program is twofold. First, it attempts to relieve the distress from disability or destitution which many veterans face when they find themselves past their prime in terms of working ability and earning power. In this sense it is an income maintenance program. But I believe it is much more. It is a program to reward veterans for interrupting their lives to defend our national freedom. It is a program to provide recognition for service in the most useful way. I find that the current procedure undermines this purpose and degrades our veterans and their families in their time of need.

Mr. Chairman, 176 Members of the House shared the concerns I have outlined by cosponsoring my bill. Many others introduced bills of their own which would address this problem in a similar manner. There is not a Member of Congress who is not familiar with the inequity I have described.

I commend you, Mr. Chairman, and the members of this subcommittee for finally addressing this and other problems with the veteran's pension. I have joined with you by cosponsoring H.R. 10173, and I support you in your efforts to obtain its favorable consideration.

BILL REDUCES FOUNDATION REPORTING REQUIREMENTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. JONES) is recognized for 5 minutes.

Mr. JONES of Oklahoma. Mr. Speaker, I am introducing a bill today to reduce the paperwork burden on private foundations and charitable trusts which are treated as private foundations under the tax code.

Specifically, my bill would simplify the

annual information return and reporting requirements imposed by the tax code by combining these two duplicative reports into one filing.

Under current law, a private foundation must annually file with the Internal Revenue Service a detailed information return setting forth data concerning the foundation's receipts and expenditures, assets and liabilities, contributors, managers, compensation expenses, distributions for exempt purposes, activities, and compliance with private foundation rules. In addition, a foundation having assets of $5,000 or more must file a short "annual report." For the most part, the annual report calls for the same data which is already shown on the annual information return.

Also under current law, a private foundation must file copies of both the information return and the report with the attorney general for the State in which the foundation was incorporated or organized, the State in which its principal office is located, and any State in which it is registered to carry on its activities. Copies of both the annual return and the annual report can be obtained by the public through the Internal Revenue Service, although necessarily there is some delay between the time of filing and the time copies can be obtained. The annual report—but not the more detailed information return—must be made available at the foundation's principal office for inspection during a period of 180 days following publication of newspaper notice as to the report's availability.

PROPOSED LEGISLATION

My bill would repeal the Internal Revenue Code provision (sec. 6056) which requires foundations to file an annual report containing certain information with the Revenue Service and with State officials (sec. 1 of bill). Since the annual report would be eliminated, the current list of required information which must be furnished in the information return would be modified to include those items now shown on the annual report but not on the information return (sec. 3 of bill). It appears that only minor changes would have to be made by the Revenue Service in the annual information return forms and instructions to request these additional items.

The bill would also make appropriate amendments to existing statutory provisions in order to provide for public inspection and filing with State officials of annual information returns, in place of annual reports (sec. 2 of bill); to require publication of newspaper notice with respect to availability of annual information returns, in place of annual reports (sec. 2 of bill); and to provide penalties for failure to comply with the requirement as to public inspection, and so forth of annual information returns (sec. 4 of bill). On the assumption the bill would be enacted in 1978, the changes made would be effective with respect to taxable years beginning after December 31, 1978; for example, as to the return for 1979 filed by a calendar-year foundation.

Because the annual information return of a foundation would require additional and more detailed information than does the annual report form, the proposed legislation would actually increase the amount of information about the foundation which would be available for public inspection at the foundation's office. Also, this more detailed information would be available, through the public inspection requirement, at an earlier time (immediately after the filing date) than such information currently can be obtained through request to the Revenue Service. (The legislation would not affect the existing procedures for requesting copies of information returns from certain IRS offices.) However, the duplication presently required by two separate returns would be eliminated by consolidating the two returns into one. In addition, the bill would make returns available for inspection at the foundation's office in the case of small foundations, assets of less than $5,000, which under current law need not file the annual report form.

Mr. Speaker, I hope that my colleagues will support this attempt to reduce the paperwork burden on private foundations. We are all familiar with the fine and humanitarian work of the many private foundations in this country. Any assistance we can give them in reducing Government red tape and duplication will allow them more time to concentrate on helping our fellow citizens.

I would welcome cosponsors on this measure.

STATE DEPARTMENT COMMENTS ON ECONOMIC ANALYSIS OF TREATIES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. METCALFE) is recognized for 10 minutes.

Mr. METCALFE. Mr. Speaker, recent news reports have indicated that the economic and financial aspects of the Panama Canal treaties are receiving increased attention. Certainly the economic aspects of the treaties have been of major concern to the Panama Canal Subcommittee which I chair. This is the House subcommittee which will have to deal with treaty implementing legislation relating to the financing of the proposed canal commission and the establishment of a tolls structure for the canal.

On November 30 and December 1, 1977, the Panama Canal Subcommittee held hearings on the economic and financial aspects of the treaties. The printed record of these hearings should be available in the near future. Included in that hearing record will be the paper of Mr. W. M. Whitman, consultant to the Committee on Merchant Marine and Fisheries, whose paper was placed in the proceedings of the Senate of February 6, 1978 (page 2234) by the Senator from Utah (Mr. HATCH). Also included in the committee record will be the response of the Department of State to Mr. Whitman's paper. So that this response is available to the public, I present it here:

DEPARTMENT OF STATE,
Washington, D.C., February 3, 1978.

Hon. RALPH H. METCALFE,
Chairman, Committee on Merchant Marine and Fisheries, Panama Canal Subcommittee, House of Representatives.

DEAR MR. CHAIRMAN:

This is in response to your letter of January 9 asking for comments on Mr. W. M. Whitman's paper "Panama Canal Treaty Problems."

I note that a large segment of the paper is devoted to an analysis of operating costs under the new Treaties. It should interest you, therefore, to learn that a consultant to the Department is currently developing some cost projections. When we receive the final report in early February, I will provide a copy to the Subcommittee. It is my hope that the study offer considerable insight into the projected operating costs for the new Panama Canal Commission.

In the interim, I am enclosing a point-by-point analysis of the issues raised in Mr. Whitman's paper.

Sincerely,

DOUGLAS J. BENNET, JR.,
Assistant Secretary for Congressional Relations.

POINT-BY-POINT ANALYSIS

(1) CANAL REVENUE DEFICIENCY

Mr. Whitman is correct in stating that at the present time, Canal revenues would not cover the additional costs projected under the Treaty. But even without a new treaty, a toll increase might be necessary to meet operating costs. The new Treaty will significantly alter the cost structure of Panama Canal operations; certain functions will be transferred or eliminated, thereby increasing the net revenue and partly covering increased payments to Panama. An increase in toll rates in the neighborhood of 30% will be required to cover the total cost of Panama's annuity.

It should be observed in this respect, that Dr. Ely Brandes has testified before the Senate Foreign Relations Committee that the Panama Canal Commission should have sufficient revenue resources available to meet operating costs; that tolls could safely be raised 75% to 100%; and that this step would yield 40% more revenue. This estimate is more optimistic than the revenue estimates developed by our negotiating team during the treaty negotiations, and would allow a much greater increase in tolls than is necessary to provide for the annuity payment to Panama.

(2) TRAFFIC INCREASES

Our increased traffic projections are based on an analysis of future individual commodity movements on established trade routes. Mr. Whitman is correct that this is the only sound basis for projections of future Canal traffic. We anticipate that Panama Canal traffic will increase at a projected growth rate of about 2.2% per year. A sharp increase is projected for 1978 and 1979, mostly due to the transit of North Slope petroleum, which will begin to decline in 1980. However, increases in other commodity categories will tend to offset losses in petroleum shipments.

The anticipated toll increases would probably divert small volumes of traffic over time, but Canal traffic would still not reach the point of diminishing returns.

(3) APPROPRIATIONS OR ABSORPTIONS OF COSTS BY U.S.

We contemplate that the new Commission, like the present Canal Company, will have the authority to borrow funds from the U.S. Treasury with the obligation to repay. This option would cover any possibility of emergency that should be accorded the Canal operations in the interests of prudent management.

(a) *Interest of U.S. investment*

The interest referred to is a measure of the equity of the United States in the Panama Canal developed in the 1950's for accounting purposes. The definition of this equity in the Canal is a function of internal U.S.G. accountancy provided for under current law.

The Administration is familiar with the history and purposes of the requirement that the Canal Company make interest payments to the Treasury. It is a more complex matter than Mr. Whitman suggests. While he is correct that the Canal Company was to operate on the principle that "federal business enterprises should pay a rate of return on the Government's investment," Mr. Nachmanoff, the Deputy Assistant Secretary from Treasury whom he quotes, is also correct in stating that one reason for the interest requirement is to avoid a subsidy to users of the services of these business enterprises. The "subsidy" issue was in fact one of the key issues discussed in 1950 when Congress considered legislation to separate "business" from "government" functions in the Canal Zone. (See, in particular, Hearings on H.R. 8677, Subcommittee on the Panama Canal, House Committee on Merchant Marine and Fisheries, 81st Cong., 2nd. Session, and the Testimony of the Association of American Railroads, which urged that "no subsidy (should) be allowed to the water carriers . . . who are competitors" of the railroads. (Attention pp. 113–114.))

For all practical purposes, the interest requirement became effective in 1951, when President Truman organized the Canal Company and transferred the waterway and other assets to it, and when, pursuant to legislation enacted in 1950, the Canal Company could include interest in the tolls base. Prior to that time, it does not appear that interest was paid to Treasury.

The Administration intends to propose repeal of the interest requirement in the legislation to implement the treaties. This proposal will be based on considerations of national interest as well as on the expectation that the toll increase required to make the Commission self-sustaining will eliminate the need to avoid a possible subsidy. This proposal stems from efforts of the Negotiators to balance three policy objectives: (1) to keep the Commission self-sustaining; (2) to restrict Canal operating expenditures and costs to the Canal users; and (3) to help assure Panama's stake in the efficient operation of the Canal by providing Panama with an equitable share of the benefits of the Canal.

(b) *Depreciation*

Mr. Whitman's discussion on this subject does not appear to lead to his conclusion that the Panama Canal will not be self-sustaining under the Treaty. He fails to note that depreciation costs as used by the Panama Canal Company are a means of financing future capital costs of the Canal. During the treaty negotiations, the U.S. team assumed that there would be capital costs in excess of what would be provided by current depreciation techniques. The objective of the Negotiators was to insure that all Canal operating and capital requirements would be sustained by Canal revenues. This objective will be achieved through the use of appropriate accounting techniques.

(c) *Other treaty costs*

We have consistently maintained that the costs of payments to Panama can and will be met out of Canal revenues. Appropriated funds will only be necessary to implement other Treaty provisions that are not normal operating costs such as those for early retirement and relocation of military facilities.

(4) FORM OF GOVERNMENT AGENCY TO BE ESTABLISHED

The treaty provides that until the year 2000 the U.S. will have the right to manage, operate and maintain the Canal and that it will exercise these rights through a U.S.G. agency to be called the Panama Canal Commission. It will have a Board of Directors consisting of nine members, five of which will always be Americans.

Under the Treaty, it will be the sole prerogative of the U.S.G. to determine the structure of the Commission. For example, the method of selecting the five U.S. directors is left up to the internal processes of the U.S. The Executive Branch may recommend to Congress that like the Panama Canal Company, it should be a corporate agency of the U.S.G. Regardless of its structure, it will be a self-sustaining agency with revenues produced by operations to cover expenditures.

(5) AMBIGUITIES

There has never been any misunderstanding between President Carter and General Torrijos as to the exact meaning of the language of the Treaties. The Treaties clearly delineate our rights until the year 2000 and beyond. The Treaties are self-explanatory about our major rights and responsibilities.

(a) *Payments to Panama*

Paragraph 4(a) of Article XIII of the Treaty provides for payment to Panama of an annual amount of 30 cents "per Panama Canal net ton, or its equivalent, for each vessel transiting the Canal for which tolls are charged." The phrase "or its equivalent" refers to the measurement in PCTs for vessels transiting in ballast or on a displacement basis.

Paragraph 4(c) of Article XIII is a contingency payment due only if Canal revenues exceed expenditures. It is understood by the Parties that the "expenditures" referred to would include all actual costs of operation and maintenance of the Canal. These costs would include the payments to be made to Panama by the Commission pursuant to the provisions of the Treaty, funding for plant replacement and capital improvements, and repayment of borrowed funds. The need to finance these costs before making the Paragraph 4(c) payment was made clear to the Panamanian negotiating team. The specific accounting system to be utilized by the Commission is to be established by the U.S. The accounting system should be established in such a manner that it will be apparent from looking at the books at the end of the year whether such a surplus exists, and thus no disputes should arise on this question.

Paragraph 5 of Article III provides for payment to Panama of $10 million in reimbursement for certain public services. The payment for these services will be adjusted every three years to reflect inflation and other relevant factors including the actual costs incurred by Panama, and may be raised or lowered on the basis of each triennial review.

Panama currently owes the Panama Canal Company, Canal Zone Government $8.6 million. Most of the $8.6 million represents pre-1960 costs of garbage bills plus a $4.6 million leprosarium bill which increases at a rate of $37,000 per month.

Some of the debt is in dispute for various reasons. We expect that now that the new Treaties have been signed, we will be able to negotiate a reasonable settlement with the Panamanian Government.

The Treaty grants the U.S. all the rights necessary to operate the Canal, including authority to set tolls. It is contemplated that the Commission will be a self-sustaining entity. Since the U.S. has plenary authority to manage the Canal, Panama should not be saddled with deficits which might be incurred as a result of unilateral U.S. policies of Canal operation. However, the Treaty provides that Panama may agree to assume any liability contracted by the United States in connection with the operation of the Canal.

(b) *Statement of understanding*

It is clear from the Statement issued in Washington and Panama last October that our vessels of war are assured transit through the Canal as quickly as possible, without any impediment. Additionally, it is understood that the U.S. has the right to take whatever action it deems necessary, including the use of military force, to protect the neutrality of the Canal. Panamanian spokesmen have stated publicly that the Neutrality provision would allow the U.S. to take action against any threats to the Canal including those originating in Panama.

The Statement of Understanding is an official interpretation of these two articles. As such, it is not necessary that it be formally incorporated into the Treaty.

(6) CONSTITUTIONAL QUESTIONS

It is the position of the Executive Branch that a self-executing Treaty has the power to dispose of U.S. property concurrently and independent of the power of Congress under the Constitution.

On the question of appropriations, the Treaty provides for the measurement and source of the annuity payments. However, the Treaty does not dictate what procedures will be followed in appropriating these monies. Like all Treaties which include financial obligations, the procedures are left to the discretion of Congress.

THE BURKE PROPOSAL: SOCIAL SECURITY ONE-THIRD, ONE-THIRD, ONE-THIRD GENERAL REVENUE-FINANCING PROPOSAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. BURKE) is recognized for 5 minutes.

Mr. BURKE of Massachusetts. Mr. Speaker, I would like to take this opportunity to remind the House that I have filed a bill calling for restructuring of the financing for the social security system. I have received calls from a great many of the Members of the House and Senate asking for further information on my proposal. I have mailed to Members' offices a complete explanation of the program I have advocated—a program that was advocated by the late beloved Senator Robert F. Kennedy when he was in the U.S. Senate.

It is a sound system of financing. It is a system that is going to come about just as sure as you and I are here today. I think time is of the essence. I think it should be enacted this year.

I hope that each Member of this Congress is looking over the information I sent last week. The one-third, one-third, one-third bill will reinvigorate the textile industry, the footwear industry, the steel industry, the automobile industry—the manufacturing segment of America. It will help the farmers.

This is the type of legislation we have to put through to get the economy in this country moving. Any other step that has been proposed so far will be negligible. I think it is time that we take the bold initiative; financing through general revenue—reducing the tax to 3.9 percent rather than the regressive taxes we have today of 6.05 percent.

This tax is levied on the employer and employee, and is causing high unemployment in this country. It is causing the closing of steel plants and the lay off of workers. It is the major cause of the loss of 650,000 jobs in New York City that brought that city to the brink of bankruptcy. It is the cause of high unemployment in Detroit. It has also contributed to the closing of hundreds of shoe plants in New England. This exorbitant tax contributes to high hospital costs and high utility bills. Its regressive effect is to dampen the whole economy.

I now have well over 90 cosponsors on my one-third, one-third, one-third general revenue financing proposal, in response to my January 31 Dear Colleague letter. If you wish to become a cosponsor of this progressive legislation, please call my office—extension 53215.

Mr. Speaker, I would also like to bring to the attention of my colleagues the following news article which appeared in the Boston Sunday Globe on February 5, 1978:

SOCIAL SECURITY PLAN IS RIPE

(By Rachelle Patterson)

WASHINGTON.—General revenue financing of Social Security, which has been promoted by Rep. James Burke for nearly a decade, is an idea whose time apparently has come.

Every session since 1969 the 67-year-old Massachusetts Democrat and highest-ranking member of the House Ways and Means Committee has filed legislation calling for the federal government to pick up part of the tab for the Social Security system, a concept first introduced on Capitol Hill by Sen. Robert Kennedy in 1965.

"They used to laugh at him when he would introduce it," a Burke aide said the other day.

But ever since Burke sent out a "Dear colleague" letter on Monday, his office has been swamped with phone calls offering support from lawmakers who face reelection this year and who have heard from disgruntled wage earners upset over higher Social Security taxes enacted last year.

Under Burke's newest bill, the employee would pay one-third and the employer one-third. The other third would come from the U.S. Treasury, funded through the progressive income tax.

Currently Social Security is financed through equal contributions by employers and employees at a 6.05 percent rate. Burke would reduce the tax rate in 1979 from 6.13 percent to 3.90 percent for employees and employers.

The taxable wage base is currently $17,700 and is scheduled to rise to $22,900 in 1979. Under Burke's bill the taxable wage base would be increased in 1979 to $100,000.

Two other lawmakers have jumped on the bandwagon with proposals that call for general-revenue participation in Social Security financing.

Rep. John F. Seiberling (D-Ohio), a cosponsor of Burke's bill, has introduced a measure of his own that would phase in general-revenue financing next year by giving employees an 11-percent credit on what they pay in Social Security taxes. The credit would be reflected each week in the employee's paycheck. By 1982, the credit would increase to 22 percent, and in 1983 to 33 percent.

Tomorrow Rep. Abner Joseph Mikva (D-Ill.), one of the leading liberals on the House Ways and Means Committee, will announce his plan to have the Treasury assume about one-fifth of the costs of Social Security.

Under Mikva's plan, the disability insurance and hospital insurance portions of the payroll tax would be shifted to the general treasury. Sen. Gaylord Nelson (D-Wis.) is the Senate sponsor.

In its Social Security proposal last year, the Carter Administration sought to dip into general revenue as a backup in time of high unemployment. According to sources, the Administration would go further in promoting general revenue financing if it appeared politically viable.

The recent Carter tax cut plan is designed to effect the higher Social Security taxes and energy costs.

While the tax-cut proposal offers some tax benefits to industry, Burke feels that reducing the Social Security tax burden is a more effective way to stimulate employment. The Smaller Business Assn. of New England and the national AFL–CIO are among backers of Burke's plan. So are the 10 Massachusetts House Democrats, including House Speaker Thomas P. O'Neill, a number of liberal Republicans and members of the black caucus.

Among the arguments against the concept of general-revenue financing are: Social Security costs would be more controllable if reflected each week in a worker's paycheck; Congress could more easily resist special-interest groups seeking higher benefits, and philosophically the Social Security system is an insurance program that has no business being funded by the federal government.

PERSONAL EXPLANATION

(Mr. BAUMAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BAUMAN. Mr. Speaker, due to the inclement weather yesterday, I was unable to attend the session of the House, a great regret to many of my colleagues, I am sure. The power of nature is greater even than the power of Congress, thank God, and the snow prevented my presence.

Had I been present I would have voted as follows:

Rollcall No. 36. Suspension and passage of H.R. 9434. Vote: "nay."

Rollcall No. 37. House Resolution 982. Passage of rule making in order, H.R. 8336. Vote "nay."

Rollcall No. 38. Quorum call. I would have voted "present."

Rollcall No. 39. Krebs amendment to H.R. 6362. Vote: "nay."

Rollcall No. 40. Foley substitute to H.R. 6362. Vote: "aye."

WILDLIFE IMPLICATIONS OF WILDERNESS PROVISIONS OF ALASKA NATIONAL INTEREST LANDS CONSERVATION ACT

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SEIBERLING. Mr. Speaker, the Subcommittee on General Oversight and Alaska Lands has completed its markup of H.R. 39, the Alaska National Interest Lands Conservation Act authored by our colleague, Mr. UDALL, and cosponsored by many other Members. The last issue we considered was the designation of units of the national wilderness preservation system. After a thorough debate, the subcommittee voted to retain the wilderness designations in the subcommittee print with only minor changes. Thus, as the bill goes to the full committee, it will contain a designation of 82,000,000 acres of wilderness in the 132,000,000 acres of national parks, wildlife refuges, and other conservation units that would be created or expanded by the bill. While this is a large acreage, it is substantially less than the 148,000,000 acres granted to the State of Alaska and its Native population under prior legislation.

Because wilderness designations are such an important part of this bill, I think the Members will be interested in the incisive discussion of "wilderness, wildlife, and d–2" in the Anchorage Daily News for January 23, 1978. The writer, David R. Cline, is a wildlife biologist and is a member of the State steering council on Alaska lands which has been so active in talking to Members in recent weeks. As he points out:

For many people, wilderness and wildlife are to a great extent what Alaska is all about. There are annual wildlife spectacles here that can be witnessed nowhere else in America or the world.

The full text of Mr. Cline's article follows these remarks:

[From the Anchorage Daily News, Jan. 23, 1978]

WILDERNESS AND WILDLIFE AND D-2

(By David R. Cline)

As the Alaska d-2 lands debate intensifies in the months ahead, nothing will be more volatile than the matter of "wilderness."

Most Alaskans probably associate wilderness with wild undeveloped country, remote landscapes and the presence of wildlife. Thereafter lines are soon drawn between those who further view it as a frontier to be exploited, and others who see it as a homeland or a national heritage to be protected.

Need it be said there are strong feelings on both sides. As a wise Indian Chief once said, "What we see depends on where we stand."

One of the major difficulties in describing wilderness and wildlife is you cannot attach a dollar value to them anymore than you can a beautiful sunset, an endangered species or historic site. Their true value cannot be measured in the market place; only in the hearts and minds of those who use and enjoy them, who make them part of their culture across generations.

The fact is wilderness is a non-renewable resource. Both it and wildlife are irreplaceable components of our national heritage.

For many people, wilderness and wildlife are to a great extent what Alaska is all about. There are annual wildlife spectacles here that can be witnessed nowhere else in America or the world. Many laws, international treaties and agreements have been carefully forged to protect these wildlife values for the benefit of people wherever they live. These contracts in conservation carry obligations and responsibilities for all Americans.

It is of interest to note that the modern concept of wilderness was actually born and reached fruition in the U.S. Forest Service, ironically, the agency that in Alaska has for so long been reluctant to make wilderness recommendations for the Tongass and Chugach National Forests.

The noted forester and conservationist, Aldo Leopold, was instrumental in establishment of the nation's first wilderness area, the Gila Wilderness in New Mexico in 1924. Leopold stated that, "the administration of the National Forests of America has for its real purpose the perpetuation of life—human, plant, and animal life."

And through the leadership of Robert Marshall the Forest Service on its own protected over 14 million acres of National Forest land as "wilderness," "wild" or "primi-

tive areas," prior to passage of the Wilderness Act of 1964. It was Marshall who pointed out that the National Forest System is uniquely suited to provide multiple values to man including, "the peaceful timelessness where vast forests germinate and flourish and die and rot and grow again without relationship to the ambitions and interference of man."

Assistant Secretary of Agriculture Dr. M. Rupert Cutler recently stated that, "these observations are as valid today as when they were made, and the value of wilderness will increase as our society becomes more dependent upon complex technology."

Without question the Great American wilderness has been conquered, to where today only about 1 percent of the entire country is considered to be in a wilderness condition. And only a portion of this will ever receive full protection. Incidentally, only about 30 million acres of what remains has been given permanent protection by inclusion in the National Wilderness Preservation System. About 76,000 acres of this total is in Alaska, about .02 percent of the state.

Alaska, despite being recognized for its outstanding wilderness country, actually has less protection in the Wilderness System than 13 other states.

The key to protecting wildlife is protecting its habitat. This is an undeniable fact whether we are talking of our back yard wildlife species or those of the wilderness. In this regard it seems worth noting a Report of the Committee on North American Wildlife Policy developed in 1973 by some of the most noted wildlife authorities and game managers in the United States. The report stated in part:

The time for dedicating wilderness is short. It should be given high priority in our public land management . . .

The committee supports a strong wilderness preservation system, with its many wildlife related benefits . . .

The areas should be . . . (delineated) as rapidly as possible . . .

Incompatible uses such as grazing, mining or timber salvage should be prohibited. . . .

Species that will be particularly benefited by large wilderness areas in Alaska include those familiar to us all: caribou, Dall sheep, wolves, grizzly bears, musk ox, wolverines, birds of prey including peregrine falcons and bald eagles, and many others.

The d-2 legislation now before the Congress expressly provides that any restrictions that may apply in a wilderness are made subject to existing rights. And Alaskan conservationists are supporting language in the bill that will provide access to wilderness areas by traditional and established means including snowmachine, motorboat and aircraft.

So despite the seemingly endless, complex and confusing d-2 lands debate as relates to wilderness and wildlife, the basic problem is this: some want to exploit the State's resources wherever they occur, and conservationists want to permanently protect at least portions of Alaska's rich wilderness and wildlife heritage in a variety of landscape situations.

The debate is now, as it should be, before the American people in the Congress where the outcome will be decided soon. It would seem prudent for Alaskans, rather than devote valuable time and effort to self defeating anti-wilderness and anti-federal government lobbying, to instead begin fostering the highest levels of cooperation between Native landowners, the State of Alaska, and federal agencies in wildlife conservation and innovative wilderness management. Wildlife, after all, do not recognize jurisdictional boundaries in their annual travels, and no one group of people or single government agency can provide them adequate protection for the benefit of people standing alone.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mrs. HOLT (at the request of Mr. RHODES), for today, on account of illness.

Mr. GOLDWATER (at the request of Mr. RHODES), for today, on account of illness.

Mr. GOODLING (at the request of Mr. RHODES), for February 6 and February 7, on account of inclement weather and adverse traveling conditions.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. SIKES, for 30 minutes today, and to include extraneous material.

(The following Members (at the request of Mrs. FENWICK) and to revise and extend their remarks and include extraneous matter:)

Mr. ANDERSON of Illinois, for 30 minutes, today.

Mr. RAILSBACK, for 5 minutes, today.

Mr. CLEVELAND, for 5 minutes, today.

Mr. EVANS of Delaware, for 5 minutes, today.

(The following Members (at the request of Mr. LEDERER) to revise and extend their remarks and include extraneous material:)

Mrs. BOGGS, for 10 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes today.

Mr. BENJAMIN, for 5 minutes, today.

Mr. ROSTENKOWSKI, for 60 minutes, today.

Mr. VANIK, for 5 minutes, today.

Mr. REUSS, for 30 minutes, today.

Mr. CONYERS, for 5 minutes, today.

Mr. FORD of Tennessee, for 5 minutes, today.

Mr. JONES of Oklahoma, for 5 minutes, today.

Mr. METCALFE, for 10 minutes, today.

Mr. BURKE of Massachusetts, for 5 minutes, today.

Mr. BRADEMAS, for 5 minutes, today.

Mr. MURPHY of Illinois, for 60 minutes on February 14, 1978.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. LEVITAS, to insert extraneous material with his remarks on the rule and on the bill H.R. 6805 under consideration today.

(The following Members (at the request of Mrs. FENWICK), and to include extraneous matter:)

Mr. YOUNG of Florida.

Mr. COLEMAN.

Mr. CRANE.

Mr. STOCKMAN.

Mr. RHODES.

Mr. SARASIN.

Mr. RUPPE.

Mr. SYMMS in two instances.

Mr. HYDE.

Mr. MARTIN.

(The following Members (at the request of Mr. LEDERER) and to include extraneous matter:)

Mr. JACOBS in two instances.

Mr. WAXMAN.

Mr. GONZALEZ in three instances.

Mr. ANDERSON of California in three instances.

Mr. BINGHAM in 10 instances.

Mr. BENJAMIN.

Mr. JONES of Oklahoma in two instances.

Mrs. SCHROEDER.

Mr. HARRIS.

Mr. ROSE.

Mr. CONYERS.

Mr. MAZZOLI in two instances.

Mr. UDALL.

Mr. COTTER.

Mr. MCCORMACK.

Mr. LEHMAN.

Mr. SOLARZ.

Mr. PANETTA.

Ms. MIKULSKI in two instances.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 1360. An act to amend section 14(e) of the National Forest Management Act of 1976; and

S. 1509. An act to provide for the return to the United States of title to certain lands conveyed to certain Indian pueblos of New Mexico and for such land to be held in trust by the United States for such tribes.

ADJOURNMENT

Mr. LEDERER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 35 minutes p.m.), under its previous order, the House adjourned until tomorrow, Wednesday, February 8, 1978, at 1 o'clock p.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications wre taken from the Speaker's table and referred as follows:

3192. A letter from the Secretary of Defense, transmitting a reorganization order abolishing certain unfilled positions in the Department of Defense, pursuant to 10 U.S.C. 125 (a); to the Committee on Armed Services.

3193. A letter from the Deputy Secretary of Defense, transmitting a report on funds obligated in the chemical warfare and biological defense research programs during fiscal year 1977, pursuant to section 409(a) of Public Law 91–121, as amended (88 Stat. 1971); to the Committee on Armed Services.

3194. A letter from the Director, Congressional Budget Office, transmitting the annual report of the Office, pursuant to section 202 (f) of Public Law 93–344 (H. Doc. No. 95–287); to the Committee on the Budget and ordered to be printed.

3195. A letter from the Comptroller General of the United States, transmitting a report on accounting for automatic data processing costs (FGMSD–78–14, February 7, 1978); to the Committee on Government Operations.

3196. A letter from the Deputy Secretary of Defense, transmitting the 11th report on the Federal voting assistance program, pursuant to section 201 of the Federal Voting

Assistance Act of 1955; to the Committee on House Administration.

3197. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report on steps taken by the Agency for International Development because of human rights considerations to alter programs under part I of the Foreign Assistance Act of 1961, pursuant to section 116(d)(2) of the act, as amended (91 Stat. 537); to the Committee on International Relations.

3198. A letter from the Acting Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b; to the Committee on International Relations.

3199. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders entered in cases in which the authority contained in section 212(d)(3) of the Immigration and Nationality Act was exercised in behalf of certain aliens, pursuant to section 212(d)(6) of the act; to the Committee on the Judiciary.

3200. A letter from the Secretary of the Interior, transmitting the annual report of the Fish and Wildlife Service on administration of its functions under the Marine Mammal Protection Act of 1972, covering the period June 22, 1976, through June 21, 1977, pursuant to section 103(f) of the act; to the Committee on Merchant Marine and Fisheries.

3201. A letter from the Chairman, Council on Environmental Quality, Executive Office of the President, transmitting a draft of proposed legislation to authorize further appropriations for the Office of Environmental Quality, the Council on Environmental Quality, and for other purposes; to the Committee on Merchant Marine and Fisheries.

3202. A letter from the Chairman, Board of Governors, U.S. Postal Service, transmitting the annual report of the Postmaster General for fiscal year 1977, pursuant to 39 U.S.C. 2402; to the Committee on Post Office and Civil Service.

3203. A letter from the Comptroller General of the United States, transmitting a report on budgetary costs associated with implementing the All-Volunteer Force (FPCD–78–11, February 6, 1978); jointly, to the Committees on Government Operations, and Armed Services.

3204. A letter from the Comptroller General of the United States, transmitting a report recommending a coordinated Federal approach to planning, acquiring, and using computed tomography scanners (HRD–78–41, January 30, 1978); jointly, to the Committees on Government Operations, Armed Services, Interstate and Foriegn Commerce, and Veterans' Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. SISK: Committee on Rules. House Resolution 1006. Resolution providing for the consideration of H.R. 3813. A bill to amend the act of October 2, 1968, an act to establish a Redwood National Park in the State of California, and for other purposes (Rept. No. 95–866). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BEVILL:

H.R. 10791. A bill to amend title 38 of the United States Code in order to provide for the payment of service pensions to veterans of World War I and for certain surviving spouses and certain children; to the Committee on Veterans' Affairs.

By Mrs. BOGGS (for herself, Mr. MAHON, Mr. CEDERBERG, Mr. BRADEMAS, Mr. CONYERS, and Mr. HORTON):

H.R. 10792. A bill to authorize the Smithsonian Institution to acquire the Museum of African Art, and for other purposes; to the Committee on House Administration.

By Mrs. BOGGS (for herself, Mr. AKAKA, Mr. BONIOR, Mr. DRINAN, Mr. EDWARDS of California, Mr. EILBERG, Mr. FRENZEL, Mr. GOODLING, Mr. MEEDS, Mr. MITCHELL of Maryland, Mr. MOAKLEY, Mr. NOLAN, Mr. OTTINGER, Mr. PEPPER, Mr. PRICE, Mr. SIMON, Mr. SOLARZ, Mr. STEERS, Mr. THOMPSON, Mr. VENTO, Mr. WINN, Mr. ZEFERETTI, and Mr. EDGAR):

H.R. 10793. A bill to authorize the Smithsonian Institution to acquire the Museum of African Art, and for other purposes; to the Committee on House Administration.

By Mr. BURKE of Massachusetts (for himself, Mr. BINGHAM, Mrs. BURKE of California, Ms. COLLINS of Illinois, Mr. CONTE, Mr. DELLUMS, Ms. HECKLER, Mr. HAWKINS, Ms. JORDAN, Mr. METCALFE, Mr. MOAKLEY, Mr. MOFFETT, Mr. MOSS, Mr. MCFALL, Mr. NIX, Mr. OTTINGER, Mr. PEPPER, Mr. SOLARZ, Mr. STARK, Mr. STOKES, Mr. STUDDS, Mr. THOMPSON, Mr. CHARLES H. WILSON of California, Mr. WON PAT, and Mr. ZABLOCKI):

H.R. 10794. A bill to amend the Social Security Act and the Internal Revenue Code of 1954 to provide for Federal participation in the costs of the old-age, survivors, and disability insurance program and the medicare program, with appropriate reductions in social security taxes to reflect such participation, and with a substantial increase in the amount of an individual's annual earnings which may be counted for benefit and tax purposes; to the Committee on Ways and Means.

By Mr. CONABLE:

H.R. 10795. A bill to amend the Internal Revenue Code of 1954 to allow an individual to take a deduction for charitable contributions whether or not he itemizes his deductions; to the Committee on Ways and Means.

By Mr. FASCELL:

H.R. 10796. A bill to improve the functioning of Federal agencies by requiring the completion of proceedings in a timely manner; to the Committee on the Judiciary.

By Mr. FORD of Michigan (for himself, Mr. QUIE, Mr. BEDELL, Mrs. BOGGS, Mr. BONIOR, Mr. BRADEMAS, Mr. CORNELL, Mr. DENT, Mr. HOWARD, Mr. LE FANTE, Mr. METCALFE, Mr. MILLER of California, Mr. PRICE, Mr. SHIPLEY, Mr. SOLARZ, Mr. ZEFERETTI, and Mr. ROE):

H.R. 10797. A bill to authorize funds for the Hubert H. Humphrey Institute of Public Affairs; to the Committee on Education and Labor.

By Mr. FORD of Michigan (for himself, Mr. HEFTEL, Mr. MURPHY of Pennsylvania, and Mr. KILDEE):

H.R. 10798. A bill to amend certain provisions of title II of the Higher Education Act of 1965 relating to college library assistance; to the Committee on Education and Labor.

By Mr. FRENZEL:

H.R. 10799. A bill to amend title 39 of the United States Code to provide that pledge reminders of charitable organizations may be mailed at third-class rates; to the Committee on Post Office and Civil Service.

By Ms. HOLTZMAN (for herself, Mr. ADDABBO, Mr. BALDUS, Mr. BEDELL, Mr. CONYERS, Mr. CORMAN, Mr. CORNWELL, Mr. FASCELL, Mr. FLOOD, Mr. GRADISON, Mr. GUDGER, Mr. HARRINGTON, Mr. LUNDINE, Mrs. MEYNER, Mr. MIKVA, Mr. MINETA, Mr. PANETTA, Mr. PRICE, Mr. ROSE, Mr. RYAN, Mrs. SPELLMAN, Mr. THOMPSON, Mr. TRIBLE, Mr. VENTO, and Mr. ZEFERETTI):

H.R. 10800. A bill to amend the Immigration and Nationality Act to exclude from admission into and to deport from the United States all aliens who persecuted others on the basis of religion, race, or national origin under the direction of the Nazi government of Germany; to the Committee on the Judiciary.

By Mr. JONES of Oklahoma:

H.R. 10801. A bill to simplify the private foundation return and reporting requirements under the Internal Revenue Code, and to make private foundation information returns more readily accessible to the public; to the Committee on Ways and Means.

By Mr. LLOYD of California (for himself, Mr. ADDABBO, Mr. AKAKA, Mr. ANDREWS of North Dakota, Mr. BONIOR, Mr. BONKER, Mr. BURGENER, Mr. BYRON, Mr. DAN DANIEL, Mr. DUNCAN of Tennessee, Mr. EILBERG, Mr. ERTEL, Mr. EVANS of Georgia, Ms. FENWICK, Mr. FLORIO, Mr. GOODLING, Mr. GRASSLEY, Mr. HANNAFORD, Mr. HILLIS, Mr. HYDE, Mr. KOSTMAYER, Mr. LAFALCE, Mr. LEDERER, Mr. LENT, Ms. LLOYD of Tennessee):

H.R. 10802. A bill to amend the Internal Revenue Code of 1954 to allow a deduction of not more than $1,500 for amounts paid or incurred for maintaining a household a member of which is a dependent of the taxpayer who has attained the age of 65; to the Committee on Ways and Means.

By Mr. LLOYD of California (for himself, Mr. MCKAY, Mr. MATHIS, Mr. MILLER of California, Mr. MOAKLEY, Mr. MURPHY of Pennsylvania, Mr. O'BRIEN, Mr. OTTINGER, Mr. PEASE, Mr. PERKINS, Mr. PRICE, Mr. PRITCHARD, Mr. RANDALL, Mr. RYAN, Mr. SOLARZ, Mr. TREEN, Mr. TRIBLE, Mr. CHARLES WILSON of Texas, and Mr. WOLFF):

H.R. 10803. A bill to amend the Internal Revenue Code of 1954 to allow a deduction of not more than $1,500 for amounts paid or incurred for maintaining a household a member of which is a dependent of the taxpayer who has attained the age of 65; to the Committee on Ways and Means.

By Mr. LLOYD of California (for himself, Mr. CHAPPELL, Mr. CUNNINGHAM, Mr. DAVIS, Mr. DERWINSKI, Mr. EVANS of Georgia, Mr. FISH, Mr. GOODLING, Mr. LUKEN, Mr. MURPHY of Pennsylvania, Mr. PATTERSON of California, Mr. PEPPER, Mrs. SPELLMAN, and Mr. CHARLES H. WILSON of California):

H.R. 10804. A bill to strengthen Federal programs and policies for combating international and domestic terrorism; jointly, to the Committees on International Relations, the Judiciary, and Public Works and Transportation.

By Mr. MAZZOLI:

H.R. 10805. A bill to suspend until the close of June 30, 1980, the duty on certain nitrocellulose; to the Committee on Ways and Means.

By Mr. MINISH:

H.R. 10806. A bill to amend the Tariff Schedules of the United States by repealing item 807 of schedule 8, part 1, subpart B; to the Committee on Ways and Means.

By Mr. RAILSBACK (for himself, Mr. MURPHY of Illinois, Mr. O'BRIEN, Mr. STEERS, Mr. PATTEN, Mr. SCHEUER, Mr. MOTTL, Mr. LAGOMARSINO, Mr.

DUNCAN of Tennessee, Mr. PRICE, Mr. CRANE, Mr. LEACH, Mr. SIMON, Mr. BEDELL, Mr. BAUCUS, Mrs. SPELLMAN, Mr. MCHUGH, Mr. GOODLING, Mr. MAZZOLI, and Mr. SOLARZ):

H.R. 10807. A bill to eliminate racketeering in the sale and distribution of cigarettes, and for other purposes; to the Committee on the Judiciary.

By Mr. SEIBERLING (for himself, Mr. AMMERMAN, Mr. CAPUTO, Mr. EILBERG, Mr. HANNAFORD, Ms. HOLTZMAN, Mr. HUGHES, Mr. MATHIS, Mr. MCDADE, Mrs. MEYNER, Mr. MURPHY of Pennsylvania, Mr. PRICE, Mr. SIMON, Mr. TRAXLER, Mr. VENTO, Mr. WEAVER, and Mr. WEISS):

H.R. 10808. A bill to amend the Internal Revenue Code of 1954 to allow, as a credit against income tax, certain amounts of social security taxes paid by an employee, and to make the earned income credit permanent; to the Committee on Ways and Means.

By Mr. STANGELAND:

H.R. 10809. A bill to amend the Internal Revenue Code of 1954 to exempt farm vehicles from the highway use tax; to the Committee on Ways and Means.

By Mr. STOCKMAN:

H.R. 10810. A bill to amend the Farm Labor Contractor Registration Act of 1963 as amended to exclude from the requirement of registering as farm labor contractors certain farmers, and for other purposes; to the Committee on Education and Labor.

By Mr. TEAGUE (for himself, Mr. MILFORD, Mr. LLOYD of California, Mr. AMBRO, Mr. FUQUA, Mr. YOUNG of Missouri, Mr. RUDD, and Mr. GOLDWATER):

H.R. 10811. A bill to authorize research, development and demonstration projects relating to aviation, and for other purposes; to the Committee on Science and Technology.

By Mr. TEAGUE (by request):

H.R. 10812. A bill to authorize appropriations to carry out the Standard Reference Data Act; to the Committee on Science and Technology.

By Mr. THONE:

H.R. 10813. A bill to amend title VIII of the Public Health Service Act to extend for 2 fiscal years the program of assistance for nurse training; to the Committee on Interstate and Foreign Commerce.

By Mr. WAXMAN:

H.R. 10814. A bill to provide employment programs for middle-aged and older workers; to the Committee on Education and Labor.

By Mr. BYRON:

H.R. 10815. A bill to provide for the payment of losses incurred as a result of the ban on the use of the chemical Tris in apparel, fabric, yarn or fiber, and for other purposes; to the Committee on the Judiciary.

H.R. 10816. A bill to amend title 38 of the United States Code in order to provide for the payment of service pensions to veterans of World War I and for certain surviving spouses and certain children; to the Committee on Veterans' Affairs.

By Mr. DERRICK (for himself, Mr. DINGELL, Mr. NATCHER, Mrs. LLOYD of Tennessee, Mr. CHARLES H. WILSON of Texas, Mr. BARNARD, Mr. TSONGAS, Mr. AKAKA, Mr. HYDE, Ms. HOLTZMAN, Mr. YOUNG of Missouri, Mrs. KEYS, Mr. EILBERG, Mr. MCKINNEY, Mr. ABDNOR, Mr. BURGENER, Mr. BAUMAN, Mr. FRENZEL, Mr. PANETTA, Mr. LENT, and Mr. MITCHELL of New York):

H.R. 10817. A bill to improve congressional oversight of Federal programs and activities by requiring greater specificity in setting program objectives, by requiring continuing information on the extent to which programs are achieving their stated objectives, by requiring periodic review of new authorizations of budget authority and tax expenditures, and for other purposes; to the Committee on Rules.

By Mr. DERRICK (for himself, Mr. PRICE, Mr. DODD, Mr. LEGGETT, Mr. COHEN, Mr. SANTINI, Mr. KREBS, Mr. PATTERSON of California, Mr. HOLLAND, Mr. JENRETTE, Mr. LUNDINE, Mr. PREYER, Mr. ROUSSELOT, Mr. HANNAFORD, Mr. WHITEHURST, Mr. MCHUGH, Mr. LUJAN, Mr. COTTER, Mr. GOODLING, and Mr. RAHALL):

H.R. 10818. A bill to improve congressional oversight of Federal programs and activities by requiring greater specificity in setting program objectives, by requiring continuing information on the extent to which programs are achieving their stated objectives, by requiring period review of new authorizations of budget authority and tax expenditures, and for other purpose; to the Committee on Rules.

By Mr. ECKHARDT:

H.R. 10819. A bill to amend the Consumer Product Safety Act to extend the authorization of appropriations contained in such act, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. FISHER (for himself and Mr. KRUEGER):

H.R. 10820. A bill to provide that individuals who retired on disability before October 1, 1976, shall be entitled to the exclusion for disability payments under section 105(d) of the Internal Revenue Code of 1954 without regard to the income limitation in such section, and for other purposes; to the Committee on Ways and Means.

By Mr. MURPHY of New York:

H.R. 10821. A bill to confer jurisdiction upon the Court of Claims to hear and make determinations with respect to certain claims and for other purposes; to the Committee on the Judiciary.

By Mr. MURPHY of New York (for himself, Mr. BREAUX, Mr. RUPPE, Mr. ROGERS, Mr. ANDERSON of California, Mr. PRITCHARD, Mr. METCALFE, Mr. GINN, Mr. STUDDS, Mr. BOWEN, Mr. BONKER, Mr. AUCOIN, Mr. PATTERSON of California, Mr. ZEFERETTI, Mr. OBERSTAR, Mr. HUGHES, Ms. MIKULSKI, Mr. BONIOR, and Mr. AKAKA):

H.R. 10822. A bill to improve the operations of the national sea grant program, to authorize appropriations to carry out such program for fiscal years 1979 and 1980, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. MURPHY of New York (for himself, Mr. BREAUX, Mr. PRITCHARD, Mr. AUCOIN, Mr. GINN, Mr. FORSYTHE, Mr. ZEFERETTI, Mr. OBERSTAR, Mr. HUGHES, Mr. AKAKA, and Ms. MIKULSKI):

H.R. 10823. A bill to amend the National Advisory Committee on Oceans and Atmosphere Act of 1977 to authorize appropriations to carry out the provisions of such act for fiscal years 1979 and 1980, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. RAHALL:

H.R. 10824. A bill to amend title 5 and title 28, United States Code, to provide for the reclassification of positions of deputy U.S. marshal, to include supervisory and managerial or specialists positions, and for other purposes; jointly, to the Committees on the Judiciary, and Post Office and Civil Service.

By Mr. RUPPE (for himself, Mr. CEDERBERG, Mr. VANDER JAGT, Mr. PURSELL, Mr. PRITCHARD, Mr. WHITLEY, Mr. LAFALCE, and Mr. LENT):

H.R. 10825. A bill to amend the Coastal Zone Management Act of 1972 in order to provide financial assistance to Great Lakes States to enable the States to implement erosion management measures, and for other purposes; jointly, to the Committees on Merchant Marine and Fisheries, and Public Works and Transportation.

By Mr. THONE:

H.R. 10826. A bill to authorize the Secretary of Health, Education, and Welfare to establish a grant program designed to develop methods of prevention and treatment relating to domestic violence, and for other purposes; jointly, to the Committees on Education and Labor, Interstate and Foreign Commerce, and the Judiciary.

By Mr. FLYNT (for himself, Mr. BAUCUS, Mr. COLEMAN, Mr. DICKS, Mr. DOWNEY, Mr. ERTEL, Mrs. FENWICK, Mr. GEPHARDT, Mr. HANNAFORD, Ms. KEYS, Mr. LAGOMARSINO, Mr. LEVITAS, Mrs. LLOYD of Tennessee, Mr. MATHIS, Ms. MIKULSKI, Mr. MICHAEL O. MYERS, Mr. NOLAN, Mr. PEPPER, Mr. RAHALL, Mr. RODINO, Mr. WAXMAN, Mr. WINN, Mr. WOLFF, Mr. YOUNG of Missouri, and Mr. ZEFERETTI):

H.J. Res. 728. Joint resolution to authorize and request the President to issue annually a proclamation designating the first Sunday of September after Labor Day of each year as National Grandparents Day; to the Committee on Post Office and Civil Service.

By Mr. HARRIS (for himself, Mr. BRODHEAD, Mr. BUCHANAN, Mr. CARR, Mr. COTTER, Mr. DANIELSON, Mr. EDWARDS of California, Mrs. FENWICK, Mr. FITHIAN, Mr. KREBS, Mr. MANN, Mrs. MEYNER, Ms. MIKULSKI, Mr. MILLER of California, Mr. MOSS, Mr. OTTINGER, Mr. PATTERSON of California, Mr. PATTISON of New York, Mr. ROSE, Mr. RUNNELS, Mr. RYAN, Mr. STOKES, Mr. WEAVER, Mr. WHITLEY, and Mr. ZABLOCKI):

H. Res. 1007. Resolution to amend the Rules of the House of Representatives to restrict provisions of and amendments to appropriation bills; to the Committee on Rules.

By Mr. LEACH (for himself and Mr. BEILENSON):

H. Res. 1008. Resolution condemning the recent poisoning by terrorists of oranges exported from Israel; to the Committee on International Relations.

By Mr. LOTT:

H. Res. 1009. Resolution to extend the reporting date of the Committee on Rules respecting the study of broadcasting proceedings of the House of Representatives under House Resolution 866, 95th Congress, to April 30, 1978, and to authorize and direct the Speaker to make arrangements with a major television network pool to conduct a thorough study of television broadcasting of proceedings in the House Chamber during March 1978; to the Committee on Rules.

By Mr. RODINO:

H. Res. 1010. Resolution to provide for the expenses of investigations and studies to be conducted by the Committee on the Judiciary; to the Committee on House Administration.

By Mr. SISK:

H. Res. 1011. Resolution providing broadcast coverage of House floor proceedings; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

291. The SPEAKER presented a memorial of the Legislature of the State of California, relative to tuna fishing; to the Committee on Merchant Marine and Fisheries.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. WALKER:

H.R. 10827. A bill for the relief of Claretha

Bessick and Fredericka Athena Clark Engs; to the Committee on the Judiciary.

By Mr. WHITEHURST:

H.R. 10828. A bill for the relief of Gloria Martinez Bustoz; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

392. The SPEAKER presented a petition of the board of supervisors, Los Angeles County, Calif., relative to use of excess water from the Columbia River for irrigation in the Southwestern United States and northern Mexico; jointly, to the Committees on Interior and Insular Affairs, and Public Works and Transportation.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 6805

By Mr. QUAYLE:

Section 4, page 6, after line 21 insert the following new subsection (c) to read:

"(c) Nothing in this Act shall be construed to give the Administrator the authority to designate regional offices of the Office."

Redesignate the following sections accordingly.

Section 14, page 26, line 12, following "records," insert "personnel,".

Section 17, page 32, line 20, following the words "of Energy", insert a period and strike out ", or to a labor dispute" and everything that follows through line 16 on page 33.

Section 17, page 32, line 20, strike out ", or to a labor dispute" and everything that follows through "Management Relations Act, 1947 (29 U.S.C. 171)" on page 33, line 2.

On page 33, line 15, strike out ", or" and insert in lieu thereof a semicolon.

On page 33, line 16, delete the period and add new (3) to read: "; or (3) in any labor dispute within the meaning of section 13 of the Act entitled 'An Act to amend the Judicial Code and to define and limit the jurisdiction of courts sitting in equity, and for other purposes', approved March 23, 1932 (29 U.S.C. 113), or of section 2 of the Labor Management Relations Act (29 U.S.C. 152), or to a labor agreement within the meaning of section 201 or the Labor Management Relations Act, 1947 (29 U.S.C. 171)."

Section 19, page 34, line 5, delete "$15,000,000 for fiscal year" to the end of line 7, page 34. Insert in lieu thereof: $3,400,000 for the fiscal year ending September 30, 1979."

SENATE—*Tuesday, February 7, 1978*

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by Hon. ROBERT MORGAN, a Senator from the State of North Carolina.

PRAYER

Rabbi Jack M. Rosoff, Congregation B'nai Israel, Ridge Road, Rumson, N.J., offered the following prayer:

Let us pray:

O Lord, we stand before you troubled and distressed.
Troubled because the older we become the less sure we are,
Distressed because what seemed so bright and certain in earlier years is now beclouded and insecure.
We yearn for days of yore when life was divided into the good and the bad,
When the world was inhabited by the righteous and the wicked and we knew which was which,
When ethical certainty and moral rectitude were absolute and clear.
But those days, O God, are indeed of yore and are gone for us.
For our pain and pleasure in life have taught us that morality comes in shades of gray.
Our triumphs and failures in life have instructed us that absolute right and absolute wrong are reserved for the philosophers and theologians.
They have little, if any, place in the affairs of men and nations.
Be with us our Father when, in the tumult of the public forum and the solitude of the study, we struggle to choose—
What is more right and less wrong
What is more good and less bad
What is more just and less unjust
Know that we wish with all our hearts that our choices were between absolutes,
But you did not so construct this world, this life or us.
And so we pray not for easy and clear choices
But rather for the wisdom to make the hard and blurred choices.
When each side has right and each, wrong;
When each advocate has justice and each, injustice;
For that is the life we have chosen.
And so we pray not for adulation and passing popularity
But rather for the peace and inner contentment that come only after the anguish and agony of real moral dilemmas.
We know that we will not always be right,
But we pray that you will grant us the courage to always try to be.
Accept this, our prayer, O Lord, for it issues forth from our fallible hearts and our imperfect souls.
Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., February 7, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable ROBERT MORGAN, a Senator from the State of North Carolina, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. MORGAN thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia is recognized.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of yesterday, Monday, February 6, 1978, following the adjournment, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business, with statements limited therein to 3 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

OUTER SPACE WEAPONRY

Mr. ROBERT C. BYRD. Mr. President, the potential for mankind in the frontier of outer space is unlimited. We have already, over the span of two short decades, harvested benefits far beyond the imagination of most of us. These explorations have been healthy and profitable adventures, and in several space-related programs we have enjoyed the partnership and cooperation of the Soviet Union.

Now come disturbing developments that cast a shadow over this progress. We should be acutely aware of, and deeply concerned over, Soviet advancement in outer space weaponry.

In the past 5 years, it is reported that the Soviet Union has launched for military purposes 325 space satellites. The Soviets are, in fact, well on their way to developing a so-called hunter-killer satellite. Such a space armament would be capable of destroying the communications network by which the United States controls its military deterrent system.

At a time when the two great powers are groping with the problem of how best to halt the strategic arms race on Earth, it is alarming that there would be an escalation of military might in space. But, such a threat cannot be ignored, or placed on a security backburner.

Defense Secretary Harold Brown recently told the House Armed Services Committee that there was now a "standoff or stalemate" in the strategic nuclear balance between the United States and the Soviet Union. However, there can be no question that in recent years the Soviets have greatly increased their military spending.

The introduction of exotic outer space weaponry adds a dimension to the arms race which must either be curbed through negotiations or matched by the United States. This country has a strong desire to avoid an arms race in space.

President Carter has spoken of the administration's desire to negotiate with

the Soviets a commitment not to destroy each other's satellite observation posts. He has also suggested an agreement to prohibit Earth-orbiting satellites which carry atomic radiational material, or at the very least the institution of a sure-fire safety requirement.

These are necessary and urgent steps to be taken. The American people and the people of all countries do not desire to have their security threatened by military space pollution.

But, if the Soviets forge ahead in extending earthly rivalries into outer space, then—to use the words of Secretary Brown—"Our interests do not allow us the luxury of passivity."

The Washington Star, in a Monday, Feb. 6, editorial, posed the question:

Why would the Soviet Union be developing a satellite-killing system capable of severing the communications link that makes U.S. deterrence work, unless with hostile intent?

Before the 95th Congress adjourns, there is a chance we will have before us a new Strategic Arms Limitation Treaty.

Continued Soviet advancement in space weaponry would leave us but two alternatives: Greatly accelerating our own antisatellite program, or preferably, placing outer space weaponry under future SALT discussions or a similar negotiating forum.

Above all else, we must insure that our defense mechanism—our measure of security—cannot be short-circuited.

(Routine morning business transacted and additional statements submitted are printed later in today's RECORD.)

CONCLUSION OF MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Is there further morning business? If not, morning business is closed.

NUCLEAR NONPROLIFERATION ACT OF 1977

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume the consideration of the unfinished business, S. 897, which the clerk will state.

The legislative clerk read as follows:

A bill (S. 897) to strengthen United States policies on non-proliferation and to reorganize certain export functions of the Federal Government to promote more efficient administration of such functions.

The Senate resumed consideration of the bill.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. McCLURE. Mr. President, I suggest the absence of a quorum and ask unanimous consent that the time be divided equally.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. GLENN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

UP AMENDMENT NO. 1201

Mr. GLENN. Mr. President, I send to the desk an unprinted amendment and ask unanimous consent for its immediate consideration.

The ACTING PRESIDENT pro tempore. Without objection, the amendment will be stated.

The legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN) proposes an unprinted amendment numbered 1201:

On page 118, line 23, insert the following: after "15 days": "of continuous session (as defined in subsection 130 g. of the 1954 Act)".

Mr. GLENN. Mr. President, there is no part of this bill that is of more significance for the prevention of nuclear proliferation than the elevation of the "timely warning" standard to statutory force.

I think it is important to note that the standard of timely warning, the basic concept upon which the entire international safeguards program rests, is strictly a measure of whether warning of a diversion will be received far enough in advance of the time when the recipient could transform the diverted material into an explosive device to permit an adequate diplomatic response.

The amount of warning time required will vary depending on the type of response which would be needed—that is, in some cases a bilateral response would be adequate, whereas in others a coordinated response by several nations and/or international organizations would be necessary. In addition to determining the amount of warning time required, it will be necessary to determine how much time will actually be available under any specific circumstances. Some reprocessing technology would provide a greater warning time than others.

Another crucial consideration is the quality of the safeguards in place at the facility—especially the probability that the safeguards would in fact detect a diversion and the rapidity with which such detection would occur. Other factors include whether the nation would have limited access to the material because of multinational control or other barriers, whether the fuel is multinationally owned, and whether the nation has access to any facilities which might be needed to convert the diverted material to a weapons-usable form. Also, if the facility is of such a small size that it would take several months for the facility to produce enough weapons-usable material to make a bomb and in addition the nation does not have access to additional material from other sources, timely warning would probably be possible.

Other factors which may be taken into account in determining whether a subsequent arrangement for reprocessing will lead to a significant increase in the risk of proliferation are whether the nation is firmly committed to effective nonproliferation policies and is genuinely willing to accept conditions which would minimize the risk of proliferation, whether the nation has a security agreement or other important foreign policy relationship with the United States, the nature and stability of the recipient's government, its military and security position, and whether the nation has any practicable alternatives to reprocessing in meeting its energy needs. In other words, Mr. President, there is nothing in this section of the bill on subsequent arrangements that prohibits, permanently or unconditionally, the reprocessing of spent fuel by other nations.

I repeat that: There is nothing in this section of the bill on subsequent arrangements that prohibits, permanently or unconditionally, the reprocessing of spent fuel by other nations.

It is important to note, however, that the bill requires that foremost consideration be given to the question of timely warning. This implies that the latter will receive the greatest weight among all factors. Although this does not require denial of a request when timely warning is not clearly determinable, the language suggests that in the absence of a clear determination that timely warning will indeed be provided, a strong combination of other factors would be necessary to compensate for this weakness in safeguards. It then follows that a decision to approve reprocessing in the absence of such a clear determination would be an unusual event that should be carefully scrutinized.

Indeed the inherently sensitive nature of any subsequent arrangement for reprocessing or for the subsequent retransfer of plutonium in quantities greater than 500 grams makes it imperative that the Congress be given a sufficient amount of time to react to the Secretary of Energy's report as provided for in subsection 303(b)(1), a report which is designed to lay out the Secretary's reasons for entering into such subsequent arrangements, including his application of the timely warning standard.

The present language of the bill implies that 15 calendar days after the Secretary of Energy files his report with the Senate Foreign Relations Committee and the House International Relations Committee, he may then enter into the subsequent arrangement. I believe it is obvious what would happen if the 15-day period were to start, say, 5 days before Christmas, or during any other extended 2- or 3-month session of nonlegislative days in the Senate.

The proposed amendment simply changes the time involved to 15 days during which the Congress is in continuous session as defined in section 130(g) of the 1954 act. The amendment insures, Mr. President, that if the appropriate committees wish to react or to take any substantive action based upon the Secretary's report, they will have sufficient opportunity to do so.

Mr. President, I do not know whether the Senator from Idaho cares to make any comment on this proposed amendment. I know that, in private discussions, we have discussed the fact that, with this particular proposal, there might be an emergency type situation, but with reprocessing and plutonium transfer, and so on, that is involved here, I cannot imagine that we cannot foresee those

events coming up that would be of such a time-critical nature that we would have to react within a 15-calendar-day time period. I think it is reasonable to make this a 15-legislative-day basis instead of calendar-day basis.

Mr. McCLURE. Will the Senator yield?

Mr. President, we have discussed this matter. I think that, last year, there was a circumstance that arose in December that would have fallen under this provision. It may be that it was not important that it fall in December, that it might have easily waited until January. I am not sufficiently familiar with the background of that particular incident to know. But I think it is important to underscore that this does not deal with all transfers or retransfers of all uranium or fuel or spent fuel elements. It deals with the special nuclear material, it deals with transfer for reprocessing, it deals with the transfer of quantities of plutonium and not minute quantities of plutonium. I think that, with that understanding, the 15-day provision, referring to legislative days, does strengthen the congressional oversight, the congressional opportunity, which is, I think, fundamental to this legislation.

I do not oppose the amendment. As a matter of fact, I support it, recognizing that there may be a few unique circumstances in which timing of events will have to depend upon this provision. But I agree with the Senator from Ohio that it is unlikely that such events cannot be timed in such a way that they will not cause great difficulty and that it does not apply to the relatively routine types of fuels transfers and so on that occur so frequently that the congressional recess period—which, hopefully, this year, may be from October to January—would interfere with orderly commerce between the nations in the routine nuclear power business.

I understand that this does not apply to that and it is in that light that I can add my support to this amendment.

Mr. GLENN. I thank the Senator from Idaho. This would apply just to reprocessing and plutonium transfer subsequent to reprocessing.

If there are no further comments, I am happy to yield to the Senator from Illinois.

Mr. PERCY. If the Senator will yield, I do not think there is any more important aspect of the present program that we could consider. After all, when we debated the whole Korean situation, when we were going to withdraw ground forces, the essence, the crucial part of that whole program was, what is the timely warning we shall have, how far away from the demarcation line? When we determined that the warning time might be 6 hours, it conditions everything that we do on that program.

So, too, with the whole intercontinental missile program. The question is, What is the timely warning involved?

Here, too, the measure of whether or not warning of a diversion will be received far enough in advance of the time when the recipient could transform the diverted material into an explosive device to permit an adequate diplomatic response, I think, is extremely important. The amendment now being offered is a very important amendment.

I am delighted to hear that the distinguished Senator from Idaho supports the amendment. I think that the legislative process is important and we should have our say in these matters, so it should be legislative days, not calendar days. I think the Senator's amendment takes this into account.

Certainly, knowing that there is no opposition on this side of the aisle, I fully support the amendment. I commend the distinguished majority floor manager of the bill for it.

Mr. GLENN. Mr. President, I thank the Senator from Illinois.

If the Senator from Idaho is prepared, I am prepared to yield back the time.

Mr. McCLURE. Will the Senator yield?

Mr. GLENN. Certainly.

Mr. McCLURE. I will explain a little further because I had intended to offer an amendment dealing with the issue of timely warning. At this time, it is not my intention to do that. But since we have made some reference to it, I thought I might explain both what I had in mind, and why I will not be offering the amendment.

The issue of timely warning is one of the most difficult that we confront, not just in terms of the acceptance or rejection of our efforts by others who are involved in negotiations or dealings with the United States, but also in terms of the techniques by which we can know, and whether or not we can accept assurances, or whether or not we can verify these requirements. The technical questions associated with timely warning, are among the most difficult we have.

I think the sponsors and the floor managers of this legislation would agree that this whole issue of timely warning is one of the most complex and one of the most potentially difficult ones with which we have to deal.

Because of that, I proposed introducing an amendment, which would have inserted on page 118, on line 24, at the beginning of subsection 303(b)(2) the words, "after November 1, 1980" to provide that the timely warning standard for subsequent arrangements for approvals of reprocessing would become operative after that date. In other words, allowing 2 years to elapse before embarking upon an absolute prohibition against such subsequent arrangements, unless the timely warning standard had been satisfied.

As I understand what we have done up until now, it is that we have, in effect, grandfathered the existing reprocessing and fuel arrangements so that the ones that are in existence now are not subjected to the new tests and that the new facilities for reprocessing are not likely to come into being before November 1, 1980, whether they are in the United States, or in Japan, or in Brazil, or in Europe, wherever they may be. Because of this time lag, there will be a period of time in which we can work this out.

There are a number of other countries that we will be dealing with in that period of time, trying to get their agreement both through the Suppliers Conference Guidelines, through the strengthening of IAEA safeguards, through the negotiation on the International Nuclear Fuel Cycle Evaluation, which will be completed sometime in 1979.

All of these initiatives in negotiations are underway, and they will deal with this question in about the time frame that I was going to suggest in my amendment.

So my amendment is perhaps not needed. The only purpose in that amendment would be to set forth for the world to see what the framework of expectation on the part of the Congress of the United States and the U.S. policy was going to be on this issue, so they would be negotiated toward that conclusion.

I suspect they will be doing that whether I put my amendment in, or not.

Certainly, the United States is in no position to dictate to the rest of the world what the results will be 2, 3, 4 or 5 years from now. We simply do not have that kind of dominance in the market anymore. But, we can have a profound influence on the discussions of these negotiations and whatever the results of those negotiations may be, if they are carefully wrought and reasoned and have international support.

I suspect if any further refinement of this legislation is needed to reflect the results of those negotiations, we can attain that refinement in legislation.

I suspect that the Senator from Ohio would agree with me that we are exercising our best judgment now. If our best judgments later indicate a slightly differing result, the Congress can reflect that at that time. Congress does not need to attempt at this time to anticipate all of the results of the negotiating process in those various forums over the next couple of years.

So I will not be offering my amendment on this issue for that reason. I take the time now only because the issue of timely warning is associated with the amendment which the Senator has now offered and which I support.

Mr. GLENN. I thank the Senator from Idaho for his comments and I agree with him on this completely in several respects. First, in the difficulty of assessing timely warning. It is an imprecise phrase. We cannot quantify it with specific numbers of so much timely warning because every single case, as the Senator is well aware, varies and has to be subject to scrutiny on its own particular merits or demerits, whichever the case may be.

Yet even realizing that, the difficulty of establishing timely warning, and the whole worldwide network of looking at the nuclear plants around the world, IAEA's look at these plants, nuclear suppliers' look at their own and other people's plants, the international fuel cycle evaluation, which the Senator from Idaho referred to, all of these things, base their views on warning time in each individual situation. So warning time might vary in one situation from a matter of a very few days, or perhaps theoretically even hours, as opposed to perhaps years, requiring fabrication of a

nuclear weapon, in the situation existing in other countries.

So it is very difficult, and I agree with the Senator from Idaho completely on that.

As to his last comments, that we may have better judgments to make later on, I could not agree more. I think that is absolutely the case. I hope our wisdom in this whole field of nuclear proliferation increases with experience with this legislation and with the international nuclear fuel cycle evaluation, with experience with the nuclear suppliers conference.

I would certainly be very happy to work with him later on if we have other legislative proposals that we think can strengthen the cause of nuclear proliferation, and I think it will require some experience as we go along to reach those determinations.

So if there is no further discussion on this amendment, Mr. President, I am prepared to yield back the remainder of my time on this amendment and proceed to vote.

The ACTING PRESIDENT pro tempore. Is all time yielded back?

Mr. PERCY. Yes, we yield back the remainder of our time.

The ACTING PRESIDENT pro tempore. All time has been yielded back. The question is on agreeing to the amendment of the Senator from Ohio.

The amendment was agreed to.

Mr. GLENN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. President, I ask unanimous consent to have printed in the RECORD the lead editorial from the Washington Post of today, entitled "Nuclear Exports and Common Sense," which I think is an excellent statement of exactly where we are now.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, will the Senator yield on that question?

Mr. GLENN. I yield.

Mr. McCLURE. I, too, read the editorial in the Washington Post. I may have had a slightly different reaction to it from that of the Senator from Ohio, because it did not mention him as much as it did me, and perhaps one can forgive some personal reaction.

I thought that the explanation the Senator from Ohio just made about the difference between warning and time and timely warning was a very good illustration of the difficulties of understanding this legislation. Perhaps the Washington Post editorial writers can be forgiven if they show certain lack of knowledge concerning the nuances and the intricacies of this legislation and prefer, instead, to paint with a broad brush that totally ignores those intricate difficulties.

The Senator from Ohio is correct. It is important that the legislation and the legislative history be stated carefully, or the results might be quite different from that which is anticipated by the editors of the Washington Post.

Mr. PERCY. Mr. President, if the Senator will yield, I should like to make it a matter of record that the perception of some of the media that there have been obstructionist efforts is a perception that might have gone back some time, but I think it is out of date. It is for that reason that I felt the Chicago Sun Times editorial was not completely current with what is now happening. I have not talked to them in a long time. When I submitted that editorial in the RECORD yesterday, I entered extracts from it, because I deleted from it what I felt was improper to put on the public record.

The efforts of the distinguished Senator from Idaho to date on the floor and in working with the floor managers of the bill have been entirely constructive. He has represented and presented a point of view, just as the distinguished senior Senator from Idaho (Mr. CHURCH) has presented a representative point of view, because he has interests in the State that are vital to that State and that State's economy, and we expect those interests to be represented.

Similarly, the Senator from Illinois has no hesitancy in presenting the point of view of various interests, whether they be labor or management, in Illinois, as it affects legislation on the floor.

To date, the Senator from Illinois and the Senator from Ohio have enjoyed very much working with the Senator from Idaho. We have presented our respective points of view and reconciled ourselves as to what was the overriding concern. Whenever a commercial interest should have been subordinated to the overriding issue of preventing nuclear proliferation throughout the world, the latter has won out, and it has been unanimous on the part of us all.

It is for that reason that I think the media have been somewhat out of date, as I believe we will have a legislative history, by 5:30 p.m. today, of working in accord with the distinguished Senator from Idaho, in arriving at a bill with which we can all live. In the end, it will be a better bill because of the cooperative effort we have had between us.

Mr. GLENN. Mr. President, I should like to amend my previous request, and I ask unanimous consent that excerpts from the editorial be printed in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

NUCLEAR EXPORT AND COMMON SENSE

Today the Senate is scheduled to vote on legislation aimed at controlling U.S. exports of nuclear materials to countries around the world. That in itself is something—the scheduling of the vote, we mean. For months opponents of the legislation, chiefly spokesmen for the nuclear industry that does the exporting, have put their best (and, up till now, successful) efforts into preventing the Nuclear Nonproliferation Act from coming to the Senate floor at all. If you want to know why they were not eager for an open test of strength on the merits of the issue, you need only consider that in the House the companion bill (which they also tried to defeat) was passed last year by a vote of 411 to 0.

The House was right. This is legislation that emphatically deserves to be enacted. . . . The purpose of the bill, whose principal Senate sponsors are Democrat John Glenn of Ohio and Republican Charles Percy of Illinois, is not to limit or terminate American exports of nuclear fuel and plant to countries seeking to get the good of the atom for energy generation and other peaceful purposes. On the contrary, the bill is designed merely to make sure, to the extent possible, that such peaceful-purposes exports do not find their way into the makings of nuclear bombs. Is that an unreasonable goal?

What the legislation would do is establish some clear and consistent rules governing the circumstances under which fuel and plant could be exported. There would have to be very strict safeguards on all of a country's nuclear installations; activities that could not be properly safeguarded would be out of bounds for material exported by the United States; and American permission would be required for the retransfer to third countries of material originally exported from this country or for the reprocessing of U.S.-exported fuel. In addition, the legislation reaffirms the essential role of the Nuclear Regulatory Commission in overseeing U.S. exports, and it also provides a generous time span for renegotiating nuclear agreements we have with other countries in order to bring them into accord with the provisions of the new Act.

There has been a lot of sophistry and illogic thrown around by those opposing this sensible legislation, and a certain amount of hysteria has been injected into the argument, too. It has been noisily worried, for instance, that the legislation would destroy the homegrown nuclear industry, whereas all it would really do is make impossible the genuinely reckless sale. And it has also been argued that the legislation would demonstrate the United States to be an unreliable exporter, whereas a reasonable and consistent set of standards such as those embodied in the bill would make transactions far less chancy. How odd it is, coming from legislators not known for their roll-over-and-play-dead propensities where U.S. foreign relations are concerned, to hear all this anxious, nervous Nelly business about how if we make clear that our nuclear exports are not to be used for weapon-making . . . well, we will lose the market, or it just won't work or "they won't put up with it"—or something.

"They" will put up with it. The U.S. nuclear industry has a good product to sell, one that will withstand the inconvenience to importers of having to demonstrate that they do not intend to misuse that product. And the U.S. government has a real obligation not to let our nuclear exports be the stuff of which new nuclear bombs are made. The Senate should reject the troublesome amendments and vote for the Glenn-Percy measure as is.

Mr. McCLURE. Mr. President, I thank the Senator from Illinois for his comments. I thought that the editorial perhaps was written last week, rather than last night, because it reflects not the current situation but the situation that was in the perception of some people some time ago.

The only reason I took the time to comment upon it at all was that I think the legislative history of the last day or two very clearly indicates that the floor managers of the bill and the Senator from Idaho share a common goal, and that the legislative history has not been as polarized as the Post editorial would indicate it to be.

I thank my colleagues for their comments.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. PERCY. Mr. President, I should like to put a question to the distinguished Senator from Ohio (Mr. GLENN), the floor manager of the bill. It pertains to page 104 of the bill, under "Definitions."

For the purpose of legislative history, it would be well for us to clarify the section beginning on line 18, subparagraph 6, entitled "Sensitive Nuclear Technology." The definition given is as follows:

"Sensitive nuclear technology" means any information (including information incorported in a production or utilization facility or important component part thereof), which is not available to the public and which is important to the design, construction, fabrication, operation or maintenance of a uranium enrichment or nuclear fuel reprocessing facility, or a facility for the production of heavy water, but shall not include Restricted Data controlled pursuant to chapter 12 of the 1954 Act;

The definition of "sensitive nuclear technology" as given in this section excludes information which is "available to the public."

Is it the Senator's understanding that this exclusion covers patent applications filed with the U.S. Patent Office that are not subject to a secrecy order?

Mr. GLENN. I am glad the distinguished Senator from Illinois has brought this up, because it has been brought to my attention that this act may be considered by some to apply to the filing of foreign patent applications involving nuclear technology.

When a U.S. patent application is filed and the provisions of 35 U.S.C. 184 have been complied with, a foreign patent application may be made. The ERDA regulations on this subject recognize that "information which is available to the public in published form" includes information contained in a patent application filed in accordance with the regulations of the U.S. Patent Office and eligible for foreign filing under 35 U.S.C. 184. (See 10 C.F.R. § 810.8 at p. 692.) The exclusion in the definition of "sensitive nuclear technology" for information available to the public includes foreign patent filings as now provided in those regulations.

Mr. PERCY. Mr. President, I thank the distinguished Senator for his explanation. I think it helps very much indeed. I concur with the conclusions he has reached.

UP AMENDMENT NO. 1202

Mr. PERCY. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The statement will be stated.

The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an unprinted amendment numbered 1202:

On page 123, line 15, insert "and so notifies the Congress" before the period.

Mr. PERCY. Mr. President, this is a technical amendment which simply insures that Congress will receive notice of any extension of the proviso in section 126a(2) of the 1954 act. I understand that there is no disagreement with this amendment—that is, it has been reaffirmed that there is no disagreement on our side of the aisle.

Mr. GLENN. Mr. President, I am happy to agree to the amendment.

Mr. PERCY. I yield back the remainder of my time.

Mr. GLENN. I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. All time having been yielded back, the question is on agreeing to the amendment.

The amendment was agreed to.

Mr. PERCY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ALLEN. Mr. President, I ask unanimous consent that I might proceed for 5 minutes and the time not be charged to either side and further that I might proceed without regard to the rule of germaneness.

The PRESIDING OFFICER (Mr. ANDERSON). Without objection, it is so ordered.

THE PANAMA CANAL TREATIES

Mr. ALLEN. Mr. President, on yesterday I respectfully requested the majority leader and the minority leader to request respectfully the attendance of the distinguished Vice President when the Panama Canal treaties are laid before the Senate on tomorrow. I stated that I plan to make parliamentary inquiries as to the Senate procedure with respect to consideration of these treaties.

I feel that the Vice President and the leaders should be informed of the inquiries I intend to make, and, therefore, for the benefit of the Vice President, the Parliamentarian, the joint leadership, the Members of the Senate, and concerned citizens, I shall send to the desk and I shall ask unanimous consent that there be printed in the RECORD the parliamentary inquiries that I plan to make on tomorrow. There are 17 inquiries, and I feel that when the Vice President gives answers to these parliamentary inquiries we will have the proper guidelines for the Senate in the consideration of these treaties. This will be one of the few times in some 50 years, I am informed, that the rules of the Senate will be used in connection with the consideration of treaties. Usually we have requests made that it be considered that all parliamentary steps have been taken down to the resolution of ratification and then we proceed to approve the treaty.

The rules, of course, provide that treaties shall first be considered in the Committee of the Whole and a set procedure is provided by the rules. That procedure will be followed with respect to this treaty. But there are still a number of questions that need a ruling, I feel in advance, by the Vice President, so we will know just the proper procedure.

So I send these inquiries to the desk and ask unanimous consent that they be printed in the RECORD.

There being no objection, the inquiries were ordered to be printed in the RECORD, as follows:

PARLIAMENTARY INQUIRIES OF MR. ALLEN AS TO SENATE PROCEDURE FOR CONSIDERATION OF PANAMA CANAL TREATIES

1. Are there not two treaties before the Senate in the Committee of the Whole involving the Panama Canal? And will it not be necessary to complete action on one through the Resolution of Ratification before action can be commenced on the other?

2. Are the amendments to Articles IV and VI of the Neutrality Treaty referred to in the Report of the Senate Foreign Relations Committee "amendments reported by the Committee" as such term is used in Senate Rule XXXVII, or will such amendments be the amendments only of the Senators who introduce and sponsor them?

3. It is not in order without unanimous consent, is it, for a Resolution of Ratification to be proposed as to a treaty until the following procedure has taken place with respect to a treaty:

A. Consideration and report by Committee of the Whole to the full Senate;

B. Consideration by the Senate of action by the Committee of the Whole;

C. Consideration of other amendments; and

D. Lying over for one day.

4. In considering each treaty by Articles, as the Rules provide, with Committee amendments, if any, to be considered first, would it not be necessary to consider amendments from the floor of the Senate as to an Article and to have a vote on such Article before amendments of any sort to the next succeeding Article could be offered or considered in the Senate?

5. If Calendar No. 1—the Neutrality Treaty is approved and Calendar No. 2—the Panama Canal Treaty is not approved by the Senate, would not the action on the Neutrality Treaty be thereby vitiated, since it is not to go into effect until the expiration of the term of Calendar No. 2—the Panama Canal Treaty.

6. For cloture to be invoked as to the treaties, would not a separate cloture motion and a separate cloture vote by at least 60 Senators on each motion be required?

7. If cloture is sought on one treaty and voted by the Senate, would it not be necessary to complete action on the clotured treaty before there could be a cloture vote on the second treaty?

8. At what point will the preamble of the treaties be before the Senate for consideration and for possible amendment and for action by the Senate?

UNANIMOUS CONSENT REQUEST

I ask unanimous consent that the "Documents Implementing the Panama Canal Treaty" and the "Other Documents" identified on page 221 of the Report of the Committee on Foreign Relations (Executive Report No. 95–12) be identified in like manner in the record at this point as predicate for my next two parliamentary inquiries.

9. Since most of the actual agreements between the United States and Panama are provided in the documents set forth in the record pursuant to the foregoing unanimous consent request, are such documents before the Senate for consideration and for vote thereon and for possible amendment prior thereto?

10. If amendments to a treaty or treaties inconsistent with the provisions of the documents set forth in the record pursuant to the foregoing unanimous consent request are agreed to by the Senate, would not such amendments so adopted supplant or supercede the inconsistent provisions of such documents?

11. Executive N contains in the case of the Panama Canal Treaty an annex and an agreed minute. Additionally, the Treaty Concerning the Permanent Neutrality and Oper-

ation of the Panama Canal, also within Executive N, has two annexes, each having a map attachment. At what point will the annexes, minutes, and associated attachments within Executive N be before the Committee of the Whole for consideration and possible amendment?

12. If amendments to a treaty or treaties are agreed to by the Senate and are inconsistent with the provisions contained in Executive N of the annexes, their attachments, or the agreed minute, would not such amendments so adopted supplant or supersede the inconsistent provisions in such annexes, attachments, or agreed minute?

13. Subject to the limitations that might be imposed by cloture, are not each article and each amendment to an article debatable?

14. Are not amendments offered to a treaty amendable in like manner as amendments to bills in legislative session? Are perfecting amendments to portions of the treaty sought to be amended in order?

15. In the absence of cloture, must amendments to articles be germane to the article under consideration?

16. Since both the Panama Canal Treaty and the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal are made in duplicate, in the English and Spanish languages, both texts being declared equally authentic, are the Spanish texts of both treaties before the Senate for consideration? If they are not, when will the Spanish language texts be presented to the Senate for consideration and comparison with the English language texts for purposes of ascertaining any discrepancies between them?

17. If the President transmits two treaties to the Senate under cover of one message and the same are received by the Senate and docketed as one executive message, if no action is taken in committee to change the manner in which the documents were transmitted, would not such documents remain in the order transmitted when reported by committee to the Senate for consideration in the Committee of the Whole? In other words, does the Executive Clerk have authority to rearrange the documents submitted by the President?

Mr. ALLEN. I yield the floor, Mr. President.

NUCLEAR NONPROLIFERATION ACT OF 1978

The Senate continued with the consideration of S. 897.

The PRESIDING OFFICER. Who yields time?

Mr. ALLEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. ALLEN. I ask unanimous consent that it be equally divided.

Mr. GLENN. Evenly split, Mr. President?

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HASKELL). Without objection, it is so ordered.

RECESS UNTIL 1 P.M.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate stand in recess until 1 p.m. today.

There being no objection, the Senate, at 12:05 p.m., recessed until 1 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. TALMADGE).

NUCLEAR NONPROLIFERATION ACT OF 1978

The PRESIDING OFFICER. The Senate will resume the consideration of the unfinished business, S. 897, which the clerk will state.

The assistant legislative clerk read as follows:

A bill (S. 897) to strengthen United States policies on non-proliferation and to reorganize certain export functions of the Federal Government to promote more efficient administration of such functions.

The Senate resumed the consideration of the bill.

The PRESIDING OFFICER. The Chair in his capacity as a Senator from Georgia suggests the absence of a quorum.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GLENN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. NELSON). Without objection, it is so ordered.

COMMITTEE MEETINGS

Mr. GLENN. Mr. President, I have two unanimous-consent requests regarding committee meetings that have been cleared on both sides of the aisle.

Mr. President, I ask unanimous consent that the Armed Services Committee be authorized to meet during the session of the Senate today to hold hearings on fiscal year 1979 military procurement authorization requests.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, I ask unanimous consent that the Judiciary Committee be authorized to meet during the session of the Senate today to hold hearings on judicial nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

NUCLEAR NONPROLIFERATION ACT OF 1978

The Senate continued with the consideration of S. 897.

UP AMENDMENT NO. 1203

Mr. CHURCH. Mr. President, I send to the desk an amendment and ask that it be stated.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. CHURCH) proposes an unprinted amendment numbered 1203.

Mr. CHURCH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection it is so ordered.

The amendment is as follows:

Beginning on page 106, line 19, strike all the words through and including page 109, line 14, and insert in lieu thereof the following:

SEC. 104. (a) Consistent with section 105 of this Act, the President shall institute prompt discussions with other nations and groups of nations to develop international approaches for meeting future worldwide nuclear fuel needs. The President, in cooperation with the IAEA, is authorized to consider in these discussions with nations possessing nuclear fuel production facilities or source material and such other nations as may be deemed appropriate, the following:

(1) the establishment of an international nuclear fuel authority (INFA) with responsibility for allocating agreed upon quantities of fuel resources and providing other agreed upon services to ensure fuel supply on reasonable terms in accordance with agreements between INFA and supplier and recipient nations;

(2) a set of conditions under which international fuel assurance under INFA auspices will be provided to recipient nations, including conditions which will insure that the transferred materials cannot or will not be used for nuclear explosive devices;

(3) devising feasible and environmentally sound approaches for the siting, development, and management under effective international auspices of facilities for the provision of nuclear fuel services and the storage of special nuclear material which is sensitive from the standpoint of preventing the proliferation of nuclear explosive devices;

(4) the establishment of repositories under effective international auspices and inspection for the storage of spent nuclear reactor fuel;

(5) the establishment of arrangements under which nations placing their spent fuel in such repositories would receive appropriate compensation for the energy content of such spent fuel if recovery of such spent fuel is deemed necessary or desirable; and

(6) sanctions for violations of the provisions of or for abrogation of such binding international undertakings.

(b) The President shall submit to the Congress no later than twelve months after the date of enactment of this Act proposals for the establishment of an initial international undertaking to guarantee the supply of nuclear fuel to nations that adhere to strict policies designed to prevent proliferation. In preparing these proposals, the President may consider making available, for transfer to an international stockpile established pursuant to an international agreement, uranium enriched to less than 20 percent in the isotope 235 up to an amount sufficient to produce 100,000 MWe years of power from light water nuclear reactors.

(c) The President shall, in the report required by section 103, also address the desirability of and options for foreign participation, including investment in new United States uranium enrichment facilities. This report shall also address the arrangements that would be required to implement such participation and the commitments that would be required as a condition of such participation. This report shall be accompanied by any proposed legislation to implement these arrangements.

(d) The fuel assurances contemplated by this section shall be for the benefit of nations that adhere to policies designed to prevent proliferation. In the discussions called for in this section, the President shall, in particular, seek to ensure that the benefits of such arrangements are available to non-nuclear-weapon states only if such states accept IAEA safeguards on all their peaceful nuclear activities, do not manufacture or otherwise acquire any nuclear explosive device, do not establish any new enrichment or reprocessing facilities except on an internationally acceptable and agreed upon basis,

and place any existing facilities under effective international auspices and inspection.

(e) The report required by section 601 shall include information on the progress made in any negotiations pursuant to this section.

Mr. CHURCH. This unprinted amendment I offer on behalf of the Committee on Energy and Natural Resources. It substitutes a new section 104, which begins on page 106, line 19 of the bill.

The language of the amendment contains the wording of all of section 104 as reported from the Energy Committee. A detailed explanation of the Energy Committee's reasons for amending section 104 was given in the joint report of the committee, Senate Report 94–467.

Mr. President, since the Committee on Energy and Natural Resources took this action, we have conferred with the managers of the bill, and certain alterations have been made in the Energy Committee's recommended change of section 104. These alterations are acceptable, and the purpose of the committee has been carried out. The changes do not alter or affect that purpose, but they make the amendment acceptable to the managers of the bill and, for that reason, I would hope that the substitute, which, I understand, the distinguished Senator from Ohio (Mr. GLENN) will offer to this amendment, will be accepted and approved by the Senate.

Mr. GLENN. Mr. President, I appreciate the remarks of the distinguished Senator from Idaho.

UP AMENDMENT NO. 1204

I send to the desk a substitute for the amendment that the Senator from Idaho just described, and I ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN) proposes an unprinted amendment numbered 1204 in the nature of a substitute for the Church amendment.

Mr. GLENN. Mr. President, I ask unanimous consent that further reading of the substitute amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

SEC. 104. (a) Consistent with section 105 of this Act, the President shall institute prompt discussions with other nations and groups of nations, including both supplier and recipient nations, to develop international approaches for meeting future worldwide nuclear fuel needs. In particular, the President is authorized and urged to seek to negotiate as soon as practicable with nations possessing nuclear fuel production facilities or source material and such other nations and groups of nations, such as the IAEA, as may be deemed appropriate, with a view toward the timely establishment of binding international undertakings provided for—

(1) the establishment of an international nuclear fuel authority (INFA) with responsibility for providing agreed upon fuel services and allocating agreed upon quantities of fuel resources to ensure fuel supply on reasonable terms in accordance with agreements between INFA and supplier and recipient nations;

(2) a set of conditions consistent with subsection (d) under which international fuel assurances under INFA auspices will be provided to recipient nations, including conditions which will ensure that the transferred materials will not be used for nuclear explosive devices;

(3) devising, consistent with the policy set forth in section 403 of this Act, feasible and environmentally sound approaches for the siting, development, and management under effective international auspices and inspection of facilities for the provision of nuclear fuel services, including the storage of special nuclear material;

(4) the establishment of repositories for the storage of spent nuclear reactor fuel under effective auspices and inspection;

(5) the establishment of arrangements under which nations placing spent fuel in such repositories would receive appropriate composition for the energy content of such spent fuel if recovery of such energy content is deemed necessary or desirable; and

(6) sanctions for violations of the provisions of or for abrogation of such binding international undertakings.

(b) The President shall submit to Congress not later than six months after the date of enactment of this Act proposals for initial fuel assurances, including creation of an interim stockpile of uranium enriched to less than 20 percent in the uranium isotope 235 (low-enriched uranium) to be available for transfer pursuant to a sales arrangement to nations which adhere to strict policies designed to prevent proliferation when and if necessary to ensure continuity of nuclear fuel supply to such nations. Such submission shall include proposals for the transfer of low-enriched uranium up to an amount sufficient to produce 100,000 MWe years of power from light water nuclear reactors, and shall also include proposals for seeking contributions from other supplier nations to such an interim stockpile pending the establishment of INFA.

(c) The President shall, in the report required by section 103, also address the desirability of and options for foreign participation, including investment, in new United States uranium enrichment facilities. This report shall also address the arrangements that would be required to implement such participation and the commitments that would be required as a condition of such participation. This report shall be accompanied by any proposed legislation to implement these arrangements.

(d) The fuel assurances contemplated by this section shall be for the benefit of nations that adhere to policies designed to prevent proliferation. In negotiating the binding international undertakings called for in this section, the President shall, in particular, seek to ensure that the benefits of such undertakings are available to non-nuclear-weapon states only if such states accept IAEA safeguards on all their peaceful nuclear activities, do not manufacture or otherwise acquire any nuclear explosive device, do not establish any new enrichment or reprocessing facilities under their defacto or dejure control, and place any such existing facilities under effective international auspices and inspection.

(e) The report required by section 601 shall include information on the progress made in any negotiations pursuant to this section.

(f) (1) The President may not enter into any binding international undertaking negotiated pursuant to subsection (a) which is not a treaty until such time as such proposed undertaking has been submitted to the Congress and has been approved by concurrent resolution.

(2) The proposals prepared pursuant to subsection (b) shall be submitted to the Congress as part of an annual authorization act for the Department of Energy.

Mr. GLENN. Mr. President, this substitute for the amendment offered on behalf of the Energy Committee by the Senator from Idaho would differ from the committee's proposals in only two respects.

The International Nuclear Fuel Authority in the second amendment would go in with a two-house approval required, unless the arrangements worked out by the President brought it back to us in the form of a treaty, in which event, of course, it would be considered only by the Senate.

The second change is that the immediate set-aside of part of our nuclear fuel stockpile, the so-called fuel bank proposal, will be subject to the regular authorization processes of Congress.

I would add one thing to that: It was my view when we put in this International Nuclear Fuel Authority provision that this was not a giveaway of our resources in this country. I saw this stockpile and this bank as being a pool into which we would sell our nuclear fuel, and other nations perhaps, following our lead, would do the same thing.

I would not want anything in this bill to be construed as indicating that, because we are providing an authorization process, we are precluding the sale of nuclear fuel to such an international fuel stockpile. I do not object to this set-aside being required to go through our regular authorization processes here. If the President works out such an arrangement with other countries, whether it is a barter arrangement or whatever arrangement it may be, where we would need that authorization authority, I would be happy to see it provided. But, as I say, I do not want anyone to construe that this would preclude our sales of fuel to the International Nuclear Fuel Authority. I think this would be the proper way to handle the matter, and I would want my remarks to so indicate today.

Mr. CHURCH. Mr. President, I am in accord with the remarks of the Senator from Ohio.

Mr. McCLURE. Mr. President, the Senator from Illinois (Mr. PERCY) has asked me to express, on behalf of the Senator from Illinois, his endorsement of the action of the Senator from Ohio. I would like to add to that my personal endorsement as a member of the Committee on Energy and Natural Resources, this proposal having originally been made by my colleague from Idaho (Mr. CHURCH) and me in the comittee. I am in full accord with the amendment.

The PRESIDING OFFICER. Is all remaining time yielded back?

Mr. GLENN. I yield back the remainder of my time.

Mr. CHURCH. I yield back the remainder of my time.

Mr. GLENN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. GLENN. The vote is on the substitute proposal, is that correct?

The PRESIDING OFFICER. The question is on agreeing to the substitute for the amendment.

The substitute amendment was agreed to.

The PRESIDING OFFICER. The question now is on agreeing to the amendment of the Senator from Idaho, as amended. Do Senators yield back their time?

Mr. GLENN. I yield back the remainder of my time.

Mr. CHURCH. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as amended.

The amendment, as amended, was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment, as amended, was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1205

Mr. CHURCH. Mr. President, I wish to offer two additional amendments, en bloc, which reflect the action of the Committee on Energy and Natural Resources.

The PRESIDING OFFICER. The amendments will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. CHURCH) offers an unprinted amendment numbered 1205.

Mr. CHURCH. Mr. President, I ask unanimous consent that further reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered. Without objection, the amendments will be considered en bloc.

The amendments are as follows:

On page 106, line 9, after the period, insert the following:

Further, the Secretary as well as the Nuclear Regulatory Commission, the Secretary of State, and the Director of the Arms Control and Disarmament Agency are directed to establish and implement procedures which will insure to the maximum extent feasible, consistent with this Act, orderly processing of subsequent arrangements and export licenses with minimum time delay.

(2) On page 158, lines 13 and 14, strike the words "a total of $10,000,000 for fiscal year 1979 to", and insert in lieu thereof "such annual sums are as contained in annual authorization acts for". The provision in subsection (d) then reads as follows:

(d) For the purposes of carrying out this section, there is authorized to be appropriated such sums as are contained in annual authorization acts for the Department of Energy, including such sums which have been authorized for such purposes under previous legislation.

Mr. CHURCH. Mr. President, these unprinted amendments reflect adjustments which have been worked with the managers of the bill, Senators GLENN and PERCY.

The first amendment is an addition to section 102 which, except for a change of one word, is exactly the same as the Energy Committee amendment.

It is intended to insure maximum cooperation between the four Federal agencies involved in approving export licenses and subsequent arrangements.

The second amendment involves subsection 502(d). The subsection has been rewritten to authorize funding for the program outlined in title V as a part of an annual authorization act for the Department of Energy.

Mr. GLENN. Mr. President, I am glad to accept these amendments and to have them considered en bloc. The second of the amendments strikes the $10 million authorization for fiscal year 1979. While I have some regrets about seeing that taken out, it does not mean that consideration of the energy problems of other nations will be lacking because of this change: there are funds under other authorizations to do some of the same things. Moreover, we will be going through the regular authorization and appropriation process later on, and I think that taking this out at this particular time does, indeed, improve the measure, since we would want a minimum of conflict with our budgetary process as now established; and, as I say, it can be authorized later.

So I am glad to accept the amendment. Title V does remain in the bill, and I am glad to agree that we should proceed through the regular DOE authorization process.

I yield back the remainder of my time.

Mr. CHURCH. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All remaining time having been yielded back, the question is on agreeing, en bloc, to the amendment of the Senator from Idaho.

Mr. McCLURE. Mr. President, will the Senator yield for a moment?

Mr. GLENN. I yield.

Mr. McCLURE. Senator PERCY had asked that I respond on behalf of the minority in support of these amendments and the action being taken, and I wish to express that on the record.

I thank the Senator for yielding.

The PRESIDING OFFICER. All remaining time is yielded back.

Mr. GLENN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GLENN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. The question is on agreeing to the amendment of the Senator from Idaho (Mr CHURCH).

The amendment was agreed to.

Mr. GLENN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CHURCH. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GLENN. Mr. President, the substitute amendment I have offered, as far as title V is concerned has the effect of routing any authorized appropriations for this title through the Department of Energy Authorization Act. It was our intention originally to place at least $10 million into this program for fiscal 1979. Is the distinguished Senator from Idaho willing to commit himself to doing what he can to see to it that an adequate authorization of at least $10 million is put into this program when the Department of Energy 1979 authorization for research and development is taken up next year?

Mr. CHURCH. Mr. President, I assure the Senator that he has my commitment on that. And moreover, I believe the senior Senator from Ohio would make an excellent witness in support of this program when the DOE authorization hearings are held this year, and I hereby invite him for that purpose. But I would like to clarify the intent of the authorization language in title V. Am I correct in assuming that the Governmental Affairs Committee is not seeking to have referral of this authorization?

Mr. GLENN. That is correct.

Mr. CHURCH. Then, Mr. President, I believe we are in agreement on title V and all other aspects of these amendments.

Mr. GLENN. I believe that is correct.

Mr. CHURCH. I thank the Senator from Ohio.

Mr. HOLLINGS. I have been concerned about S. 897, the Nuclear Non-Proliferation Act of 1977.

My main concern is that the bill, as reported, does not pay enough attention to one factor vital to the success of our Nation's nonproliferation policy: The need to reassure other countries that we indeed will be a reliable supplier of nuclear fuel and technology.

It is vital that S. 897 be crystal clear about this. Otherwise, foreign nations may feel that they cannot count on the United States. And if they turn elsewhere, we will lose the leverage that comes when others are willing to accept safeguards in exchange for U.S. fuel and equipment that they would like.

Yet when I first read the bill, it did not seem clear on this vital point. As reported, it speaks of both new international fuel arrangements and the need for timely U.S. nuclear export decisions. But the operation of these promising international arrangements is still far off. This makes the export provisions of the bill all the more important.

But the bill is not completely explicit about its intention to stabilize nuclear export ground rules and to minimize unnecessary bureaucratic redtape and delay. For instance, it does not direct the responsible Federal agencies to establish clear and specific procedures to insure that they both individually and jointly process applications in a timely, reliable way. Such explicitness is important if others are to have full confidence that the United States is dependable. Also, in today's debate we should state forcefully that the United intends expeditiously and reliably to provide exports to those nations which properly adhere to safeguards requirements.

I do not believe that anything I am saying now is contrary to the philosophy

of this bill. But the bill should be more explicit on this matter of reliability, not just stating that we intend to be a dependable supplier but also showing how we plan to do this in practice.

In a letter dated last October, I expressed my concerns to the distinguished chairman of the Subcommittee on Energy, Nuclear Proliferation, and Federal Services, Senator GLENN, and suggested in particular that certain parts of the bill be clarified to make it absolutely clear that the United States intends to establish appropriate and expeditious export licensing procedures. I also suggested that certain sections affecting the Barnwell plant in my State be clarified.

Senator GLENN responded with a gracious letter, reaffirming his intention that the bill reestablish the United States as a reliable supplier and saying that some provisions could be clarified through either colloquy or amendment.

Mr. President, I ask unanimous consent that both my letter and Senator GLENN's reply be included in the RECORD at the conclusion of my statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HOLLINGS. Mr. President, I still have some concerns about this bill and the administration strategy that it implicitly endorses. Controlling the proliferation of nuclear weapons is one of the most important goals of our time. Yet our policies must recognize that many nations feel they need nuclear power—safeguarded to be sure, but nuclear power nonetheless. Current policy has not always recognized this. Yet our nonproliferation program must deal with this hard reality and contain concrete proposals that will win over others by meeting their perceived need for reliable and safe nuclear energy. Again, making it crystal clear that we will be a reliable supplier is central to this. I hope the clarifications of S. 897 that Senator GLENN and I are discussing today will be a step toward this objective.

Mr. President, at this time I would like to ask some questions of my distinguished friend, Senator GLENN, in the hope that we can clarify certain parts of S. 897, the nuclear nonproliferation bill.

As I have said before, I am concerned that this bill in its present form does not give as many assurances as it might that the United States fully intends to be a reliable supplier of nuclear fuel and technology. It does affirm that the United States should be a dependable source, but I wish there were more specifics on how we plan to become one.

For instance, the export licensing procedures in title III are complex, yet there are no provisions for coordinating the many Federal agencies involved. Such provisions would show presently skeptical nations that their applications will be handled in a timely manner according to stable ground rules. Clarifying the bill by urging or directing the agencies involved to establish appropriate procedures would be an improvement.

Mr. GLENN. Well, at several points in the bill we have urged the Nuclear Regulatory Commission and other agencies to give timely consideration to requests for export licenses and exemptions. I do not believe we disagree about the need to provide clear assurances to others, and I therefore would like to be as accommodating as possible in responding to your specific concerns. We have, in fact, directed the agencies involved to clarify the procedures you are referring to through the amendments we have adopted over the past few days, and it is my view that appropriate and expeditious export licensing procedures have been established by this bill.

Mr. HOLLINGS. Am I correct, then, in understanding that the amendment to section 102 that we passed earlier today is consistent with your view of the bill—that you do want the Federal agencies to establish clear and specific export licensing procedures, including ones for interagency coordination? Such procedures are important if other nations are to feel that we indeed will process applications in an expeditious manner, with a minimum of unnecessary bureaucratic redtape and delay.

Mr. GLENN. You are correct, Senator. I think the amendment is consistent with the philosophy of the bill, and I, too, would urge the appropriate Federal agencies to process applications as quickly and efficiently as is reasonable, in accordance with the procedures we have asked them to set up.

Title I of the bill contains several important provisions designed to reassure these nations. Specifically, it provides that the United States shall expand uranium enrichment capacity, authorizes the President to seek a new International Nuclear Fuel Authority (INFA), and pending the establishment of INFA gives the President the authority to supply enriched uranium fuel to an international stockpile. All of these would provide additional assurance of fuel delivery to nations that adhere to policies designed to prevent proliferation. They also will give other countries less reasons to move toward the use of plutonium fuel.

Mr. HOLLINGS. But other laws have already directed an expansion of enrichment capacity, have they not? And the operation of INFA seems a long way off. At the moment, reestablishing ourselves as a reliable exporter seems to be the most important way to reassure others that stable supplies of nuclear fuel will be available.

Mr. GLENN. True. But the title I steps are very important. They reaffirm our commitment to expanding enrichment capacity so that we can supply both ourselves and others. And the International Nuclear Fuel Authority is now a step closer since President Carter recently proposed the adoption of the first step in its formation. While details remain to be worked out, it is an important part of a stable long-term nonproliferation program.

Mr. HOLLINGS. One other question I have deals with the provision that Congress can add new export licensing criteria through joint resolution, rather than through the regular process of amending a statute. This section concerns me because it could be interpreted by others (i) as one more way a unit of the American Government can change the export ground rules and (ii) as saying that Congress is not certain it wants to limit itself to the export criteria already in the bill.

Mr. GLENN. Of course the Congress can add new export criteria in the future if it wishes. However, the intent of this provision is to reduce uncertainty, not increase it. As the Senate report on the bill says, the idea is to expedite the consideration of any proposed change in the export criteria, one such change has been adopted by either House so that any delays or uncertainty caused by the action of that House will be kept as short as possible. An amendment to this provision that we accept yesterday reflects this idea.

Mr. HOLLINGS. So you see this as a way to help stabilize the ground rules for nuclear exports, not a section encouraging people to suggest new and frequent changes in our nuclear export policy.

Mr. GLENN. Correct.

Mr. HOLLINGS. That clears up a major concern of mine. Now I would like to turn to the clarifications that Senator THURMOND and I have requested concerning the possible effects of S. 897 on the Barnwell Nuclear Fuels Plant in South Carolina. As you know, that plant is not reprocessing nuclear fuel but rather is now conducting safeguards and fuel cycle research in support of the President's nonproliferation program. Thus I am concerned about how this nonproliferation bill might affect this work at the plant. I would like to mention three items, and suggest that we agree on some clarifications.

First, section 104 advocates international and multinational approaches for meeting future fuel needs. The section will be given additional substance if it is stressed here today that section 104 provides for devising, consistent with the policy goals of section 403, feasible and environmentally sound approaches for the siting, development, and management under effective international auspices of facilities for the provisions of nuclear fuel services.

Second, section 105 calls for reevaluation of all aspects of the nuclear fuel cycle, with alternatives to an economy based on the separation of pure plutonium. It would be appropriate to clarify that this reevaluation should consider proliferation-resistant forms of reprocessing, including coprocessing and blending.

Third, section 202 directs the Energy Department, in consultation with the Nuclear Regulatory Commission, to establish and operate a program to train people from other countries about safeguards and physical security procedures. There should be some direction to the Department to consider using existing facilities for such a program.

Mr. GLENN. We have discussed these points, and I agree with you entirely regarding them. I also understand that there is some concern that section 303 (b)(3) inadvertently may place a reprocessing monopoly in foreign hands. That certainly is not my intention. While the bill does exempt certain existing re-

processing plants around the world from the criteria that would apply to any future plants, I would urge the Secretary of Energy to try to persuade owners of these existing plants to accept the same safeguards as will apply to future facilities.

Exhibit 1 follows:

EXHIBIT 1

U.S. SENATE,
October 25, 1977.

Senator JOHN GLENN,
Chairman, Subcommittee on Energy, Nuclear Proliferation Planning and Federal Services, Senate Committee on Governmental Affairs, U.S. Senate, Washington, D.C.

DEAR JOHN: I am deeply concerned about S. 897, the "Nuclear Non-Proliferation Act of 1977," and urge you to consider further amendments and clarifications. The major problem is that the bill still neglects one factor vital to the success of our nation's non-proliferation policy: the need to assure other nations that we indeed are a reliable supplier of nuclear technology and fuel.

No one should underestimate the importance of such assurances, for it is totally unrealistic to believe that any non-proliferation strategy can succeed without them. Many countries which lack our nation's still rich supplies of coal, oil, and uranium see nuclear power as indispensible. Furthermore, these are now alternative sources of nuclear equipment and increasingly there are alternative sources of nuclear fuel. This means that they will turn to foreign suppliers for this much-desired technology if they feel that the United States is an unsure or unpredictable supplier. One piece of evidence is the recent Iranian purchase of two French reactors.

If other nations feel they cannot count on the United States and turn elsewhere, our policy will backfire. We will continue to lose the leverage that comes when others want our products and fuel and are willing to accept safeguards in exchange for them. Moreover, the U.S. nuclear export industry will be hurt. Maintaining export sales should not be the main aim here, of course, but neither should a major U.S. industry be scuttled unnecessarily.

This present version of the bill does not provide the necessary assurances to other nations. It does affirm that the U.S. should be a reliable supporter, but there is little in the bill to persuade others that we will be. For instance, the export licensing procedures in title III are complex, yet there are few provisions for coordinating the many agencies involved or signalling to presently skeptical nations that their applications will be handled in a timely manner according to stable ground rules. The Energy Committee's proposed amendment to section 102 would be a distinct improvement. Without weakening the criteria which guide export decisions, it would direct the Executive Branch "quickly develop and implement procedures which are designed specifically to provide the rapid and efficient consideration and administrative processing of all subsequent arrangements and export licenses."

One part of section 304(a) of the bill also concerns me. It provides that Congress can add new nuclear export criteria through joint resolution, rather than through the regular legislative procedure of amending a law. While this provision would add to the flexibility of Congress, it also would send out two serious negative signals to others: (i) others will see it as one more way that a unit of the American government can change the ground rules, and (ii) some will interpret it as saying that Congress is not certain it wants to limit itself to the export criteria in the bill.

Moreover, the bill is not just critical of plutonium reprocessing but generally antinuclear in tone. Aside from talk of still distant international fuel arrangements, there is little in the bill to show that we are truly aware of other nations' energy plights or we appreciate their very strong desire for significant—though safeguarded—nuclear programs. There is nothing ambiguous about the signals this bill will send out if it becomes law: its emphasis on controls without a parallel emphasis on meeting world energy needs implies not only a distrust of other nations—whether signers of the Non-Proliferation Treaty or not—but also gives them little reason to think that the United States actually wants to supply them with nuclear exports.

Without some improvements in both the substance and particularly the tone of this bill, it is not acceptable. While I commend the President and others on their goal of limiting proliferation, it is unrealistic to think that this bill—in its present form—will accomplish that very important goal. Unless it gives other nations true assurance that the U.S. is prepared to help them meet their energy needs, consistent with the safeguards criteria, these nations will turn to other suppliers and our policy largely will fail.

I also would like to request that three sections which impact on the Barnwell Nuclear Fuels Plant in South Carolina be clarified by colloquy or amendment.

First, section 104 advocates international and multinational approaches for meeting future fuel needs. This section will be given additional substance if it is stressed that section 104 provides for "devising feasible and environmentally sound approaches for the siting, development, and management under effective international auspices of facilities for the provisions of nuclear fuel services and the storage of spent nuclear fuel."

Second, section 105 calls for reevaluation of all aspects of the nuclear fuel cycle, with alternatives to an economy based on the separation of pure plutonium. It would be appropriate to clarify that this reevaluation should consider such proliferation-resistant forms of reprocessing as coprocessing and blending. Coprocessing in particular is a promising technology now being investigated at both Barnwell and the Tokai Mura plant in Japan.

Third, section 202 directs the Energy Department, in consultation with the Nuclear Regulatory Commission, to establish and operate a program to train people from other countries about safeguards and physical security procedures. There should be some direction to the Department to consider using existing facilities for such a program. Barnwell and other existing facilities contain some of the world's most advanced safeguards equipment and might be safe and cost-effective locations for the program. Language mentioning existing facilities would ensure that these plants receive full consideration.

I urge you to consider appropriate action to reflect my concerns.

Sincerely,

ERNEST F. HOLLINGS.

U.S. SENATE,
Washington, D.C., October 28, 1977.

Hon. ERNEST HOLLINGS,
U.S. Senate, Russell Senate Office Building, Washington, D.C.

DEAR FRITZ: I appreciate the concerns you have expressed in your letter of October 25, concerning S. 897, the Nuclear Nonproliferation Act.

I agree with you that a vital factor in the success of any nonproliferation policy must be the need to assure other nations that we are a reliable supplier of nuclear technology and fuel. It was specifically for this reason that I added a major title (Title I) to the bill concerning United States initiatives to provide adequate nuclear fuel supply. This title provides a number of things:

First, it provides that the United States shall ensure that it will have available the capacity on a long-term basis to enter into new fuel supply commitments.

Secondly, and perhaps most importantly, it provides for the President to seek to negotiate with other countries the establishment of an International Nuclear Fuel Authority (INFA) which would provide agreed upon fuel services and allocate agreed upon quantities of fuel resources to ensure fuel supply on reasonable terms in accordance with agreements between INFA and supplier and recipient nations.

INFA would deal with both the front end and back end of the fuel cycle. It could run repositories for the storage of spent nuclear reactor fuel and would provide for nations placing spent fuel in such repositories to receive appropriate compensation for the energy content of the spent fuel, if recovery of the energy content is deemed necessary or desirable.

Pending the establishment of INFA, the President is given authority to make available to an international stockpile, established pursuant to an international sales arrangement, low-enriched nuclear fuel up to an amount sufficient to produce 100,000 megawatt-years of power from light water nuclear reactors. This stockpile would be used to backup existing fuel contracts, thus providing assurances on delivery of fuel to nations that adhere to policies designed to prevent proliferation. I might add that I have been told that the INFA proposal was the inspiration for the President's recent proposal for an international fuel bank

With respect to the question of considering applications of export licenses in a timely manner, I would like to draw your attention to various places in the bill in which support is given to this idea

In Title I, under Section 101, the following statement appears: "The NRC shall on a timely basis authorize the export of nuclear materials and equipment when all applicable statutory requirements are met."

In Section 303(a)(3), under the title "Subsequent Arrangements," the following statement appears: "The United States will give timely consideration to requests for prior approval, when required by this Act, to the reprocessing of materials proposed to be exported, previously exported, and subject to the applicable agreement for cooperation . . ."

In Section 304 (the section on export licensing procedures), a new subsection 126 (b)(1) is added to the Atomic Energy Act of 1954. This subsection reads as follows:

"Timely consideration shall be given by the Commission to requests for export licenses and exemptions and by the Department of Energy to requests for distributions, and such requests shall be granted upon a determination that the application or request therefor is acceptable and that all applicable statutory requirements have been met." Further, in the section that immediately follows, additional impetus is given to the notion of issuing licenses on a timely basis. This section says, in part: "If, after receiving the Executive Branch judgment that the issuance of a proposed export license will not be inimical to the common defense and security, the Commission does not issue the proposed license *on a timely basis* (emphasis added) because it is unable to make the statutory determinations required under this Act, the Commission shall publicly issue its decision to that affect and shall submit the license application to the President."

I believe that Title I, plus all of the language dealing with the timely processing of applications for licenses and subsequent arrangements, gives ample evidence that a

major intent of the bill is to restore the position of the U.S. to that of a reliable exporter of nuclear materials, fuel and technology. That is certainly one aspect of a good nonproliferation policy. The other aspect of the policy is that of export controls. While it is our desire to have the United States play a leadership role in this area, we recognize that if the United States gets too far ahead of all the other supplier nations, no one will follow. Accordingly, the export controls that are contained in this bill are relatively modest. For example, for the first 18 months after enactment, the export criteria contained in the bill represent nothing more than a codification of our present export policy. At the end of the 18-month period, we then require that full scope IAEA safeguards be adhered to by all recipient nations. I cannot imagine any nonproliferation policy which does not have this as a minimal provision. The Bill was intended to be, and I believe is, pro-fuel assurances and pro-safeguards, and not anti-nuclear. The assurances, in particular, are an absolute necessity if we are to avoid every small nation demanding reprocessing, or eventually breeders, as part of their equipment, with all plutonium spread potential that would entail.

I do not believe we are in basic disagreement regarding philosophy, and I would therefore like to be as accommodating as possible in responding to your specific concerns on specific sections of the bill. With respect to Section 102, the Energy Committee Amendment does not completely track with the language which you have suggested in your letter on page two. I believe your language is an improvement and I would be willing to accept an amendment to that subsection which would meet the substance of your concern and which would say the following: "Further the Secretary of Energy as well as the Director of ACDA are urged to establish and implement procedures to facilitate, consistent with this Act, timely processing of subsequent arrangements and export licenses."

Regarding Section 3049(a), the Senate Report on S. 897 states: "The provision for expedited Congressional consideration of additional export criteria is to ensure that any moratorium or delay in licensing of exports by the Nuclear Regulatory Commission which is likely to accompany such Congressional consideration shall be kept to an absolute minimum by encouraging expeditious Congressional consideration of any such additional export criteria." I am not totally wedded to this section of the bill. However, if new legislation is ever presented on nuclear export criteria in the future, it is my feeling that such legislation should be considered with expedited procedures in order to obviate the problem discussed in the Senate Report. I believe your concerns about this section can be met by a colloquy on the floor and I would be open to any suggestion on this part from you. Finally, on the three points that you raised with respect to the impact on Barnwell by the bill, our staffs have been in contact with each other on these points and I am willing to engage in a colloquy which would have the effect of meeting your concerns in this area as well. I am enclosing a copy of a letter to Senator Thurmond dealing with this issue and I believe the colloquy proposed to Senator Thurmond would also meet your concerns.

I have tried to address all the issues raised in your letter, and I hope we are now in agreement regarding the future disposition of this bill.

With best personal regards,

Sincerely,

JOHN GLENN.

U.S. SENATE,
Washington, D.C. October 28, 1977.

Hon. STROM THURMOND,
U.S. Senate,
Russell Senate Office Building,
Washington, D.C.

DEAR STROM: I appreciate the concerns you have expressed in your letter of October 18, 1977 on the subject of S. 897, the Nuclear Nonproliferation Act. I believe those concerns are well-founded and I am glad to accommodate them through colloquy on the floor in accordance with the agreements between our staffs. In particular, on section 104, our colloquy could say that the creation of INFA involves devising feasible and environmentally sound approaches for the siting, development, and management under effective international auspices of facilities for the provisions of nuclear fuel services and the storage of spent nuclear fuel.

Second, in discussing the reevaluation of the nuclear fuel cycle in section 105, our colloquy could say that the reevaluation should consider coprocessing and blending.

Third, our colloquy could also say that in section 202, which deals with the establishment and operation of a program to train people from other countries on safeguards and physical security procedures, that the Department of Energy should consider using existing facilities for such a program.

Finally, section 303(b)(3) is certainly not intended to place a reprocessing monopoly in foreign hands and that should certainly be made clear in colloquy on the floor.

I would leave it to our staffs to work out whatever details are needed to put the colloquy together and trust that we are now in agreement on those aspects of the bill in which you expressed concern. If so, in accordance with the statement in the first paragraph of your letter, I hope you will withdraw your current hold on S. 897.

With best personal regards,

Sincerely,

JOHN GLENN.

UP AMENDMENT NO. 1206

The PRESIDING OFFICER. Under the previous order, the hour of 1:30 p.m. having arrived, the Senate will now proceed to the consideration of the spent fuel amendment offered by the Senator from Idaho (Mr. MCCLURE), with the vote thereon to occur no later than 4:30 p.m. today.

The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. MCCLURE) proposes unprinted amendment No. 1206.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Page 120, after the period, insert new subsection (c), in Section 303, as follows,

"(c)(1) With regard to any subsequent arrangement under subsection (a)(2)(E) (for the storage or disposition of irradiated fuel elements), where such arrangement involves a direct or indirect commitment of the United States for the storage or other disposition, interim or permanent, of any foreign spent nuclear fuel in the United States, the Secretary of Energy may not enter into any such subsequent arrangement, unless:

(A)(i) Such commitment of the United States has been previously and expressly authorized by Congress in a concurrent resolution or in legislation hereafter enacted, or

(ii) the President has submitted a detailed plan for such disposition or storage in the United States 60 days during which the Congress is in continuous session, as defined in section 130 of this Act, prior to entering into such subsequent arrangement, and neither House of Congress, using the procedures of section 130 of this Act, approves a resolution of disapproval of the plan.

(B) The Secretary of Energy has complied with subsection (a); and

(C) The Secretary of Energy has complied, or in the arrangement will comply with all other statutory requirements of the Atomic Energy Act, under sections 54 and 55 and any other applicable sections, and any other requirements of law.

(2) Subsection (1) shall not apply to the storage or other disposition in the United States of limited quantities of foreign spent nuclear fuel if the President determines that (1) commitment under section 54 or 55 of this Act of the United States for storage or other disposition of such limited quantities in the United States is required by an emergency situation, (2) it is in the national interest to take such immediate action, and (3) he notifies the Committees on International Relations and Science and Technology of the House of Representatives and the Committees on Foreign Relations and Energy and Natural Resources of the Senate of the determination and action, with a detailed explanation and justification thereof, as soon as possible.

(3) Any plan submitted by the President under subsection (c)(1) shall include a detailed discussion, with detailed information, and any supporting documentation thereof, relating to policy objectives, technical description, geographic information, cost data and justifications, legal and regulatory considerations, environmental impact information and any related international agreements, arrangements or understandings.

(4) For the purposes of this subsection, the term "foreign spent nuclear fuel" shall include any nuclear fuel irradiated in any nuclear power reactor located outside of the United States and operated by any foreign legal entity, government or nongovernment, regardless of the legal ownership or other control of the fuel or the reactor and regardless of the origin or licensing of the fuel or reactor, but not including fuel irradiated in a research reactor.

2. Section 303 is further amended by inserting the following new subsection immediately after the preceding new subsection:

(d) Conforming Amendments to the Atomic Energy Act of 1954, as amended

(1) Section 54 of the Act is amended by adding new subsection (d) as follows:

"(d) The authority in this section to commit United States funds for any activities pursuant to any subsequent arrangement under Section 131(a)(1)(E) shall be subject to the requirements of Section 131."

(2) Section 55 of this Act is amended by adding a proviso at the end of the section as follows: *"Provided,* That the authority in this section to commit United States funds for any activities pursuant to any subsequent arrangements under Section 131(a)(1)(E) shall be subject to the requirements of section 131."

Mr. McCLURE. Mr. President, I think the Senator from New Mexico and the Senator from Ohio want to have a brief period of time to discuss another matter. For that reason, I ask unanimous consent that we have a brief quorum call, with the time to be equally divided on the amendment.

Mr. DOMENICI. I thank the Senator.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, the pending amendment is one which comes as no surprise to anyone. The policy has been before the Senate for quite a little while, and the decision which must be made, I am certain, will be made today.

I want to stress at the outset of the debate that the bill before us is neutral on this question. There have been a number of discussions about various policy matters in which we sought to make certain that the bill remained neutral, that it expressed no policy choice and it made no policy decision.

This bill is not neutral on the question of whether or not spent fuel from the world may be returned to the United States because, under the provisions of 303(a)(2)(E) of the subsequent arrangements section of this bill, it is perfectly clear that the executive branch would have the authority to enter into arrangements for the return of spent fuel from all over the world to temporary or permanent repositories in the United States.

It seems to me, Mr. President, that that is an incredible thing to have happen at a time when the U.S. Government, and the Congress itself, has not yet come to grips with the domestic storage problems, let alone becoming the depository for all of the world's radioactive waste.

I think this bill needs to make a statement, but certainly not the statement which is contained within it now. The bill is now abdicating congressional responsibility or opportunity to express itself on this particular issue, by simply delegating that authority to the executive branch for decision by them on whatever terms, in whatever way, in whatever place, to whatever degree, the administration might decide to make us the world's storage place for spent fuel elements.

The Department of Energy announced on October 18 of last year a new policy that the United States would make commitments to bring foreign nuclear waste to the United States. Several of the members of the Energy and Natural Resources Committee, and myself, have been in disagreement with the administration over this policy since early June of 1977.

I think it might be informative to recite a little history as to why a number of us have been in that kind of a disagreement.

There are those who will recall that last year in acting on S. 1811, I offered a similar amendment to that bill, and that amendment was subsequently adopted by the Senate, was unanimously endorsed by the conference, and became part of that bill as it was sent to the President.

Now, that bill, as everyone khows, was the fiscal year 1978 ERDA authorization, the Department of Energy R. & D. authorization for this fiscal year, and it contained within it the Clinch River breeder reactor authorization, and the President vetoed that legislation for that reason.

Therefore, the limitation on the authorization which I had attached at that time, which the Senate had attached as a result of my amendment, died with the veto for other reasons.

But I wanted to note, as I did then, that it was my intention to offer a similar amendment to S. 897 at the appropriate time, when it came before the Senate.

I was not sure at that time, in October last year, whether this bill would be before the Senate in November, December, or later, as it turned out, and I anticipated it would be before us before the end of last session. But I did say at the time S. 1811 passed, that I would offer the amendment again for the same reasons that I had offered it then.

Let me look for a moment at what precipitated this amendment. The Carter administration in the May 16 budget amendment requested a section on nonproliferation initiatives generally and specifically for "international spent fuel disposition." That request of the May 16 budget submission of last year was for authority for the U.S. participation in multinational and international studies of international spent fuel storage and transportation, and for U.S. entry into agreements for appropriate support to increase international spent fuel storage. Twenty million dollars was included for fiscal year 1978 efforts in those areas.

In the hearings on the ERDA nuclear authorization, the Committee on Energy and Natural Resources questioned administration witnesses on the administration's then current plan for international spent fuel disposition, and details on how the authority contained in the relevant section of the administration's bill would be used.

The Energy Committee noted that the budget justification documents accompanying the draft bill did not define with specificity the anticipated actions for increasing international spent fuel shortage capacity.

The administration witnesses indicated that the President had not yet made a final decision on the specific options to be pursued in international discussions and negotiations.

The witnesses, in fact, did indicate that one of the several options under consideration was repurchase of the foreign spent fuel and storage of it in the United States and Energy Committee members expressed serious reservations about the wisdom of this course of action.

At that time, the administration witnesses concurred that such an action would involve a host of environmental, institutional and legal complications, as well as the probability of significant cost to increase our domestic spent fuel storage capacity.

The Energy Committee in those hearings formally and on the record asked to be notified of the final decisions by the President, but the information that has been submitted to the committee, or to the Congress, as a result of that request is almost totally lacking in any substance.

As a matter of fact, the record is quite the opposite of full and complete disclosure to the Congress of what the administration has in mind.

The Energy Committee in the markup on S. 1811, because of the potential problems with the proposed international agreement in markup, added the phrase "subject to the consent of Congress," and thereby required that any agreement providing for appropriate support by the United States to increase foreign fuel spent storage be approved by Congress.

I suggested that there be such a requirement and my colleague, Senator CHURCH, suggested the specific consent of the Congress phrase.

The administration objected to that requirement generally, and they still object to that requirement.

Secretary Vance, in a letter to Chairman JACKSON on September 12 discussed in detail below, stated as follows:

The activities contemplated under this section do not involve the return of foreign spent fuel to the U.S.; rather, they involve U.S. financial support to foreign spent fuel storage facilities. Pending the outcome of the President's proposed International Nuclear Fuel Cycle Evaluation, we expect many foreign reactor operators will need to expand their spent fuel storage facilities. U.S. support for this activity should be permitted without the need for additional Congressional consent.

A consent requirement has been retained.

First, it is clear that there should be a requirement for Congressional notification and approval. The Carter policy of no reprocessing will create a major spent fuel problem internationally, since the United States has approval rights over much of the free world fuel (U.S. enriched most of it), and since many of the foreign nuclear power programs included reprocessing in planning for facilities and fuel requirements. Also, failure to reprocess denies countries of the value, in both resource and cost terms, of the unburned fuel—a value for which many may request reimbursement for replacement cost. Consequently, agreements for appropriate support probably could lead to large costs over time and undoubtedly will be closely coupled to the nonproliferation policy's continued restriction on reprocessing. Congress therefore should play a positive role.

Second, the type of consent is consistent with the House conferees' feeling on the need for full congressional, as opposed to Senate only, consideration of these agreements.

As a result of the section 108 discussion in markup and because of ongoing policy analysis on international spent fuel disposition in the administration, we have followed the issue closely. The following events relate to the amendment.

I shall recite a little of the background that occurred prior to the time of the Vance letter in September. Remember, the date of that letter is September 12 of last year, and I will return to that a little later and explain the reason why that date is significant.

First. On June 8 and 10, during hearings on the nonproliferation bills, the committee again aksed ERDA Acting Administrator Fri to advise us of the administration policy on domestic and international spent fuel disposition. We were told only that the policy was awaiting then-pending Presidential decision.

Second. The June 30 Washington Post included an Associated Press report that the Nuclear Regulatory Commission yesterday approved the export of 27,000 pounds of uranium to fuel India's Tarapur atomic power station. The articles concluded with the following statement:

"Discussing points raised by the citizen groups, the NRC noted that the Indian government has agreed to have the U.S. repurchase spent nuclear fuel from Tarapur, as a safeguard against the conversion of that spent fuel into weapons material."

Because of the committee's interest in the international spent fuel disposition issue and its actions in the fiscal year 1978 ERDA authorization, we were immediately concerned by this report and initiated an effort to determine the validity of the report.

That appeared in the newspaper on June 30.

A copy of the Nuclear Regulatory Commission's memorandum and order on the Tarapur export application, dated June 28, 1977, was reviewed. The Commission's memo, in fact, supports the Associated Press report in this morning's paper. The Commission, based on reports of the Department of State, indicated that the United States does have an agreement with the Government of India giving the United States the option to repurchase the Indian spent fuel from Tarapur. The Commission states that "Indian Government authorities have agreed in principle to such an arrangement."

Remember that that was taking place following the inquiries by us initially in the prior hearings and the assurance by the administration that Congress would be involved and would be kept apprised of what was going to happen in regard to the return of spent nuclear fuel to the United States.

Senior administration sources confirmed at the time that the United States not only has the option to repurchase the spent fuel from Tarapur, but that exercising the repurchase option is the basis for an understanding which has been reached with the new Government of India.

That was not a result of information volunteered by the administration, not event the result of the prior request of the Energy Committee to be kept informed, but was the result of probing inquiries brought about by the Associated Press report.

This would be the first such repurchase understanding by the United States. It is particularly significant that the Commission's memo also states that the apparent intention for repurchase of the Tarapur spent fuel will be followed by similar understandings with other nations.

So it becomes apparent that that policy, initiated by commission action and State Department understandings with India, was not to be an isolated instance but the beginning of a new policy.

The sources further indicated that there had not yet been any decision within the administration on the ultimate duplication of repurchased spent fuel from Tarapur. In fact, however, it appears from a close reading of the Commission's memorandum that this probable repurchase and removal of the spent fuel was a significant factor in the Commission's approval of the export application, particularly in light of the nonproliferation significance attached to the detonation of a nuclear explosive device by the Government of India in 1974.

It therefore was possible that the administration was proceeding directly to a repurchase policy, even as the Congress has under consideration the exceedingly nonspecific authorization language for "international spent fuel disposition" in the ERDA authorization. In fact, one senior official indicated that the statutory language reported by the Committee on Energy and Natural Resources requiring congressional consent for any "agreement" would not be applicable to the Tarapur repurchase situation, because there is no "formal agreement," but rather an "understanding."

This series of events made clear the fact that the administration had every intention of proceeding to embark the United States on a potentially highly controversial and extremely costly program for repurchase and disposition of foreign spent fuel. And, further, the administration fully intended to do this without the agreement of the Congress and the full authorization for the required activities and funding which should be included in the ERDA authorization and appropriation. The administration thereby could repurchase the spent fuel, and without any limitation, commit the United States to its transport from India for storage in the United States.

The Tarapur events led to my amendment to S. 1611 on the Senate floor on July 12, adding the provisos to the section.

Third. On August 3, Secretary of Energy designate Dr. Schlesinger in his confirmation hearing before the Energy Committee stated that the administration shortly would announce a new policy for U.S. Government storage of spent nuclear fuel from domestic and foreign nuclear power reactors. The committee again criticized this apparent decision, with Senator ABOUREZK and DURKIN expressing serious concern about it. Senators HANSEN and DOMENICI and I wrote to President Carter on August 5, expressing strong reservations about the policy and urging the President to obtain congressional comment in the decisionmaking process.

We also requested a meeting and briefing on the policy. To date, the only response has been two perfunctory acknowledgements of receipt from a White House aide and an aide to Secretary Schlesinger.

In further hearings on the non-proliferation bills on September 12.

And again we get back to that date of September 12, the date of the letter Secretary Vance wrote to Senator Jackson—

ERDA Acting Administrator Fri, Dr. Nye of the State Department, and Dr. Keeny of the Arms Control and Disarmament Agency were asked about the administration's policy on international spent fuel disposition. Again, they only deferred to a reportedly pending spent-fuel policy decision by the President.

That was on September 12, the date Secretary Vance wrote Senator JACKSON and the date that they told us in the committee hearing that there was only a pending policy decision but no policy.

Concurrent with that hearing, Secretary Vance wrote to Chairman JACKSON on September 12 to advise him—

And this is the letter to which I made reference earlier—

of the administration's opposition to my amendment. In the letter, the Secretary acknowledged that the activities contemplated under this section to involve U.S. financial support to foreign spent fuel storage facilities because pending the outcome of the President's proposed International Nuclear Fuel Cycle Evaluation, we expect that many foreign reactor operators will need to expand their spent fuel storage.

Again they are indicating in that letter not anything concerning a policy decision that had been made, concerning the return of spent fuel to this country but only the need to support spent fuel storage in foreign countries.

The Secretary commented that—

U.S. support for this activity should be permitted without the need for additional congressional consent.

He did state that the contemplated activities do not involve the return of foreign spent fuel to the United States, significantly, he also stated:

At the current time the United States is actively engaged in discussions with the Indian Government which may lead to an agreement under which spent Tarapur fuel will be removed from India.

During informal meetings on the nonproliferation bill with the administration during the week of September 26, we were informed that a General Electric team, apparently under contract with ERDA, was in India to begin review of the Tarapur spent fuel disposition problem. In fact, then, fiscal year 1978 will begin with the United States already actively involved, and perhaps implicitly, if not expressly, committed to direct U.S. support for the disposition of foreign spent fuel. The Congress, however, despite repeated requests has never been advised of U.S. policy decision in this area.

I will turn in a moment to what they have told us, which is not much, but allow me first to make the following comment:

The conference adopted a revised concept as a compromise proposal directing that Congress be involved either by legislative route, by affirmative decision on a resolution of consent or subject to a congressional one-House veto procedure. That amendment was adopted in the conference unanimously and, as I stated earlier, the bill was vetoed for other reasons.

The September 12 Vance letter identified a major concern in the area of spent fuel from foreign research reactors. Current policy is to require the return of such spent fuel to the United States. The Vance letter cites the importance of that arrangement with South Africa and attached a long listing of other current contracts. These arrangements are also of particular importance because of the use of highly enriched fuels in these reactors, and the precedent that the 1974 Indian nuclear device reportedly used such fuel. It is clear that any prohibition should be on spent fuel from foreign power reactors and should expressly exempt research reactor spent fuel.

It also is clear that there should be an exemption for emergency situations, albeit with at least notification as soon as possible to Congress.

Since the Vance letter states that it is not contemplated that section 108 authority—the section in S. 1811—would be used to bring spent fuel from foreign power reactors to the United States, it should not be unacceptable to apply any prohibition to such activity unless subsequently authorized by Congress.

If the administration really means, as Secretary Vance said in his letter of September 12, they should have no objection to my amendment. Instead, they do object, and I think, as we can see from the events, we know why they object. They say they do not intend to do it, whereas, as a matter of fact, they were quietly and secretly negotiating such ar-

rangements at the time they so directly denied anything more than the possibility of such negotiations.

It is noteworthy that Dr. Nye, Deputy Under Secretary of State who has led the administration nonproliferation policy effort, informed me on September 29 that Dr. Nye did not believe the State Department would object to a notification and layover for any contractual commitment for the shipment to or storage in the United States of foreign power reactor spent fuel.

The "provided further" on the Tarapur export was included at the request of Chairman JACKSON as a disclaimer of any congressional intent to directly or indirectly criticize or reverse the President's decision and the NRC's concurrence to export the fuel for Tarapur. The chairman was concerned that, in the absence of such a statutory disclaimer, the new Desai government in India or any reviewing court in the event of a challenge to the NRC decision might get the wrong signal.

It is noteworthy that the only serious input we have received from the administration on this whole subject of foreign spent fuel disposition, which is a major problem directly resulting from the President's nonproliferation policy, is in the form of bits of information in communications opposing the committee which I had suggested in my amendments to section 105. All direct requests for information on the policy remained at the time of that enactment unanswered.

Let me now refer to a couple of items that might well be understood to put that in context.

One is remembering the date of the September 12 letter and the request for information that went unheeded. At that time the General Electric team was in India; they were under contract to ERDA. The administration was negotiating with the Indian Government. They did conclude an agreement which was signed by India on September 14, just 2 days after the Vance letter, and the United States signed it on September 24, which is several days, as a matter of fact weeks, prior to the time that Congress was notified of that arrangement.

They protest that we do not need this kind of amendment, because they will come forward with all candor with all of their proposals and discuss them with us fully and get our prior concurrence, but their track record indicates exactly the opposite.

What do we know about their policy at this time?

On October 18, the Department of Energy announced a new spent nuclear fuel policy. That nuclear spent fuel policy consists of one page, single-spaced, with some fine print on the back. And, the only thing to which that has any substantive reference I will read:

> Although the spent fuel policy is primarily designed to resolve the uncertainties facing U.S. utilities, the United States Government also intends in support of its non-proliferation goals to extend the offer to foreign users on a limited basis. The U.S. is encouraging other nations to expand their own storage capacity and is strongly supporting the study of regional or international storage sites.
>
> Under this policy, the United States would be compelled to store limited amounts of foreign spent fuel when this action would contribute to meeting non-proliferation goals. It is expected that foreign spent fuel will be a small part of the total spent fuel stored in the United States.
>
> Although specific details remain to be worked out, arrangements for storage of spent fuel from foreign users would probably be on the same terms as domestic spent fuel, subject to appropriate limitations established later.

There follows after that the suggestion that, "The Department of Energy will work closely with the Congress, State governments, and other agencies, utilities, industries, the public, and in conjunction with the State Department, and so forth, in establishing a policy."

In other words, as of October 18 their policy is not a policy. It is only a suggestion that a policy might be developed; and again a suggestion that Congress might be involved in it. But, if Congress is involved in it, it has been a massive secret to this day.

The fiscal year 1979 budget book contains:

> *Justification of activity*
>
> *Operating expenses:*
>
> 1. International spent fuel storage___ $3,000
>
> This program will support U.S. non-proliferation objectives by enabling DOE to assess foreign fuel storage capabilities and requirements in conjunction with foreign requests for approval to transfer fuel. Means of providing increased storage at reactors will be developed as an alternative to possible fuel transfers to the U.S.
>
> This funding provides technical support to international studies being conducted on spent fuel storage. International criteria will be developed on siting, design, construction, and operation of fuel storage facilities. Preliminary design studies will be performed on an international spent fuel storage facility which is suitable for use by an international organization having responsibility for spent fuel storage. Contractual arrangements for international storage will also be investigated. Studies will be performed to estimate fuel clad lifetimes for safe storage of foreign-origin spent fuel, to extend basin storage capacities in foreign plants. Available data on potential sites for international facilities will be evaluated and studies and evaluations of logistics requirements and needed systems will be conducted. An Environmental Impact Statement (EIS) will be completed and the technical support for licensing, environmental and economic aspects of spent fuel storage from foreign countries will be provided.

The last sentence is the only hint in the entire explanation of the fiscal year 1979 budget request that returned spent fuel to the United States from foreign sources is contemplated as a part of the international spent fuel storage policy efforts of this administration.

Mr. President, I think the record speaks loudly for the need to have congressional involvement in a matter of this importance, in light of the past record of the administration and in light of the extreme importance of this as a policy matter.

Mr. President, let me detail the kind of questions this Senator would ask—if this Congress is given a role by my amendment—of any administration witness when a proposal to bring foreign nuclear waste to the United States includes a detailed discussion of at least the following information and any supporting documentation thereto:

First. The exact policy objectives intended to be achieved by such repurchase, transportation, or storage, including the relation of such objectives to domestic and international energy policy, domestic and international nuclear power policy, and nuclear nonproliferation policy;

Second. A detailed technical description and discussion of the proposed mode or modes of transportation and storage, and an analysis of any technical alternatives thereto;

Third. A summary of the domestic and international transportation and storage facilities and capacity for disposition of spent nuclear fuels;

Fourth. A discussion of the proposed geographic sites for such storage, including any alternatives thereto;

Fifth. An identification and discussion of all proposed or potential international accords, agreements, arrangements, understandings, or any other direct or indirect form of conditional, discretionary, or mandatory arrangement with one or more foreign legal entities, government or nongovernment, or international or multinational organization for such repurchase, storage, or transportation, directly or indirectly.

Mr. President, you may wonder why the detail in that formulation of that particular question. But I remember when we were involved in the Energy and Natural Resources Committee with the congressional direction in the formulation by our committee for congressional consent for any agreement. The administration answered and said that the Tarapur repurchase situation would not be applicable, because there is no formal agreement but rather an understanding.

It is obvious we have to use a great many words if we hope to circumscribe the ingenuity of the administration in seeking total latitude to do what they wish without any congressional oversight or involvement regardless of the statute we may write.

Sixth. A discussion of all potential costs, direct and indirect, for that fiscal year and the following 10 fiscal years, on an annual basis, and 5-year increments beyond through the end of the century, including, but not limited to, all management and administrative costs, the value of any required U.S.-owned facilities or equipment, and all required payments to any legal entity for spent fuel, for facilities or equipment outside the United States, or for any supporting services;

Seventh. A discussion of any and all research, development or demonstration funds, personnel or facilities, which directly or indirectly will be required to support the technical implementation of the plan over the life of the proposed program;

Eighth. A complete justification of the basis for the price proposed to be paid for the foreign spent fuels, in terms of the remaining unburned fissionable fuel or other reusable fuel assembly component or element, or any amount considered to be an incentive payment for inducing the sale to the United States, any imputed value as a result of a particular

policy objective, any amount related to alternative costs for storage or reprocessing by the foreign entity, or any other factor;

Ninth. A cost/benefit analysis of such repurchase, transportation or storage, taking into account the factors discussed in previous subsections, and including a specific cost comparison analysis of the proposed disposition with other alternatives, including but not limited to, reprocessing and recycling the spent fuel;

Tenth. A discussion of all legal and regulatory considerations and requirement for the proposed actions under any applicable local, State, or Federal law or regulation, or under any international law, accord, agreement, understanding, arrangement or any other form of conditional, discretionary or mandatory arrangement with one or more foreign entities, government or nongovernment, or international or multinational organization;

Eleventh. For any transportation to or through, or interim or permanent storage of any foreign spent fuel in the United States, the proposed procedures for seeking and obtaining the comments and approval of the public and any local or State jurisdiction, as may be required by Federal law, in which or through which the foreign spent fuel will be transported or stored.

Additionally, any report submitted by the President under subsection (c)(3) shall include an environmental impact statement for any Federal actions in the United States.

Additionally, I would want to know exactly what the impact of the proposed action would be on our domestic nuclear waste alternatives. I understand that we are going to be very tight on waste storage from our existing nuclear plants. In fact, Mr. President, I understand that reactors in the utility of the State represented by the distinguished minority floor manager (Mr. PERCY), will have just such a problem in the not too distant future. I suggest that he certainly would want such information on the impact on our domestic storage option—and yet his bill does not give us the option to do so, as a matter of right for the Congress. Rather, the bill gives the administration a blank check, totally carte blanche authority, subject only to interagency concurrence.

All my amendment does, Mr. President, is give us the right by statute to ask those questions before the final decision—to ask the questions which the administration has refused thus far for 10 months to answer. They will not even answer the telephone, answer letters, or answer questions in hearing, where their witnesses do appear. Congress deserves that right, and I urge support of my amendment to require it.

Mr. President, in closing, let me state what may not be so obvious. This amendment is not intended as a bar to the return of foreign-spent fuel to the United States. There may be circumstances under which the values to the United States in support of nonproliferation or other objectives of this Government justify that action; but I think Congress must either set the guidelines or be involved in the approval of those arrangements and those procedures.

I cannot imagine that this Congress will sidestep its responsibility in such a tough issue simply because it is a tough issue, or simply because the administration finds it more convenient to act without public and congressional oversight rather than with it.

Mr. President, I hope that this amendment will be adopted on this bill, as it was on S. 1811 when it passed. I am confident that the administration, rather than finding it obstructive of their policies, will find that an informed consent on the part of the Congress of the United States will render their policies more meaningful and, therefore, will find that congressional involvement in the decision will yield strength to the nonproliferation goals of this administration, and not frustration, which I am certain would occur if the administration persists in attempting to go around Congress, and ignore Congress in this most fundamental of all of the questions dealing with the safety and the security of the people of this country.

Mr. President, I reserve the remainder of my time.

Mr. GLENN. Mr. President, as the Senator from Ohio understands the amendment by the Senator from Idaho, there would be two ways in which the administration could handle nuclear spent fuel imports for storage in this country. One would be for imports to occur pursuant to an overall U.S. generic plan or spent-fuel policy, which would cover any number of imports, and would spell out, generally, the details of the storage conditions, costs, and the like. That would be a generic plan.

However, the second instance, if no such plan were developed, and the administration proposed spent-fuel imports on a case-by-case basis, that would be a second alternative.

In the first instance, where there was a generic plan, Congress at that time would have the opportunity to veto the plan by a one-House vote, according to the proposal of the Senator from Idaho. In the second instance, where case-by-case consideration would be given to imports, a confirming congressional authorization from both Houses of Congress would be required.

Is the Senator from Ohio correct in those assumptions of what is intended by the Senator from Idaho?

Mr. McCLURE. Mr. President, I would say to the Senator that that is not my intent. I think in either instance the administration would have the option of proceeding with the generic plan, in which they could either ask for congressional concurrence or submit it to us for the possibility of congressional veto.

Mr. GLENN. If I might interrupt, if the Senator will yield to me just one moment, in that instance that would be a congressional one-House veto?

Mr. McCLURE. That is correct. And in a case-by-case situation, if they would elect not to submit a plan to be subject to the congressional veto, they could ask for an authorization of the generic plan or case-by-case arrangement, if they decide they want it, and ask for congressional concurrence.

This, of course, does raise the question of the one-House veto or the two-House veto. The one-House veto, of course, has always appealed to the Senator from Idaho. Where any positive action taken by the administration would require concurrence of both Houses, certainly requiring a veto by both Houses is a more onerous requirement than requiring concurrence by both Houses.

Mr. GLENN. I am not sure I understand the second case yet.

Where there would be a case-by-case approach to spent fuel imports and these were submitted by the administration, would that need a two-House congressional authority, to proceed?

Mr. McCLURE. They can either come in with a case-by-case basis subject to a veto, or they could come in, in the ordinary authorization process, subject to the authorization and approval by both Houses of Congress, which they would ordinarily do if they have an administrative program for which they seek approval.

Mr. GLENN. I thank the distinguished Senator from Idaho.

Mr. President, on October 18, 1977, the Department of Energy announced its spent fuel policy. So this policy has been in effect for only a short period of time, since just midfall of 1977.

This policy is a logical extension, given the indefinite deferral of reprocessing, of long-established Federal responsibility for permanent disposal of high-level waste; and no one in this country has quarreled, I believe, with the fact that this is a Federal responsibility.

Under this policy, the Federal Government would prepare to accept and take title to used or spent nuclear reactor fuel from utilities domestically on an ongoing payment basis or on a one-time storage fee basis.

This policy, just established in midfall of 1977, will remove, I think, a lot of the uncertainty faced by utilities in their planning processes up to now.

Although the spent fuel policy will have its primary impact domestically, the U.S. Government does intend, and has so stated, in support of its non-proliferation goals, to extend the offer to foreign users on a limited basis.

This is not intended by the administration, as I understand it, to encompass all nuclear wastes or all spent fuel. It would be on a case-by-case basis.

Most nuclear suppliers do not have policies involving return of spent fuel. In our case, however, the United States does have a special responsibility, for the following reason: We are, in fact, asking other nations to defer voluntarily commercial reprocessing and the premature use of plutonium around the world. This is important because plutonium carries with it the specter of nuclear holocaust either at the hands of terrorists should they obtain this material or as a result of nations' misappropriating nuclear materials from their peaceful nuclear programs.

In addition, the administration will be renegotiating all the agreements of cooperation in order to incorporate more stringent nonproliferation conditions on our nuclear exports. Our policy cannot succeed, however, if it is based solely on

denials and controls. We need to offer other nations adequate incentives—there needs to be the carrot with the stick, and big carrots, big incentives—to get other nations to abide by nonproliferation restraints. One of these is to offer them reasonable alternatives to reprocessing, such as the opportunity to return spent fuel to the United States.

We provide in this bill quite a number of incentives to get nations to refrain from reprocessing. INFA, the International Nuclear Fuel Authority, is one, whereby nations will be able to buy their fuels from apolitical, guaranteed international sources. Along with that, we are trying to reduce the time needed for the licensing processing, so that purchase of fresh fuel supplies from the United States will be attractive, again as an alternative to reprocessing. So we are not without incentives in this bill.

Our spent fuel storage policy is another such incentive. However, it should be stressed that this policy is not a general offer, but rather, one conditioned on the contribution it makes to our nonproliferation objectives, demonstrated need, and availability of capacity in the United States will be attractive, again as an alternative to reprocessing. So we are not without incentives in this bill.

With regard to spent fuels, specifically, however, this could be looked at as a very valuable commodity, because it can be reused to reenrich fuel and, in some ways, become a sort of minor league breeder reactor in its own right.

The administration is encouraging other nations to expand their own storage capacity now and actively promoting the study of regional and international storage sites.

I believe the view is that, while we might be storing some of this foreign fuel here now, for the reasons I have mentioned earlier, we hope eventually to see nations storing their own spent fuel or to develop international storage sites.

At the present time, the U.S. Government is preparing, as I understand it, environmental impact statements for both its domestic and international spent fuel policies. The work on this should be completed by about the beginning of March, so we should have a lot more information out of that study by this time.

The rate base for the program will be published in the Federal Register for comment. I think it is clear that there are reasonable cases where the spent fuel should be returned to the United States. I believe, however, that the one-House disapproval option over the return of spent fuel to the United States, as proposed in the amendment, would be overly restrictive. On the other hand, my informal contacts with the executive branch indicate that they do not want to cut Congress completely out of this process, a view which I share. The one-House veto procedure troubles me because it can interfere considerably in the reliability of the United States as a nuclear trading partner in this regard and sets up one more unnecessary hurdle that other nations must cross before they can obtain a satisfactory arrangement with us.

As a brief summary, I feel that the proposal by the Senator from Idaho gives too great discretion to Congress, particularly when a single-House veto is available. The proposal, it should be noted, also makes spent fuel returns subject to closer congressional scrutiny than any other nuclear cooperation arrangements covered in this bill; all of the other similar provisions call for a two-House veto as a means for disapproving executive actions. To single out spent fuel returns for easier congressional challenge than any other arrangements in this bill, to me, is unwarranted.

For those reasons, Mr. President, I have to rise in opposition to the proposed amendment by the distinguished Senator from Idaho. I hope that my colleagues will go along with the administration's policy, which was announced in October, and on which they are working now. This policy may be one of the key incentives to persuade nations that do not have their own storage facilities to avoid reprocessing. This would do much to keep nuclear terrorism and nuclear proliferation under control.

We know that if we make such arrangements to bring fuel back or bring nuclear wastes back into this country and store them for a fee, we will have the material under close guard and it will be less dangerous to the world and less dangerous to proliferation problems than if we leave it abroad in nations without that type of security.

For all of these reasons, Mr. President, I rise in opposition to the amendment proposed by the Senator from Idaho.

Mr. PERCY. Will the Senator yield?

Mr. GLENN. Yes.

Mr. PERCY. I should like very much to reason aloud between myself and my distinguished colleague, to reason along lines that I never felt I would. I believe we share a common desire to have a reliable source of supply. There is not any question about that. I just question whether placing in jeopardy our ability to offer a complete range of services would be a service to our nuclear industry, for instance, and our desire to be a reliable source of supply.

I merely want to point out the tremendous emotion that is involved in this particular issue. The Senator from Illinois testified before the House committee that held its hearings in Chicago just recently on nuclear waste disposal. Headlines day after day proclaimed that at Sheffield, Ill., and Morris, Ill., where we have some of the largest nuclear waste disposal facilities in the world, we were becoming a nuclear dumping ground in Illinois for all that nuclear waste—from Kansas, maybe, or Idaho, or other States. And there were a lot of emotions aroused about this. It was almost as if New York City suddenly was discovered to have been dumping its garbage in Lake Michigan, there was so much emotion about it.

I think we have to be extraordinarily careful, as we, as a nation, go out to convince others that we shall do our fair share, if they will do a fair share, in providing facilities and adequately secure places under international control and management for the storage of spent fuel. We do not want to lock ourselves in so that we cannot fulfill our part of the bargain and accept a fair share of nuclear waste in attempting to reduce the risks of nucear proliferation.

To take the risk that one House could block an action, I think, would place us in great jeopardy. I just ask my distinguished colleagues that are on the floor today whether or not we in the Senate would agree with, let us say, a procedure such as was accomplished in the House passage of a labor reform bill. It was overwhelmingly passed under the rules of the House, which, in a sense, caught everyone short and caused a major bill of that Congress to go through without what the business community feels is adequate understanding and debate of the issue. That is why the bicameral system is so extraordinarily important in this regard and why both we and the administration have been concerned.

I am concerned about the amendment as it now stands and, although there are certainly problems associated with the storage of foreign spent fuel in the United States, U.S. security interests are greatly affected by the risk associated with having plutonium-bearing spent fuel in the possession of non-nuclear-weapons states. Even though we consider it somewhat dangerous to have spent fuel in the United States, I ask my fellow citizens a question: Would you sooner have that fuel sitting in the possession of a non-nuclear-weapon state where it would be extraordinarily difficult to provide safeguard and security measures?

Would you feel very comfortable if a group of terrorists, or the head of a terrorist or radical state, had available this kind of material, plutonium-bearing spent fuel, in an area that they could more readily obtain it and easily obtain it than some secure place right here in the United States? Which is the more dangerous course?

I say it is more dangerous to have it in some remote area, easily accessible to some terrorist or some irresponsible chief of state and his forces, than to have it right here.

Second, the United States must demonstrate to others that we are willing to accept our fair share of the burden of solving the problem of providing secure storage for spent fuel produced in non-nuclear-weapon states if we are to convince them that we want to make certain that they take a share of it and we are left only with a fair share of it.

Last, because of our distinguished guest on the floor and our desire to recess for a few moments, I simply say that, under certain circumstances, assistance to another country with regard to spent fuel can provide a significant incentive to accept effective nonproliferation controls by providing additional time for the development of secure nuclear cycle facilities, especially international storage.

So, for these reasons, I would join with the majority floor manager of the bill, and would find myself compelled to oppose the pending amandment in its present form.

I am very happy to yield to my distinguished colleague from Maryland for a very important announcement.

VISIT TO THE SENATE BY DR. KARL CARSTENS, PRESIDENT OF THE GERMAN BUNDESTAG OF THE FEDERAL REPUBLIC OF GERMANY

Mr. MATHIAS. I thank the distinguished Senator for yielding.

Mr. President, we are honored in the Senate this afternoon by a visit from Dr. Carstens, the President of the German Bundestag, who is visiting Washington.

[Applause.]

RECESS

Mr. MATHIAS. Mr. President, I ask unanimous consent that the Senate stand in recess for 3 minutes so that Members on the floor may have an opportunity to greet the President of the German Bundestag.

There being no objection, the Senate, a 2:44 p.m., recessed until 2:47 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. METZENBAUM).

NUCLEAR NONPROLIFERATION ACT OF 1977

The Senate continued with the consideration of S 897.

The PRESIDING OFFICER. Who yields time?

Mr. GLENN. Mr. President, I suggest the absence of a quorum with the time to be divided equally.

Mr. HELMS. Will the Senator withhold that?

Mr. GLENN. Yes, I withhold that request.

Mr. McCLURE. Mr. President, I am prepared to yield to the distinguished Senator from North Carolina.

How much time does the Senator request?

Mr. HELMS. Five minutes.

Mr. McCLURE. I will yield whatever time he consumes.

Mr. HELMS. I thank the Senator.

Mr. President, I want to commend the distinguished Senator from Idaho for the diligent and perceptive work he has done on this bill. As a result of his efforts, it will be a far better piece of legislation.

I am not certain that even as amended it will be in the best interests of this country, but we shall see how further amendments affect the legislation when it goes to final passage.

Mr. President, as with so much other legislation we have seen in recent years, the bill before us, while enshrined with noble purposes, will in fact be counterproductive to its ends.

What is the purpose of this bill? Presumably, it is to slow or control nuclear proliferation. How is this goal to be accomplished? Apparently by imposing stringent, virtually impossible and certainly unrealistic requisites on the export of nuclear fuels and equipment from the United States.

Such a simplistic solution might be acceptable if the United States had a virtual monopoly of nuclear fuels and equipment. With little or no competition we would essentially be the sole arbiter of who received what and how much. This may have been the situation 30, 20, or even 10 years ago. But today many nations possess nuclear technology, and, for better or for worse, they do not seem to share our scruples about sharing this technology with other nations.

Ideally, it is nice to dream of a perfect and orderly world where all nations were as responsible and benevolent as the United States. Indeed, in such a world, if it existed, there would be no need to worry about nuclear proliferation because such a world would have no wars or threats of war. But we do not live in such a world, and we cannot afford to legislate our fantasies.

In the real world, this legislation is clearly counterproductive. Far from controlling proliferation, it would actually tend to increase it. If this bill makes it almost impossible for the United States to be a major nuclear exporter, then someone else, much less responsible and much less committed to the control of a potentially dangerous technology, will move in to fill the vacuum. The United States, under this bill, will become a wholly unreliable supplier of nuclear fuels and equipment. It is perfectly natural that the resulting lack of predictability will drive potential trading partners to other supplier nations.

It is clear that the other nations have rendered little more than lipservice to the President's nonproliferation goals. The President has tried, but he has not met with success. The situation is not likely to change. Therefore, little purpose is served by allowing ourselves to become self-proclaimed martyrs for righteousness in this matter. Whether it be the Clinch River issue, or the issue now before us, our nonproliferation policy will harm no one but ourselves and could very well result in greater proliferation.

On few matters have the nations of the world shown a greater willingness to work together than in the nuclear area. The organization of the International Atomic Energy Agency and the Nonproliferation Treaty are monuments to the international willingness to join together to control nuclear proliferation. As with most broadly-accepted international agreements, each contain tradeoffs. Under the Nonproliferation Treaty, for instance, nuclear weapons governments agree not to transfer, assist, or encourage nonnuclear weapon governments to acquire or gain control over nuclear explosive devices. Nonnuclear weapon governments agree not to seek or develop such devices and to submit to IAEA inspection on all peaceful nuclear activities within their territories, under their jurisdiction, or carried out under their control anywhere. In return, nonnuclear weapon governments receive assurances that all parties: First, have the right to develop and use nuclear energy for peaceful purposes; and second, should make available the benefits of peaceful applications of nuclear technology to the other parties "on a nondiscriminatory basis."

S. 897 imposes more stringent conditions on nuclear commerce and threatens the existing international legal regime without assurances that the ad hoc mechanism which it employs can provide a satisfactory replacement. It would impose conditions on U.S. exports which have not received the widespread international consensus which accompanied the creation of the International Atomic Energy Agency and the negotiation of the Nonproliferation Treaty. Perhaps they will in fact be broadly accepted within the international community. Yet the further the United States proceeds down this path of unilateral or narrowly sponsored new nuclear controls, the more difficult it will be to achieve a broad consensus.

Several dangers are present in this approach. First, the conditions are being imposed on our trading partners; they are left with very little negotiating room. With this alteration of the rules governing nuclear exports, recipient nonnuclear weapon governments could argue that the bargain struck in the NPT is no longer valid. The reaction of these nations during the 1975 NPT Review Conference and the threat of Yugoslavia to withdraw from the treaty because the United States and Soviet Union had not fulfilled their pledges to cooperate under article VI are clear evidence that this is no idle concern. It also could become a symbolic issue of contention in the continuing negotiations over the distribution of the world's resources, wealth, technological capabilities and power.

Whatever its shortcomings, the existing framework of bilateral and multilateral control is a significant factor in deterrence today. The technical barriers to the widespread development fell long ago, yet no nation has ever breached its international safeguards commitments. For these reasons, we should resist the temptation to adopt ad hoc, quasi-legal mechanisms to resolve matters of international significance.

Further, this legislation will damage our convalescing domestic economy. The reduction of nuclear exports will only add to our worsening trade balance and the continuation of the softening of the dollar, and, perhaps even more important in the long run, the resulting stagnation in our nuclear industry will cause a retardation in our nuclear energy development. Other nations, with an active trade and thriving industry, will naturally begin to surpass us in new technological innovations. Such a development has the most profound implication, both as to our military security and our energy resources. If our technological superiority, as the administration claims, is supposed to be the answer to our growing strategic inferiority vis-a-vis the Soviets, this is a strange way to go about maintaining it. Sick industries do not remain technologically alert. And, if again as the administration claims, we are engaged in a "moral equivalent of war" because we are importing too much oil, the administration's aversion to nuclear development is a strange way to go about fighting that war.

Further, Mr. President, I would add this one thought. I do not claim to be an expert on nuclear physics, or nuclear trade, or all the nuances of the proliferation issue. I doubt there are more than a

handful of Senators—if that many—who do possess such expertise. But I do know a little bit about history. And I cannot dismiss the obvious fact that new technological developments have always caused a certain amount of fear among the general populace. Fear of the unknown is common to man, and, to a great extent, nuclear energy—its use, its limits, its benefits, and its dangers—is still an unknown.

One can look back when the automobile was first developed and recall the fear expressed by some that speeds in excess of 60 mph might cause one's adam's apple to fall out. I do not mean to suggest that we should be careless or foolhardy. But I sense a certain irrational phobia that we must learn to overcome. It is interesting to note that we continuously receive mail from people worried about the dangers of peaceful nuclear energy projects—even though there has never been even a serious injury connected with these projects in more than 30 years—while we never hear about the accidents in coal mines and oil rigs that result in the loss of hundreds of lives and cause thousands of injuries year after year.

I believe it is time that we took a more rational approach in these matters. I do not oppose some reasonable controls on the export of nuclear materials, as we have at present. Certainly there are safety precautions and military security that must be protected. But creating new layers of bureaucracy and redtape, so burdensome that it will virtually lead to a moratorium of U.S. exports of nuclear fuels and equipment, protects neither safety nor military security. What it will do is damage our economy, retard our nuclear technology, and, if anything, accelerate nuclear proliferation throughout the world.

Mr. President, I commend the distinguished Senator from Idaho for the splendid work he has done on this bill. I know he did it at a great sacrifice of time which he could have spent on other issues which are equally important to him. As one Senator, I am thankful to him.

Mr. McCLURE. Mr. President, I thank the Senator from North Carolina for his comments and his support. I appreciate very much the wise counsel he has given in this matter, as well as in many others. He is one of the most distinguished Members of this body and a man who has contributed a great deal to the deliberations here.

Mr. President, I reserve the remainder of my time.

Mr. GLENN. Mr. President, I do not plan to respond at length to the distinguished Senator from North Carolina.

I agree with him on the safety aspects of nuclear energy and the remarkable safety record that has been established by this industry. We have some 300 plant year of operation in this country and have yet to have the first person killed. As the Senator points out, we have some 150 miners killed each year. Forty thousand or fifty thousand people are killed on the highways every year. I wish the citizens would become as exercised about some of these other things that occur year in and year out.

Having said that, we certainly must stress the safety aspects of nuclear energy.

But I think I must rise in opposition when the distinguished Senator from North Carolina uses such terms as "this bill is embarking upon new layers of bureaucracy and redtape" and "this bill will retard nuclear technology" and "this bill will hold down nuclear technology throughout the whole world." I could not disagree more strongly with those statements because I believe very firmly that this bill will do just the opposite.

Our licensing process in this country with regard to nuclear energy, our whole procedure around it has been in such a turmoil that I think this bill brings some order out of chaos, and with the amendments we have put on that we agreed to in private and put into the bill and then have agreed to accept here on the floor as we worked out our arrangements on it, I think it has really strengthened this bill and I think leaves our nuclear industry and our ability to be a reliable partner around the world in better shape by far than it is without this legislation. So I think that the bill very decidedly improves this situation and does not provide additional layers of bureaucracy or redtape. If anything, it straightens them out and reduces some and puts finite time limits on the licensing process at each step along the way.

So I look at this as a step forward in helping get away from some of the bureaucracy and get away from some of the redtape that the nuclear industry has been saddled with.

And I do not make any claim at all that this bill solves all the problems of the bureaucracy. It certainly does not. But it certainly does streamline some of those procedures and make us a more reliable partner to those interested in buying American nuclear equipment around the world. As nuclear sales open up in the future I think we will see our people be more competitive rather than less because of this legislation.

Mr. HELMS. Mr. President, will the Senator yield?

Mr. GLENN. I yield.

Mr. HELMS. Will the Senator yield me 1 minute?

Mr. McCLURE. I am happy to yield to the Senator from North Carolina.

Mr. HELMS. I know my good friend from Ohio, whom I respect greatly, has that intent and I certainly hope that he is correct in his anticipation regarding this legislation.

Mr. President, so often we have been told on this floor relative to other pieces of legislation and in perfectly good faith that all of this will not increase bureaucracy, this will cure the problem and so forth; and this has not come to pass. As examples, we can use OSHA, and so many aspects of Federal aid to education and other issues.

But I have no doubt whatsoever about the sincerity and good intentions of the Senator from Ohio, and I say again that I hope he is correct and the Senator from North Carolina is wrong, and I thank the Senator for yielding to me.

The PRESIDING OFFICER. Who yields time?

Mr. GLENN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On equal time?

Mr. GLENN. I ask unanimous consent that it be on equal time.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I made reference earlier to a letter which had been written to the President of the United States dated August 5, 1977, which was signed by myself, Senator DOMENICI, and Senator HANSEN. And I think it might be well for the record to show at this point what was stated in that letter.

I say that only because I think it would illustrate the sense of frustration that some of us have in trying to deal with a fundamental policy consideration as important as this, with almost no access to discussion within the administration.

For that reason, I shall read that letter at this point.

COMMITTEE ON ENERGY
AND NATURAL RESOURCES,
Washington, D.C., August 5, 1977.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: Dr. James Schlesinger, in testimony during his confirmation hearing before the Committee on Energy and Natural Resources on August 3rd, stated that the Administration shortly would announce a new policy for United States Government storage of spent nuclear fuel from domestic and foreign nuclear power reactors. We are concerned greatly about the many budget, diplomatic, environmental, legal, political and technical ramifications of such a policy by the United States. We also are greatly troubled by the significant potential for further negative impact on our domestic nuclear power option resulting from this policy. We already have a national undercurrent of opposition to nuclear waste disposal and storage today at the local, state and Federal levels. This new policy would seriously exacerbate that problem and further erode the public support for the nuclear power option.

The Senate already has considered some of these nuclear waste issues in the actions on the McGovern amendment (defeating a state veto on waste disposal sites), the McClure-Church amendment (passing a requirement for Congressional approval of any U.S. bilateral or multilateral assistance agreement for spent fuel disposition), and the McClure amendment (passing a prohibition on any United States repurchase, transportation or storage of foreign spent nuclear fuel) to S. 1811, the Fiscal Year 1978 authorization bill for the Energy Research and Development Administration (ERDA). The House of Representatives has not considered yet the companion bill, H.R. 6796. The Senate's actions, however, does make it clear that these are potentially issues of major controversy.

We sincerely believe that the forthcoming policy statement, as briefly outlined by Dr. Schlesinger, should be closely coordinated with the Congress. We would note that we asked Mr. Fri, Acting Administrator of ERDA, on June 8th and June 10th in hearings before the Energy Committee, to advise

us of the Administration policy on domestic and international spent fuel disposition. We only were told that the policy was awaiting then-pending Presidential decisions. In fact, our apprehensions about the eventual new policy motivated the McClure-Church and McClure amendments to S. 1811. Dr. Schlesinger's confirmation testimony, under oath, was the first formal-word we have received since June 10th.

Mr. President, we urge you to make the Congress a full partner in your deliberations on the new policy before a final decision is made. Without prematurely passing judgment on any policy alternative for the disposition of domestic or foreign spent fuel, a full partnership is necessary to avoid any further embarrassment for the United States in nuclear power policy, resulting from a major Congressional-Executive disagreement In any event, S. 1811, and the companion H.R. 6796, should be the proper legislative vehicle for any Fiscal Year 1978 action under a new spent fuel disposition policy.

We, therefore, request a full and candid exchange between you and your advisors and this Committee before the final decision is made. Such a meeting should occur soon after the August Congressional recess to support further action on S. 1811 and H.R. 6796. Our staffs could initiate preliminary discussions during the recess. We would appreciate very much such an exchange, Mr. President, to ensure ultimately that Congress is a full partner in the spent fuel disposition decision.

We are anxious to work with you on this policy, Mr. President, and we look forward to your response.

Sincerely,

JAMES A. MCCLURE.
PETE V. DOMENICI.
CLIFFORD P. HANSEN.

Mr. McCLURE. Mr. President, that letter was dated August 5, 1977. Today, in February of 1978, we have not yet received anything other than a perfunctory acknowledgement of that letter. In spite of the fact we suggested action might occur soon after the congressional recess in August. The administration, instead of consulting with us on policy, instead of advising us of their policy role, went right ahead negotiating new agreements with India, and without announcing them to us signed such agreements in secrecy, rather than responding to this letter, either on the record or off.

Mr. President, that is the reason why some of us feel it is essential that Congress be involved in advance, not in retrospect, on the policy decisions that may be made with respect to the return of spent fuel from overseas.

Mr. BAKER. Mr. President, I rise in support of the amendment offered by the distinguished Senator from Idaho (Mr. MCCLURE) which would require prior affirmative congressional authorization or a one-House veto of any administration plan to bring spent nuclear fuel from foreign nuclear power reactors to the United States for storage, interim or permanent. Some of my colleagues may remember that on last Thursday, when I addressed this Chamber on this bill, I indicated there was still a considerable degree of uncertainty both within this administration and in the international community, as well as in the Congress, over the entire series of matters associated with the international transporting of nuclear fuel, both enriched and spent.

In light of the serious uncertainty that still exists and is likely to continue for some time, I believe the amendment that is now before us not only protects American interests, but retains the right of Congress to exercise its will at a later date on the question of the storage of spent fuel. It is also my understanding that this amendment will require prior notification of the Congress for any commitment of U.S. funds for overseas storage or other disposition of foreign spent nuclear fuel.

As I also suggested on Thursday, it seems to me that certain inconsistencies in the current administration's proliferation policy may yet come to haunt us. On one hand, the President has signaled his intention to ship fuel to the Indian reactor at Tarapur, while supporting provisions in S. 897 that will make future shipments extraordinarily difficult, if not impossible. Throughout American policy in regard to nuclear exports, there are so many inconsistencies that I cannot help but think it wise for the Congress to retain a high level of control in this regard.

The recent Department of Energy October 18, 1977, statement announcing its intentions to make commitments to bring foreign spent nuclear fuel to the United States raises more budgetary, environmental, legal, technical, and nonproliferation issues than it solves. Certainly, these matters are a legitimate concern of the Senate, both now and in the future. I am told, for instance, that the foreign spent fuel problems alone could involve costs of $1 billion or more in the near term.

I will remind my colleagues that an amendment similar to the one currently offered by the Senator from Idaho, but limited to fiscal year 1978 funding, has already been passed by both Houses. Unfortunately, the President vetoed that bill because of the inclusion of the Clinch River breeder reactor project.

I would add, furthermore, that I am continuously perplexed, even at this late date, over the current administration's inability even to decide what its nuclear policy is. I believe I am correct in stating that, as late as last Thursday, when Senators MCCLURE, CHURCH, GLENN, DOMENICI, and I were discussing this bill on the floor, the administration was changing its mind once again on a series of amendments for which they had previously indicated support. Therefore, because of environmental and cost problems, as well as the overriding need for the Congress to retain control on these matters, I urge my colleagues to support this particular amendment.

Mr. McCLURE. Mr. President, I yield to the Senator from New Mexico (Mr. DOMENICI).

Mr. DOMENICI. Mr. President, I rise in support of the McClure amendment and to discuss with the Senate a few observations about this problem.

First of all, Mr. President, I believe the Senate and the people of this country ought to know that here we are today talking about a bill that could cause the United States, through the unilateral actions of the President, to bring more nuclear waste into this country for disposition when, as of this day and this particular hour this, country itself has no—and I repeat no—plan for the disposition of waste in this country at all—no plan whatsoever.

As a matter of fact, the truth is we have not even demonstrated a way to store spent fuel in this country. As a matter of fact, we do not know whether the first one we want to try should be a demonstration, should be retrievable, should be permanent, should involve commercial, should involve defense. We have not even been able to come up with a plan that anyone agrees to in the sovereign states of America to dispose of less than the commercial waste we are talking about.

As a matter of fact, I came down to speak in behalf of the McClure amendment because in the State of New Mexico, as of right now, probably the most significant issue among the people of that State is the status of a demonstration or pilot project which started out with low-level transuranic just to demonstrate we knew how to store it, and it is now out of all proportions in our State.

Nobody knows what the Federal Government intends, nobody knows their plans, and as of last week we met with the Secretary of Energy and his two or three top officials, the entire delegation from New Mexico, and concluded if substantial changes were not made there was no chance to even get this project considered by this State.

Pending in the legislature of the State is a constitutional amendment prohibiting the bringing into our State of any wastes that were not generated there. I suspect that might have a rather significant chance of passing. I am not suggesting what the validity of it would be, but I merely raise the issue that we presently have not even demonstrated in our own country how we are going to dispose of this kind of waste, not even demonstrated that we know how.

As a matter of fact, I can tell the Senator from Idaho that as of right now as a result of those meetings with the Secretary of Energy and others that they have agreed publicly that they will give the State of New Mexico veto authority over even a demonstration project.

They have agreed that a State like mine, with this kind of project contemplated, is going to be given the authority to say yes or no.

Now what we have with what we have pending in this bill, as I understand it, just makes this problem potentially even more critical, and the solution to the problem even more critical. I submit that the McClure amendment, which has already passed the Senate previously, which merely involves the Congress of the United States in a meaningful way before this country unilaterally at the executive level signs agreements, spends money to bring the wastes from other countries into this country, is a very logical and needed step. As a matter of fact, it appears to me that in short order before the Energy and Natural Resources Committee here in the Senate, and others, that the administration is going to have to come up with the beginnings, just the beginnings, of a plan for the

United States to demonstrate alternate ways of storing spent fuel; that is where we, as a nation, are about to approve a bill that would permit the President to spend money in other countries under a plan to bring their wastes here, with the Congress not even being involved.

So it appears to me that from the pure logic, and with full consideration, that we need to assume some of the responsibility in some of our States of this Nation to show that we can do this.

This is not being done yet; so that a proposal like the one suggested here adds a dimension of probability to our ever solving the problem here at home; whereas going the other way makes the chance of our ever demonstrating that we can in fact do it, of getting any State in the Union to ever consider it—it being as fragile as it is, and making it even more fragile—will make it less of an opportunity on the part of those trying to run this program in the Federal Government of ever getting anyone in this country to agree to even the beginnings or the demonstration of any kind of option, be it in the ground or otherwise.

I repeat, that as of today, the United States of America does not have a program, nor has it undertaken a demonstration to show that we know how to store this waste product.

I do not see how the McClure amendment could do anything but make it more feasible that we might in due course be able to come up with one.

I commend him for it, and I commend to the Senate a "yea" vote on it. It passed before, and it ought to pass now, certainly as part of an overall game plan involving a very genuine, good goal which this bill has of minimizing the international aspects of proliferation about which we are also concerned.

I thank the Senator from Idaho for yielding me time.

Mr. McCLURE. Mr. President, I thank the Senator from New Mexico for the remarks that he has made. I think his remarks are exactly accurate with respect to what may happen in reactions across this country State by State and locality by locality if, as a matter of fact, we do not have Congress involved in the formulation of a spent-fuel policy applicable domestically, as well as internationally.

I think the course the administration has embarked upon as far as unilateral determination is concerned is fraught with a great deal more danger than if Congress were involved in that responsibility.

Mr. GLENN. Mr. President, without attempting to repeat in detail the administration position announced on October 18, 1977, with regard to a spent-fuel policy—that has been covered previously and I think the record will speak for itself on that—the administration is moving in this area, and we are in the process at the moment, here on this floor, of trying to work out some agreement on the McClure amendment.

I do not believe all the answers are here yet that Senator McCLURE wished to get before we proceed with that matter; therefore, I ask unanimous consent that we set aside the consideration of this amendment and proceed to two other amendments that Senator PERCY has, with the specific agreement that we immediately, upon conclusion of action on those two amendments, come back to the McClure amendment on the same basis on which we have been proceeding. Is that agreeable?

Mr. McCLURE. Mr. President, I have no objection to that arrangement if the time remaining to the Senator from Idaho is not reduced as a result of that action. I think my time is just about used up, and I do not want to use a part of it in this manner.

The PRESIDING OFFICER (Mr. BUMPERS). Is there a unanimous-consent request?

Mr. GLENN. That is a unanimous-consent request that we proceed with the understanding that time used on the amendments to be offered by the Senator from Illinois, would not cut into the time of the Senator from Idaho.

Mr. McCLURE. The only request I have is that the time remaining to the Senator from Idaho under the unanimous-consent request not be reduced because of setting this matter aside.

Mr. GLENN. That would be agreeable, because I think just a few minutes would be required for this matter, anyway.

The PRESIDING OFFICER. Are the Senators attempting to change the time for the vote on the McClure amendment?

Mr. McCLURE. No.

The PRESIDING OFFICER. The vote is to occur at 4:30 under the unanimous-consent agreement, and therefore any other business would come out of that time.

The Senator from Ohio has 62 minutes remaining, and the Senator from Idaho has 7 minutes.

Mr. GLENN. Mr. President, I will agree to the time agreement as stated by the Senator from Idaho. I think these amendments will require just a few moments, and any time we use can come out of my time.

The PRESIDING OFFICER. Will the Senator be kind enough to restate his agreement, or his understanding, the Senator from Idaho?

Mr. McCLURE. Mr. President, as I understand the agreement, it is that the pending amendment be temporarily set aside for the consideration of two amendments to be offered by the Senator from Illinois (Mr. PERCY), and that upon the disposition of those amendments, we would return to the consideration of the pending amendment under the previous unanimous-consent agreement, conditioned that the time consumed by this request and the consideration of these amendments be charged against the time of the Senator from Ohio (Mr. GLENN).

Mr. GLENN. I accept that.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

UP AMENDMENT NO. 1207

Mr. PERCY. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an unprinted amendment numbered 1207: On page—

Mr. PERCY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 101, line 11, delete "1977" and insert in lieu thereof "1978".

On page 102, line 12, delete the period and insert in lieu thereof a semicolon.

On page 102, line 15, insert "and" after the semicolon.

On page 102, line 18, delete the comma after "tion" and insert a comma after "and".

On page 102, line 22, delete "; and" and insert in lieu thereof a period.

On page 103, line 23, delete the comma after "ment".

On page 104, line 15, delete " 'physical security measures' " and insert in lieu thereof " "physical security measures" ".

On page 104, line 21, delete the comma after "thereof)".

On page 104, line 24, delete the comma after "facility".

On page 106, line 2, delete "NRC" and insert in lieu thereof "Commission".

On page 107, line 1, insert a comma after "material".

On page 107, line 2, delete "etablishment" and insert in lieu thereof "establishment".

On page 108, line 1, delete "violations" and insert in lieu thereof "violation".

On page 110, line 3, delete "GUARD" and insert in lieu thereof "GUARDS".

On page 110, line 11, delete "strength," and insert in lieu thereof "strengthen".

On page 111, line 13, delete "that" and insert in lieu thereof "of adherence to".

On page 111, line 14, delete "all being adhered to".

On page 112, line 18, delete "204" and insert in lieu thereof "203".

On page 113, line 5, insert a comma after "facilities".

On page 114, line 7, delete "(other" and insert in lieu thereof "other".

On page 114, line 8, delete "Commission)," and insert in lieu thereof "Commission".

On page 115, line 17, delete "(a)" and insert in lieu thereof " "a."

On page 115, line 20, delete "the 1954" and insert in lieu thereof "this".

On page 115, line 23, insert "the" before "Commission".

On page 116, line 14, delete "(2)" and insert in lieu thereof " "(2)".

On page 116, line 24, after "arrangements" " delete "means arrangement" and insert in lieu thereof "means arrangements".

On page 117, line 1, delete "(A)" and insert in lieu thereof " "(A)".

On page 117, line 3, delete "(B)" and insert in lieu thereof " "(B)".

On page 117, line 8, delete "(C)" and insert in lieu thereof " "(C)".

On page 117, line 9, delete "the 1954" and insert in lieu thereof "this", and delete "111 (b), Section 126, or Section 109 (b)" and insert in lieu thereof "111 b., Section 126, or Section 109 b.".

On page 117, line 10, delete "(D)" and insert in lieu thereof " "(D)".

On page 117, line 11, delete "(E)" and insert in lieu thereof " "(E)".

On page 117, line 13, delete "(F)" and insert in lieu thereof " "(F)".

On page 117, line 16, delete "(G)" and insert in lieu thereof " "(G)".

On page 117, line 19, delete "(3)" and insert in lieu thereof " "(3)".

On page 117, line 21, delete "to" and insert in lieu thereof "for".

On page 118, line 7, delete "the 1954" and insert in lieu thereof "this".

On page 118, after line 7, delete "(4)" and insert in lieu thereof "'(4)", and delete "(a)" after "pursuant to subsection" and insert in lieu thereof "a".

On page 118, line 8, delete "(b)" and insert in lieu thereof "'b.".

On page 118, line 12, delete "(1)" and insert in lieu thereof "'(1)".

On page 118, line 24, delete "(2)" and insert in lieu thereof "'(2)".

On page 119, line 4, delete "this Act" and insert in lieu thereof "the Nuclear Non-Proliferation Act of 1978".

On page 119, line 16, insert "-weapon" after "non-nuclear".

On page 119, line 19, delete "(3)" and insert in lieu thereof "'(3)".

On page 119, line 24, delete "this Act" and insert in lieu thereof "the Nuclear Non-Proliferation Act of 1978".

On page 120, line 6, delete "(2)", and insert in lieu thereof "(2).'".

On page 120, line 11, insert "Nuclear Regulatory" before "Commission", and insert "('the Commission')" after "Commission".

On page 121, line 15, delete "1977" and insert in lieu thereof "1978".

On page 121, line 25, insert a comma after "export".

On page 122, line 21, delete "1977" and insert in lieu thereof "1978".

On page 123, line 6, insert "not" after "has".

On page 123, line 23, delete "circumstance" after "reasonably similar" and insert in lieu thereof "circumstances", and delete "circumstances" after "there is no material changed" and insert in lieu thereof "circumstance".

On page 124, line 5, delete "(2)" and insert in lieu thereof "'(2)".

On page 124, line 18, delete "the" the second time it appears.

On page 126, line 7, insert "any" before "such".

On page 126, line 12, insert "or" before "separate".

On page 128, line 13, delete "subsection" and insert in lieu thereof "section".

On page 129, line 20, delete "foreign" and insert in lieu thereof "foregoing".

On page 130, line 19, insert "to any non-nuclear-weapon state which has failed to meet such criterion" after "made".

On page 130, lines 21 and 22, delete "to each non-nuclear-weapon state which has failed to meet such criterion".

On page 130, line 22, insert "to such state" before "is submitted".

On page 131, line 4, delete "(g)" and insert in lieu thereof "g.".

On page 133, line 3, delete "(a)".

On page 133, line 7, insert a comma after "section".

On page 134, line 7, delete "represents" and insert in lieu thereof "represent".

On page 135, line 5, delete "the 1954" and insert in lieu thereof "this".

On page 137, line 19, delete "phrase, 'does not,'" and insert in lieu thereof "phrase 'does not'".

On page 138, line 4, delete "purpose" and insert in lieu thereof "purposes".

On page 139, line 21, delete "inimical".

On page 141, line 6, delete "subsection (a)" and insert in lieu thereof "section 109 of the 1954 Act".

On page 141, line 12, delete "the" the second time it appears.

On page 141, line 21, delete "Nuclear Regulatory".

On page 147, line 7, insert "of the Arms Control' and Disarmament Agency ("the Director") after "Director".

On page 155, beginning on line 3, delete "and be subject to the procedures of section 128 of the 1954 Act" and insert in lieu thereof a period.

Mr. PERCY. Mr. President, this amendment is simply technical and conforming in nature, for correction of spelling errors and other technical changes. It has been cleared with Senator McCLURE and the majority floor manager of the bill, Mr. GLENN.

I yield back the remainder of my time.

Mr. GLENN. Mr. President, I am willing to accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois.

The amendment was agreed to.

Mr. PERCY. I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1208

Mr. PERCY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) offers an unprinted amendment numbered 1208.

Mr. PERCY. I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 133, line 25, delete "; or" and insert in lieu thereof ", or, with respect to material or equipment not supplied under an agreement for cooperation, materially violated the terms under which such material or equipment was supplied or the terms of any commitments obtained with respect thereto pursuant to Section 402(a) of the Nuclear-Non-Proliferation Act of 1978, or".

On page 145, line 14, after "reprocessed," add the word "enriched".

On page 150, delete section 402(a) and insert in lieu thereof the following:

"(a) Except as specifically provided in any agreement for cooperation, no source or special nuclear material hereafter exported from the United States may be enriched after export without the prior approval of the United States for such enrichment: *Provided,* That the procedures governing such approvals shall be identical to those set forth for the approval of proposed subsequent arrangements under section 303(a) of this Act, and any commitments from the recipient which the Secretary of Energy and the Secretary of State deem necessary to ensure that such approval will be obtained prior to such enrichment shall be obtained prior to the submission of the executive branch judgment regarding the export in question and shall be set forth in such submission; and *Provided further,* That no source or special nuclear material shall be exported for the purpose of enrichment or reactor fueling to any nation or group of nations which has, after the date of enactment of this Act, entered into a new or amended agreement for cooperation with the United States, except pursuant to such agreement."

Mr. PERCY. Mr. President, this amendment is designed to close a loophole in the export procedures of this bill which has recently come to my attention. Without this amendment, it will be possible to export nuclear materials without an agreement for cooperation indefinitely into the future. It would be a mistake to close out this avenue precipitously, as it would unduly interfere with existing contracts and planned future activities. Instead, this amendment insures that necessary controls will be placed on the use of any material exported under this procedure starting immediately and that once we have renegotiated an agreement with another country, no material exported by the United States could be enriched or used as reactor fuel except under the agreement. The amendment also calls for new and amended agreements to allow prior U.S. approval of the enrichment of U.S. material. Finally, the amendment clarifies the sanctions section to cover any arrangements setting the terms for enrichment until such activities are brought under an agreement.

This amendment has been cleared with the administration, and they have indicated that they have no objection, and in fact support the amendment.

The amendment has also been discussed with the distinguished Senator from Idaho (Mr. McCLURE). As I understand, he has no objection to it, nor does the floor manager of the bill, Mr. GLENN.

Mr. McCLURE. Mr. President, will the Senator yield briefly at that point?

Mr. PERCY. Yes.

Mr. McCLURE. The Senator from Wyoming (Mr. HANSEN) has expressed great interest in this amendment. He is concerned about the same embargo that would exist in the absence of the amendment.

Because of the extreme technical nature of the bill, it is difficult, sometimes, to determine whether we have anticipated all that we should have anticipated. I realize the Senator from Illinois wants these arrangements to be possible, as does the Senator from Wyoming. If, for any reason, the language of the amendment and the way it dovetails with the other provisions of the bill would indicate some additional language might be necessary, I assume that might possibly be worked out in conference with the other body. Does the Senator from Illinois agree with that general statement and general objective?

Mr. PERCY. Mr. President, it would be my hope that the amendment would stand on its own. I think there is adequate time between now and the time for passage, and I would just prefer to assume, if the Senator from Illinois is not advised to the contrary between now and passage, that this amendment is satisfactory.

Certainly every opportunity is given to fellow Senators who may have objection to make their objections known, but I would hope that if there is such it could be brought to my immediate attention, so that there would be no dispute hereafter.

Mr. McCLURE. Mr. President, I know of no objection. I just know of Senator HANSEN's interest. I know he would be

here on the floor now if he were not committed to the attempt to resolve some of the difficulties with the energy conference.

Mr. PERCY. The Senator from Illinois would feel better if it were possible to send a message to Senator HANSEN that we have this amendment before us, and we are accepting it, taking into account that he has an interest.

Mr. McCLURE. My only concern is that if there is any difficulty with the language, the Senator from Illinois, I am sure, would be as anxious to be sure it is workable as the Senator from Wyoming.

Mr. PERCY. I believe it is workable. I thank the Senator for the interest he has evidenced today.

Mr. President, I yield back the remainder of my time.

Mr. GLENN. I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois.

The amendment was agreed to.

Mr. PERCY. I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Who yields time?

Mr. GLENN. I suggest the absence of a quorum, Mr. President, with time to be divided equally.

The PRESIDING OFFICER. Is there objection?

Mr. GLENN. Put it on my time.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GLENN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. GLENN. In the current parliamentary situation, if I offer an amendment to the amendment which Senator MCCLURE has pending at the present time, when would my amendment be voted on?

The PRESIDING OFFICER. The amendment is not in order under the present agreement until the time has expired, and once it is offered it is not debatable and will have to be voted on immediately.

Mr. GLENN. Mr. President, a further parliamentary inquiry: I presume that there would be no objection or no parliamentary reason why I could not discuss this amendment in advance on my current time with the idea that I would submit it at the appropriate time for consideration by the Senate?

The PRESIDING OFFICER. The Senator has that right.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. GLENN. Certainly.

Mr. McCLURE. I think the Senator is correct if he does it in that manner and I have no objection to it. I was going to agree to a unanimous-consent agreement to change it if necessary, but I think this may accommodate the Senator.

Mr. GLENN. That will be fine and we can stay with the current parliamentary situation. I thank the Senator from Idaho.

UNANIMOUS-CONSENT AGREEMENT ON DOMENICI AMENDMENT

Mr. DOMENICI. Mr. President, might I inquire of the Senator from Ohio if we might attempt a unanimous-consent request with reference to an amendment I will offer merely with reference to the time we would use and the time at which the vote would occur?

I ask unanimous consent that immediately following the disposition of the McClure amendment or any amendment to it that the Domenici amendment be the pending business; that we be allowed 5 minutes equally divided, with a vote to occur immediately thereafter. The vote may be a vote to table or a vote up or down on the amendment.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. GLENN. Mr. President, it is my intention and the intention of the Senator from Illinois to offer an amendment to the McClure amendment at the appropriate time which does but one thing: It makes the veto not a single-House veto but a two-House veto and thus brings it into harmony with the rest of this bill. The other provisions we have in this bill require a two-House veto, and I see no reason why we should separate out the spent fuel provision.

Mr. McCLURE. Mr. President, will the Senator from Ohio yield—and I apologize for interrupting his presentation—but in the time that remains between now and 4:30, at which time the voting will commence, I ask unanimous consent that the time be equally divided between the Senator from Ohio and the Senator from Idaho.

Mr. GLENN. Well, reserving the right to object, I would like to dispose of my comments on this amendment, and then whatever time is remaining, at that time——

Mr. McCLURE. I think it works in the Senator's favor at this point. I am giving the Senator some of my time.

Mr. GLENN. What is the remaining time?

The PRESIDING OFFICER. The time at present is equally divided 7 minutes on each side.

Mr. McCLURE. Very good.

Mr. GLENN. Very good, that takes care of the problem.

Mr. President, this amendment to the amendment of the Senator from Idaho will provide for a two-House veto as opposed to a single-House veto as proposed by his amendment.

We provide for a two-House veto in other sections of this bill, and this will bring this into harmony with the rest of the bill.

I think we have seen that the two bodies of Congress quite often do go quite separate ways on some of these issues, and I believe it would make us a more assured supplier if my amendment were adopted and I believe it would make the original proposal somewhat more acceptable to the administration.

In informal conversations with members of the administration I believe they would accept this where they are very definitely opposed to the single-House veto as proposed by the Senator from Idaho.

So I would hope that the Senator from Idaho would accept the amendment, and if he saw fit to accept the amendment, I think it would change the complexion of his amendment sufficiently that we would be inclined to, in turn, accept that amendment, where we would otherwise be forced to oppose it.

I would appreciate hearing the views of the Senator from Idaho at this point.

Mr. McCLURE. Mr. President, I rise to oppose the amendment of the Senator from Ohio. We had discussed the possibility of compromising on this formula. If the administration had done what the administration told us they were going to do, by submitting a policy to us for our authorization and approval, it would require the concurrence of both Houses of Congress. To then say they can avoid asking Congress for approval, and instead subject it to a veto, but require both Houses to veto, is to increase the burden of the opponents of that policy, because in order to get approval, it must pass both Houses of Congress.

If either House of Congress were to disagree, the authorization would fail. For it to be suggested, then, that there is some kind of a neat symmetry in requiring a two-House veto seems to me to make the wrong comparison, because the two-House concurrence and the one-House veto are a logical pair; they represent the same actions by Congress. To say a two-House concurence is all right, but it also requires a two-House veto, elevates the initiative of the administration to a plane which it would not otherwise have. It presumes the concurrence of one of the Houses already, without identifying which one.

For that reason, Mr. President, I would have to oppose the amendment of the Senator from Ohio, and again ask the Senate's support for the amendment of the Senator from Idaho, which was adopted by the Senate and by the conference on S. 1811 last year.

The difference from the rest of the bill is that there already will have been an affirmative two-House congressional action by passage of this bill. That is positive two-House concurrence. All I am asking is that whatever action is taken under this proposal be either submitted to Congress for specific approval, or allow either body of Congress to specifically and pointedly reserve their approval, and thereby veto that action.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. GLENN. Mr. President, the considerations regarding this bill have been many and have been long. We have had a lot of debate, and we have just about 6 minutes left before the voting will occur, with no further discussion to occur

between the vote on my amendment, which I shall propose as soon as all time has elapsed, and the vote on the McClure amendment, as amended by my amendment if that carries; and then we will vote on the Domenici proposal. So we will have three votes in a row. I shall move to table the second amendment at the appropriate time—that is, to table the Domenici amendments. Should this motion not carry, there is a possibility we might have another vote on that one also; hence we have a possibility of four votes remaining today.

There are a number of things we are not doing in this bill. We are not trying to bring down any heavy hand on the nuclear industry in this country. We are, quite on the contrary, I think, by this bill simplifying procedures, by, for example, setting appropriate time limits for all Federal agencies to act in considering export license requests. At the same time we are balancing American business interests with nonproliferation objectives abroad.

Those are the main objectives of the bill, and I think the bill goes a long way in clarifying those issues and opening the situation up for American business to move into what has been a nonexistent market for the last year and a half. It will help our nuclear industry, and at the same time provide a pattern which we hope other nations will follow as we attempt to curb a growing specter of potential nuclear holocaust around the world.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. The time of the Senator from Ohio has expired. The Senator from Idaho has 3 minutes.

Mr. McCLURE. Mr. President, I yield 1½ minutes to the Senator from New Mexico (Mr. DOMENICI).

Mr. DOMENICI. Mr. President, I send to the desk an unprinted amendment.

The PRESIDING OFFICER. The amendment is not in order at this time.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the amendment be in order, subject to the previous agreement with respect to voting thereon.

Mr. McCLURE. Mr. President, if the Senator from New Mexico wishes, he may offer it on my time.

Mr. GLENN. Mr. President, reserving the right to object, this does not change in any way our previous arrangement?

Mr. DOMENICI. Not at all. I just want to be able to refer to the amendment; that is why I submit it at this point.

Mr. GLENN. Before we go to that, Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. GLENN. Can I call for the yeas and nays in advance on the amendment I will submit as soon as time has expired?

The PRESIDING OFFICER. By unanimous consent.

Mr. GLENN. I ask unanimous consent that it be in order to ask for the yeas and nays on the amendment I shall offer.

The PRESIDING OFFICER. Without objection, it is ordered.

Mr. GLENN. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOMENICI. Is it the Senator's intention to move to table the Domenici amendment?

Mr. GLENN. Yes, that is my intention.

Mr. DOMENICI. Then, Mr. President, I ask unanimous consent at this time that it be in order to ask for the yeas and nays on the motion of the Senator from Ohio to lay on the table the Domenici amendment, when that is in order.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DOMENICI. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. McCLURE. Mr. President, in the remaining time, let me just, in conclusion of this debate, indicate that if the President seriously has a nuclear spent fuel policy which he wishes Congress to adopt, and he could send that to us for authorization. Both Houses of Congress, through their regular proceedings, then would have the opportunity to make amendments, to make modifications, to establish whatever conditions they might wish, and to work their will on it, as well as accepting or rejecting such a proposal.

In sending a proposal to us which is subject to veto, Congress does not have the same right to make modifications. We can only accept or reject it. For that reason, as well as the reason that it requires both Houses, by affirmative action, to approve, and it should not require both Houses, by affirmative action, to reject. The burden of proof, or the level of approval, is different in those cases.

This is an issue that has often been debated. Whereas in the Senate it has been affirmed on most occasions by Senate approval of the one-House veto principle, I hope the Senate will see fit to reject the amendment of the Senator from Ohio and approve the amendment of the Senator from Idaho.

Mr. President, in view of the fact that it will not be in order for the Senator from Ohio to offer a motion to table the amendment of the Senator from Idaho, the Senator from Idaho will not make a motion to table the amendment of the Senator from Ohio. I hope that the Senate, in working its will, will vote directly on both issues.

The PRESIDING OFFICER. All time has expired.

UP AMENDMENT 1209 (TO UP AMENDMENT 1206)

Mr. GLENN. Mr. President, I send to the desk an unprinted amendment and, due to the previous arrangement, ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN) proposes unprinted amendment numbered 1209 to unprinted amendment Number 1206.

Strike subparagraph (c)(1)(A) of the amendment and substitute in lieu thereof:

(A)(i) Such commitment of the United States has been submitted to the Congress for a period of sixty days of continuous session (as defined in subsection 130g of this Act) and has been referred to the Committee on International Relations of the House of Representatives and the Committee on Foreign Relations of the Senate, but any such commitment shall not become effective during end of the 60-day period the Congress adopts a concurrent resolution stating in substance that it does not favor the commitment, any such commitment to be considered pursuant to the Procedures set forth in section 130 of this Act for the consideration of Presidential submission; or (ii) If the President has submitted a detailed generic plan for such disposition or storage in the United States to the Congress for a period of sixty days of continuous session (as defined in subsection 130g of this Act), which plan has been referred to the Committee on International Relations of the House of Representatives and the Committee on Foreign Relations of the Senate and has not been disapproved during such sixty-day period by the adoption of a concurrent resolution stating in substance that Congress does not favor the plan; and the commitment is subject to the terms of an effective plan. Any such plan shall be considered pursuant to the procedures set forth in section 130 of this Act for the consideration of Presidential submissions.

Mr. DOLE. Mr. President, I would like to comment on the amendment offered by my colleague, the Senator from Idaho. This amendment would require congressional authorization for any plan to store foreign spent fuel in the United States.

Mr. President, I think this amendment will be a most important addition to the Nonproliferation Act. At the present time in this country, we have yet to adopt a comprehensive policy regarding our nuclear future. The decision to slow down our development of the breeder reactor is controversial. The decision to defer reprocessing is controversial. And the decision to influence the rest of the world to do likewise is also controversial.

Moreover, all these fragments of a nuclear policy are very much interrelated. And in the midst of these uncertainties, I question whether now is the time to allow the administration to offer land in the United States as a storage site for fuel from foreign reactors.

RISK AND COSTS ARE UNCERTAIN

It is a fact that some people in this country still perceive enormous risks from the storage of our own domestic fuel. Until this issue is settled, we should at the very least reserve the right to pass judgement on plans to bring foreign fuel into the country for storage.

Aside from the perceived risks associated with spent fuel, the decision to bring it into the country could prove to be enormously expensive.

It is estimated that accepting foreign fuel will add more than $1 billion to the expected cost of storage. I question whether we are yet ready to accept this burden, merely to unburden foreign nations.

ISSUES ARE INTERRELATED

Remember, our own policies will be the cause of the large stocks of spent fuel that will be created in other countries. These stocks will result if other countries follow our lead and forgo reprocessing as we seem determined to do. Should we influence other countries to forgo reprocessing? If we do, should we

then offer to relieve them of the burden that comes from following our lead? Again let me say that our entire policy in this area is uncertain and very controversial.

In light of these uncertainties I feel it is much too early to simply allow the President to offer countries a convenient place to store their spent fuel.

I think the McClure amendment offers a reasonable approach to dealing with this problem. When the time arises, the Congress will have the opportunity to review the facts. If a particular proposal seems consistent with our developing policies, there should be no reason for the Congress to refuse to approve it. But before the specifics are known, it is much too early to give the administration blanket authority to bring spent fuel into the United States for either temporary or permanent storage.

I compliment my colleague from Idaho for introducing this amendment. I think it is a most reasonable approach to the problems at this time and I would urge all my colleagues to give it their full support.

The PRESIDING OFFICER. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Iowa (Mr. CULVER) and the Senator from Alaska (Mr. GRAVEL) are necessarily absent.

I further announce that the Senator from South Dakota (Mr. ABOUREZK) is absent on official business.

I also announce that the Senator from South Dakota (Mr. MCGOVERN) is absent because of illness.

I further announce that, if present and voting, the Senator from Iowa (Mr. CULVER) would vote "yea".

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Utah (Mr. GARN), the Senator from Indiana (Mr. LUGAR), the Senator from Oregon (Mr. PACKWOOD), and the Senator from Delaware (Mr. ROTH) are necessarily absent.

I further announce that, if present and voting, the Senator from Tennessee (Mr. BAKER) would vote "nay".

The result was announced—yeas 47, nays 44, as follows:

[Rollcall Vote No. 27 Leg.]

YEAS—47

Anderson	Hart	Moynihan
Bayh	Haskell	Muskie
Bentsen	Hatfield, Paul G.	Nelson

So Mr. GLENN's amendment (UP amendment 1209) to Mr. MCCLURE's amendment (UP amendment 1206) was agreed to.

Mr. GLENN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PERCY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question now recurs on the amendment of the Senator from Idaho, as amended by the amendment of the Senator from Ohio.

Mr. MCCLURE. Mr. President, a parliamentary inquiry. The yeas and nays have been ordered on this amendment.

The PRESIDING OFFICER. The Chair informs the Senator that the yeas and nays apparently have not been ordered on the amendment.

Mr. MCCLURE. Mr. President, they were ordered by the unanimous-consent agreement under which this matter is pending.

I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

UP AMENDMENT NO. 1206 (AS AMENDED BY UP AMENDMENT NO. 1209)

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Idaho, as amended. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Iowa (Mr. CULVER), and the Senator from Alaska (Mr. GRAVEL) are necessarily absent.

I further announce that the Senator from South Dakota (Mr. ABOUREZK) is absent on official business.

I also announce that the Senator from South Dakota (Mr. MCGOVERN) is absent because of illness.

I further announce that, if present and voting, the Senator from Iowa (Mr. CULVER) would vote "yea."

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Utah (Mr. GARN), the Senator from Indiana (Mr. LUGAR), the Senator from Oregon (Mr. PACKWOOD), and the Senator from Delaware (Mr. ROTH) are necessarily absent.

I further announce that, if present and voting, the Senator from Tennessee (Mr. BAKER) would vote "yea."

The result was announced—yeas 91, nays 0, as follows:

[Rollcall Vote No. 28 Leg.]

YEAS—91

Abourezk	Garn	McGovern
Baker	Gravel	Packwood
Culver	Lugar	Roth

So Mr. MCCLURE's amendment (No. 1206), as amended, was agreed to.

The PRESIDING OFFICER (Mr. LEAHY). Under the previous order the Senator from New Mexico is recognized to call up an amendment under which there will be 5 minutes of debate, 2½ minutes on each side.

The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I ask unanimous consent that Dick Getzinger of my staff be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, could we have order?

The PRESIDING OFFICER. The Senator raises a good point. There is a very short time limit on this debate. The Chair will demand order so that the Senator from New Mexico can be heard.

UP AMENDMENT NO. 1210

Mr. DOMENICI. Mr. President, I call up my amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI), for himself and Mr. HELMS, proposes an unprinted amendment numbered 1210.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 125, line 19, insert the following: a new subsection d.

"d. Notwithstanding any other provision of this Act, once an export license for a

specific peaceful production or utilization facility, or for fuel or components for a facility exported or licensed prior to the enactment of the Nuclear Nonproliferation Act, has been finally approved pursuant to this section, all subsequent export licenses for the same production or utilization facility and fuel for it and licenses for the aforementioned fuel or components shall be approved by the Commission without requiring any further judgments or findings as called for by this section, unless the Commission determines on the basis of information provided by the Secretary of State that there has been a material change in circumstances regarding the recipient nation or the facility which probably would materially affect the prior findings required by this section for the previously approved export license. In the case that the Commission makes such a finding, the export license application or exemption shall be subject to the full provisions of this section: *Provided*, That if the Commission has not made a determination of such a material changed circumstance regarding a specific recipient nation or a specific facility for a period of five years after a license has been approved using the full procedures of this section and thus has not been subject to the full licensing procedures of this section for the five years, the next license for that recipient nation or facility shall be fully considered using procedures of this section."

Mr. DOMENICI. Mr. President, may we have order?

The PRESIDING OFFICER. The Senator from New Mexico is perfectly correct.

May we please have order in the Chamber?

The Chair requests that all Members of the Senate and staff be in order.

The Senator from New Mexico.

Mr. DOMENICI. Mr. President, this will not take long. I have 2½ minutes and I probably will not even use all of them.

I wish to make it as simple as I can.

I have before me the flow chart that this bill will now require for an export license to be granted, and I am just going to hold it up so that Senators can see it.

The first page and a half is what we use today, and I think if Senators go through it, it is now 10 pages of charts.

I was talking with a Senator who suggested he did not know how he stood on my amendment but he had a nice observation. He said if this chart were not produced by this bill he thinks it would be impossible to invent such a flow chart.

Having said that, let me tell Senators that my amendment leaves the flow chart intact. When Senators vote for this bill tonight that is the flow chart that export licenses are going to follow before they are going to be granted by the Nuclear Regulatory Commission.

What I am trying to do is to say this: A trading partner of the United States does not have to go through this flow chart every time he makes an order from a supplier in the United States.

The way the bill is now each and every time an order is placed an export license will have to be obtained and this process will be followed.

The Senator from Ohio is going to say, "However, we amended the bill on the floor and said that in the discretion of the Nuclear Regulatory Commission they do not have to do this every time."

Well, what my amendment does is to very simply say, "Once you grant it you put as many conditions as you want in it, be as careful as you want," and then thereafter, unless the Nuclear Regulatory Commission finds substantial changes, "a material change of circumstances"—those are the words of art, unless they find that, then for each and every succeeding order they do not require this but rather grant the export license.

For those who might say, therefore, is it a lifetime export license, let me say the discretion is always there for the Nuclear Regulatory Commission in the event of those material changes to require it and, in addition, my amendment says that in all events they will make a full review at least every 5 years.

That is basically my amendment.

You will soon be asked to table my amendment, and I hope you do not do that, because I believe that future trading partners of America already know about this 11-page flow chart, and if they have an option to deal with somebody that has something a little more rational, it appears to me they will deal with them and not us.

Yet I am not going to do away with this. This will be the basic export license format. I just do not want anyone to require it on each and every license for supply for a nuclear reactor during its life, but rather if there are material changes in the circumstances, they do it. If not, they do not have to. They must in any event review each 5 years.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 30 seconds remaining.

Mr. DOMENICI. I reserve the remainder of my time.

Mr. GLENN. Mr. President, I rise in opposition to the amendment.

The flow chart which the Senator waved around, I might submit, is accurate if a case were to go all the way through the licensing process. But such uses will only be the few most serious ones that could come before the Nuclear Regulatory Commission. These would concern a country about whose nuclear policy we had the most serious doubt. Only in such a case would a license go through all the procedures the Senator points out. In the typical case, however, procedures under the bill will be simpler than under existing law. We have simplified procedures, added deadlines and the like.

If certain countries are unreliable from a proliferation standpoint, they might well go through these additional checks if the Department of State and NRC could not agree on a common policy. And I think they should be looked at. But these complex procedures, including Presidential override and Congressional review would only be used in the most extreme cases. The objective we are searching for here is to maximize U.S. nuclear trade by improving licensing while also advancing nonproliferation objectives.

I would note that we agreed last Thursday to accept one of the McClure amendments, which provided for the Nuclear Regulatory Commission to implement a "no changed circumstance rule" as a matter of discretion. We thought that took care of this problem, but now it has come up again today.

If we put in this lifetime arrangement proposed in the amendment into effect then the NRC is going to be forced to do a much more thorough license review in the first instance; which this, too, can hurt predictability and our ability to sell nuclear reactors around the world. I do not want to see that happen.

I am opposed to this amendment because it would unduly constrain NRC from performing the role we have given it as an independent check on the judgments of the executive branch. The amendment would, in essence, foreclose NRC from doing a full license review unless a preliminary standard had been satisfied—a change in the circumstances surrounding the license when compared to previous exports to the same country. While I would share the view that predictability and consistency are highly desirable in the licensing of exports, I want NRC to be free to question the executive branch at any time on any license if it has serious concerns, without regard to whether there have been major changes in the surrounding circumstances. This freedom is vitally important where exports to sensitive nations are concerned; there should be no impediments here to a full and careful review.

The "changed circumstances" test in this amendment would, in effect, apply to virtually all exports to a given country for a number of years, removing these exports from full licensing review. I think it is clear, however, that there are a number of sensitive countries where we would want to review each export most carefully and for this reason I believe the amendment—which would limit licensing reviews across the board—is not well conceived. Let me note one very important point here: License-by-license review by the NRC can be most helpful to nuclear commerce where these sensitive nations are concerned; if this continuing oversight were lacking, there might be much greater reluctance to entering into nuclear export trade with these nations.

I would also note that for countries which are not of unusual proliferation concern, the licensing process has been working smoothly—delays and uncertainties have been extremely rare for exports to countries like Sweden, Japan, Switzerland, and West Germany. For these countries a mandatory waiver of the procedures and standards set forth in S. 897 is simply not needed. I am, moreover, very reluctant at this late juncture to suddenly and significantly revise the procedures which we have so carefully worked out with the administration and which have already been adopted by the House, 411 to 0. Let me also add that last Thursday we voted an amendment to S. 897 specifically giving NRC the authority to issue licenses upon a finding of no changed circumstances and to issue licenses for groups of exports. I believe this approach strikes the right balance. It is flexible and allows NRC to tailor its procedures to the countries involved. In conferring such au-

thority it was obviously our intention to encourage NRC to move in the direction of more streamlined licensing procedures in appropriate cases; but they will be the judge of when to use these new procedures. I am confident they will do so, and would cite NRC's recently promulgated export licensing procedural regulations as evidence that NRC is indeed concerned about administrative efficiency. As I understand them, these regulations provide that licenses for routine reloads for a previously approved reactor can be issued by the NRC staff and need not come before the Commission, itself, for review.

The Commission has also imposed upon itself new target deadlines for acting on export licenses; these are in keeping with the deadlines adopted in the amendments we passed yesterday and last Thursday. These amendments, I would add, provide a number of additional deadlines for executive branch and NRC actions. To me these various amendments will significantly streamline the licensing process and increase predictability; I do not, therefore, believe the further changes proposed by my colleague are necessary or desirable, and I oppose them.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. GLENN. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. GLENN. We had 5 minutes to a side was my understanding.

Mr. DOMENICI. We had 2½ minutes on a side, but I have no objection to the Senator's taking time on the bill.

The PRESIDING OFFICER The journal clerk advises that it is 5 minutes.

Mr. PERCY. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. PERCY. How much time do we have on the bill?

The PRESIDING OFFICER. Thirty minutes on each side.

Mr. GLENN. Mr. President, I ask unanimous consent that the Senator from Illinois be granted 2 minutes.

Mr. DOMENICI. Reserving the right to object—Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOMENICI. Under the time limit as it presently exists can time be used from the bill without unanimous consent by either side?

The PRESIDING OFFICER. Time can be taken off the bill.

Mr. DOMENICI. Even if I were to object, based upon the 5-minute time limitation?

The PRESIDING OFFICER. That is correct. The time limitation under the basic agreement——

Mr. PERCY. I would suggest that certainly we would not object to the Senator's taking time off the bill. We have taken 30 amendments, and this is the first amendment involving licensing procedure that the managers of the bill have objected to, so I do not think it ought to be railroaded through without hearing the arguments.

Mr. DOMENICI. I do not object to that.

The PRESIDING OFFICER. The Chair is advised time can be taken off the bill under the basic agreement at the discretion of—the Senator from Illinois and the Senator from Ohio each had 30 minutes remaining under the basic agreement. There was a time limitation simply on this amendment. On that particular matter the Senator from New Mexico has 30 seconds remaining. Both the Senator from Illinois and the Senator from Ohio have 30 minutes each remaining on the bill itself and the amendments thereto.

Mr. DOMENICI. Mr. President, might I just say to the Senator from Illinois I merely wanted to live up to the commitment that we would expedite the matter. Senators understood that we would vote in 5 minutes. That was the only reason for my inquiry. I have no objection.

Mr. PERCY. Certainly the Senator from Illinois would want to see that there was an adequate chance to respond if I say anything that alarms the distinguished Senator from New Mexico.

I merely feel that this amendment goes really a little farther than we are able to go because it now starts to invade our ability to keep the nonproliferators in charge rather than the nuclear salesmen.

Look at the ludicrous position we would be in as a nation. Right in India today we are negotiating with India at the highest level—the President of the United States has just left India. We are all alarmed that we have a developing country that used technology and know-how from Canada and from the United States under the Atoms for Peace Program to develop a nuclear bomb. This has destabilized the whole condition in the subcontinent. Pakistan is now pressing France to fulfill its commitment to give them a full cycle which would give them by anyone's admission the capability of developing nuclear explosives.

So you have got India, you have got Pakistan; Afghanistan will want it next. Where is the subcontinent going to go? Where is Latin America going to go? Where is the Middle East going to go? That is the whole name of the game, to stop proliferation and this huge danger that we face.

Under the amendment of the Senator from New Mexico the NRC would be required to continue to supply enriched uranium to India. What we have, and what we have admitted from the start, is time. We are the principal suppliers. We have clout, and I think the world expects us to use that clout as a bargaining chip. We want to be able to keep it and, for that reason, the distinguished Senator from New Mexico's amendment would really undercut the policy of this Government to move toward nonproliferation.

Under this amendment, exports would simply have to go out if there were no changed circumstances.

We want changed circumstances in India. We want India to sign the Non-Proliferation Treaty, just as we want South Africa to sign the Non-Proliferation Treaty. Virtually every nation on Earth wants that, and we want to bring about that change through the leverage and the persuasive powers of the United States of America. We do not want to undercut the President in his bargaining power.

The amendment of the Senator from Idaho which we have already accepted has already gone just about as far as anyone who really feels nonproliferation is the essence of what we are trying to accomplish would go. Its language provides that the NRC may, if it makes a positive determination that there are no changed circumstances since a previous similar license, shorten the review of the license. This is within the discretion of the NRC, where it belongs. In addition, it does not create a statutory institutional bias against adequate review. Under the amendment which we have already accepted, the NRC will not be directed or encouraged to do a cursory review of exports. Instead, where they know that a country is adhering to effective nonproliferation controls, they can process the licenses every bit as quickly as they would under the Senator from New Mexico's amendment. However, the committee feels that in those cases where a problem either does or may exist, the assumption will be that a sufficient review will be performed.

We have accepted a large number of compromise amendments from Senator McCLURE. I am very concerned that this amendment would step over the line that we have drawn and jeopardize our nonproliferation objectives.

I simply feel that, with the safety and the safeguards we are attempting to preserve, at this stage we have to say "no" to the nuclear salesmen. We cannot say that a few more dollars in exports are as important to world security and U.S. national interests as to make certain that the United States retains its ability to use every bargaining chip that it has to try to bring into conformity the community of nations to adhere to a policy that most nations on Earth today recognize is wise. We can number on our fingers those nations that are still holdouts and have not conformed to what we consider to be minimum barriers to nuclear proliferation.

For that reason, I vigorously oppose the amendment of the Senator from New Mexico, and will support any motion to table that is made.

Mr. DOMENICI. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 25 seconds.

Mr. DOMENICI. I ask unanimous consent that my time be extended to 1 minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. First, Mr. President, let me repeat that my amendment in no way changes the new process for the granting of an export license. All of the things provided for on this chart must be accomplished before a license can be granted. If the Senator from Illinois is talking about all these countries that

might come to us wanting to buy, I want everyone to know that I am not changing the conditions that the United States, through the Nuclear Regulatory Commission, can impose on them. They must get a license as prescribed in this law.

All I am saying is that once they have granted that, and they can put all the conditions they want in under this series of protective events that must occur, I am just saying that once that has occurred, that country is entitled to buy the supplies it needs under that license, unless the Nuclear Regulatory Commission finds that there has been a material change in the facts.

From what I can tell, I would welcome——

The PRESIDING OFFICER. The Senator's time has expired.

Mr. DOMENICI. I ask unanimous consent for 1 additional minute.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DOMENICI. I would welcome the Nuclear Regulatory Commission taking whatever time is necessary before it granted that first license to a fragile country. I am not as worried about them as the countries that buy from us regularly, our good trading customers, when we are about to pass a law that will say, "We are passing this law and granting that first license, but for any subsequent sale, we can require that you do this all over again."

I am merely saying I would rather give them some security to remain our partners, and spend our time and resources on the fragile countries before we ever grant the first license.

I reserve the remainder of my time.

Mr. GLENN. Mr. President, I move to lay on the table the amendment of the Senator from New Mexico. The yeas and nays have previously been ordered, as I understand.

The PRESIDING OFFICER. The Senator is correct.

The question is on agreeing to the motion to lay on the table. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Iowa (Mr. CULVER), and the Senator from Alaska (Mr. GRAVEL) are necessarily absent.

I further announce that the Senator from South Dakota (Mr. ABOUREZK) is absent on official business.

I also announce that the Senator from South Dakota (Mr. McGOVERN) is absent because of illness.

I further announce that, if present and voting, the Senator from Iowa (Mr. CULVER) would vote "yea."

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Nebraska (Mr. CURTIS), the Senator from Oregon (Mr. PACKWOOD), and the Senator from Delaware (Mr. ROTH) are necessarily absent.

I further announce that, if present and voting, the Senator from Tennessee (Mr. BAKER) would vote "nay."

The result was announced—yeas 56, nays 36, as follows:

[Rollcall Vote No. 29 Leg.]

YEAS—56

NOT VOTING—8

Abourezk	Curtis	Packwood
Baker	Gravel	Roth
Culver	McGovern	

So the motion to lay on the table was agreed to.

H.R. 7843—APPOINTMENT OF ADDITIONAL DISTRICT AND CIRCUIT JUDGES

Mr. EASTLAND. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 7843.

The PRESIDING OFFICER. The Chair lays before the Senate a message from the House, which the clerk will state.

The second assistant legislative clerk read as follows:

H.R. 7843, an act to provide for the appointment of additional district and circuit judges, and for other purposes.

The PRESIDING OFFICER. Without objection, the bill will be considered as having been read twice and the Senate will proceed to its immediate consideration.

Mr. EASTLAND. Mr. President, I move that all after the enacting clause of H.R. 7843 be stricken and the text of S. 11 as amended and passed by the Senate be inserted in lieu thereof.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EASTLAND. Mr. President, I move that H.R. 7843, as amended, be given its third reading and passed by the Senate.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

Mr. JAVITS. Mr. President, may we know what this is about?

The PRESIDING OFFICER. The Senator from New York has requested an explanation of the nature of the bill.

Mr. JAVITS. I would like to know what it is.

The PRESIDING OFFICER. The clerk will state the bill by title.

The second assistant legislative clerk read as follows:

An act to provide for the appointment of additional district and circuit judges, and for other purposes.

Mr. JAVITS. Well, the purpose of the Senator then is not to pass the bill as amended?

Mr. EASTLAND. To amend the House bill and get to conference.

Mr. JAVITS. To appoint conferees, OK.

The PRESIDING OFFICER. Without objection, the bill as amended is passed.

Mr. EASTLAND. Mr. President, I move to reconsider the vote by which the bill was passed and move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. EASTLAND. Mr. President, I move that the Senate insist on its amendment, request a conference with the House of Representatives thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to, and the Presiding Officer (Mr. LEAHY) appointed Mr. EASTLAND, Mr. KENNEDY, Mr. BAYH, Mr. ROBERT C. BYRD, Mr. DECONCINI, Mr. THURMOND, Mr. SCOTT, and Mr. HATCH conferees on the part of the Senate.

NUCLEAR NONPROLIFERATION ACT OF 1978

The Senate continued with the consideration of S. 897.

Mr. BROOKE addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. BROOKE. Mr. President, I shall vote for this bill, but I do have a question I would like to propound to the distinguished floor managers of the bill and that has to do with the economic impact assessment.

I would like to ask the distinguished floor manager, what do the economic impact assessments indicate regarding the effects of this legislation on the U.S. balance of trade and the U.S. employment levels?

I think it would be useful to have an assessment for the present and the future projections.

Mr. GLENN. Mr. President, I am glad to respond to the question of the Senator from Massachusetts.

I think it would be well to note that last year there was only one nuclear reactor sold, in 1976 there was only one nuclear reactor sold by our American producers. There were only four sold by all producers worldwide.

Now, I think that by this bill simplify-

ing the procedures that potential buyers must go through and in providing an international nuclear fuel authority we can sell enriched fuel, along with other nations, and in providing for better control of our whole fuel cycle, goes a long way toward making the nuclear industry more acceptable with their products around the world.

While no one can give a precise answer at this point to the questions of the Senator from Massachusetts, I would anticipate that this would help our industry and not hurt it, because that means jobs in this country.

So the economic impact would be helpful to our industry in this country.

I cannot guarantee that will happen, obviously, but the GAO study will point out some of these things and I think might, perhaps, give a better answer.

I might add that all of this downturn in the American nuclear industry has certainly not been due just to the complexities of dealing with our Nation, because we have had a general worldwide recession in business and the cost of a nuclear generating plant of 1,000-megawatt capacity has gone steadily up and now stands somewhere around the $1.2 billion mark, a commitment nations must make on a long-term basis and a 7- to 10-year basis before the plant is actually built.

Those factors have also been responsible, I think, for a lot of the turndown in nuclear plant production business.

But I would anticipate with the simplification in this bill and the changes the distinguished Senator from Idaho (Mr. McCLURE) put on, that this helps our producers in this country be more competitive than they have been in the past.

Mr. BROOKE. I thank the distinguished floor manager.

Obviously, the producers in this country have suffered, our balance of trade has suffered, U.S. unemployment levels are extremely high. Of course, that has prompted me to propound this question to the Senator.

I would be pleased to have any response that the distinguished Senator from Idaho may have.

Mr. McCLURE. Mr. President, I thank the Senator for yielding, because I think it is premature to know. I think almost anything we would attempt to say is really conjectural, because the real key to the impact upon exports will be not in our judgment of what this bill does, but the judgment of people in other countries. We will have a good opportunity to test that when the Japanese are here, looking at future arrangements, sometime in April, as Ambassador Strauss has stressed. That may be as much as a $2 billion decision, and I think that how that comes out will be some indication of what we can expect.

I believe that the decision of both the Iranians and the Brazilians to seek suppliers in other countries than the United States has been directly attributable, at least in part, to uncertainty about U.S. policy. To the extent that this bill may make that policy more predictable, it should aid. To the extent that it makes the licensing required much more complex, it may detract.

I think the balance in those two things will be the questions that will be asked by foreign governments and by consumers in foreign countries, and their judgment is going to be the determination.

One thing further should be added: This bill will be discussed further in conference, and the Senator's question can better be addressed after we see what kind of action the conference takes between the House and Senate versions of this bill.

Mr. BROOKE. I thank the Senator from Idaho.

Obviously, we do not have a definitive answer to the question. However, as I understand the distinguished Senator from Ohio, it is his opinion that the bill will have a beneficial impact upon production in the United States.

It seems to me, from the response of the Senator from Idaho, that it could have an adverse impact upon the industry. I hope that an industry that already has suffered will not be affected adversely by the passage of this measure.

I thank the distinguished Senator.

UP AMENDMENT NO. 1211

Mr. GLENN. Mr. President, I send to the desk an amendment and ask for its immediate consideration. It will take just a couple of minutes. It has been agreed to on both sides of the aisle.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN) proposes an amendment, unprinted amendment numbered 1211:

On the amendment on page 118, line 23 after the word "days", delete the period at the end of the line and insert in lieu thereof: ": *Provided, however,* That if in the view of the President an emergency exists due to unforeseen circumstances requiring immediate entry into a subsequent arrangement, such period shall consist of 15 calendar days."

Mr. GLENN. Mr. President, I am submitting this amendment in response to a request from the administration. It provides for quick approval of certain subsequent arrangements when an emergency exists due to unforeseen circumstances.

It involves a situation we discussed with the Senator from Idaho earlier today, in which he had some concerns. In further talk with administration representatives today, they had similar concerns, and we decided to offer this amendment. I believe it has the support of the Senator from Idaho, and I suggest that we have a voice vote.

Mr. McCLURE. Mr. President, I was amazed earlier, when this matter came up, and the Senator was advising us that the administration had no objection to the change to 15 legislative days, because I anticipated that the State Department would raise the alarms which they apparently now have. I understand their concern. I understand the effort of the Senator from Ohio to respond to it.

I think the amendment is responsible, and it goes a long way to removing some of the doubts I had earlier when this matter was discussed.

I, too, support the amendment, and I suggest that it be adopted by voice vote.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. GLENN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CASE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PERCY. Mr. President, our vote tonight culminates several years of work on the part of many of my colleagues and outstanding work done by members of the staff on both sides.

Overwhelming passage of the nonproliferation bill will put the Senate firmly on record in support of a nuclear export policy that seeks to insure that atomic power is used for peaceful purposes. When the United States sells nuclear fuel abroad, we want to make sure that the fuel and the know-how needed to use it produce energy for peace, not for war.

The nuclear fuel we sell to other nations has the potential of being used to make nuclear bombs. Imagine the consequences of a world with a growing number of nations with the capacity to make nuclear war.

This bill will not impair the ability of the United States to be a reliable nuclear exporter. In fact, it will strengthen the reputation of the United States as a reliable supplier to all nations that adhere to reasonable and sensible guidelines and safeguards. But the rules and safeguards it sets down for nuclear exports will help check the spread of nuclear warmaking capability.

I have worked on this measure for 3 years, and I consider it to be one of the most important bills I have worked on since I came to the Senate, and I think other Senators share that feeling. I can think of nothing more important than a bill that makes our nuclear export policy sound and safe and helps to reduce the atmosphere of terror created by the spread of nuclear weapons.

Mr. GLENN. Mr. President, I associate myself with the remarks of the distinguished Senator from Illinois, who has worked long and hard on this bill. I think it has been 2½ years that we have seen this effort going forward. Senator RIBICOFF, Senator JAVITS, Senator PERCY, and I have played roles in this matter.

As we go down the road and see the spread of nuclear energy around the world, I hope this legislation will play a major role in making that safe and sane benefit spread around the world without the bombs that can go along with it.

Mr. SPARKMAN. Mr. President, in connection with Senate consideration of S. 897, I wish to draw to the attention of my fellow Senators a letter I received, as chairman of the Senate Foreign Relations Committee, from the Honorable Joseph M. Hendrie, Chairman of the Nuclear Regulatory Commission.

Commissioner Hendrie sent a very thoughtful letter in regard to the Commission's role in assessing international safeguards against diversion of nuclear

materials. The adequacy of safeguards is a matter of particular concern now, especially in light of a recent International Atomic Energy Agency report of deficiencies in international safeguards.

The Commissioner made this central point:

The Commission wishes to reiterate that it does not receive sufficient country-specific safeguards information to allow it to make an independent assessment of the adequacy or effectiveness of safeguards implementation in a country for which an export license is being requested. It, therefore, is faced with making such licensing decisions on the basis of other factors noted previously and its general view of safeguards. The Commission's staff has noted its inability on the basis of available information to provide such independent safeguards assessments and has asked for Commission guidance as to the course it should follow in these circumstances. This issue is now before the Commission and clearly encompasses the nature and extent of the independent judgment which the Commission should make with respect to the adequacy of international safeguards before concluding that issuance of a license will not be inimical to the common defense and security of the United States.

Mr. President, I ask unanimous consent that the full text of Mr. Hendrie's letter appear in the RECORD following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. SPARKMAN. The Department of State was asked to comment on Commissioner Hendrie's letter. I was particularly interested in whether further amendments to the legislation might be advisable. Assistant Secretary of State Douglas J. Bennet, Jr., replied this morning with the recommendation that no further legislative changes are necessary. He said in part:

A further statutory restriction of the NRC role with regard to assessment of the adequacy of international safeguards is not, in our view, necessary since the Executive Branch believes that the independent role of the NRC in the nuclear export licensing process should be maintained. Conversely, broadening the NRC role, for example, to require the NRC to make on-site inspections would seriously undermine the international safeguards inspection system provided by the IAEA and thus, the current basis for worldwide nuclear cooperation.

Mr. President, I ask unanimous consent that Mr. Bennet's letter also appear in the RECORD following my remarks, together with the attached letter to the Senator from Idaho (Mr. CHURCH) from Joseph S. Nye, Deputy to the Under Secretary of State.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. SPARKMAN. Mr. President, the bill has been amended to provide that this legislation does not judge this issue one way or the other. My personal belief is that any changes in procedures at this time, in regard to the way in which the United States determines the adequacy of safeguards, could serve to undermine the International Atomic Energy Agency. At the same time, however, I believe that it is crucially important that the United States join with other nations to bolster and currently informed of all matters of and compliance with safeguards by all nations. I hope that the executive branch will take particular care to cooperate with the Nuclear Regulatory Commission and to keep the Commission fully and currenly informed of all matters pertinent to the Commission's needs.

EXHIBIT 1

WASHINGTON, D.C.,
February 2, 1978.

Hon. JOHN J. SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: During the past few months, the Commission has been reexamining the role of its assessments of international safeguards against diversion of nuclear materials in our export licensing decisions, particularly in light of a report by the International Atomic Energy Agency (IAEA) stating that deficiencies exist in the implementation of international safeguards.[1] In this connection, staff papers forwarding major export applications for Commission review now note that the staff does not have country-specific information which would permit it to reach an independent conclusion as to the effectiveness of IAEA or EURATOM nuclear material control and accounting safeguards on a country-by-country basis.

While the Commission and other Executive Branch agencies do have knowledge of the overall IAEA safeguards program and some of its deficiencies, no U.S. Government agency, including NRC, has direct access to country-specific IAEA safeguards confidential information as a basis for independent evaluations of the effectiveness of IAEA safeguards implementation on a country-by-country basis. The staff has clearly advised the Commission that, in the absence of country-specific detailed information it is not able to provide such independent evaluations. In this regard, representatives of the Department of State have expressed the view that, for the U.S. Government, either through the Executive Branch or the NRC, to insist now on country-specific inspection reports from the IAEA or alternatively on U.S. on-site inspections would undermine the basic international consensus that has developed around the safeguards system administered by the IAEA. This issue also arose in connection with recent testimony on anti-terrorism legislation before the Senate Governmental Affairs Committee.

In keeping with the Commission's duty to keep your Committee fully and currently informed, the purpose of this letter is to advise you how these matters, in our view, currently relate to our export licensing responsibilities.

In the past, the Commission has relied heavily in its licensing approvals on the fact that the recipient country was committed to accept IAEA or EURATOM safeguards. Recently, however, the IAEA's Special Safeguards Implementation Report (SSIR)[2] indicated that a country's agreement to subject its nuclear activities to IAEA safeguards does not necessarily assure that adequate material control and accounting measures are applied in all cases. It is therefore possible that the NRC could approve the export of nuclear materials to countries in which the IAEA is having implementation problems without the NRC knowing it.

In conducting its assessment, the Commission solicits and carefully considers the views of the Executive Branch on certain matters. These have been detailed in previous statements to the Congress and in formal Commission export license opinions. In summary, they include the purpose of a proposed export, the applicability of an agreement for cooperation containing certain governmental assurances and conditions, the application of International Atomic Energy Agency safeguards, the position of a recipient country on nonproliferation and the development of nuclear explosives for any purpose, and other factors which bear on issuance of a proposed export license.

Another consideration in proposed exports of significant quantities of weapon-usable material, such as highly enriched uranium or plutonium, is the adequacy of a recipient country's physical security measures to protect against theft or sabotage by subnational groups. Conclusions regarding the adequacy of recipient countries' physical security programs are based in part on information obtained from visits by U.S. teams to review countries' overall programs and representative sites and from follow-on exchanges. These teams, comprised of Department of Energy and NRC representatives, conduct visits with the cooperation of recipient countries. It is important to note that the application of physical security against subnational threats is largely considered a sovereign police power and that the IAEA has not been accorded the responsibility in physical security matters that it has for international material control and accounting safeguards.

The IAEA does have, by longstanding international consensus and pursuant to the Nonproliferation Treaty, responsibility for establishing and implementing material control and accounting safeguards to detect and, thereby, to deter national diversion of significant quantities of nuclear material. An element in the IAEA system is the principle of confidentiality, under which certain information concerning safeguards implementation in any given country is not generally made available to other countries.[3] In connection with its safeguards responsibilities, the agency is required to report unremedied noncompliance or violations of safeguards agreements to its Board of Governors, on which the United States has a permanent seat. It should be noted that there have been no such reports.

Since the creation of the IAEA, the U.S. has strongly supported development of an effective IAEA system in order to achieve a uniformly applied international system

[1] "International safeguards" refers to the material control and accounting measures applied by the IAEA, and does not include physical security measures, such as guards and fencing, whereas "domestic safeguards" includes both.

[2] We understand that copies of this report have been provided to you by the Department of State on a confidential basis.

[3] For example, paragraph 5 of the IAEA Information Circular/153, entitled "The Structure and Content of Agreements between the Agency and States required in Connection with the Treaty on the Non-Proliferation of Nuclear Weapons," states that safeguards agreements "should provide that the Agency shall take every precaution to protect commercial and industrial secrets and other confidential information coming to its knowledge in the implementation of the Agreement. The Agency shall not publish or communicate to any State, organization or person any information obtained by it in connection with the implementation of the Agreement, except that specific information relating to such implementation in the State may be given to the Board of Governors and to such Agency staff members as require such knowledge by reason of their official duties in connection with safeguards, but only to the extent necessary for the Agency to fulfill its responsibilities in implementing the Agreement. Summarized information on *nuclear material* being safeguarded by the Agency under the Agreement may be published upon decision of the Board if the States directly concerned agree."

that can provide assurances about other countries' overall programs. IAEA safeguards represent a long-established and central feature of U.S. nuclear cooperation with foreign countries. Indeed, the nonproliferation legislation now pending before Congress would make the application of IAEA safeguards an immediately applicable export licensing criterion.

The application of safeguards is a fundamental requirement in U.S. nuclear export activities. Other factors and considerations are also taken into account. With respect to the assessment of risks of potential national diversions, for example, relevant information includes any evidence of past or prospective diversion of material by a proposed recipient country. In this regard, we have recently emphasized to the Executive Branch the importance of assuring that all relevant information is brought promptly to the Commission's attention.

The Commission continues to believe that the U.S. should make every reasonable effort to gain better and more timely information on overall international safeguards effectiveness and on any significant safeguards problems in countries receiving U.S. exports. As a related matter, the NRC has strongly supported efforts by the Executive Branch to secure better information from the IAEA on implementation and effectiveness of the overall IAEA safeguards system. This has included efforts to have the Agency report on a periodic basis to the IAEA Board of Governors on how well the Agency's safeguards are operating and to identify, without reference to specific countries, safeguards problems in sufficient detail to permit corrective actions. The issues and recommendations of the first such report, entitled, as noted above, the Special Safeguards Implementation Report (SSIR), were considered by the Board at its September 1977 meeting. The SSIR highlighted deficiencies in a number of countries, which were not identified, in the implementation of IAEA safeguards.

While recognizing the deficiencies, the IAEA Secretariat concluded that, for the period covered by the report, in none of the 41 States in which inspections were carried out was there any diversion of a significant quantity of IAEA safeguarded nuclear material and expressed confidence that in these States there was no diversion at all. The report notes that this conclusion is based on both quantitative analyses and elements of judgment. Although there will always be some room for subjective judgment in evaluating safeguards systems generally, the Commission believes that the effectiveness of the IAEA system can and should be strengthened to minimize the element of subjective judgment.

The Agency's critical review of its safeguards system represents a very significant step in the right direction. It highlights the need for an energetic and constructive program to strengthen IAEA safeguards and, in this regard, it is essential that actions the U.S. takes serve to encourage, and not to inhibit, further candid and critical evaluations by the Agency.

The NRC is also actively involved in several ongoing U.S. efforts to improve both the effectiveness of IAEA safeguards and our knowledge of them. These efforts include not only the U.S. technical support program, but also political support to ensure that the system keeps pace with expanding nuclear programs. We are also engaged in U.S. efforts to establish technical safeguards objectives and to develop internationally-agreed standards for State systems of material control and accountancy.

In this regard, the Commission has actively supported development of a comprehensive action plan, under the auspices of the Interagency Steering Group on International Safeguards, for upgrading international safeguards. By bringing together a variety of U.S. activities, the plan is being designed not only to address the deficiencies identified in the SSIR but also assure that the U.S. Government is informed of significant safeguards problems. The ability and time required to introduce certain improvements in safeguards performance are, of course, subjects of considerable uncertainty at this time. It will take time and difficult negotiations to achieve many of the objectives in the plan. In the meantime, we are discussing with the Department of State ways in which we might improve the exercise of our responsibilities.

The Commission wishes to reiterate that it does not receive sufficient country-specific safeguards information to allow it to make an independent assessment of the adequacy or effectiveness of safeguards implementation in a country for which an export license is being requested. It, therefore, is faced with making such licensing decisions on the basis of other factors noted previously and its general view of safeguards. The Commission's staff has noted its inability on the basis of available information to provide such independent safeguards assessments and has asked for Commission guidance as to the course it should follow in these circumstances. This issue is now before the Commission and clearly encompasses the nature and extent of the independent judgment which the Commission should make with respect to the adequacy of international safeguards before concluding that issuance of a license will not be inimical to the common defense and security of the United States.

We trust that this information, which has also been forwarded to other cognizant Congressional committees, will clarify the role of NRC in nuclear export deliberations. We are ready to amplify any of these matters with you or members of your staff at any time.

Sincerely,

JOSEPH M. HENDRIE,
Chairman.

EXHIBIT 2

WASHINGTON, D.C., *February 7, 1978.*

Hon. JOHN SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate.

DEAR MR. CHAIRMAN: In response to a request by your staff, we are pleased to convey our comments on a recent letter you received, dated February 2, from Joseph Hendrie, Chairman of the Nuclear Regulatory Commission, on the subject of international safeguards assessments. Specifically, the Committee staff wished to know whether, based on the information in the letter, the Executive Branch believes that further amendment of S. 897, the Nuclear Non-Proliferation Act, is needed.

As indicated in the Chairman's letter, the purpose of his communication is to ensure that the major Committees of the Congress concerned with US non-proliferation policy and nuclear export policy and those Committees responsible for oversight of the Commission's activity are fully aware of and are in agreement with the current basis upon which the Commission exercises its export licensing responsibilities with regard to international safeguards.

In commenting on this, we would first note that the Executive Branch has a responsibility to make a judgment on the adequacy of safeguards as part of its overall recommendation to the Commission on nuclear exports. In addition to this judgment, the recommendation by the Executive Branch necessarily takes into account the overall relationships between the US and the recipient state and the specific international and bilateral assurances provided by the recipient state to ensure further that US nuclear exports will not be used for military or nuclear explosive purposes. It is the position of the Executive Branch that a judgment as to the adequacy of safeguards implementation is part of the NRC's responsibility to make an overall determination as to whether US exports are inimical to the common defense and security of the US.

The current basis for this judgment, by both the Executive Branch and the NRC, is the information and assessments available to the Executive Branch. This includes information obtained through technical safeguards documents, reports by the Director General of the International Atomic Energy Agency (IAEA) to the Agency Board of Governors, and other country-specific information available to the Executive Branch in determining that a specific export will or will not be inimical to the national interest. This information has been and will continue to be made available to the NRC by the Executive Branch. We believe this is the proper basis for such judgments.

A further statutory restriction of the NRC role with regard to assessment of the adequacy of international safeguards is not, in our view, necessary since the Executive Branch believes that the independent role of the NRC in the nuclear export licensing process should be maintained. Conversely, broadening the NRC role, for example, to require the NRC to make on-site inspections would seriously undermine the international safeguards inspection system provided by the IAEA and thus, the current basis for worldwide nuclear cooperation. A detailed discussion of our concerns in this regard was provided in the February 4 letter from Joe Nye to Senator Church on this subject and is enclosed.

In view of the above, we strongly recommend that the current basis for independent NRC judgments be maintained. We do not believe that any legislative changes are necessary to further define the NRC role and would oppose any amendments that would attempt to further limit the role of the NRC or, alternatively, that would expand the role of the NRC.

We hope that these comments will be helpful to you in your consideration of S. 897.

The Office of Management and Budget advises that from the standpoint of the Administration's program, there is no objection to the submission of this report.

Sincerely,

DOUGLAS J. BENNET, Jr.,
Assistant Secretary for Congressional Relations.

Enclosure.

WASHINGTON, D.C.,
February 4, 1978.

Hon. FRANK CHURCH,
U.S. Senate.

DEAR SENATOR CHURCH: Thank you for your letter of January 30, regarding Commissioner Kennedy's concerns about the NRC's inability to assess independently the adequacy of IAEA safeguards.

While I share many of his concerns, I believe that the NRC, in exercising its statutory responsibilities to make assessments as to the inimicality of U.S. nuclear exports, has a responsibility to make an independent judgment as to the adequacy of safeguards implementation. This judgment, however, should be based primarily on information and assessments from the Executive Branch and should in no way undermine the role of IAEA.

The United States was the leading force behind the establishment of the IAEA as the international instrument for implementation of technical safeguards. We recognized that we needed a combination of political assurances and technical safeguards if we and other states were to be assured that peaceful nuclear cooperation would not lead to proliferation of nuclear weapons. At the same

time, we recognized that the on-site inspections required to implement technical safeguards could be interpreted by many states as an infringement of sovereignty if carried out by another state. For this reason, and because of the need to avoid a multiplicity of safeguards systems and to apply safeguards uniformly when other states entered the market as suppliers of nuclear fuel and technology, it was the judgment of the U.S. that the only viable long-term solution was for the IAEA to establish and administer safeguards. I believe that this judgment remains valid. The international community is now fundamentally committed, through the NPT and trilateral supply agreements, to IAEA safeguards, and the Agency has established a reputation for integrity and technical expertise.

Reliance on an international safeguards system does, of course, represent a trade-off. Instead of ascertaining for ourselves, through a direct bilateral approach, that technical safeguards are effectively applied, we must rely primarily on a multilateral mechanism, and we do not have direct access to the confidential information obtained by Agency inspectors. The Executive Branch and the NRC are, therefore, not able to obtain access on a country-by-country basis to the raw data on which the IAEA bases its safeguards conclusions. For the US Government, either through the Executive Branch or the NRC, to insist now on country-specific inspection reports from the Agency or alternatively on US on-site inspection would undermine the basic international consensus that has developed around the safeguards system administered by the IAEA. This would be inconsistent with the existing international framework. It is our judgment that the international safeguards system can best achieve our objective of deterring the diversion of nuclear material for non-peaceful purposes.

Having determined that US objectives can best be met through an international safeguards system, we have an obligation to ensure that this system is effective, and is improved and expanded to keep pace with technological developments and the growth of nuclear power. We must also rely upon the overall relationship between the US and recipient countries and the specific assurances they give us to further ensure that US nuclear exports will not be used for military and/or explosive purposes. The information obtained through technical safeguards documents, reports by the Director General to the Board, and through other information available to us is used by the Executive Branch in determining that a specific export will or will not be inimical to the national interest. Any information available to the Executive Branch that indicates that IAEA safeguards have been applied inadequately has been and will continue to be made available to the NRC and will be used in formulation of Executive Branch recommendations on export license approvals.

I do not share the view expressed by some that once we transfer US safeguards arrangements to the IAEA we relinquish any right to questions whether or not they satisfy US safeguards requirements or that the US is "blindly accepting" the adequacy of international safeguards. As noted above, besides the information made available formally by the IAEA, we have substantial data on which to judge whether diversion of material for non-peaceful purposes has occurred or is likely to occur. These assessments are not made on an ad hoc or intuitive basis.

The US has been and continues to be in the lead in promoting universal acceptance of IAEA safeguards and of improvements in the system. We have increased technical support for the Agency to a proposed $5 million in 1978. In addition, the US has played a lead role in pressing the IAEA to adopt tighter safeguards criteria, and the IAEA is in the process of adopting more stringent standards on taking physical inventories, accounting for material, and improved containment and surveillance procedures. In addition to establishing criteria against which effectiveness is to be judged, we need to assess the existing system againt these criteria. The Special Safeguards Implementation Report (SSIR) was prepared by the IAEA Secretariat with the strong support of the US and attempts to objectively assess the effectiveness of the existing system. The SSIR for the first time provides a basis upon which to identify practices needing correction and it offers an important opportunity for general improvement of the Agency safeguards system. As a parallel effort, the Executive Branch, with NRC participation, is now working on an action plan, the first stages of which are already being implemented, to help solve existing problems and to consolidate and coordinate US actions in support of effective IAEA safeguards. The main features of this action plan are:

To promote adequate and regularized information flow related to the application of Agency safeguards including more detailed technical information on the nature of deficiencies identified in the SSIR and on the status of corrective actions recommends in prior documents of the Board of Governors;

To provide US technical support to the Agency which includes improvements in equipment and techniques, safeguards research and development and inspector training;

To seek broad-based support among Agency members for specific goals for safeguards effectiveness and promote improvements in the effective application of Agency safeguards to meet these goals; and

To encourage and to provide technical assistance to the Agency and states to take necessary steps in order to correct deficiencies in state systems of accounting and control.

The Executive Branch does not propose to eliminate any NRC safeguards review as part of its overall inimicality determination or relegate the Commission to rubber-stamping license recommendations. Rather, I believe that, considering the above factors, the NRC can make a judgment on the adequacy of safeguards abroad based on information and assessment provided by the Executive Branch. On the other hand, as pointed out above, to carry this independent decision process too far e.g. to require bilateral on-site inspections) is not needed and, in my view, would seriously undermine the international safegards system.

I hope that these comments will be helpful to you in your consideration of S. 897.

Sincerely,

JOSEPH S. NYE,
Deputy to the Under Secretary.

Mr. THURMOND. Mr. President, on October 18, 1977, I wrote to Senator GLENN outlining concerns which I had with possible implications that sections 104, 105, 202, and 303(b)(3) of S. 897 might have for the Barnwell Nuclear Fuel Reprocessing Plant in South Carolina. His response to my concerns was satisfactory, and I ask unanimous consent that my letter and Senator GLENN's response to be included in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., October 18, 1977.

Senator JOHN GLENN,
Chairman, Subcommittee on Energy, Nuclear Proliferation Planning and Federal Services, Senate Committee on Governmental Affairs, Washington, D.C.

DEAR JOHN: I am writing to request that several outstanding issues relating to the implications that S. 897, the "Nuclear Non-Proliferation Act of 1977," and the impact take place under conditions that will ensure that passage of the Act might have on the Barnwell Nuclear Fuel Plant in South Carolina, be clarified in the Senate-House Conference Report on the respective non-proliferation bills. If this clarification is guaranteed with regard to Barnwell, I will withdraw my current hold on S. 897 for consideration by the full Senate.

The clarification I am seeking to the Foreign Relations Committee version of the bill is as follows:

First, Section 104 advocates international or multinational approaches for meeting future worldwide nuclear fuel needs. Under this Section, "the President is authorized and urged" to seek binding international undertakings providing for the establishment of an international nuclear fuel authority (INFA) for providing agreed upon fuel services. Nuclear fuel services is defined in the Committee Report on S. 897 to include enrichment, fuel fabrication and reprocessing. With this in mind, the Conference Report should stress that Section 104(a) provides for "devising feasible and environmentally sound approaches for the siting, development, and management under effective international auspices of facilities for the provision of nuclear fuel services and the storage of special nuclear material which is sensitive from the standpoint of preventing the proliferation of nuclear explosive devices."

This language is taken directly from Section 104(a) subsection (3) as reported out by the Energy and Natural Resources Committee. This language in the Conference Report would provide latitude for enrichment and reprocessing facilities if they are established and operated on an internationally acceptable and agreed-upon basis, such as regional fuel cycle centers.

Second, Section 105 calls for an international nuclear fuel cycle evaluation and, in the context of this evaluation, a re-evaluation of all aspects of the nuclear fuel cycle, with emphasis on alternatives to the separation of pure plutonium. The Conference Report should clarify that this study should also focus on such proliferation resistant variations of reprocessing as coprocessing and blending.

Third, Section 202 directs the Department of Energy and the Nuclear Regulatory Commission to establish and operate a safeguards and physical security training program available to other nations. The program would include advanced safeguards and physical security techniques and technology consistent with national security interests of the United States. The Conference Report should direct that consideration be given to use of existing domestic fuel cycle facilities for this purpose, such as the Barnwell Nuclear Fuel Plant, and recognize the fact that the International Atomic Energy Agency (IAEA) has expressed an interest in using the Barnwell Plant as a safeguards training center. It is contemplated that part of the FY '78 fuel cycle R&D programs at Barnwell will use the plant and staff to study such proliferation resistant measures as coprocessing and blending. Such measures may result in the establishment of a reprocessing procedure which would give the sort of "timely warning" discussed in Section 303. I understand that difficulty in quantifying "timely warning" has been one of the most serious deficiencies in drafting a meaningful non-proliferation policy.

Finally, Section 403(b)(1) calls for the President to take immediate and vigorous steps to seek international agreements whereby, among other things: "No source reprocessing in a facility 'which has not processed power reactor fuel assemblies or been the subject of a subsequent arrangement therefor prior to the date of enactment of this Act" unless he is satisfied that such reprocessing will not result in a significant increase in the risk of proliferation. Among other factors, "foremost consideration" is to be given to whether such reprocessing will

"timely warning". Depending upon the meaning given to the phrase "timely warning", if a foreign Country entering into any such subsequent arrangement with the United States should insist, as seems probable, on a reciprocal provision applicable to the United States, then the result of such provision might be to place a reprocessing monopoly in foreign hands to the exclusion of Barnwell or any other U.S. reprocessing facility. In this regard, while 303(b) (3) provides that the Secretary of Energy "shall attempt to ensure" that the conditions of 303 (b) (2) are more applicable to existing facilities, he is not required to do so. Section 303(b) (2) could thus prove to be a detrimental provision to the use of Barnwell by the U.S.

I request that the Conference Report clarify the intent of this Section to prevent the prospect of a foreign reprocessing monopoly and prevent the adoption of a provision that could foreclose the future use of the Barnwell facility as a means of strengthening our non-proliferation policies.
